I HAVE now deduced from Trajan to Con-
stantine, from Constantine to Heraclius, the 
regular series of the Roman emperors; and 
faithfully exposed the prosperous and adverse 
fortunes of their reigns. Five centuries of the 
decline and fall of the empire have already elap-
seed; but a period of more than eight hundred 
years still separates me from the term of my la-
bours, the taking of Constantinople by the

The Decline and Fall

Chap. Turks. Should I persevere in the same course, should I observe the same measure, a prolix and slender thread would be spun through many a volume, nor would the patient reader find an adequate reward of instruction or amusement. At every step, as we sink deeper in the decline and fall of the Eastern empire, the annals of each succeeding reign would impose a more ungrateful and melancholy task. These annals must continue to repeat a tedious and uniform tale of weakness and misery; the natural connection of causes and events would be broken by frequent and hasty transitions, and a minute accumulation of circumstances must destroy the light and effect of those general pictures which compose the use and ornament of a remote history. From the time of Heraclius, the Byzantine theatre is contracted and darkened; the line of empire, which had been defined by the laws of Justinian and the arms of Belisarius, recesses on all sides from our view; the Roman name, the proper subject of our enquiries, is reduced to a narrow corner of Europe, to the lonely suburbs of Constantinople; and the fate of the Greek empire has been compared to that of the Rhine, which loses itself in the lands, before its waters can mingle with the ocean. The scale of dominion is diminished to our view by the distance of time and place; nor is the loss of external splendour compensated by the nobler gifts of virtue and genius. In the last moments of her decay, Constantinople was doubtless more opulent and populous than Athens at her most flourishing era, when a scanty sum of six thousand talents, or twelve hundred thousand pounds sterling, was possessed by twenty-one thousand male citizens of an adult age. But each of these citizens was a freeman, who dared to assert the liberty of his thoughts, words, and actions; whole

whose person and property were guarded by equal law; and who exercised his independent vote in the government of the republic. Their numbers seem to be multiplied by the strong and various discriminations of character: under the shield of freedom, on the wings of emulation and vanity, each Athenian aspired to the level of the national dignity: from this commanding eminence, some chosen spirits soared beyond the reach of a vulgar eye; and the chances of superior merit in a great and populous kingdom, as they are proved by experience, would excuse the computation of imaginary millions. The territories of Athens, Sparta, and their allies, do not exceed a moderate province of France or England; but after the trophies of Salamis and Platæa, they expand in our fancy to the gigantic size of Asia, which had been trampled under the feet of the victorious Greeks. But the subjects of the Byzantine empire, who assume and dishonour the names both of Greeks and Romans, present a dead uniformity of abject vices, which are neither softened by the weaknesses of humanity, nor animated by the vigour of memorable crimes. The freemen of antiquity might repeat with generous enthusiasm the sentence of Homer, "that on the first day of his servitude, the captive is deprived of one half of his manly virtue." But the poet had only seen the effects of civil or domestic slavery, nor could he foretell that the second moiety of manhood must be annihilated by the spiritual despotism, which shackles, not only the actions, but even the thoughts of the prostrate votary. By this double yoke, the Greeks were oppressed under the successors of Herachus; the tyrant, a law of eternal justice, was degraded by the vices of his subjects; and on the throne, in the camp, in the schools, we search, perhaps, with fruitless diligence,

gence, the names and characters that may de-
serve to be rescued from oblivion. Nor are the
defects of the subject compensated by the skill
and variety of the painters. Of a space of eight
hundred years, the four first centuries are over-
spread with a cloud interrupted by some faint
and broken rays of historic light: in the lives of
the emperors, from Maurice to Alexius, Basil
the Macedonian has alone been the theme of a
separate work; and the absence, or loss, or im-
perfection of contemporary evidence, must be
poorly supplied by the doubtful authority of more
recent compilers. The four last centuries are
exempt from the reproach of penury: and with
the Comnenian family, the historic muse of Con-
fstantinople again revives, but her apparel is
gaudy, her motions are without elegance or
grace. A succession of priests, or courtiers,
treads in each other's footsteps in the same path
of servitude and superstition: their views are
narrow, their judgment is feeble or corrupt;
and we close the volume of copious barrenness,
still ignorant of the causes of events, the char-
acters of the actors, and the manners of the
times, which they celebrate or deplore. The
observation which has been applied to a man,
may be extended to a whole people, that the
energy of the sword is communicated to the pen;
and it will be found by experience, that the
tone of history will rise or fall with the spirit of
the age.

From these considerations, I should have aban-
donned without regret the Greek slaves and their
servile historians, had I not reflected that the
fate of the Byzantine monarchy is passively con-
ected with the most splendid and important re-
volutions which have changed the state of the
world. The space of the lost provinces was im-
mediately replenished with new colonies and ri-

OF THE ROMAN EMPIRE.

Sing kingdoms: the active virtues of peace and was deserted from the vanquished to the victorious nations; and it is in their origin and conquests, in their religion and government, that we must explore the causes and effects of the decline and fall of the Eastern empire. Nor will this scope of narrative; the riches and variety of these materials, be incompatible with the unity of design and composition. As, in his daily prayers, the Mussulman of Fez or Delhi still turns his face towards the temple of Mecca, the historian's eye shall be always fixed on the city of Constantinople. The excursive line may embrace the wilds of Arabia and Tartary, but the circle will be ultimately reduced to the decreasing limit of the Roman monarchy.

On this principle, I shall now establish the plan of the four last volumes of the present work. The first chapter will contain, in a regular series, the emperors who reigned at Constantinople during a period of six hundred years, from the days of Heraclius to the Latin conquest: a rapid abstract, which may be supported by a general appeal to the order and text of the original historians. In this introduction, I shall confine myself to the revolutions of the throne, the succession of families, the personal characters of the Greek princes, the mode of their life and death, the maxims and influence of their domestic government, and the tendency of their reign to accelerate or suspend the downfall of the Eastern empire. Such a chronological review will serve to illustrate the various argument of the subsequent chapters; and each circumstance of the eventful story of the Barbarians will adapt itself in a proper place to the Byzantine annals. The internal state of the empire, and the dangerous heresy of the Paulicians, which shook the East and enlightened the West, will be the subject of two
two separate chapters; but these enquiries must be postponed till our farther progress shall have opened the view of the world in the ninth and tenth centuries of the Christian era. After this foundation of Byzantine history, the following nations will pass before our eyes, and each will occupy the space to which it may be entitled by greatness or merit, or the degree of connection with the Roman world and the present age.

I. The Franks; a general appellation which includes all the Barbarians of France, Italy, and Germany, who were united by the sword and sceptre of Charlemagne. The persecution of images and their votaries, separated Rome and Italy from the Byzantine throne, and prepared the restoration of the Roman empire in the West.

II. The Arabs or Saracens. Three ample chapters will be devoted to this curious and interesting object. In the first, after a picture of the country and its inhabitants, I shall investigate the character of Mahomet, the character, religion, and success of the prophet. In the second I shall lead the Arabs to the conquest of Syria, Egypt, and Africa, the provinces of the Roman empire; nor can I check their victorious career till they have overthrown the monarchies of Persia and Spain. In the third I shall enquire how Constantinople and Europe were favored by the luxury and arts, the division, and decay of the empire of the caliphs. A single chapter will include:

III. The Bulgarians, IV. Hungarians, and V. Russians, who assaulted by sea or by land the provinces and the capital; but the last of these, so important in their present greatness, will excite some curiosity in their origin and infancy.

VI. The Nomads; or rather the private adventurers of that a-like people, who founded a powerful kingdom in Apulia and Sicily, shook the throne of Constantinople,

Chap. XLVIII.

Stantinople, displayed the trophies of chivalry, and almost realized the wonders of romance.

VII. The Latins; the subjects of the pope, the nations of the West, who enlisted under the banner of the cross for the recovery or relief of the holy sepulchre. The Greek emperors were terrified and preferred by the myriads of pilgrims who marched to Jerusalem with Godfrey of Bouillon and the peers of Christendom. The second and third crusades trod in the footsteps of the first: Asia and Europe were mingled in a sacred war of two hundred years; and the Christian powers were bravely refitted, and finally expelled, by Saladin and the Mamalukes of Egypt. In those memorable crusades, a fleet and army of French and Venetians were diverted from Syria to the Thracian Bosporus: they assaulted the capital, they subverted the Greek monarchy: and a dynasty of Latin princes was seated near three-score years on the throne of Constantine.

VIII. The Greeks themselves, during this period of captivity and exile, must be considered as a foreign nation; the enemies, and again the sovereigns, of Constantinople. Misfortune had rekindled a spark of national virtue; and the Imperial furies may be continued with some dignity from their restoration to the Turkish conquest.

IX. The Moguls and Tartars. By the arms of Zingis and his descendents, the globe was shaken from China to Poland and Greece: the sultans were overthrown: the caliphs fell, and the Caesars trembled on their throne. The victories of Timour suspended above fifty years the final ruin of the Byzantine empire.

X. I have already noticed the first appearance of the Turks, and the names of the fathers, of Seljuk and Othman, discriminate the two successive dynasties of the nation, which emerged in the eleventh century from the Scythian wilderness. The former established a potent
THE DECLINE AND FALL

CHAP. potent and splendid kingdom from the banks of the Oxus to Antioch and Nice; and the first crusade was provoked by the violation of Jerusalem and the danger of Constantinople. From an humble origin, the Ottomans arose, the scourge and terror of Christendom. Constantinople was besieged and taken by Mahomet II. and his triumph annihilates the remnant, the image, the title, of the Roman empire in the East. The schism of the Greeks will be connected with their last calamities, and the restoration of learning in the Western world. I shall return from the captivity of the new, to the ruins of ancient Rome: and the venerable name, the interesting theme, will shed a ray of glory on the conclusion of my labours.

Second marriage and death of Heraclius.

THE emperor Heraclius had punished a tyrant and ascended his throne; and the memory of his reign is perpetuated by the transient conquest, and irreparable loss, of the Eastern provinces. After the death of Eudocia, his first wife, he disobeyed the patriarch, and violated the laws, by his second marriage with his niece Martina; and the superstition of the Greeks beheld the judgment of heaven in the diseases of the father and the deformity of his offspring. But the opinion of an illegitimate birth is sufficient to distract the choice, and loosen the obedience of the people: the ambition of Martina was quickened by maternal love, and perhaps by the envy of a stepmother; and the aged husband was too feeble to withstand the arts of conjugal allurements. Constantine, his eldest son, enjoyed in a mature age the title of Augustus; but the weakness of his constitution required a colleague and
and a guardian, and he yielded with secret reluctancte to the partition of the empire. The XLVIII.

senate was summoned to the palace to ratify or attest the association of Heracleonas, the son of July 4.

Martina; the imposition of the diadem was consecrated by the prayer and blessing of the patriarch; the senators and patricians adored the majesty of the great emperor and the partners of his reign; and as soon as the doors were thrown open, they were hailed by the tumultuary but important voice of the soldiers. After an interval of five months, the pompous ceremonies which formed the essence of the Byzantine state were celebrated in the cathedral and the hippodrome; the concord of the royal brothers was affectedly displayed by the younger leaning on the arm of the elder; and the name of Martina was mingled in the reluctant or venal acclamations of the people. Heraclius survived this association about two years; his last testament declared his two sons the equal heirs of the Eastern empire, and commanded them to honour his widow Martina as their mother and their sovereign.

When Martina first appeared on the throne with the name and attributes of royalty, she was checked by a firm, though respectful, opposition; and the dying embers of freedom were kindled by the breath of superstitious prejudice. "We reverence," exclaimed the voice of a citizen, "we reverence the mother of our princes; but to those princes alone our obedience is due; and Constantine, the elder emperor, is of an age to sustain, in his own hands, the weight of the sceptre, Your sex is excluded by nature from the toils of government. How could you combat, how could you answer, the Bar- barians, who, with hostile or friendly intentions, may approach the royal city? May heaven
heaven avert from the Roman republic this national disgrace, which would provoke the "patience of the slaves of Persia." Martina descended from the throne with indignation, and sought a refuge in the female apartment of the palace. The reign of Constantine the third lasted only one hundred and three days: he expired in the thirtieth year of his age, and, although his life had been a long malady, a belief was entertained that poison had been the means, and his cruel step-mother the author, of his untimely fate. Martina reaped indeed the harvest of his death, and assumed the government in the name of the surviving emperor; but the incestuous widow of Heraclius was universally abhorred; the jealousy of the people was awakened, and the two orphans whom Constantine had left, became the objects of the public care. It was in vain that the son of Martina, who was no more than fifteen years of age, was taught to declare himself the guardian of his nephews, one of whom he had presented at the baptismal font: it was in vain that he swore on the wood of the true cross, to defend them against all their enemies. On his death-bed, the late emperor had dispatched a trusty servant to arm the troops and provinces of the East in the defence of his helpless children: the eloquence and liberality of Valentini had been successful, and from his camp of Chalcedon, he boldly demanded the punishment of the assassins, and the restoration of the lawful heir. The licence of the soldiers who devoured the grapes and drank the wine of their Asiatic vineyards, provoked the citizens of Constantinople against the domestic authors of their calamities, and the dome of St. Sophia re-echoed, not with prayers and hymns, but with the clamours and imprecations of an enraged multitude. At their imperious command, Heracleonas
racleonas appeared in the pulpit with the eldest of the royal orphans; Constans alone was saluted as emperor of the Romans, and a crown of gold, which had been taken from the tomb of Heraclius, was placed on his head, with the solemn benediction of the patriarch. But in the tumult of joy and indignation, the church was pillaged, the sanctuary was polluted by a promiscuous crowd of Jews and Barbarians; and the Monothelite Pyrrhus, a creature of the empress, after dropping a protestation on the altar, escaped by a prudent flight from the zeal of the Catholics. A more serious and bloody task was reserved for the senate, who derived a temporary strength from the consent of the soldiers and people. The spirit of Roman freedom revived the ancient and awful examples of the judgment of tyrants, and the Imperial culprits were deposed and condemned as the authors of the death of Constantine. But the severity of the conscript fathers was stayed by the indiscriminate punishment of the innocent and the guilty: Martina and Hacroleonas were sentenced to the amputation, the former of her tongue, the latter of his nose; and after this cruel execution, they consumed the remainder of their days in exile and oblivion. The Greeks who were capable of reflection might find some consolation for their servitude, by observing the abuse of power when it was lodged for a moment in the hands of an aristocracy.

We shall imagine ourselves transported five hundred years backwards to the age of the Antonines, if we listen to the oration which Constans II. pronounced in the twelfth year of his age before the Byzantine senate. After returning his thanks for the just punishment of the assassins who had intercepted the fairest hopes of his father’s reign, “By the divine providence,” said
THE DECLINE AND FALL

CHAP. said the young emperor, "and by your righteous decree, Martina and her incestuous progeny have been cast headlong from the throne. Your majesty and wisdom have prevented the Roman state from degenerating into lawless tyranny. I therefore exhort and beseech you to stand forth as the counsellors and judges of the common safety." The senators were gratified by the respectful address and liberal donation of their sovereign; but these servile Greeks were unworthy and regardless of freedom; and in his mind, the lesson of an hour was quickly erased by the prejudices of the age and the habits of despotism. He retained only a jealous fear lest the senate or people should one day invade the right of primogeniture, and seat his brother Theodosius on an equal throne. By the imposition of holy orders, the grandson of Heracious was disqualified for the purple; but this ceremony, which seemed to profane the sacraments of the church, was insufficient to appease the suspicions of the tyrant, and the death of the deacon Theodosius could alone expiate the crime of his royal birth. His murder was avenged by the imprecations of the people, and the assassin, in the fulness of power, was driven from his capital into voluntary and perpetual exile. Constans embarked for Greece; and, as if he meant to retort the abhorrence which he deserved, he is said, from the Imperial galley, to have spit against the walls of his native city. After passing the winter at Athens, he failed to Tarentum in Italy, visited Rome, and concluded a long pilgrimage of disgrace and sacrilegious rapine, by fixing his residence at Syracuse. But if Constans could fly from his people, he could not fly from himself. The remorse of his conscience created a phantom who pursued him by land and sea, by day and by night; and the visionary Theodosius,
Theodosius, presenting to his lips a cup of blood, said, or seemed to say, "Drink, brother, drink;" a sure emblem of the aggravation of his guilt, since he had received from the hands of the deacon the mystic cup of the blood of Christ. Odious to himself and to mankind, Constans perished by domestic, perhaps by episcopal, treason, in the capital of Sicily. A servant who waited in the bath, after pouring warm water on his head, struck him violently with the vae. He fell, stunned by the blow, and suffocated by the water; and his attendants, who wondered at the tedious delay, beheld with indifference the corpse of their lifeless emperor. The troops of Sicily invested with the purple an obscure youth, whose inimitable beauty eluded, and it might easily elude, the declining art of the painters and sculptors of the age.

Constans had left in the Byzantine palace three sons, the eldest of whom had been clothed in his infancy with the purple. When the father summoned them to attend his person in Sicily, these precious hostages were detained by the Greeks, and a firm refusal informed him that they were the children of the state. The news of his murder was conveyed with almost supernatural speed from Syracuse to Constantinople; and Constantine, the eldest of his sons, inherited his throne without being the heir of the public hatred. His subjects contributed, with zeal and alacrity, to chastise the guilt and presumption of a province which had usurped the rights of the senate and people; the young emperor sailed from the Hellespont with a powerful fleet; and the legions of Rome and Carthage were assembled under his standard in the harbour of Syracuse. The defeat of the Sicilian tyrant was easy, his punishment just, and his beauteous head was exposed in the hippodrome: but I cannot

XLVIII. among a crowd of victims, condemned the son
of a patrician, for deploring with some bitterness the execution of a virtuous father. The youth was castrated: he survived the operation, and the memory of this indecent cruelty is preserved by the elevation of Germanus to the rank of a patriarch and saint. After pouring this bloody libation on his father's tomb, Constantine returned to his capital, and the growth of his young beard during the Sicilian voyage, was announced by the familiar surname of Pogonatus, to the Grecian world. But his reign, like that of his predecessor, was stained with fraternal discord. On his two brothers, Heraclius and Tiberius, he had bestowed the title of Augustus: an empty title, for they continued to languish without trust or power in the solitude of the palace. At their secret instigation, the troops of the Anatolian theme or province approached the city on the Asiatic side, demanded for the royal brothers, the partition or exercise of sovereignty, and supported their seditious claim by a theological argument. They were Christians (they cried), and orthodox Catholics, the sincere votaries of the holy and undivided Trinity. Since there are three equal persons in heaven, it is reasonable there should be three equal persons upon earth. The emperor invited these learned divines to a friendly conference; in which they might propound their arguments to the senate: they obeyed the summons, but the prospect of their bodies hanging on the gibbet in the suburb of Galata, reconciled their companions to the unity of the reign of Constantine. He pardoned his brothers, and their names were still pronounced in the public acclamations; but on the repetition of suspicion of a similar offence, the obnoxious princes were deprived of their titles and

and noses, in the presence of the Catholic bishops who were assembled at Constantinople in the sixth general synod. In the close of his life, Pogonatus was anxious only to establish the right of primogeniture: the hair of his two sons, Justinian and Heraclius, was offered on the shrine of St. Peter, as a symbol of their spiritual adoption by the pope; but the elder was alone exalted to the rank of Augustus and the assurance of the empire.

After the decease of his father, the inheritance of the Roman world devolved to Justinian II.; and the name of a triumphant lawgiver was dishonoured by the vices of a boy, who imitated his namesake only in the expensive luxury of building. His passions were strong; his understanding was feeble; and he was intoxicated with a foolish pride, that his birth had given him the command of millions, of whom the smallest community would not have chosen him for their local magistrate. His favourite ministers were two beings the least susceptible of human sympathy, an eunuch and a monk: to the one he abandoned the palace, to the other the finances; the former corrected the emperor's mother with a scourge, the latter suspended the insolvent tributaries, with their heads downwards, over a slow and smoky fire. Since the days of Commodus and Caracalla, the cruelty of the Roman princes had most commonly been the effect of their fear; but Justinian, who possessed some vigour of character, enjoyed the sufferings, and braved the revenge, of his subjects about ten years, till the measure was full, of his crimes and of their patience. In a dark dungeon, Leontius, a general of reputation, had groaned above three years, with some of the noblest and most deserving of the patricians: he was suddenly drawn forth to assume the govern-
ment of Greece; and this promotion of an in- 
jured man was a mark of the contempt rather 
than of the confidence of his prince. As he 
was followed to the port by the kind offices of 
his friends, Leontius observed with a sigh that 
he was a victim adorned for sacrifice, and that 
inevitable death would pursue his footsteps. 
They ventured to reply, that glory and empire 
might be the recompense of a generous resolu-
tion; that every order of men abhorred the reign 
of a monster; and that the bands of two hun-
dred thousand patriots expected only the voice, 
of a leader. The night was chosen for their 
deliverance; and in the first effort of the con-
spirators, the praetor was slain, and the prisons 
were forced open: the emissaries of Leontius 
proclaimed in every street, "Christians to St. 
Sophia;" and the reasonable text of the patri-
arch, "this is the day of the Lord!" was the 
prelude of an inflammatory sermon. From the 
church the people adjourned to the hippodrome: 
Justinian, in whose cause not a sword had been 
drawn, was dragged before these tumultuary 
judges, and their clamours demanded the instant 
death of the tyrant. But Leontius, who was 
already cloathed with the purple, cast an eye of 
pity on the prostrate son of his own benefactor 
and of so many emperors. The life of Justin-
ian was spared; the amputation of his nose, per-
haps of his tongue, was imperfectly performed: 
the happy flexibility of the Greek language 
could impose the name of Rhinotmetus; and the 
mutilated tyrant was banished to Chersonæ 
in Crim-Tartary, a lonely settlement, where 
corn, wine, and oil, were imported as foreign 
luxuries.

His exile, 
A. D. 
695—705.

On the edge of the Scythian wilderness, Juf-
tinian still cherished the pride of his birth and 
the hope of his restoration. After three years, 
exile,
exile, he received the pleasing intelligence that his injury was avenged by a second revolution, and that Leontius in his turn had been dethroned and mutilated by the rebel Apismar, who assumed the more respectable name of Tiberius. But the claim of lineal succession was still formidable to a plebeian usurper; and his jealousy was stimulated by the complaints and charges of the Cherisonites, who beheld the vices of the tyrant in the spirit of the exile. With a band of followers, attached to his person by common hope or common despair, Justinian fled from the inhospitable shore to the herd of the Chozars, who pitched their tents between the Tanais and Borysthenes. The khan entertained with pity and respect the royal supplicant: Phanagoria, once an opulent city, on the Asiatic side of the lake Moesitis, was assigned for his residence; and every Roman prejudice was stifled in his marriage with the sister of the Barbarian, who seems, however, from the name of Theodora, to have received the sacrament of baptism. But the faithless Chozar was soon tempted by the gold of Constantinople; and had not the design been revealed by the conjugal love of Theodora, her husband must have been assassinated, or betrayed into the power of his enemies. After strangling, with his own hands, the two emissaries of the khan, Justinian sent back his wife to her brother, and embarked on the Euxine in search of new and more faithful allies. His vessel was assaulted by a violent tempest; and one of his pious companions advised him to deserve the mercy of God by a vow of general forgivenes, if he should be restored to the throne. "Of forgivenes?" replied the intrepid tyrant: "may I perish this instant—may the Almighty whelm me in the waves—if I consent to spare a single head of my enemies!" He survived this im-
pious menace, failed into the mouth of the Danube, trusted his person in the royal village of the Bulgarians, and purchased the aid of Terbelis, a Pagan conqueror, by the promise of his daughter and a fair partition of the treasures of the empire. The Bulgarian kingdom extended to the confines of Thrace; and the two princes besieged Constantinople at the head of fifteen thousand horse. Apsimar was dismayed by the sudden and hostile apparition of his rival, whose head had been promised by the Chozar, and of whose evasion he was yet ignorant. After an absence of ten years, the crimes of Justinian were faintly remembered, and the birth and misfortunes of their hereditary sovereign excited the pity of the multitude, ever discontented with the ruling powers; and by the active diligence of his adherents he was introduced into the city and palace of Constantine.

In rewarding his allies and recalling his wife, Justinian displayed some sense of honour and gratitude; and Terbelis retired, after sweeping away an heap of gold coin, which he measured with his Scythian whip. But never was vow more religiously performed than the sacred oath of revenge which he had sworn amidst the storms of the Euxine. The two usurpers, for I must refer the name of tyrant for the conqueror, were dragged into the hippodrome, the one from his prison, the other from his palace. Before their execution, Leontius and Apsimar were cast prostrate in chains beneath the throne of the emperor; and Justinian, planting a foot on each of their necks, contemplated above an hour the chariot-race, while the inconstant people shouted; in the words of the Psalmist, "Thou shalt trample on the asp and basilisk, and on the lion and dragon shalt thou set thy foot!" The universal defection which he had once experienced...
enced might provoke him to repeat the stroke of Caligula, that the Roman people had but one head. Yet I shall presume to observe, that such a stroke is unworthy of an ingenious tyrant, since his revenge and cruelty would have been extinguished by a single blow, instead of the cruel variety of tortures which Justinian inflicted on the victims of his anger. His pleasures were inexhaustible: neither private virtue nor public service could expiate the guilt of active, or even passive, obedience to an established government; and during the six years of his new reign, he considered the axe, the cord, and the rack, as the only instruments of royalty. But his most implacable hatred was pointed against the Chersonites, who had insulted his exile and violated the laws of hospitality. Their remote situation afforded some means of defence, or at least of escape; and a grievous tax was imposed on Constantinople, to supply the preparations of a fleet and army: "All are guilty, and all must pay," was the mandate of Justinian; and the bloody execution was entrusted to his favourite Stephen, who was recommended by the epithet of the savage. Yet even the savage Stephen imperfectly accomplished the intentions of his sovereign. The slowness of his attack allowed the greater part of the inhabitants to withdraw into the country; and the minister of vengeance contented himself with reducing the youth of both sexes to a state of servitude, with roasting alive seven of the principal citizens, with drowning twenty in the sea, and with reserving forty-two in chains to receive their doom from the mouth of the emperor. In their return, the fleet was driven on the rocky shores of Anatolia; and Justinian applauded the obedience of the Euxine, which had involved to many thousands of his subjects and enemies in a common shipwreck:

shipwreck; but the tyrant was still insatiate of blood; and a second expedition was commanded to extirpate the remains of the proscribed colony. In the short interval, the Chersonites had returned to their city, and were prepared to die in arms; the khan of the Chozars had renounced the cause of his odious brother; the exiles of every province were assembled in Tauris; and Bardanes, under the name of Philippicus, was invested with the purple. The Imperial troops, unwilling and unable to perpetrate the revenge of Justinian, escaped his displeasure by abjuring his allegiance; the fleet, under their new sovereign, steered back a more auspicious course to the harbours of Sinope and Constantinople; and every tongue was prompt to pronounce, every hand to execute, the death of the tyrant. Destitute of friends, he was deserted by his Barbarian guards; and the stroke of the assassin was praised as an act of patriotism and Roman virtue. His son Tiberius had taken refuge in a church; his aged grandmother guarded the door; and the innocent youth, suspending round his neck the most formidable relics, embraced with one hand the altar, with the other the wood of the true cross. But the popular fury that dares to trample on superstition, is deaf to the cries of humanity; and the race of Heraclius was extinguished after a reign of one hundred years.

Between the fall of the Heraclian and the rise of the Isaurian dynasty, a short interval of six years is divided into three reigns. Bardanes, or Philippicus, was hailed at Constantinople as an hero who had delivered his country from a tyrant; and he might taste some moments of happiness in the first transports of sincere and universal joy. Justinian had left behind him an ample treasure, the fruit of cruelty and rapine: but this useful fund was soon and idly dissipated by his
his successor. On the festival of his birth-day, Philippicus entertained the multitude with the games of the hippodrome; from thence he paraded through the streets with a thousand banners and a thousand trumpets; refreshed himself in the baths of Zeuxippus, and, returning to the palace, entertained his nobles with a sumptuous banquet. At the meridian hour he withdrew to his chamber, intoxicated with flattery and wine, and forgetful that his example had made every subject ambitious, and that every ambitious subject was his secret enemy. Some bold conspirators introduced themselves in the disorder of the feast; and the slumbering monarch was surprised, bound, blinded, and deposed, before he was sensible of his danger. Yet the traitors were deprived of their reward; and the free voice of the Senate and people promoted Artemius from the office of secretary to that of emperor: he assumed the title of Anastasius the second, and displayed in a short and troubled reign the virtues both of peace and war. But, after the extinction of the imperial line, the rule of obedience was violated, and every change diffused the seeds of new revolutions. In a mutiny of the fleet, an obscure and reluctant officer of the revenue was forcibly invested with the purple: after some months of a naval war, Anastasius renounced the sceptre; and the conqueror, Theodosius the third, submitted in his turn to the superior ascendant of Leo, the general and emperor of the Oriental troops. His two predecessors were permitted to embrace the ecclesiastical profession: the restful impatience of Anastasius tempted him to risk and to lose his life in a treasonable enterprise; but the last days of Theodosius were honourable and secure. The single sublime word "HEALTH," which he inscribed on his tomb, expresses the confidence of philosophy or religion; and the fame

Fame of his miracles was long preferred among the people of Ephesus. This convenient shelter of the church might sometimes impose a lesson of clemency; but it may be questioned whether it is for the public interest to diminish the perils of unsuccessful ambition.

Leo III. the Ilaurian, A. D. 718, March 25.

I have dwelt on the fall of a tyrant; I shall briefly represent the founder of a new dynasty, who is known to posterity by the invectives of his enemies, and whose public and private life is involved in the ecclesiastical story of the Iconoclasts. Yet in spite of the clamours of superstition, a favourable prejudice for the character of Leo the Ilaurian, may be reasonably drawn from the obscurity of his birth, and the duration of his reign.—I. In an age of manly spirit, the prospect of an Imperial reward would have kindled every energy of the mind, and produced a crowd of competitors as deserving as they were defirous to reign. Even in the corruption and debility of the modern Greeks, the elevation of a plebeian from the last to the first rank of society, supposes some qualifications above the level of the multitude. He would probably be ignorant and disdainful of speculative science; and in the pursuit of fortune, he might absolve himself from the obligations of benevolence and justice; but to his character we may ascribe the useful virtues of prudence and fortitude, the knowledge of mankind, and the important art of gaining their confidence and directing their passions. It is agreed that Leo was a native of Ilauria, and that Conon was his primitive name. The writers, whose awkward satire is praise, describe him as an itinerant pedlar who drove an ass with some paltry merchandise to the country fairs; and foolishly relate that he met on the road some Jewish fortune-tellers, who promised him the Roman empire, on condition that he
he should abolish the worship of idols. A more probable account relates the migration of his father from Asia Minor to Thrace, where he exercised the lucrative trade of a grazier; and he must have acquired considerable wealth, since the first introduction of his son was procured by a supply of five hundred sheep to the Imperial camp. His first service was in the guards of Justinian, where he soon attracted the notice, and by degrees the jealousy, of the tyrant. His valour and dexterity were conspicuous in the Colchian war: from Anastasius he received the command of the Anatolian legions, and by the suffrage of the soldiers he was raised to the empire with the general applause of the Roman world.—II. In this dangerous elevation, Leo the third supported himself against the envy of his equals, the discontent of a powerful faction, and the assaults of his foreign and domestic enemies. The Catholicons, who accuse his religious innovations, are obliged to confess that they were undertaken with temper and conducted with firmness. Their silence respects the wisdom of his administration and the purity of his manners. After a reign of twenty-four years, he peaceably expired in the palace of Constantinople; and the purple which he had acquired, was transmitted by the right of inheritance to the third generation.

In a long reign of thirty-four years, the son and successor of Leo, Constantine the fifth, surnamed Copronymus, attacked with less temperate zeal the images or idols of the church. Their votaries have exhausted the bitterness of religious gall, in their portrait of this spotted panther, this anti-christ, this flying dragon of the serpent’s seed, who surpassed the vices of Elagabalus and Nero. His reign was a long butchery of whatever was most noble, or holy, or innocent, in
his empire. In person, the emperor assisted at the execution of his victims, surveyed their agonies, listened to their groans, and indulged, without satiating, his appetite for blood: a plate of noses was accepted as a grateful offering, and his domestics were often scourged or mutilated by the royal hand. His surname was derived from his pollution of his baptismal font. The infant might be excused; but the manly pleasures of Copronymus degraded him below the level of a brute; his lust confounded the eternal distinctions of sex and species; and he seemed to extract some unnatural delight from the objects most offensive to human sense. In his religion, the Iconoclast was an Heretic, a Jew, a Mahometan, a Pagan, and an Atheist; and his belief of an invisible power could be discovered only in his magic rites, human victims, and nocturnal sacrifices to Venus and the daemons of antiquity. His life was stained with the most opposite vices, and the ulcers which covered his body, anticipated before his death the sentiment of hell-tortures. Of these accusations, which I have so patiently copied, a part is refuted by its own absurdity; and in the private anecdotes of the life of princes, the lie is more easy as the detection is more difficult. Without adopting the pernicious maxim, that where much is alleged, something must be true, I can however discern, that Constantine the fifth was dissolute and cruel. Calumny is more prone to exaggerate than to invent; and her licentious tongue is checked in some measure by the experience of the age and country to which she appeals. Of the bishops and monks, the generals and magistrates, who are said to have suffered under his reign, the numbers are recorded, the names were conspicuous, the execution was public, the mutilation visible and permanent. The Catholics
OF THE ROMAN EMPIRE.

Catholics hated the person and government of Copronymus; but even their hatred is a proof of their oppression. They dissemble the provocations which might excuse or justify his rigour, but even these provocations must gradually inflame his resentment, and harden his temper in the use or the abuse of despotism. Yet the character of the fifth Constantine was not devoid of merit, nor did his government always deserve the curses or the contempt of the Greeks. From the confession of his enemies, I am informed of the restoration of an ancient aqueduct, of the redemption of two thousand five hundred captives, of the uncommon plenty of the times, and of the new colonies which he repopulated Constantinople and the Thracian cities. They reluctantly praised his activity and courage; he was on horseback in the field at the head of his legions; and, although the fortune of his arms was various, he triumphed by sea and land, on the Euphrates and the Danube, in civil and Barbarian war. Heretical praise must be cast into the scale, to counterbalance the weight of orthodox invective. The Iconoclasts revered the virtues of the prince: forty years after his death, they still prayed before the tomb of the faint. A miraculous vision was propagated by fanaticism or fraud: and the Christian hero appeared on a milk-white steed, brandishing his lance against the pagans of Bulgaria: "An absurd fable," says the Catholic historian, "since Copronymus is chained with the demons in the abyss of hell."

Leo the fourth, the son of the fifth and the father of the sixth Constantine, was of a feeble constitution both of mind and body, and the principal care of his reign was the settlement of the succession. The association of the young Constantine was urged by the officious zeal of his subjects; and the emperor, conscious of his decay,
THE DECLINE AND FALL

CHAP XLVIII.

decay, complied, after a prudent hesitation, with their unanimous wishes. The royal infant, at the age of five years, was crowned with his mother Irene; and the national consent was ratified by every circumstance of pomp and solemnity, that could dazzle the eyes, or bind the conscience, of the Greeks. An oath of fidelity was administered in the palace, the church, and the hippodrome, to the several orders of the state, who adjured the holy names of the son, and mother, of God. "Be witness, O Christ! that we will watch over the safety of Constantine the son of Leo, expose our lives in his service, and bear true allegiance to his person and posterity." They pledged their faith on the wood of the true cross, and the act of their engagement was deposited on the altar of St. Sophia. The first to swear, and the first to violate their oath, were the five sons of Copronymus by a second marriage; and the story of these princes is singular and tragic. The right of primogeniture excluded them from the throne; the injustice of their elder brother defrauded them of a legacy of about two millions of sterling, some vain titles were not deemed a sufficient compensation for wealth and power; and they repeatedly conspired against their nephew, before and after the death of his father. Their first attempt was pardoned; for the second offence they were condemned to the ecclesiastical state: and for the third treason, Nicephorus, the eldest and most guilty, was deprived of his eyes, and his four brothers, Christopher, Nicetas, Anthemius, and Eudoxas, were punished, as a milder sentence, by the amputation of their tongues. After five years confinement, they escaped to the church of St. Sophia, and displayed a pathetic spectacle to the people. "Countrymen and Christians," cried Nicephorus for himself and his
his mute brethren, "behold the sons of your emperor, if you can still recognize our features in this miserable state. A life, an imperfect life, is all that the malice of our enemies has spared. It is now threatened, and we now throw ourselves on your compassion."

The rising murmur might have produced a revolution, had it not been checked by the presence of a minister, who soothed the unhappy princes with flattery and hope, and gently drew them from the sanctuary to the palace. They were speedily embarked for Greece, and Athens was allotted for the place of their exile. In this calm retreat, and in their helpless condition, Nicephorus and his brothers were tormented by the thirst of power, and tempted by a Sclavonian chief, who offered to break their prison, and to lead them in arms, and in the purple, to the gates of Constantinople. But the Athenian people, ever zealous in the cause of Irene, prevented her justice or cruelty; and the five sons of Copronymus were plunged in eternal darkness and oblivion.

For himself, that emperor had chosen a Barbarian wife, the daughter of the khan of the Chozars: but in the marriage of his heir, he preferred an Athenian virgin, an orphan, seventeen years old, whose sole fortune must have consisted in her personal accomplishments. The nuptials of Leo and Irene were celebrated with royal pomp; she soon acquired the love and confidence of a feeble husband, and in his testament he declared the empress, guardian of the Roman world, and of their son Constantine the sixth, who was no more than ten years of age. During his childhood, Irene most ably and diligently discharged, in her public administration, the duties of a faithful mother; and her zeal in the restoration of images has deserved the name and
and honours of a saint, which she still occupies in the Greek calendar. But the emperor attained the maturity of youth; the maternal yoke became more grievous; and he listened to the favourites of his own age, who shared his pleasures, and were ambitious of sharing his power. Their reasons convinced him of his right, their praises of his ability, to reign; and he consented to reward the services of Irene by a perpetual banishment to the isle of Sicily. But her vigilance and penetration easily disconcerted their rash projects; a similar, or more severe, punishment was retaliated on themselves and their advisers; and Irene inflicted on the ungrateful prince the chastisement of a boy. After this contest, the mother and the son were at the head of two domestic factions; and, instead of mild influence and voluntary obedience, she held in chains a captive and an enemy. The empress was overthrown by the abuse of victory; the oath of fidelity which she exacted to herself alone, was pronounced with reluctant murmurs; and the bold refusal of the Armenian guards encouraged a free and general declaration, that Constantine the sixth was the lawful emperor of the Romans. In this character he ascended his hereditary throne, and dismissed Irene to a life of solitude and repose. But her haughty spirit condescended to the arts of dissimulation: she flattered the bishops and eunuchs, revived the filial tenderness of the prince, regained his confidence, and betrayed his credulity. The character of Constantine was not destitute of sense or spirit; but his education had been studiously neglected; and his ambitious mother exposed to the public censure the vices which she had nourished and the actions which she had secretly advised: his divorce and second marriage offended the prejudices of the clergy, and by his impru-

dent rigour he forfeited the attachment of the Armenian guards. A powerful conspiracy was formed for the restoration of Irene; and the secret, though widely diffused, was faithfully kept above eight months, till the emperor, suspicious of his danger, escaped from Constantinople, with the design of appealing to the provinces and armies. By this hasty flight, the empress was left on the brink of the precipice; yet before she implored the mercy of her son, Irene addressed a private epistle to the friends whom she had placed about his person, with a menace, that unless they accomplished, she would reveal, their treason. Their fear rendered them intrepid; they seized the emperor on the Asiatic shore, and he was transported to the porphyry apartment of the palace, where he had first seen the light. In the mind of Irene, ambition had stifled every sentiment of humanity and nature; and it was decreed in her bloody council, that Constantine should be rendered incapable of the throne: her emissaries assaulted the sleeping prince, and stabbed their daggers with such violence and precipitation into his eyes, as if they meant to execute a mortal sentence. An ambiguous passage of Theophanes persuaded the annalist of the church that death was the immediate consequence of this barbarous execution. The Catholics have been deceived or subdued by the authority of Baronius; and protestant zeal has re-echoed the words of a cardinal, desirous, as it should seem, to favour the patrons of images. Yet the blind son of Irene survived many years, oppressed by the court and forgotten by the world; the Maurian dynasty was silently extinguished; and the memory of Constantine was recalled only by the nuptials of his daughter Euphrosyne with the emperor Michael the Second.

XLVIII.

Irene, 
A. D. 754, 
August 19.

The most bigotted orthodoxy has justly execrated the unnatural mother, who may not easily be paralleled in the history of crimes. To her bloody deed, superstition has attributed a subsequent darkness of seventeen days; during which many vessels in mid-day were driven from their course, as if the sun, a globe of fire so vast and so remote, could sympathise with the atoms of a revolving planet. On earth, the crime of Irene was left five years unpunished; her reign was crowned with external splendour; and if she could silence the voice of conscience, the neither heard nor regarded the reproaches of mankind. The Roman world bowed to the government of a female; and as she moved through the streets of Constantinople, the reins of four milk-white steeds were held by as many patricians, who marched on foot before the golden chariot of their queen. But these patricians were for the most part eunuchs; and their black ingratitude justified, on this occasion, the popular hatred and contempt. Raised, enriched, entrusted with the first dignities of the empire, they basely conspired against their benefactress: the great treasurer Nicephorus was secretly invested with the purple; her successor was introduced into the palace, and crowned at St. Sophia by the venal patriarch. In their first interview, she recapitulated with dignity the revolutions of her life, gently accused the perfidy of Nicephorus, intimated that he owed his life to her unsuspicous clemency; and, for the throne and treasures which she resigned, solicited a decent and honourable retreat. His avarice refused this modest compensation; and, in her exile of the isle of Lesbos, the empress earned a scanty subsistence by the labours of her distaff.

Many tyrants have reigned undoubtedly more criminal than Nicephorus, but none perhaps have
have more deeply incurred the universal abhorrence of their people. His character was stained with the three odious vices of hypocrisy, ingratitude, and avarice: his want of virtue was not redeemed by any superior talents, nor his want of talents by any pleasing qualifications. Unskilful and unfortunate in war, Nicephorus was vanquished by the Saracens, and slain by the Bulgarians; and the advantage of his death overbalanced, in the public opinion, the destruction of a Roman army. His son and heir Stauracius escaped from the field with a mortal wound: yet six months of an expiring life were sufficient to refute his indecent, though popular declaration, that he would in all things avoid the example of his father. On the near prospect of his decease, Michael, the great master of the palace, and the husband of his sister Procopia, was named by every person of the palace and city, except by his envious brother. Tenacious of a sceptre now falling from his hand, he conspired against the life of his successor, and cherished the idea of changing to a democracy the Roman empire. But these rash projects served only to inflame the zeal of the people and to remove the scruples of the candidate: Michael the first accepted the purple, and before he sunk into the grave, the son of Nicephorus implored the clemency of his new sovereign. Had Michael in an age of peace ascended an hereditary throne, he might have reigned and died the father of his people: but his mild virtues were adapted to the shade of private life, nor was he capable of controlling the ambition of his equals, or of resifting the arms of the victorious Bulgarians. While his want of ability and success exposed him to the contempt of the soldiers, the masculine spirit of his wife Procopia awakened their indignation. Even the Greeks
THE DECLINE AND FALL

CHAP. Greeks of the ninth century were provoked by
the insolence of a female, who, in the front of
the standards, presumed to direct their discipline
and animate their valour; and their licentious
clamours adviced the new Semiramis to reverence
the majesty of a Roman camp. After an unsuc-
cessful campaign, the emperor left in their win-
ter-quarters of Thrace, a disaffected army under
the command of his enemies; and their artful elo-
quence persuaded the soldiers to break the domi-
nion of the eunuchs, to degrade the husband of
Procopia, and to assert the right of a military
election. They marched towards the capital:
yet the clergy, the senate, and the people of
Constantinople, adhered to the cause of Michael;
and the troops and treasures of Asia might have
protracted the mischiefs of civil war. But his
humanity (by the ambitious, it will be termed
his weakness) protested, that not a drop of Chris-
tian blood should be shed in his quarrel, and his
messengers presented the conquerors with the
keys of the city and the palace. They were dis-
armed by his innocence and submission; his life
and his eyes were spared; and the Imperial monk
enjoyed the comforts of solitude and religion
above thirty-two years after he had been stripped
of the purple and separated from his wife.

A rebel, in the time of Nicephorus, the fa-
mous and unfortunate Bardanes, had once the
curiosity to consult an Asiatic prophet, who,
after prognosticating his fall, announced the for-
tunes of his three principal officers, Leo the
Armenian, Michael the Phrygian, and Thomas
the Cappadocian, the succesive reigns of the
two former, the fruitless and fatal enterprise of
the third. This prediction was verified, or ra-
ther was produced, by the event. Ten years
afterwards, when the Thracian camp rejected the
husband of Procopia, the crown was presented
to
to the same Leo, the first in military rank and the secret author of the mutiny. As he affected to hesitate, "With this sword," said his companion Michael, "I will open the gates of Con-stantinople to your Imperial sway; or in-stantly plunge it into your bosom, if you ob-stinately resist the just desires of your fellow-soldiers." The compliance of the Armenian was rewarded with the empire, and he reigned seven years and an half under the name of Leo the fifth. Educated in a camp, and ignorant both of laws and letters, he introduced into his civil government the rigour and even cruelty of military discipline; but if his severity was sometimes dangerous to the innocent, it was always formidable to the guilty. His religious inconstancy was taxed by the epithet of Chameleon, but the Catholics have acknowledged by the voice of a saint and confessors, that the life of the Iconoclast was useful to the republic. The zeal of his companion Michael was repaid with riches, honours, and military command; and his subordinate talents were beneficially employed in the public service. Yet the Phrygian was dissatisfied at receiving as a favour a scanty portion of the Imperial prize which he had bestowed on his equal; and his discontent, which sometimes evaporated in hasty discourse, at length assumed a more threatening and hostile aspect against a prince whom he represented as a cruel tyrant. That tyrant, however, repeatedly detected, warned, and dismissed the old companion of his arms, till fear and resentment prevailed over gratitude; and Michael, after a scrutiny into his actions and designs, was convicted of treason, and sentenced to be burnt alive in the furnace of the private baths. The devout humanity of the empress Theophano was fatal to her husband and family. A solemn day,
the twenty-fifth of December, had been fixed for the execution: she urged, that the anniversary of the Saviour's birth would be profaned by this inhuman spectacle, and Leo consented with reluctance to a decent respite. But on the vigil of the feast, his sleepless anxiety prompted him to visit at the dead of night the chamber in which his enemy was confined: he beheld him released from his chain, and stretched on his gaoler's bed in a profound slumber: Leo was alarmed at these signs of security and intelligence; but, though he retired with silent steps, his entrance and departure were noticed by a slave who lay concealed in a corner of the prison. Under the pretence of requesting the spiritual aid of a confessor, Michael informed the conspirators, that their lives depended on his discretion, and that a few hours were left to assure their own safety, by the deliverance of their friend and country. On the great festivals, a chosen band of priests and chanters was admitted into the palace by a private gate to sing matins in the chapel; and Leo, who regulated with the same strictness the discipline of the choir and of the camp, was seldom absent from these early devotions. In the ecclesiastical habit, but with swords under their robes, the conspirators mingled with the procession, lurked in the angles of the chapel, and expected, as the signal of murder, the intonation of the first psalm by the emperor himself. The imperfect light, and the uniformity of dress, might have favoured his escape, while their assault was pointed against an harmless priest; but they soon discovered their mistake, and encompassed on all sides the royal victim. Without a weapon and without a friend, he grasped a weighty cross, and stood at bay against the hunters of his life; but as he asked for mercy, "This is the hour.
not of mercy, but of vengeance," was the inexorable reply. The stroke of a well-aimed sword separated from his body the right arm and the cross, and Leo the Armenian was slain at the foot of the altar.

A memorable reverse of fortune was displayed in Michael the second, who, from a defect in his speech, was surnamed the Stammerer. He was snatched from the fiery furnace to the sovereignty of an empire; and as in the tumult a smith could not readily be found, the setters remained on his legs several hours after he was seated on the throne of the Cæsars. The royal blood which had been the price of his elevation, was unprofitably spent; in the purple he retained the ignoble vices of his origin; and Michael lost his provinces with as supine indifference as if they had been the inheritance of his fathers. His title was disputed by Thomas, the last of the military triumvirate, who transported into Europe fourscore thousand Barbarians from the banks of the Tigris and the shores of the Caspian. He formed the siege of Constantinople; but the capital was defended with spiritual and carnal weapons; a Bulgarian king assaulted the camp of the Orientals, and Thomas had the misfortune, or the weakness, to fall alive into the power of the conqueror. The hands and feet of the rebel were amputated; he was placed on an ass, and, amidst the insults of the people, was led through the streets, which he sprinkled with his blood. The depravation of manners, as savage as they were corrupt, is marked by the presence of the emperor himself. Deaf to the lamentations of a fellow-soldier, he incessantly pressed the discovery of more accomplices, till his curiosity was checked by the question of an honest or guilty minister: "Would you give credit to an enemy, against the most faithful D 2  " of
THE DECLINE AND FALL

The character of Theophilus is a rare example in which religious zeal has allowed, and perhaps magnified, the virtues of an heretic and a persecutor. His valour was often felt by the enemies, and his justice by the subjects, of the monarchy; but the valour of Theophilus was rash and fruitless, and his justice arbitrary and cruel. He displayed the banner of the cross against the Saracens; but his five expeditions were concluded by a signal overthrow; Amorium, the native city of his ancestors, was levelled with the ground, and from his military toils, he derived only the surname of the Unfortunate. The wisdom of a sovereign is comprised in the institution of laws and the choice of magistrates, and while he seems without action, his civil government revolves round his centre with the silence and order of the planetary system. But the justice of Theophilus was fashioned on the model of the Oriental despots, who, in personal and irregular acts of authority, consult the reason or passion of the moment, without measuring the sentence by the law or the penalty by the offence. A poor woman threw herself at the emperor's feet to complain of a powerful neighbour, the brother of the empress, who had raised his palace wall to such an inconvenient height, that her humble dwelling was excluded from light and air! On the proof
OF THE ROMAN EMPIRE.

proof of the fact, instead of granting, like an ordinary judge, sufficient or ample damages to the plaintiff, the sovereign adjudged to her use and benefit the palace and the ground. Nor was Theophilus content with this extravagant satisfaction: his zeal converted a civil trespass into a criminal act; and the unfortunate patrician was stripped and scourged in the public place of Constantinople. For some venial offences, some defect of equity or vigilance, the principal ministers, a praefect, a quaesitor, a captain of the guards, were banished or mutilated, or scalded with boiling pitch, or burnt alive in the hippodrome; and as these dreadful examples might be the effects of error or caprice, they must have alienated from his service the best and wisest of the citizens. But the pride of the monarch was flattered in the exercise of power, or, as he thought, of virtue; and the people, safe in their obscurity, applauded the danger and debasement of their superiors. This extraordinary rigour was justified, in some measure, by its salutary consequences; since, after a scrutiny of seventeen days, not a complaint or abuse could be found in the court or city: and it might be alleged that the Greeks could be ruled only with a rod of iron, and that the public interest is the motive and law of the supreme judge. Yet in the crime, or the suspicion, of treason, that judge is of all others the most credulous and partial. Theophilus might inflict a tardy vengeance on the assassins of Leo and the favourers of his father; but he enjoyed the fruits of their crime; and his jealous tyranny sacrificed a brother and a prince to the future safety of his life. A Persian of the race of the Sassanides died in poverty and exile at Constantinople, leaving an only son, the issue of a plebeian marriage. At the age of twelve years, the royal birth
THE DECLINE AND FALL

CHAP. The birth of Theophobus was revealed, and his merit was not unworthy of his birth. He was educated in the Byzantine palace, a Christian and a soldier; advanced with rapid steps in the career of fortune and glory; received the hand of the emperor's sister; and was promoted to the command of thirty thousand Persians, who, like his father, had fled from the Mahometan conquerors. These troops, doubly infected with mercenary and fanatic vices, were desirous of revolting against their benefactor, and erecting the standard of their native king: but the loyal Theophobus rejected their offers, disconcerted their schemes, and escaped from their hands to the camp or palace of his royal brother. A generous confidence might have secured a faithful and able guardian for his wife and his infant son, to whom Theophilus, in the flower of his age, was compelled to leave the inheritance of the empire. But his jealousy was exasperated by envy and disease; he feared the dangerous virtues which might either support or oppress their infancy and weakness; and the dying emperor demanded the head of the Persian prince. With savage delight, he recognized the familiar features of his brother: "Thou art no longer "Theophobus," he said; and sinking on his couch, he added, with a faltering voice, "Soon, "too soon, I shall be no more Theophilus!"

The Russians, who have borrowed from the Greeks the greatest part of their civil and ecclesiastical policy, preserved, till the last century, a singular institution in the marriage of the Czar. They collected, not the virgins of every rank and of every province, a vain and romantic idea, but the daughters of the principal nobles, who awaited in the palace the choice of their sovereign. It is affirmed, that a similar method was adopted in the nuptials of Theophilus.
OF THE ROMAN EMPIRE.

With a golden apple in his hand, he slowly walked between two lines of contending beauties: his eye was detained by the charms of Icassia, and, in the awkwardness of a first declaration, the prince could only observe, that, in this world, women had been the cause of much evil: "And surely, sir," she pertly replied, "they have likewise been the occasion of much good." This affectation of unseasonable wit displeased the Imperial lover: he turned aside in disgust; Icassia concealed her mortification in a convent; and the modest silence of Theodora was rewarded with the golden apple. She deserved the love, but did not escape the severity of her lord. From the palace garden he beheld a vessel deeply laden, and steering into the port, on the discovery that the precious cargo of Syrian luxury was the property of his wife, he condemned the ship to the flames, with a sharp reproach, that her avarice had degraded the character of an empress into that of a merchant. Yet his last choice entrusted her with the guardianship of the empire and her son Michael, who was left an orphan in the fifth year of his age. The restoration of images, and the final extirpation of the Iconoclasts, has endeared her name to the devotion of the Greeks; but in the fervour of religious zeal, Theodora entertained a grateful regard for the memory and salvation of her husband. After thirteen years of a prudent and frugal administration, she perceived the decline of her influence; but the second Irene imitated only the virtues of her predecessor. Instead of conspiring against the life or government of her son, she retired, without a struggle, though not without a murmur, to the solitude of private life, deploring the ingratitude, the vices, and the inevitable ruin of the worthless youth.

Among
Among the successors of Nero and Elagabalus, we have not hitherto found the imitation of their vices, the character of a Roman prince who considered pleasure as the object of life, and virtue as the enemy of pleasure. Whatever might have been the maternal care of Theodora in the education of Michael the third, her unfortunate son was a king before he was a man. If the ambitious mother laboured to check the progress of reason, she could not cool the ebullition of passion; and her selfish policy was justly repaid by the contempt and ingratitude of the headstrong youth. At the age of eighteen, he rejected her authority, without feeling his own incapacity to govern the empire and himself. With Theodora, all gravity and wisdom retired from the court; their place was supplied by the alternate dominion of vice and folly; and it was impossible without forfeiting the public esteem, to acquire or preserve the favour of the emperor. The millions of gold and silver which had been accumulated for the service of the state, were lavished on the vilest of men, who flattered his passions and shared his pleasures; and in a reign of thirteen years, the richest of sovereigns was compelled to strip the palace and the churches of their precious furniture. Like Nero, he delighted in the amusements of the theatre, and sighed to be surpassed in the accomplishments in which he should have blushed to excel. Yet the studies of Nero in music and poetry, betrayed some symptoms of a liberal taste; the more ignoble arts of the son of Theophilus were confined to the chariot-race of the hippodrome. The four factions which had agitated the peace, still amused the idleness of the capital; for himself, the emperor assumed the blue livery; the three rival colours were distributed to his favourites, and in the vile though eager
OF THE ROMAN EMPIRE.

eager contention he forgot the dignity of his person and the safety of his dominions. He silenced the messenger of an invasion, who presumed to divert his attention in the most critical moment of the race; and by his command, the importunate beacons were extinguished, that too frequently spread the alarm from Tarvis to Constantinople. The most skilful charioteers obtained the first place in his confidence and esteem; their merit was profusely rewarded; the emperor feasted in their houses, and presented their children at the baptismal font; and while he applauded his own popularity, he affected to blame the cold and stately reserve of his predecessors. The unnatural lusts which had degraded even the manhood of Nero, were banished from the world; yet the strength of Michael was consumed by the indulgence of love and intemperance. In his midnight revels, when his passions were inanimated by wine, he was provoked to issue the most sanguinary commands; and if any feelings of humanity were left, he was reduced, with the return of sense, to approve the salutary disobedience of his servants. But the most extraordinary feature in the character of Michael, is the profane mockery of the religion of his country. The superstition of the Greeks might indeed excite the smile of a philosopher; but his smile would have been rational and temperate, and he must have condemned the ignorant folly of a youth who insulted the objects of public veneration. A buffoon of the court was invested in the robes of the patriarch; his twelve metropolitans, among whom the emperor was ranked, assumed their ecleciastical garments; they used or abused the sacred vessels of the altar; and in their bacchanalian feasts the holy communion was administered in a nauseous compound of vinegar and mustard. Nor were these impious
THE DECLINE AND FALL

CHAP. impious spectacles concealed from the eyes of the city. On the day of a solemn festival, the emperor, with his bishops or buffoons, rode on asses through the streets, encountered the true patriarch at the head of his clergy; and by their licentious shouts and obscene gestures, disordered the gravity of the Christian procession. The devotion of Michael appeared only in some offence to reason or piety; he received his theatrical crowns from the statue of the Virgin; and an imperial tomb was violated for the sake of burning the bones of Constantine the Iconoclast. By this extravagant conduct, the son of Theophilus became as contemptible as he was odious: every citizen was impatient for the deliverance of his country; and even the favourites of the moment were apprehensive that a caprice might snatch away what a caprice had bestowed. In the thirtieth year of his age, and in the hour of intoxication and sleep, Michael the third was murdered in his chamber by the founder of a new dynasty, whom the emperor had raised to an equality of rank and power.

The genealogy of Basil the Macedonian (if it be not the spurious offspring of pride and flattery) exhibits a genuine picture of the revolution of the most illustrious families. The Arsacides, the rivals of Rome, possessed the sceptre of the East near four hundred years: a younger branch of these Parthian kings continued to reign in Armenia; and their royal descendants survived the partition and servitude of that ancient monarchy. Two of these, Artabanus and Chlienes, escaped or retired to the court of Leo the first: his bounty feasted them in a safe and hospitable exile, in the province of Macedonia; Adrianople was their final settlement. During several generations they maintained the dignity of their birth; and their Roman patriotism rejected the tempting
 tempting offers of the Persian and Arabian powers, who recalled them to their native country. But their splendour was insensibly clouded by time and poverty; and the father of Basil was reduced to a small farm, which he cultivated with his own hands: yet he scorned to disgrace the blood of the Arscicides by a plebeian alliance: his wife, a widow of Adrianople, was pleased to count among her ancestors, the great Constantine; and their royal infant was connected by some dark affinity of lineage or country with the Macedonian Alexander. No sooner was he born, than the cradle of Basil, his family, and his city, were swept away by an inundation of the Bulgarians: he was educated a slave in a foreign land; and in this severe discipline, he acquired the hardness of body and flexibility of mind which promoted his future elevation. In the age of youth or manhood he shared the deliverance of the Roman captives, who generously broke their fetters, marched through Bulgaria to the shores of the Euxine, defeated two armies of Barbarians, embarked in the ships which had been stationed for their reception, and returned to Constantinople, from whence they were distributed to their respective homes. But the freedom of Basil was naked and destitute: his farm was ruined by the calamities of war: after his father’s death, his manual labour, or service, could no longer support a family of orphans; and he resolved to seek a more conspicuous theatre, in which every virtue and every vice may lead to the paths of greatness. The first night of his arrival at Constantinople, without friends or money, the weary pilgrim slept on the steps of the church of St. Domethe: he was fed by the casual hospitality of a monk; and was introduced to the service of a cousin and namesake of the emperor Theophilus; who, though himself of a diminutive
THE DECLINE AND FALL

CHAP. minutive person, was always followed by a train of tall and handsome domestics. Basil attended his patron to the government of Peloponnesus; eclipsed, by his personal merit, the birth and dignity of Theophilus, and formed an useful connection with a wealthy and charitable matron of Patras. Her spiritual or carnal love embraced the young adventurer, whom she adopted as her son. Danielis presented him with thirty slaves; and the produce of her bounty was expended in the support of his brothers, and the purchase of some large estates in Macedonia. His gratitude or ambition still attached him to the service of Theophilus; and a lucky accident recommended him to the notice of the court. A famous wrestler, in the train of the Bulgarian ambassadors, had defied, at the royal banquet, the boldest and most robust of the Greeks. The strength of Basil was praised; he accepted the challenge; and the Barbarian champion was overthrown at the first onset. A beautiful but vicious horse was condemned to be hamstrung; it was subdued by the dexterity and courage of the servant of Theophilus; and his conqueror was promoted to an honourable rank in the Imperial stables. But it was impossible to obtain the confidence of Michael, without complying with his vices; and his new favourite, the great chamberlain of the palace, was raised and supported by a disgraceful marriage with a royal concubine, and the dishonour of his sister, who succeeded to her place. The public administration had been abandoned to the Caesar Bardas, the brother and enemy of Theodora; but the arts of female influence persuaded Michael to hate and to fear his uncle: he was drawn from Constantinople, under the pretence of an expedition, and stabbed in the tent of audience, by the sword of the chamberlain, and in the presence of the emperor.

About
OF THE ROMAN EMPIRE.

About a month after this execution, Basil was invested with the title of Augustus and the government of the empire. He supported this unequal association till his influence was fortified by popular esteem. His life was endangered by the caprice of the emperor; and his dignity was profaned by a second colleague, who had rowed in the gallies. Yet the murder of his benefactor must be condemned as an act of ingratitude and treason; and the churches which he dedicated to the name of St. Michael, were a poor and puerile expiation of his guilt.

The different ages of Basil the first, may be compared with those of Augustus. The situation of the Greek did not allow him in his earliest youth to lead an army against his country, or to proscribe the noblest of her sons; but his aspiring genius floored to the arts of a slave; he disfigured his ambition and even his virtues, and grasped, with the bloody hand of an assassin, the empire which he ruled with the wisdom and tenderness of a parent. A private citizen may feel his interest repugnant to his duty; but it must be from a deficiency of sense or courage, that an absolute monarch can separate his happiness from his glory, or his glory from the public welfare. The life or panegyric of Basil has indeed been composed and published under the long reign of his descendants; but even their stability on the throne may be justly ascribed to the superior merit of their ancestor. In his character, his grandson Constantine, has attempted to delineate a perfect image of royalty: but that feeble prince, unless he had copied a real model, could not easily have soared so high above the level of his own conduct or conceptions. But the most solid praise of Basil is drawn from the comparison of a ruined and a flourishing monarchy, that which he wrested from the dissolute Michael,
CHAP. Michael, and that which he bequeathed to the Macedonian dynasty. The evils which had been sanctified by time and example, were corrected by his master-hand; and he revived, if not the national spirit, at least the order and majesty of the Roman empire. His application was indefatigable, his temper cool, his understanding vigorous and decisive: and in his practice he observed that rare and salutary moderation, which pursues each virtue, at an equal distance between the opposite vices. His military service had been confined to the palace; nor was the emperor endowed with the spirit or the talents of a warrior. Yet under his reign the Roman arms were again formidable to the Barbarians. As soon as he had formed a new army by discipline and exercise, he appeared in person on the banks of the Euphrates, curbed the pride of the Saracens, and suppressed the dangerous though just revolt of the Manichæans. His indignation against a rebel who had long eluded his pursuit, provoked him to wish and to pray, that by the grace of God, he might drive three arrows into the head of Chrysochir. That odious head, which had been obtained by treason rather than by valour, was suspended from a tree, and thrice exposed to the dexterity of the Imperial archer: a base revenge against the dead, more worthy of the times, than of the character of Basil. But his principal merit was in the civil administration of the finances and of the laws. To replenish an exhausted treasury, it was proposed to resume the lavish and ill-placed gifts of his predecessor: his prudence abated one moiety of the restitution; and a sum of twelve hundred thousand pounds was instantly procured to answer the most pressing demands, and to allow some space for the mature operations of economy. Among the various schemes for the improvement of the revenue,

nue, a new mode was suggested of capitation, or tribute, which would have too much depended on the arbitrary discretion of the assessors. A sufficient list of honest and able agents was instantly produced by the minister; but on the more careful scrutiny of Basil himself, only two could be found, who might be safely entrusted with such dangerous powers; and they justified his esteem by declining his confidence. But the serious and successful diligence of the emperor established by degrees an equitable balance of property and payment, of receipt and expenditure: a peculiar fund was appropriated to each service; and a public method secured the interest of the prince and the property of the people. After reforming the luxury, he assigned two patrimonial estates to supply the decent plenty, of the Imperial table: the contributions of the subject were reserved for his defence, and the residue was employed in the embellishment of the capital and provinces. A taste for building, however costly, may deserve some praise and much excuse: from thence industry is fed, art is encouraged, and some object is attained of public emolument or pleasure: the use of a road, an aqueduct, or an hospital, is obvious and solid; and the hundred churches that arose by the command of Basil, were consecrated to the devotion of the age. In the character of a judge, he was affable and impartial, desirous to save, but not afraid to strike: the oppressors of the people were severely chastised; but his personal foes, whom it might be unsafe to pardon, were condemned, after the loss of their eyes, to a life of solitude and repentance. The change of language and manners demanded a revision of the obsolete jurisprudence of Justinian; the voluminous body of his Institutes, Pandects, Code, and Novels, was digested under forty titles, in the Greek
THE DECLINE AND FALL

CHAP. Greek idiom; and the Basilics, which were improved and completed by his son and grandson, must be referred to the original genius of the founder of their race. This glorious reign was terminated by an accident in the chase. A furious stag entangled his horns in the belt of Basil, and raised him from his horse: he was rescued by an attendant, who cut the belt and flew the animal; but the fall, or the fever, exhausted the strength of the aged monarch, and he expired in the palace, amidst the tears of his family and people. If he struck off the head of the faithful servant, for presuming to draw his sword against his sovereign; the pride of despotism, which had lain dormant in his life; revived in the last moments of despair, when he no longer wanted or valued the opinion of mankind.

Of the four sons of the emperor, Constantine died before his father, whose grief and credulity were amused by a flattering impostor and a vain apparition. Stephen, the youngest, was content with the honours of a patriarch and a saint; both Leo and Alexander were alike invested with the purple, but the powers of government were solely exercised by the elder brother. The name of Leo the sixth has been dignified with the title of philosopher; and the union of the prince and the sage, of the active and speculative virtues, would indeed constitute the perfection of human nature. But the claims of Leo are far short of this ideal excellence. Did he reduce his passions and appetites under the dominion of reason? His life was spent in the pomp of the palace, in the society of his wives and concubines; and even the clemency which he shewed, and the peace which he strove to preserve, must be imputed to the softness and indolence of his character. Did he subdue his prejudices, and those of his subjects? His mind was
was tinged with the most puérile superstition; the influence of the clergy, and the errors of the people, were consecrated by his laws; and the oracles of Leo, which reveal, in prophetic style, the fates of the empire, are founded on the arts of astrology and divination. If we still enquire the reason of his sage appellation, it can only be replied, that the son of Basil was less ignorant than the greater part of his contemporaries in church and state; that his education had been directed by the learned Photius; and that several books of profane and ecclesiastical science were composed by the pen, or in the name, of the Imperial philosopher. But the reputation of his philosophy and religion was overthrown by a domestic vice, the repetition of his nuptials. The primitive ideas of the merit and holiness of celibacy, were preached by the monks and entertained by the Greeks. Marriage was allowed as a necessary means for the propagation of mankind; after the death of either party, the survivor might satisfy by a second union, the weakness or the strength of the flesh; but a third marriage was censured as a state of legal fornication; and a fourth was a sin or scandal as yet unknown to the Christians of the East. In the beginning of his reign, Leo himself had abolished the state of concubines, and condemned, without annulling, third marriages: but his patriotism and love soon compelled him to violate his own laws, and to incur the penance, which in a similar case he had imposed on his subjects. In his three first alliances, his nuptial bed was unfruitful; the emperor required a female companion, and the empire a legitimate heir. The beautiful Zoe was introduced into the palace as a concubine; and after a trial of her fecundity, and the birth of Constantine, her lover declared his intention of legitimating the mother...
and the child, by the celebration of his fourth nuptials. But the patriarch Nicholas refused his blessing: the Imperial baptism of the young prince was obtained by a promise of separation; and the contumacious husband of Zoe was excluded from the communion of the faithful. Neither the fear of exile, nor the defection of his brethren, nor the authority of the Latin church, nor the danger of failure or doubt in the succession to the empire, could bend the spirit of the inflexible monk. After the death of Leo, he was recalled from exile to the civil and ecclesiastical administration; and the edict of union which was promulgated in the name of Constantine, condemned the future scandal of fourth marriages, and left a tacit imputation on his own birth.

In the Greek language, purple and porphyry are the same word: and as the colours of nature are invariable, we may learn, that a dark deep red was the Tyrian dye which stained the purple of the ancients. An apartment of the Byzantine palace was lined with porphyry: it was reserved for the use of the pregnant empresses; and the royal birth of their children was expressed by the appellation of porphyrogenite, or born in the purple. Several of the Roman princes had been blessed with an heir; but this peculiar surname was first applied to Constantine the seventh. His life and titular reign were of equal duration; but of fifty-four years, fix had elapsed before his father’s death; and the son of Leo was ever the voluntary or reluctant subject of those who oppressed his weakness or abused his confidence. His uncle Alexander, who had long been invested with the title of Augustus, was the first colleague and governor of the young prince: but in a rapid career of vice and folly, the brother of Leo already emulated the reputation

tion of Michael; and when he was extinguished by a timely death, he entertained a project of castrating his nephew, and leaving the empire to a worthless favourite. The succeeding years of the minority of Constantine were occupied by his mother Zoe, and a succession or council of seven regents, who pursued their interest, gratified their passions, abandoned the republic, supplanting each other, and finally vanished in the presence of a soldier. From an obscure origin, Romanus Lecapenus had raised himself to the command of the naval armies; and in the anarchy of the times, had deserved, or at least had obtained, the national esteem. With a victorious and affectionate fleet, he sailed from the mouth of the Danube into the harbour of Constantiople, and was hailed as the deliverer of the people, and the guardian of the prince. His supreme office was at first defined by the new appellation of father of the emperor; but Romanus soon disdained the subordinate powers of a minister, and assumed, with the titles of Caesar and Augustus, the full independence of royalty, which he held near five and twenty years. His three sons, Christophaer, Stephen, and Constantine, were successively adorned with the same honours, and the lawful emperor was degraded from the first to the fifth rank in this college of princes. Yet, in the preservation of his life and crown, he might still applaud his own fortune and the clemency of the usurper. The examples of ancient and modern history would have excused the ambition of Romanus: the powers and the laws of the empire were in his hand; the spurious birth of Constantine would have justified his exclusion; and the grave or the monastery was open to receive the son of the concubine. But Lecapenus does not appear to have possessed either the virtues or the vices of...
of a tyrant. The spirit and activity of his private life dissolved away in the sunshine of the throne; and in his licentious pleasures, he forgot the safety both of the republic and of his family. Of a mild and religious character, he respected the sanctity of oaths, the innocence of the youth, the memory of his parents and the attachment of the people. The studious temper and retirement of Constance, disarmed the jealousy of power; his books and music, his pen and his pencil, were a constant source of amusement; and if he could improve a scanty allowance by the sale of his pictures, if their price was not enhanced by the name of the artist, he was endowed with a personal talent, which few princes could employ in the hour of adversity.

The fall of Romanus was occasioned by his own vices and those of his children. After the decease of Christophor, his eldest son, the two surviving brothers quarrelled with each other, and conspired against their father. At the hour of noon, when all strangers were regularly excluded from the palace, they entered his apartment with an armed force, and conveyed him, in the habit of a monk, to a small island in the Propontis, which was peopled by a religious community. The rumour of this domestic revolution excited a tumult in the city; but Porphyrogenitus alone, the true and lawful emperor, was the object of the public care; and the sons of Lecapenus were taught, by tardy experience, that they had achieved a guilty and perilous enterprise for the benefit of their rival. Their sister Helena, the wife of Constance, revealed, or supposed, their treacherous design of assassinating her husband at the royal banquet. His loyal adherents were alarmed; and the two usurpers were prevented, seized, degraded from the purple, and embarked for the same island and

and monastery where their father had been so lately confined. Old Romanus met them on the beach with a sarcastic smile, and, after a just reproach of their folly and ingratitude, presented his Imperial colleagues with an equal share of his water and vegetable diet. In the fortieth year of his reign, Constantine the seventh obtained the possession of the Eastern world, which he ruled, or seemed to rule, near fifteen years. But he was devoid of that energy of character which could emerge into a life of action and glory; and the studies which had amused and dignified his leisure, were incompatible with the serious duties of a sovereign. The emperor neglected the practice, to instruct his son Romanus in the theory, of government: while he indulged the habits of intemperance and idleness, he dropped the reins of the administration into the hands of Helena his wife; and, in the shifting scene of her favour and caprice, each minister was regretted in the promotion of a more worthless successor. Yet the birth and misfortunes of Constantine had endeared him to the Greeks; they excused his failings; they respected his learning, his innocence, and charity, his love of justice; and the ceremony of his funeral was mourned with the unfeigned tears of his subjects. The body, according to ancient custom, lay in state in the vestibule of the palace; and the civil and military officers, the patricians, the senate, and the clergy, approached in due order to adore and kiss the inanimate corpse of their sovereign. Before the procession moved towards the Imperial sepulchre, an herald proclaimed this awful admonition: “Arise, O king of the world, and obey the summons of the King of kings!”

The
THE DECLINE AND FALL

The death of Constantine was imputed to poison; and his son Romanus, who derived that name from his maternal grandfather, ascended the throne of Constantinople. A prince who, at the age of twenty, could be suspected of anticipating his inheritance, must have been already lost in the public esteem; yet Romanus was rather weak than wicked; and the largest share of the guilt was transferred to his wife, Theophano, a woman of base origin, masculine spirit, and flagitious manners. The sense of personal glory and public happiness, the true pleasures of royalty, were unknown to the son of Constantine; and, while the two brothers, Nicephorus and Leo, triumphed over the Saracens, the hours which the emperor owed to his people were consumed in strenuous idleness. In the morning he visited the circus; at noon he feasted the senators; the greater part of the afternoon he spent in the hippodrome, or tennis-court, the only theatre of his victories; from thence he passed over to the Asiatic side of the Bosphorus; hunted and killed four wild boars of the largest size, and returned to the palace, proudly content with the labours of the day. In strength and beauty he was conspicuous above his equals: tall and stately as a young cypress, his complexion was fair and florid, his eyes sparkling, his shoulders broad, his nose long and aquiline. Yet even these perfections were insufficient to fix the love of Theophano; and, after a reign of four years, she mingled for her husband the same deadly draught which she had composed for his father.

By his marriage with this impious woman, Romanus the younger left two sons, Basil the second and Constantine the ninth, and two daughters, Theophano and Anne. The eldest sister was given to Otho the second, emperor of the West;
the younger became the wife of Wолодомир, great duke and apostle of Russia, and, by the marriage of her grand-daughter with Henry the first, king of France, the blood of the Macedonians, and perhaps of the Arscides, still flows in the veins of the Bourbon line. After the death of her husband, the empress aspired to reign in the name of her sons, the elder of whom was five, and the younger only two, years of age; but she soon felt the instability of a throne, which was supported by a female who could not be esteemed, and two infants who could not be feared. Theophano looked around for a protector, and threw herself into the arms of the bravest soldier; her heart was capacious; but the deformity of the new favourite rendered it more than probable that interest was the motive and excuse of her love. Nicephorus Phocas united, in the popular opinion, the double merit of an hero and a faint. In the former character, his qualifications were genuine and splendid; the descendant of a race, illustrious by their military exploits, he had displayed, in every station and in every province, the courage of a soldier and the conduct of a chief; and Nicephorus was crowned with recent laurels; from the important conquest of the isle of Crete. His religion was of a more ambiguous cast; and his haircloth, his safts, his pious idiom, and his wish to retire from the business of the world, were a convenient mask for his dark and dangerous ambition. Yet he imposed on an holy patriarch, by whose influence, and by a decree of the senate, he was entrusted, during the minority of the young princes, with the absolute and independent command of the Oriental armies. As soon as he had secured the leaders and the troops, he boldly marched to Constantinople, trampled on his enemies, avowed his correspondence with the empress,
press, and without degrading her sons, assumed with the title of Augusta, the pre-eminence of rank and the plenitude of power. But his marriage with Theophano was refused by the same patriarch who had placed the crown on his head: by his second nuptials he incurred a year of canonical penance; a bar of spiritual affinity was opposed to their celebration; and some evasion and perjury were required to silence the scruples of the clergy and people. The popularity of the emperor was lost in the purple: in a reign of six years he provoked the hatred of strangers and subjects; and the hypocrisy and avarice of the first Nicephorus were revived in his successor. Hypocrisy I shall never justify or palliate; but I will dare to observe, that the odious vice of avarice is of all others most haughtily arraigned, and most unmercifully condemned. In a private citizen, our judgment seldom expects an accurate scrutiny into his fortune and expense; and in a steward of the public treasurers, frugality is always a virtue, and the increase of taxes too often an indispensable duty. In the use of his patrimony, the generous temper of Nicephorus had been proved; and the revenue was strictly applied to the service of the state: each spring the emperor marched in person against the Saracens; and every Roman might compute the employment of his taxes in triumphs, conquests, and the security of the Eastern barrier.

Among the warriors who promoted his elevation, and served under his standard, a noble and valiant Armenian had deserved and obtained the most eminent rewards. The stature of John Zimisces was below the ordinary standard; but this diminutive body was endowed with strength, beauty, and the soul of an hero. By the jealousy of the emperor’s brother, he was degraded from the office of general of the East, to that of director
director of the posts, and his murmurs were chastised with disgrace and exile. But Zimisces was ranked among the numerous lovers of the empress: on her intercession, he was permitted to reside at Chalcedon, in the neighbourhood of the capital: her bounty was repaid in his clandestine and amorous visits to the palace; and Theophano contented, with alacrity, to the death of an ugly and penurious husband. Some bold and trifty conspirators were concealed in her most private chambers: in the darkness of a winter night, Zimisces, with his principal companions, embarked in a small boat, traversed the Bosphorus, landed at the palace stairs, and silently ascended a ladder of ropes, which was cast down by the female attendants. Neither his own suspicions, nor the warnings of his friends, nor the tardy aid of his brother Leo, nor the fortress which he had erected in the palace, could protect Nicephorus from a domestic foe, at whose voice every door was opened to the assassins. As he slept on a bear-skin, on the ground, he was roused by their noisy intrusion, and thirty daggers glittered before his eyes. It is doubtful whether Zimisces imbrued his hands in the blood of his sovereign; but he enjoyed the inhuman spectacle of revenge. The murder was protracted by insult and cruelty; and as soon as the head of Nicephorus was shewn from the window, the tumult was hushed, and the Armenian was emperor of the East. On the day of his coronation, he was stopped on the threshold of St. Sophia, by the intrepid patriarch; who charged his conscience with the deed of treason and blood; and required, as a sign of repentance, that he should separate himself from his more criminal associate. This Sally of apostolic zeal was not offensive to the prince, since he could neither love nor trust a woman who had repeatedly

Ly violated the most sacred obligations; and Theophano, instead of sharing his Imperial fortune, was dismissed with ignominy from his bed and palace. In their last interview, she displayed a frantic and impotent rage; accused the ingratitude of her lover; assaulted, with words and blows, her son Basil, as he stood silent and submissive in the presence of a superior colleague; and avowed her own prostitution, in proclaiming the illegitimacy of his birth. The public indignation was appeased by her exile, and the punishment of the meaner accomplices: the death of an unpopular prince was forgiven; and the guilt of Zimisces was forgotten in the splendour of his virtues. Perhaps his profusion was less useful to the state than the avarice of Nicephorus; but his gentle and generous behaviour delighted all who approached his person; and it was only in the paths of victory that he trod in the footsteps of his predecessor. The greatest part of his reign was employed in the camp and the field: his personal valour and activity were signalized on the Danube and the Tigris, the ancient boundaries of the Roman world; and by his double triumph over the Russians and the Saracens, he deserved the titles of favour of the empire, and conqueror of the East. In his last return from Syria, he observed that the most fruitful lands of his new provinces were possessed by the eunuchs. "And is it for them," he exclaimed, with honest indignation, "that we have fought and conquered? Is it for them that we shed our blood, and exhaust the treasures of our people?" The complaint was re-echoed to the palace, and the death of Zimisces is strongly marked with the suspicion of poison.

Under this usurpation, or regency, of twelve years, the two lawful emperors, Basil and Constantine, had silently grown to the age of manhood.

OF THE ROMAN EMPIRE.

hood. Their tender years had been incapable of dominion; the respectful modesty of their attendance and salutation, was due to the age and merit of their guardians; the childless ambition of those guardians had no temptation to violate their right of succession; their patrimony was ably and faithfully administered; and the premature death of Zimisces was a loss, rather than a benefit, to the sons of Romanus. Their want of experience detained them twelve years longer the obscure and voluntary pupils of a minister, who extended his reign by persuading them to indulge the pleasures of youth, and to disdain the labours of government. In this silken web, the weakness of Constantine was for ever entangled; but his elder brother felt the impulse of genius and the desire of action; he frowned, and the minister was no more. Basil was the acknowledged sovereign of Constantinople and the provinces of Europe; but Asia was oppressed by two veteran generals, Phocas and Sclerus, who, alternately friends and enemies, subjects and rebels, maintained their independence, and laboured to emulate the example of successful usurpation. Against these domestic enemies, the son of Romanus first drew his sword, and they trembled in the presence of a lawful and high-spirited prince. The first in the front of battle was thrown from his horse, by the stroke of poison, or an arrow: the second, who had been twice loaded with chains, and twice invested with the purple, was furious of ending in peace the small remainder of his days. As the aged supplicant approached the throne, with dim eyes and faltering steps, leaning on his two attendants, the emperor exclaimed, in the influence of youth and power, "And is this the man who has so long been the object of our terror?" After he had confirmed his own authority,
authority, and the peace of the empire, the
trophies of Nicephorus and Zimisces would not
suffer their royal pupil to sleep in the palace.
His long and frequent expeditions against the
Saracens were rather glorious, than useful to
the empire; but the final destruction of the
kingdom of Bulgaria appears, since the time of
Elefarius, the most important triumph of the
Roman arms. Yet instead of applauding their
victorious prince, his subjects detested the rapa-
cious and rigid avarice of Basil; and in the im-
perfect narrative of his exploits, we can only
discern the courage, patience, and ferociousness,
of a soldier. A vicious education, which could
not subdue his spirit, had clouded his mind; he
was ignorant of every science; and the remem-
brance of his learned and feeble grandfather might
encourage his real or affected contempt of laws
and lawyers, of artists and arts. Of such a
character, in such an age, superstition took a
firm and lasting possession; after the first licence
of his youth, Basil the second devoted his life,
in the palace and the camp, to the penance of
an hermit, wore the monastic habit under his
robes and armour, observed a vow of continence,
and imposed on his appetites a perpetual absti-
tence from wine and flesh. In the sixty-eighth
year of his age, his martial spirit urged him to
embark in person for a holy war against the Sa-
racens of Sicily; he was prevented by death,
and Basil, surnamed the Slayer of the Bulgari-
ans, was dismissed from the world, with the
blessings of the clergy and the curses of the
people. After his decease, his brother Constan-
tine enjoyed, about three years, the power, or
rather the pleasures, of royalty; and his only
care was the settlement of the succession. He
had enjoyed, sixty-six years, the title of Au-
gustus; and the reign of the two brothers is the
longest,
longest, and most obscure, of the Byzantine history.

A lineal succession of five emperors, in a period of an hundred and sixty years, had attached the loyalty of the Greeks to the Macedonian dynasty, which had been thrice respected by the usurpers of their power. After the death of Constantine the ninth, the last male of the royal race, a new and broken scene presents itself, and the accumulated years of twelve emperors do not equal the space of his single reign. His elder brother had preferred his private chastity to the public interest, and Constantine himself had only three daughters; Eudocia, who took the veil, and Zoe and Theodora, who were preserved till a mature age in a state of ignorance and virginity. When their marriage was discussed in the council of their dying father, the cold or pious Theodora refused to give an heir to the empire, but her sister Zoe presented herself a willing victim at the altar. Romanus Argyrus, a patrician of a graceful person and fair reputation, was chosen for her husband, and, on his declining that honour, was informed, that blindness or death was the second alternative. The motive of his reluctance was conjugal affection, but his faithful wife sacrificed her own happiness to his safety and greatness; and her entrance into a monastery removed the only bar to the Imperial nuptials. After the decease of Constantine, the sceptre devolved to Romanus the third; but his labours at home and abroad were equally feeble and fruitless; and the mature age, the forty-eight years of Zoe, were less favourable to the hopes of pregnancy than to the indulgence of pleasure. Her favourite chamberlain was an handsome Paphlagonian of the name of Michael, whose first trade had been that of a money-changer; and Romanus, either from gratitude
gratitude or equity, connived at their criminal intercourse, or accepted a slight assurance of their innocence. But Zoe soon justified the Roman maxim, that every adulteress is capable of poisoning her husband; and the death of Romanus was instantly followed by the scandalous marriage and elevation of Michael the fourth. The expectations of Zoe were however disappointed: instead of a vigorous and grateful lover, she had placed in her bed, a miserable wretch whose health and reason were impaired by epileptic fits, and whose conscience was tormented by despair and remorse. The most skilful physicians of the mind and body were summoned to his aid; and his hopes were amusèd by frequent pilgrimages to the baths, and to the tombs of the most popular saints; the monks applauded his penance, and, except restitution (but to whom should he have restored?) Michael sought every method of expiating his guilt. While he groaned and prayed in sackcloth and ashes, his brother, the eunuch John, smiled at his remorse, and enjoyed the harvest of a crime of which himself was the secret and most guilty author. His administration was only the art of satiating his avarice, and Zoe became a captive in the palace of her fathers and in the hands of her slaves. When he perceived the irretrievable decline of his brother’s health, he introduced his nephew, another Michael, who derived his surname of Calaphates from his father’s occupation in the careening of vessels: at the command of the eunuch, Zoe adopted for her son, the son of a mechanic; and this fictitious heir was invested with the title and purple of the Caesars, in the presence of the senate and clergy. So feeble was the character of Zoe, that she was oppress-
fed by the liberty and power which she recovered by the death of the Paphlagonian; and at the end of four days, she placed the crown upon the head of Michael the fifth, who had protested, with tears and oaths, that he should ever reign the first and most obedient of her subjects. The only act of his short reign, was his base ingratitude to his benefactors, the eunuch and the empress. The disgrace of the former was pleasing to the public; but the murmurs, and at length the clamours, of Constantinople deplored the exile of Zoe, the daughter of so many emperors; her vices were forgotten, and Michael was taught, that there is a period in which the patience of the tamest slaves rises into fury and revenge. The citizens of every degree assembled in a formidable tumult which lasted three days; they besiegued the palace, forced the gates, recalled their mothers, Zoe from her prison, Theodora from her monastery, and condemned the son of Calaphates to the loss of his eyes or of his life. For the first time, the Greeks beheld with surprise the two royal sisters seated on the same throne, presiding in the senate, and giving audience to the ambassadors of the nations. But this singular union subsisted no more than two months; the two sovereigns, their tempers, interests, and adherents, were secretly hostile to each other; and as Theodora was still averse to marriage, the indefatigable Zoe, at the age of sixty, contented, for the public good, to sustain the embraces of a third husband, and the censures of the Greek church. His name and number were Constantine the tenth, and the epithet of Monomachus, the single combatant, must have been expressive of his valour and victory in some public or private quarrel. But his health was broken by the tortures of the gout, and his dissolute reign was spent in
in the alternative of sickness and pleasure. A
fair and noble widow had accompanied Con-
stantine in his exile to the isle of Lebos, and
Sclerena gloried in the appellation of his mistres.
After his marriage and elevation, she was in-
vested with the title and pomp of Augusta, and
occupied a contiguous apartment in the palace.
The lawful comfort (such was the delicacy or
corruption of Zoe) contented to this strange
and scandalous partition; and the emperor ap-
peared in public between his wife and his concu-
bine. He survived them both; but the last
measures of Constantine to change the order of
succession were prevented by the more vigilant
friends of Theodora; and after his decease, she
resumed, with the general consent, the possessi-
on of her inheritance. In her name, and by the in-
fluence of four eunuchs, the Eastern world was
peaceably governed about nineteen months; and
as they wished to prolong their dominion, they
persuaded the aged prince to nominate for her
successor Michael the sixth. The surname of
Stratioticus declares his military profession; but
the crazy and decrepit veteran could only see
with the eyes, and execute with the hands, of
his ministers. Whilst he ascended the throne,
Theodora sunk into the grave; the last of the
Macedonian or Basilian dynasty. I have hastily
reviewed, and gladly dismiss, this shameful and
destructive period of twenty-eight years, in
which the Greeks, degraded below the common
level of servitude, were transferred like a herd
of cattle by the choice or caprice of two impor-
tent females.

From this night of slavery, a ray of freedom,
or at least of spirit, begins to emerge: the Greeks
either preferred or revived the use of surnames,
which perpetuate the fame of hereditary virtue;
and we now discern the rise, succession, and alliances of the last dynasties of Constantinople and Trebizond. The Comneni, who upheld for a while the fate of the sinking empire, assumed the honour of a Roman origin: but the family had been long since transported from Italy to Asia. Their patrimonial estate was situate in the district of Caftamona in the neighbourhood of the Euxine; and one of their chiefs, who had already entered the paths of ambition, revisited with affection, perhaps with regret, the modest though honourable dwelling of his fathers. The first of their line was the illustrious Manuel, who, in the reign of the second Basil, contributed by war and treaty to appease the troubles of the East: he left in a tender age, two sons, Isaac and John, whom, with the consciousness of desert, he bequeathed to the gratitude and favour of his sovereign. The noble youths were carefully trained in the learning of the monastery, the arts of the palace, and the exercises of the camp: and from the domestic service of the guards, they were rapidly promoted to the command of provinces and armies. Their fraternal union doubled the force and reputation of the Comneni, and their ancient nobility was illustrated by the marriage of the two brothers, with a captive princess of Bulgaria, and the daughter of a patrician, who had obtained the name of Charon from the number of enemies whom he had sent to the infernal shades. The soldiers had served with reluctant loyalty a series of effeminate masters; the elevation of Michael the sixt was a personal insult to the more deserving generals; and their discontent was inflamed by the parsimony of the emperor and the insolence of the eunuchs. They secretly assembled in the sanctuary of St. Sophia, and the votes of the military synod would have been unanimous in favour of the old and

CHAP. and valiant Catacalon, if the patriotism or modesty of the veteran had not suggested the importance of birth as well as merit in the choice of a sovereign. Isaac Comnenus was approved by general consent, and the associates separated without delay to meet in the plains of Phrygia at the head of their respective squadrons and detachments. The cause of Michael was defended in a single battle by the mercenaries of the Imperial guard, who were aliens to the public interest, and animated only by a principle of honour and gratitude. After their defeat, the fears of the emperor solicited a treaty, which was almost accepted by the moderation of the Comnenian. But the former was betrayed by his ambassadors, and the latter was prevented by his friends. The solitary Michael submitted to the voice of the people; the patriarch annulled their oath of allegiance; and as he shaved the head of the royal monk, congratulated his beneficial exchange of temporal royalty for the kingdom of heaven: an exchange, however, which the priest, on his own account, would probably have declined. By the hands of the same patriarch, Isaac Comnenus was solemnly crowned: the sword which he inscribed on his coins, might be an offensive symbol, if it implied his title by conquest; but this sword would have been drawn against the foreign and domestic enemies of the state. The decline of his health and vigour suspended the operation of active virtue; and the prospect of approaching death determined him to interpose some moments between life and eternity. But instead of leaving the empire as the marriage portion of his daughter, his reason and inclination concurred in the preference of his brother John, a soldier, a patriot, and the father of five sons, the future pillars of an hereditary succession. His first modest reluctance might be the natural dictates of discretion and tenderness, but his obstinate and successful

successful perseverance, however it may dazzle
with the shew of virtue, must be cenfured as a
criminal desertion of his duty, and a rare offence
against his family and country. The purple
which he had refused was accepted by Constan-
tine Ducas, a friend of the Comnenian house,
and whose noble birth was adorned with the ex-
perience and reputation of civil policy. In the
monastic habit, Isaac recovered his health, and
survived two years his voluntary abdication. At
the command of his abbot, he observed the rule
of St. Basil, and executed the most servile offices
of the convent: but his latent vanity was gratified
by the frequent and respectful visits of the reign-
ing monarch, who revered in his person the cha-
acter of a benefactor and a saint.

If Constantine the eleventh were indeed the
subject most worthy of empire, we must pity the
debasement of the age and nation in which he
was chosen. In the labour of puerile declama-
tions he sought, without obtaining, the crown
of eloquence, more precious in his opinion, than
that of Rome; and, in the subordinate functions
of a judge, he forgot the duties of a sovereign
and a warrior. Far from imitating the patriotic
indifference of the authors of his greatness,
Ducas was anxious only to secure, at the ex-
pense of the republic, the power and prosperity
of his children. His three sons, Michael the
seventh, Andronicus the first, and Constantine
the twelfth, were invested, in a tender age, with
the equal title of Augustus; and the succession
was speedily opened by their father's death. His
widow, Eudocia, was entrusted with the admi-
nistration; but experience had taught the jealousy
of the dying monarch to protect his sons from
the danger of her second nuptials; and her so-
lemn engagement, attested by the principal fe-
nators, was deposited in the hands of the patri-
arch.
arch. Before the end of seven months, the
wants of Eudocia, or those of the state, called
aloud for the male virtues of a soldier; and her
heart had already chosen Romanus Diogenes,
whom she raised from the scaffold to the throne.
The discovery of a treasonable attempt had exposed
him to the severity of the laws: his beauty and
valour absolved him in the eyes of the empress;
and Romanus, from a mild exile, was recalled
on the second day to the command of the Oriental
armies. Her royal choice was yet unknown to
the public; and the promise which would have
betrayed her falsehood and levity, was stolen by
a dextrous emissary from the ambition of the pa-
triarch. Xiphilin at first alluded the sanctity
of oaths and the sacred nature of a trust; but a
whisper, that his brother was the future emperor,
relaxed his scruples, and forced him to confess
that the public safety was the supreme law. He
resigned the important paper; and when his
hopes were confounded by the nomination of
Romanus, he could no longer regain his security,
retract his declarations, nor oppose the second
nuptials of the empress. Yet a murmur was
heard in the palace; and the Barbarian guards
had raised their battle-axes in the cause of the
house of Ducas, till the young princes were
soothed by the tears of their mother and the so-
lemn assurances of the fidelity of their guardian,
who filled the Imperial station with dignity and
honour. Hereafter I shall relate his valiant, but
unsuccessful, efforts to resist the progress of the
Turks. His defeat and captivity inflicted a dead-
ly wound on the Byzantine monarchy of the
East; and after he was released from the chains
of the sultan, he vainly fought his wife and his
subjects. His wife had been thrust into a mo-
nastery, and the subjects of Romanus had em-
braced the rigid maxim of the civil law, that a
prisoner
prisoner in the hands of the enemy is deprived, as by the stroke of death, of all the public and private rights of a citizen. In the general consternation, the Caesar John asserted the indefeasible right of his three nephews: Constantinople listened to his voice; and the Turkish captive was proclaimed in the capital, and received on the frontier, as an enemy of the republic. Romanus was not more fortunate in domestic than in foreign war: the loss of two battles compelled him to yield, on the assurance of fair and honourable treatment; but his enemies were devoid of faith or humanity; and, after the cruel extinction of his fight, his wounds were left to bleed and corrupt, till in a few days he was relieved from a state of misery. Under the triple reign of the house of Ducas, the two younger brothers were reduced to the vain honours of the purple; but the eldest, the pusillánimous Michael, was incapable of sustaining the Roman sceptre; and his surname of Parapinaces denotes the reproach which he shared with an avaricious favourite, who enhanced the price, and diminished the measure of wheat. In the school of Pfellus, and after the example of his mother, the son of Eudocia made some proficiency in philosophy and rhetoric; but his character was degraded, rather than ennobled, by the virtues of a monk and the learning of a sophist. Strong in the contempt of their sovereign and their own esteem, two generals, at the head of the European and Asiatic legions, assumed the purple at Adrianople and Nice. Their revolt was in the same month; they bore the same name of Nicephorus; but the two candidates were distinguished by the surnames of Bryennius and Botaniates; the former in the maturity of wisdom and courage, the latter conspicuous only by the memory of his past exploits. While Botaniates advanced with cautious
cautious and dilatory steps, his active competitor stood in arms before the gates of Constantinople. The name of Bryennius was illustrious; his cause was popular; but his licentious troops could not be restrained from burning and pillaging a suburb; and the people, who would have hailed the rebel, rejected and repulsed the incendiary of his country. This change of the public opinion was favourable to Botaniates, who at length, with an army of Turks, approached the shores of Chalcedon. A formal invitation, in the name of the patriarch, the synod, and the senate, was circulated through the streets of Constantinople; and the general assembly, in the dome of St. Sophia, debated, with order and calmness, on the choice of their sovereign. The guards of Michael would have dispersed this unarmed multitude; but the feeble emperor, applauding his own moderation and clemency, resigned the ensigns of royalty, and was rewarded with the monastic habit, and the title of archbishop of Ephesus. He left a son, a Constantine, born and educated in the purple; and a daughter of the house of Ducas illustrated the blood, and confirmed the succession, of the Comnenian dynasty.

John Comnenus, the brother of the emperor Isaac, survived in peace and dignity his generous refusal of the sceptre. By his wife Anne, a woman of masculine spirit and policy, he left eight children: the three daughters multiplied the Comnenian alliances with the noblest of the Greeks: of the five sons, Manuel was stopped by a premature death; Isaac and Alexius restored the Imperial greatness of their house, which was enjoyed without toil or danger, by the two younger brethren, Adrian and Nicephorus. Alexius, the third and most illustrious of the brothers, was endowed by nature with

the choicest gifts both of mind and body: they were cultivated by a liberal education, and exercised in the school of obedience and adversity. The youth was dismissed from the perils of the Turkish war, by the paternal care of the emperor Romanus; but the mother of the Comneni, with her aspiring race, was accused of treason, and banished, by the sons of Ducas, to an island in the Propontis. The two brothers soon emerged into favour and action, fought by each other's side against the rebels and Barbarians, and adhered to the emperor Michael, till he was deserted by the world and by himself. In his first interview with Botaniates, "Prince," said Alexius, with a noble frankness, "my duty rendered me your enemy; the decrees of God and of the people have made me your subject. Judge of my future loyalty, by my past opposition." The successor of Michael entertained him with esteem and confidence: his valour was employed against three rebels, who disturbed the peace of the empire, or at least of the emperors. Ursel, Bryennius, and Basilacius, were formidable by their numerous forces and military fame; they were successively vanquished in the field, and led in chains to the foot of the throne; and whatever treatment they might receive from a timid and cruel court, they applauded the clemency, as well as the courage, of their conqueror. But the loyalty of the Comneni was soon tainted by fear and suspicion; nor is it easy to settle between a subject and a despot, the debt of gratitude, which the former is tempted to claim by a revolt, and the latter to discharge by an executioner. The refusal of Alexius to march against a fourth rebel, the husband of his sister, destroyed the merit or memory of his past services: the favourites of Botaniates provoked the ambition which

which they apprehended and accused; and the
retreat of the two brothers might be justified
by the defence of their life or liberty. The
women of the family were deposited in a san-
tuary, respected by tyrants: the men mounted
on horseback, sallied from the city, and erected
the standard of civil war. The soldiers, who
had been gradually assembled in the capital and
the neighbourhood, were devoted to the cause
of a victorious and injured leader: the ties of
common interest and domestic alliance secured
the attachment of the house of Ducas; and the
generous dispute of the Comneni was termi-
nated by the decisive resolution of Isaac, who
was the first to invest his younger brother with
the name and ensigns of royalty. They returned
to Constantinople, to threaten rather than be-
siege that impregnable fortress; but the fidelity
of the guards was corrupted; a gate was sur-
prised; and the fleet was occupied by the active
courage of George Palæologus, who fought
against his father, without foreseeing that he la-
boured for his posterity. Alexius ascended the
throne; and his aged competitor disappeared in
a monastery. An army of various nations was
gratified with the pillage of the city; but the
public disorders were expiated by the tears and
fauls of the Comneni, who submitted to every
penance compatible with the possession of the
empire.

The life of the emperor Alexius has been de-
lineated by a favourite daughter, who was in-
spired by a tender regard for his person and
a laudable zeal to perpetuate his virtues. Con-
scious of the just suspicion of her readers, the
princess Anne Comnena repeatedly protests,
that, besides her personal knowledge, she had
searched the discourse and writings of the
most respectable veterans: that after an inter-
val
val of thirty years, forgotten by, and forget-ful of, the world, her mournful lolidude was inaccessible to hope and fear; and that truth, the naked perfect truth, was more dear and sacred than the memory of her parent. Yet instead of the simplicity of style and narrative which wins our belief, an elaborate affectation of rhetoric and science, betrays in every page the vanity of the female author. The genuine character of Alexius is lost in a vague constellation of virtues; and the perpetual strain of panegyric and apology, awakens our jealousy, to question the veracity of the historian and the merit of the hero. We cannot however refuse her judicious and important remark, that the disorders of the times were the misfortune and the glory of Alexius; and that every calamity which can afflict a declining empire was accumulated on his reign by the justice of Heaven and the vices of his predecessors. In the East, the victorious Turks had spread, from Persia to the Hellespont, the reign of the Koran and the Crescent: the West was invaded by the adventurous valour of the Normans; and, in the moments of peace, the Danube poured forth new swarms, who had gained, in the science of war, what they had lost in the ferociouness of manners. The sea was not less hostile than the land; and while the frontiers were assaulted by an open enemy, the palace was distracted with secret treason and conspiracy. On a sudden, the banner of the Crois was displayed by the Latins: Europe was precipitated on Asia; and Constantinople had almost been swept away by this impetuous deluge. In the tempest Alexius steered the Imperial vessel with dexterity and courage. At the head of his armies, he was bold in action, skilful in stratagem, patient of fatigue, ready to
to improve his advantages, and rising from his defeats with inexhaustible vigour. The discipline of the camp was revived, and a new generation of men and soldiers was created by the example and the precepts of their leader. In his intercourse with the Latins, Alexius was patient and artful: his discerning eye pervaded the new system of an unknown world; and I shall hereafter describe the superior policy with which he balanced the interests and passions of the champions of the first crusade. In a long reign of thirty-seven years, he subdued and pardoned the envy of his equals: the laws of public and private order were restored: the arts of wealth and science were cultivated: the limits of the empire were enlarged in Europe and Asia; and the Comnenian sceptre was transmitted to his children of the third and fourth generation. Yet the difficulties of the times betrayed some defects in his character; and have exposed his memory to some just or ungenerous reproach. The reader may possibly smile at the lavish praise which his daughter so often bestows on a flying hero: the weakness or prudence of his situation might be mistaken for a want of personal courage; and his political arts are branded by the Latins with the names of deceit and dissimulation. The increase of the male and female branches of his family adorned the throne and secured the succession; but their princely luxury and pride offended the patricians, exhausted the revenue, and insulted the misery of the people. Anna is a faithful witness that his happiness was destroyed, and his health was broken, by the cares of a public life; the patience of Constantinople was fatigued by the length and severity of his reign; and before Alexius expired, he had lost the love and reverence of his subjects.
subjects. The clergy could not forgive his application of the sacred riches to the defence of the state; but they applauded his theological learning and ardent zeal for the orthodox faith, which he defended with his tongue, his pen, and his sword. His character was degraded by the superstition of the Greeks; and the same inconsistent principle of human nature enjoined the emperor to found an hospital for the poor and infirm, and to direct the execution of an heretic, who was burnt alive in the square of St. Sophia. Even the sincerity of his moral and religious virtues was suspected by the persons who had passed their lives in his familiar confidence. In his last hours, when he was pressed by his wife Irene to alter the succession, he raised his head, and breathed a pious ejaculation on the vanity of this world. The indignant reply of the empress may be inscribed as an epitaph on his tomb, "You die, as you have lived—an hypocrite!"

It was the wish of Irene to supplant the eldest of her surviving sons, in favour of her daughter the princess Anne, whose philosophy would not have refused the weight of a diadem. But the order of male succession was affected by the friends of their country; the lawful heir drew the royal signet from the finger of his insensible or conscious father, and the empire obeyed the master of the palace. Anna Comnena was stimulated by ambition and revenge to conspire against the life of her brother, and when the design was prevented by the fears or scruples of her husband, she passionately exclaimed, that nature had mistaken the two sexes, and had endowed Bryennius with the soul of a woman. The two sons of Alexius, John and Isaac, maintained the fraternal concord, the hereditary virtue of their race; and the younger brother was content with
THE DECLINE AND FALL

CHAP. with the title of Sebaftocrator, which app
roached the dignity, without sharing the
power, of the emperor. In the same person,
the claims of primogeniture and merit were for-
tunately united; his swarthy complexion, harsh
features, and diminutive stature, had suggested
the ironical surname of Calo-Johannes, or John
the Handsome, which his grateful subjects more
seriously applied to the beauties of his mind.
After the discovery of her treason, the life and
fortune of Anne were justly forfeited to the
laws. Her life was spared by the clemency of
the emperor, but he visited the pomp and trea-
ures of her palace, and bestowed the rich con-
fiscation on the most deserving of his friends.
That respectable friend, Axuch, a slave of
Turkish extraction, preferred to decline the gift,
and to intercede for the criminal: his gene-
rous master applauded and imitated the virtue
of his favourite, and the reproach or complaint
of an injured brother was the only chastisement
of the guilty princess. After this example
of clemency, the remainder of his reign was
never disturbed by conspiracy or rebellion:
feared by his nobles, beloved by his people,
John was never reduced to the painful necessity
of punishing, or even of pardoning, his personal
enemies. During his government of twenty-
five years, the penalty of death was abolished in
the Roman empire, a law of mercy most deli-
ghtful to the humane theorist, but of which
the practice, in a large and vicious community,
is seldom consistent with the public safety. Se-
vere to himself, indulgent to others, chaste, fru-
gal, abstemious, the philosophic Marcus would
not have disdained the artless virtues of his suc-
cessor, derived from his heart, and not bor-
rowed from the schools. He despised and mo-
derated the stately magnificence of the Byzan-
tine court, so oppressive to the people, so con-
temptible
OF THE ROMAN EMPIRE.

temptible to the eye of reason. Under such a prince, innocence had nothing to fear, and merit had every thing to hope; and without assuming the tyrannic office of a censor, he introduced a gradual though visible reformation in the public and private manners of Constantinople. The only defect of this accomplished character, was the frailty of noble minds, the love of arms and military glory. Yet the frequent expeditions of John the Handiome may be justified, at least in their principle, by the necessity of repelling the Turks from the Hellepont and the Bosphorus. The sultan of Iconium was confined to his capital, the Barbarians were driven to the mountains, and the maritime provinces of Asia enjoyed the transient blessings of their deliverance. From Constantinople to Antioch and Aleppo, he repeatedly marched at the head of a victorious army, and in the sieges and battles of this holy war, his Latin allies were astonished by the superior spirit and prowess of a Greek. As he began to indulge the ambitious hope of restoring the ancient limits of the empire, as he revolved in his mind, the Euphrates and Tigris, the dominion of Syria, and the conquest of Jerusalem, the thread of his life and of the public felicity was broken by a singular accident. He hunted the wild boar in the valley of Anazarbus, and had fixed his javelin in the body of the furious animal; but in the struggle, a poisoned arrow dropt from his quiver, and a slight wound in his hand, which produced a mortification, was fatal to the best and greatest of the Comnenian princes.

A premature death had swept away the two eldest sons of John the Handiome; of the two survivors, Isaac and Manuel, his judgment or affection preferred the younger; and the choice of their dying prince was ratified by the soldiers who
who had applauded the valour of his favourite in the Turkish war. The faithful Alexius hastened to the capital, secured the person of Isaac in honourable confinement, and purchased with a gift of two hundred pounds of silver, the leading ecclesiastics of St. Sophia, who possessed a decisive voice in the consecration of an emperor. With his veteran and affectionate troops, Manuel soon visited Constantinople; his brother acquired in the title of Sebasticrator; his subjects admired the lofty stature and martial graces of their new sovereign, and listened with credulity to the flattering promise, that he blended the wisdom of age with the activity and vigour of youth. By the experience of his government, they were taught that he emulated the spirit, and shared the talents, of his father, whose social virtues were buried in the grave. A reign of thirty-seven years is filled by a perpetual though various warfare against the Turks, the Christians, and the hords of the wilderness beyond the Danube. The arms of Manuel were exercised on mount Taurus, in the plains of Hungary, on the coast of Italy and Egypt, and on the seas of Sicily and Greece: the influence of his negotiations extended from Jerusalem to Rome and Russia; and the Byzantine monarchy, for a while, became an object of respect of terror to the powers of Asia and Europe. Educated in the silk and purple of the East, Manuel possessed the iron temper of a soldier, which cannot easily be paralleled, except in the lives of Richard the first of England, and of Charles the twelfth of Sweden. Such was his strength and exercise in arms, that Raymond, surnamed the Hercules of Antioch, was incapable of wielding the lance and buckler of the Greek emperor. In a famous tournament, he entered the list on a fiery courser, and overturned in his first career.
two of the stoutest of the Italian knights. The first in the charge, the last in the retreat, his friends and his enemies alike trembled, the former for his safety, and the latter for their own. After posting an ambush in a wood, he rode forwards in search of some perilous adventure, accompanied only by his brother and the faithful Axuch, who refused to desert their sovereign. Eighteen horsemen, after a short combat, fled before them: but the numbers of the enemy overmatched; the march of the reinforcement was tardy and fearful, and Manuel, without receiving a wound, cut his way through a squadron of five hundred Turks. In a battle against the Hungarians, impatient of the slowness of his troops, he snatched a standard from the head of the column, and was the first, almost alone, who passed a bridge that separated him from the enemy. In the same country, after transporting his army beyond the Save, he sent back the boats, with an order, under pain of death, to their commander, that he should leave him to conquer or die on that hostile land. In the siege of Corfu, towing after him a captive galley, the emperor stood aloft on the poop, opposing against the volleys of darts and stones, a large buckler and a flowing sail, nor could he have escaped inevitable death, had not the Sicilian admiral enjoined his archers to respect the person of an hero. In one day, he is said to have slain above forty of the Barbarians with his own hand; he returned to the camp, dragging along four Turkish prisoners, whom he had tied to the rings of his saddle: he was ever the foremost to provoke or to accept a single combat; and the gigantic champions, who encountered his arm, were transpierced by the lance, or cut asunder by the sword, of the invincible Manuel. The story of his exploits, which appear as a model
of the romances of chivalry, may induce a reasonable suspicion of the veracity of the Greeks: I will not, to vindicate their credit, endanger my own; yet I may observe, that in the long series of their annals, Manuel is the only prince who has been the subject of similar exaggeration. With the valour of a soldier, he did not unite the skill or prudence of a general: his victories were not productive of any permanent or useful conquest; and his Turkish laurels were blasted in his last unfortunate campaign, in which he lost his army in the mountains of Pisidia, and owed his deliverance to the generosity of the sultan. But the most singular feature in the character of Manuel, is the contrast and vicissitude of labour and sloth, of hardiness and effeminacy. In war he seemed ignorant of peace, in peace he appeared incapable of war. In the field he slept in the sun or in the snow, tired in the longest marches the strength of his men and horses, and shared with a smile the abstinence or diet of the camp. No sooner did he return to Constantinople, than he resigned himself to the arts and pleasures of a life of luxury: the expense of his dress, his table, and his palace, surpassed the measure of his predecessors, and whole summer days were idly wasted in the delicious isles of the Propontis, in the incestuous love of his niece Theodora. The double cost of a warlike and dissolute prince, exhausted the revenue, and multiplied the taxes; and Manuel, in the distress of his last Turkish camp, endured a bitter reproach from the mouth of a desperate soldier. As he quenched his thirst, he complained that the water of a fountain was mingled with Christian blood. "It is not the first time," exclaimed a voice from the crowd, "that you have drank, O emperor, the blood of your Christian subjects." Manuel Comnenus was twice
twice married, to the virtuous Bertha or Irene of Germany, and to the beauteous Maria, a French or Latin princess of Antioch. The only daughter of his first wife was destined for Bela an Hungarian prince, who was educated at Constantinople under the name of Alexius; and the confummation of their nuptials might have transferred the Roman sceptre to a race of free and warlike Barbarians. But as soon as Maria of Antioch had given a son and heir to the empire, the presumptive rights of Bela were abolished, and he was deprived of his promised bride; but the Hungarian prince resumed his name and the kingdom of his fathers, and displayed such virtues as might excite the regret and envy of the Greeks. The son of Maria was named Alexius; and at the age of ten years, he ascended the Byzantine throne, after his father's decease had closed the glories of the Comnenian line.

The fraternal concord of the two sons of the great Alexius, had been sometimes clouded by an opposition of interest and passion. By ambition, Isaac the Sebaltocrator was excited to flight and rebellion, from whence he was reclaimed by the firmness and clemency of John the Handsome. The errors of Isaac, the father of the emperors of Trebizond, were shot and venial; but John, the elder of his sons, renounced for ever his religion. Provoked by a real or imaginary insult of his uncle, he escaped from the Roman to the Turkish camp: his apostacy was rewarded with the Sultan's daughter, the title of Chelebi, or noble, and the inheritance of a princely estate; and the fifteenth century, Mahomet the second boasted of his Imperial descent from the Comnenian family. Andronicus, younger brother of John, son of Isaac, and grandson of Alexius Comnenus, is one of the most conspicuous characters of the age; and his genuine adventures might form the subject.
THE DECLINE AND FALL

CHAP. subject of a very singular romance. To justify the choice of three ladies of royal birth, it is incumbent on me to observe, that their fortunate lover was cast in the best proportions of strength and beauty; and that the want of the softer graces was supplied by a manly countenance, a lofty stature, athletic muscles, and the air and deportment of a soldier. The preservation, in his old age, of health and vigour, was the reward of temperance and exercise. A piece of bread and a draught of water was often his sole and evening repast; and if he tasted of a wild boar, or a stag, which he had roasted with his own hands, it was the well-earned fruit of a laborious chase. Dextrous in arms, he was ignorant of fear; his persuasive eloquence could bend to every situation and character of life: his style, though not his practice, was fashioned by the example of St. Paul; and in every deed of mischief, he had a heart to resolve, a head to contrive, and a hand to execute. In his youth, after the death of the emperor John, he followed the retreat of the Roman army; but, in the march through Asia Minor, design or accident tempted him to wander in the mountains; the hunter was encompassed by the Turkish huntsmen, and he remained some time a reluctant or willing captive in the power of the sultan. His virtues and vices recommended him to the favour of his cousin: he shared the perils and the pleasures of Manuel; and while the emperor lived in public incest with his niece Theodora, the affections of her sister Eudocia were seduced and enjoyed by Andronicus. Above the decencies of her sex and rank, she gloried in the name of his concubine; and both the palace and the camp could witness that she slept, or watched, in the arms of her lover. She accompanied him to his military command of Cilicia, the first scene of
of his valour and imprudence. He pressed, with active ardour, the siege of Mopsuestia; the day was employed in the boldest attacks; but the night was wasted in song and dance, and a band of Greek comedians formed the choicest part of his retinue; Andronicus was surprized by the sally of a vigilant foe; but while his troops fled in disorder, his invincible lance transpierced the thickest ranks of the Armenians. On his return to the Imperial camp in Macedonia, he was received by Manuel with public smiles and a private reproof; but the dutchies of Naissus, Bransieba, and Caistora, were the reward or consolation of the unsuccessful general. Eudocia still attended his motions: at midnight, their tent was suddenly attacked by her angry brothers, impatient to expiate her infamy in his blood: his daring spirit refused her advice, and the disguise of a female habit; and boldly starting from his couch, he drew his sword, and cut his way through the numerous assassins. It was here that he first betrayed his ingratitude and treachery; he engaged in a treasonable correspondence with the king of Hungary and the German emperor: approached the royal tent at a suspicious hour, with a drawn sword, and, under the mask of a Latin soldier, avowed an intention of revenge against a mortal foe; and imprudently prailed the fleetness of his horse, as an instrument of flight and safety. The monarch dissembled his suspicions; but after the close of the campaign, Andronicus was arrested and strictly confined in a tower of the palace of Constantinople.

In this prison he was left above twelve years; a most painful restraint, from which the thirst of action and pleasure perpetually urged him to escape. Alone and pensive, he perceived some broken bricks in a corner of the chamber, and gradually
gradually widened the passage, till he had explored a dark and forgotten recess. Into this hole he conveyed himself, and the remains of his provisions, replacing the bricks in their former position, and erasing with care the footsteps of his retreat. At the hour of the customary visit, his guards were amazed by the silence and solitude of the prison, and reported, with shame and fear, his incomprehensible flight. The gates of the palace and city were instantly shut; the strictest orders were dispatched into the provinces, for the recovery of the fugitive; and his wife, on the suspicion of a pious act, was safely imprisoned in the same tower. At the dead of night, she beheld a spectre: she recognized her husband; they shared their provisions; and a fan was the fruit of these stolen interviews, which alleviated the tediousness of their confinement. In the custody of a woman, the vigilance of the keepers was insensibly relaxed; and the captive had accomplished his real escape, when he was discovered, brought back to Constantinople, and loaded with a double chain. At length he found the moment, and the means, of his deliverance. A boy, his domestic servant, intoxicated the guards, and obtained in wax the impression of the keys. By the diligence of his friends, a similar key, with a bundle of ropes, was introduced into the prison, in the bottom of a hoghead. Andronicus employed, with industry and courage, the instruments of his safety, unlocked the doors, descended from the tower, concealed himself all day among the bushes, and scaled in the night the garden-wall of the palace. A boat was stationed for his reception: he visited his own house, embraced his children, cast away his chain, mounted a fleet horse, and directed his rapid course towards the banks of the Danube. At Anchialus in Thrace, an intrepid friend supplied
plied him with horses and money: he passed the river, traversed with speed the desert of Moldavia and the Carpathian hills, and had almost reached the town of Halicz, in the Polish Russia, when he was intercepted by a party of Walachians, who resolved to convey their important captive to Constantinople. His presence of mind again extricated him from this danger. Under the pretence of sickness, he dismounted in the night, and was allowed to step aside from the troop: he planted in the ground his long staff; clothed it with his cap and upper garment; and, stealing into the wood, left a phantom to amuse, for some time, the eyes of the Walachians. From Halicz he was honourably conducted to Kiow, the residence of the great duke: the subtle Greek, soon obtained the esteem and confidence of Ieromlaus: his character could assume the manners of every climate; and the Barbarians applauded his strength and courage in the chase of the elk and bears of the forest. In this northern region he deserved the forgiveness of Manuel, who solicited the Russian prince to join his arms in the invasion of Hungary. The influence of Andronicus achieved this important service: his private treaty was signed with a promise of fidelity on one side, and of oblivion on the other; and he marched at the head of the Russian cavalry, from the Borythenes to the Danube. In his resentment Manuel had ever sympathized with the martial and dissolute character of his cousin; and his free pardon was sealed in the assault of Zemlin, in which he was second, and second only, to the valor of the emperor.

No sooner was the exile restored to freedom and his country, than his ambition revived, at first to his own, and at length to the public fortune. A daughter of Manuel was a feeble bar to the succession of the more deserving males of
of the Comnenian blood; her future marriage
with the prince of Hungary was repugnant to
the hopes or prejudices of the princes and nobles.
But when an oath of allegiance was required to
the presumptive heir, Andronicus alone asserted
the honour of the Roman name, declined the un-
lawful engagement, and boldly protested against
the adoption of a stranger. His patriotism was
offensive to the emperor, but he spoke the senti-
ments of the people, and was removed from the
royal presence, by an honourable banishment, a
second command of the Cilician frontier, with
the absolute disposal of the revenues of Cyprus.
In this station, the Armenians again exercised his
courage and exposed his negligence, and the
same rebel, who baffled all his operations, was
unbowed, and almost slain by the vigour of his
lance. But Andronicus soon discovered a more
easy and pleasing conquest, the beautiful Philippa,
sister of the empress Maria, and daughter of
Raymond of Poitou, the Latin prince of Antioch.
For her sake, he deserted his station, and wasted
the summer in balls and tournaments; to his love
she sacrificed her innocence, her reputation, and
the offer of an advantageous marriage. But the
resentment of Manuel for this domestic affront,
interrupted his pleasures. Andronicus left the
indiscreet princes to weep and to repent; and
with a band of desperate adventurers, undertook
the pilgrimage of Jerusalem. His birth, his
martial renown, and professions of zeal, an-
nounced him as the champion of the cross; he
soon captivated both the clergy and the king; and
the Greek prince was invested with the lordship
of Berytus, on the coast of Phœnicia. In his
neighbourhood resided a young and handsome
queen, of his own nation and family, great-
grand-daughter of the emperor Alexis, and wi-
dow of Baldwin the third, king of Jerusalem.
She
OF THE ROMAN EMPIRE.

She visited and loved her kindred. Theodora was the third victim of his amorous seduction; and her shame was more public and scandalous than that of her predecessors. The emperor still thirsted for revenge; and his subjects and allies of the Syrian frontier, were repeatedly pressed to seize the person, and put out the eyes, of the fugitive. In Palestine he was no longer safe; but the tender Theodora revealed his danger and accompanied his flight. The queen of Jerusalem was exposed to the East, his obsequious concubine; and two illegitimate children were the living monuments of her weakness. Damascus was his first refuge; and in the characters of the great Nourreddin and his servant Saladin, the superstitious Greek might learn to revere the virtues of the Moslems. As the friend of Nourreddin he visited, most probably, Bagdad, and the courts of Persia; and, after a long circuit round the Caspian sea and the mountains of Georgia, he finally settled among the Turks of Asia Minor, the hereditary enemies of his country. The sultan of Colonia afforded an hospitable retreat to Andronicus, his mistress, and his band of outlaws: the debt of gratitude was paid by frequent inroads in the Roman province of Trebizond; and he seldom returned without an ample harvest of spoil and of Christian captives. In the story of his adventures, he was fond of comparing himself to David, who escaped, by a long exile, the snares of the wicked. But the royal prophet (he preferred to add) was content to lurk on the borders of Judea, to slay an Amalekite, and to threaten, in his miserable state, the life of the avaricious Nabal. The excursions of the Comnenian prince had a wider range; and he had spread over the Eastern world the glory of his name and religion. By a sentence of the Greek church, the licentious rover had been separated from
from the faithful; but even this excommunication may prove, that he never abjured the profession of Christianity.

His vigilance had eluded or repelled the open and secret persecution of the emperor; but he was at length ensnared by the captivity of his female companion. The governor of Trebizond succeeded in his attempt to surprize the person of Theodora: the queen of Jerusalem and her two children were sent to Constantinople, and their loss embittered the tedious solitude of banishment. The fugitive implored and obtained a final pardon, with leave to throw himself at the feet of his sovereign, who was satisfied with the submission of his haughty spirit. Prostrate on the ground, he deplored with tears and groans the guilt of his past rebellion; nor would he presume to arise unless some faithful subject would drag him to the foot of the throne, by an iron chain with which he had secretly encircled his neck. This extraordinary penance excited the wonder and pity of the assembly; his sins were forgiven by the church and state; but the just suspicion of Manuel fixed his residence at a distance from the court, at Oenoe, a town of Pontus, surrounded with rich vineyards, and situate on the coast of the Euxine. The death of Manuel, and the disorders of the minority, soon opened the fairest field to his ambition. The emperor was a boy of twelve or fourteen years of age, without vigour, or wisdom, or experience: his mother, the empress Mary abandoned her person and government to a favourite of the Comnenian name; and his sister, another Mary, whose husband, an Italian, was decorated with the title of Caesar, excited a conspiracy, and at length an insurrection, against her odious stepmother. The provinces were forgotten, the capital was in flames, and a century of peace and order
OF THE ROMAN EMPIRE.

order was overthrown in the vice and weakness of a few months. A civil war was kindled in Constantinople; the two factions fought a bloody battle in the square of the palace, and the rebels sustained a regular siege in the cathedral of St. Sophia. The patriarch laboured with honest zeal to heal the wounds of the republic, the most respectable patriots called aloud for a guardian and avenger, and every tongue repeated the praise of the talents and even the virtues of Andronicus. In his retirement, he affected to revolve the solemn duties of his oath: "If the safety or honour of the Imperial family be threatened, I will reveal and oppose the mischief to the utmost of my power." His correspondence with the patriarch and patricians, was seasoned with apt quotations from the psalms of David and the epistles of St. Paul; and he patiently waited till he was called to her deliverance by the voice of his country. In his march from Oenoe to Constantinople, his slender train insensibly swelled to a crowd and an army; his professions of religion and loyalty were mistaken for the language of his heart; and the simplicity of a foreign dress, which shewed to advantage his majestic stature, displayed a lively image of his poverty and exile. All opposition funk before him; he reached the straits of the Thracian Bosporus; the Byzantine navy failed from the harbour to receive and transport the favour of the empire: the torrent was loud and irresistible, and the insects who had basked in the sunshine of royal favour disappeared at the blast of the storm. It was the first care of Andronicus to occupy the palace, to salute the emperor, to confine his mother, to punish her minister, and to restore the public order and tranquillity. He then visited the sepulchre of Manuel: the spectators were ordered to stand aloof, but as he bowed
bowed in the attitude of prayer, they heard, or thought they heard, a murmur of triumph and revenge. "I no longer fear thee, my old enemy, who hast driven me a vagabond to every climate of the earth. Thou art safely deposited under a sevenfold dome, from whence thou canst never arise till the signal of the last trumpet. It is now my turn, and speedily will I trample on thy ashes and thy posterity."

From his subsequent tyranny we may impute such feelings to the man, and the moment: but it is not extremely probable that he gave an articulate sound to his secret thoughts. In the first months of his administration, his designs were veiled by a fair semblance of hypocrisy, which could delude only the eyes of the multitude: the coronation of Alexius was performed with due solemnity, and his perfidious guardian, holding in his hands the body and blood of Christ, most fervently declared, that he lived, and was ready to die, for the service of his beloved pupil. But his numerous adherents were instructed to maintain, that the sinking empire must perish in the hands of a child, that the Romans could only be saved by a veteran prince, bold in arms, skilful in policy, and taught to reign by the long experience of fortune and mankind; and that it was the duty of every citizen to force the reluctant modesty of Andronicus to undertake the burthen of the public care. The young emperor was himself constrained to join his voice to the general acclamation, and to solicit the association of a colleague, who instantly degraded him from the supreme rank, secluded his person, and verified the rash declaration of the patriarch, that Alexius might be considered as dead, so soon as he was committed to the custody of his guardian. But his death was preceded by the imprisonment and execution of his mother. After blackening her
OF THE ROMAN EMPIRE.

Her reputation, and inflaming against her the passions of the multitude, the tyrant accused and tried the empress for a treasonable correspondence with the king of Hungary. His own son, a youth of honour and humanity, avowed his abhorrence of this flagitious act, and three of the judges had the merit of preferring their conscience to their safety: but the obsequious tribunal, without requiring any proof, or hearing any defence, condemned the widow of Manuel; and her unfortunate son subscribed the sentence of her death. Maria was strangled, her corpse was buried in the sea, and her memory was wounded by the insult most offensive to female vanity, a false and ugly representation of her beauteous form. The fate of her son was not long deferred: he was strangled with a bowstring, and the tyrant, insensible to pity or remorse, after surveying the body of the innocent youth, struck it rudely with his foot: "Thy father, he cried, "was a knave, thy mother a whore, and thyself "a fool!"

The Roman sceptre, the reward of his crimes, was held by Andronicus about three years and a half as the guardian or sovereign of the empire. His government exhibited a singular contrast of vice and virtue. When he listened to his passions, he was the scourge; when he consulted his reason, the father, of his people. In the exercise of private justice, he was equitable and rigorous: a shameful and pernicious venality was abolished, and the offices were filled with the most deserving candidates by a prince who had sense to chuse, and severity to punish. He prohibited the inhuman practice of pillaging the goods and persons of shipwrecked mariners; the provinces, so long the objects of oppression or neglect, revived in prosperity and plenty; and millions applauded the
the distant blessings of his reign, while he was cursed by the witnesses of his daily cruelties. The ancient proverb, That blood-thirsty is the man who returns from banishment to power, had been applied with too much truth to Marius and Tiberius; and was now verified for the third time in the life of Andronicus. His memory was stored with a black list of the enemies and rivals, who had traduced his merit, opposed his greatness, or insulted his misfortunes; and the only comfort of his exile was the secret hope and promise of revenge. The necessary extinction of the young emperor and his mother, imposed the fatal obligation of extirpating the friends, who hated, and might punish, the assassin; and the repetition of murder rendered him less willing, and less able, to forgive. An horrid narrative of the victims whom he sacrificed by poison or the sword, by the sea or the flames, would be less expressive of his cruelty than the appellation of the Halcyon-days, which was applied to a rare and bloodless week of repose: the tyrant strove to transfer, on the laws and the judges, some portion of his guilt; but the mark was fallen, and his subjects could no longer mistake the true author of their calamities. The noblest of the Greeks, more especially those who, by descent or alliance, might dispute the Comnenian inheritance, escaped from the monster's den: Nice or Prusa, Sicily or Cyprus, were their places of refuge; and as their flight was already criminal, they aggravated their offence by an open revolt, and the Imperial title. Yet Andronicus refisted the daggers and swords of his most formidable enemies: Nice and Prusa were reduced and chastised: the Sicilians were content with the sack of Thessalonica; and the distance of Cyprus was not more propitious to the rebel than to the tyrant. His throne was subverted by

by a rival without merit, and a people without arms. Isaac Angelus, a descen-
dant in the female line from the great Alex-
ius, was marked as a victim, by the prudence
or superstition of the emperor. In a moment
of despair, Angelus defended his life and li-
iberty, flew the executioner, and fled to the
church of St. Sophia. The sanctuary was in-
sensibly filled with a curious and mournful
crowd, who, in his fate, prognosticated their
own. But their lamentations were soon turned
to curses, and their curses to threats: they dared
to ask, "Why do we fear? why do we obey?
"We are many, and he is one; our patience
"is the only bond of our slavery." With the
dawn of day the city burst into a general sedition,
the prisons were thrown open, the coldeft and
most servile were roused to the defence of their
country, and Isaac, the second of the name,
was raised from the sanctuary to the throne. Un-
conscious of his danger, the tyrant was absent;
withdrawn from the toils of state, in the delicious
islands of the Propontis. He had contracted an
indecent marriage with Alice, or Agnes, daugh-
ter of Lewis the seventh, of France, and relïck
of the unfortunate Alexius; and his society,
more suitable to his temper than to his age, was
composed of a young wife and a favourite con-
cubine. On the first alarm he rushed to Constan-
tinople, impatient for the blood of the guilty;
but he was astonished by the silence of the palace,
the tumult of the city, and the general desertion
of mankind. Andronicus proclaimed a free pardon
to his subjects; they neither desired, nor would
grant, forgiveness: he offered to resign the crown
to his son Manuel; but the virtues of the
son could not expiate his Father's crimes. The
sea was still open for his retreat; but the news of
the revolution had flown along the coast: when

fear
fear had ceased, obedience was no more: the Imperial galley was pursued and taken by an armed brigantine; and the tyrant was dragged to the presence of Isaac Angelus, loaded with fetters, and a long chain round his neck. His eloquence, and the tears of his female companions, pleaded in vain for his life; but, instead of the decencies of a legal execution, the new monarch abandoned the criminal to the numerous sufferers, whom he had deprived of a father, an husband, or a friend. His teeth and hair, an eye and a hand, were torn from him, as a poor compensation for their loss; and a short respite was allowed, that he might feel the bitterness of death. Astride on a camel, without any danger of a rescue, he was carried through the city, and the bafelest of the populace rejoiced to trample on the fallen majesty of their prince. After a thousand blows and outrages, Andronicus was hung by the feet between two pillars that supported the statues of a wolf and a lion; and every hand that could reach the public enemy, inflicted on his body some mark of ingenious or brutal cruelty, till two friendly or furious Italians, plunging their swords into his body, released him from all human punishment. In this long and painful agony, "Lord have mercy upon me! and why will you bruise a broken reed?" were the only words that escaped from his mouth. Our hatred for the tyrant is lost in pity for the man; nor can we blame his pusillanimous resignation, since a Greek Christian was no longer master of his life.

I have been tempted to expatiate on the extraordinary character and adventures of Andronicus; but I shall here terminate the series of the Greek emperors since the time of Heraclius. The branches that sprang from the Comnenian trunk had insensibly withered; and the male

line was continued only in the posterity of An-
dronicus himself, who, in the public confusion,
usurped the sovereignty of Trebizond, so ob-
scure in history, and so famous in romance. A
private citizen of Philadelphia, Constantine An-
gelus, had emerged to wealth and honours, by
his marriage with a daughter of the emperor
Alexius. His son Andronicus is conspicuous
only by his cowardice. His grandson Isaac pu-
nished and succeeded the tyrant; but he was
dethroned by his own vices, and the ambition
of his brother; and their discord introduced the
Latin to the conquest of Constantinople, the first
great period in the fall of the Eastern empire.

If we compute the number and duration of
the reigns, it will be found, that a period of six
hundred years is filled by sixty emperors, in-
cluding in the Augustan list some female so-
vereigns; and deducting some usurpers who
were never acknowledged in the capital, and
some princes who did not live to possess their in-
heritance. The average proportion will allow
ten years for each emperor, far below the chro-
nological rule of Sir Isaac Newton, who, from
the experience of more recent and regular mo-
narchies, has defined about eighteen or twenty
years as the term of an ordinary reign. The
Byzantine empire was most tranquil and prospe-
rinous when it could acquiesce in hereditary suc-
cession: five dynasties, the Heraclian, Ifaurian,
Amorian, Basilian, and Comnenian families en-
joyed and transmitted the royal patrimony during
their respective series, of five, four, three, six,
and four generations; several princes number
the years of their reign with those of their in-
fancy; and Constantine the seventh and his two
grandsons occupy the space of an entire century.
But in the intervals of the Byzantine dynasties,
the succession is rapid and broken, and the name
of
of a successful candidate is speedily erased by a more fortunate competitor. Many were the paths that led to the summit of royalty: the fabric of rebellion was overthrown by the stroke of conspiracy, or undermined by the silent arts of intrigue: the favourites of the solders or people, of the senate or clergy, of the women and eunuchs, were alternately cloathed with the purple: the means of their elevation were base, and their end was often contemptible or tragic. A being of the nature of man, endowed with the same faculties, but with a longer measure of existence, would cast down a smile of pity and contempt on the crimes and follies of human ambition, so eager, in a narrow span, to grasp at a precarious and short-lived enjoyment. It is thus that the experience of history exalts and enlarges the horizon of our intellectual view. In a composition of some days, in a perusal of some hours, six hundred years have rolled away, and the duration of a life or reign is contracted to a fleeting moment: the grave is ever beside the throne; the success of a criminal is almost instantly followed by the loss of his prize; and our immortal reason survives and disdains the sixty phantoms of kings who have passed before our eyes, and faintly dwell on our remembrance. The observation, that, in every age and climate, ambition has prevailed with the same commanding energy, may abate the surprize of a philosopher; but while he condemns the vanity, he may search the motive, of this universal desire to obtain and hold the sceptre of dominion. To the greater part of the Byzantine series, we cannot reasonably ascribe the love of fame and of mankind. The virtue alone of John Comnenus, was beneficent and pure: the most illustrious of the princes, who precede or follow that respectable name, have trod with some dexterity and vigour
OF THE ROMAN EMPIRE.

vigour the crooked and bloody paths of a selfish policy: in scrutinizing the imperfect characters of Leo the Maurian, Basil the first, and Alexius Comnenus, of Theophilus, the second Basil, and Manuel Comnenus, our esteem and censure are almost equally balanced; and the remainder of the imperial crowd could only desire and expect to be forgotten by posterity. Was personal happiness the aim and object of their ambition? I shall not descant on the vulgar topics of the misery of kings; but I may surely observe, that their condition, of all others, is the most pregnant with fear, and the least susceptible of hope. For these opposite passions, a larger scope was allowed in the revolutions of antiquity, than in the smooth and solid temper of the modern world, which cannot easily repeat either the triumph of Alexander or the fall of Darius. But the peculiar infelicity of the Byzantine princes exposed them to domestic perils, without affording any lively promise of foreign conquest. From the pinnacle of greatness, Andronicus was precipitated by a death more cruel and shameful than that of the vilest malefactor; but the most glorious of his predecessors had much more to dread from their subjects than to hope from their enemies. The army was licentious without spirit, the nation turbulent without freedom: the Barbarians of the East and West pressed on the monarchy, and the loss of the provinces was terminated by the final servitude of the capital.

The entire series of Roman emperors, from the first of the Cæsars to the last of the Constantines, extends above fifteen hundred years: and the term of dominion unbroken by foreign conquest, surpasses the measure of the ancient monarchies: the Assyrians or Medes, the successors of Cyrus, or those of Alexander.

Introduction, Worship, and Persecution of Images.—Revolt of Italy and Rome.—Temporal Dominion of the Popes.—Conquest of Italy by the Franks.—Establishment of Images.—Character and Coronation of Charlemagne.—Restoration and Decay of the Roman Empire in the West.—Independence of Italy.—Constitution of the Germanic Body.

In the connection of the church and state, I have considered the former as subservient only, and relative, to the latter; a salutary maxim, if in fact, as well as in narrative; it had ever been held sacred. The oriental philosophy of the Gnostics, the dark abyss of predestination and grace, and the strange transformation of the Eucharist from the signs to the substance of Christ's body (1), I have purposely abandoned to the curiosity of speculative divines. But I have reviewed, with diligence and pleasure, the objects of ecclesiastical history, by which the decline and fall of the Roman empire were materially affected, the propagation of Christian unity, the constitution of the Catholic church, the ruin of Paganism, and the facts that arose from the mysterious controversies concerning the Trinity and incarnation. At the head of this class, we may justly rank the worship of images, so fiercely disputed in the eighth and ninth centuries; since a question

of popular superstition produced the revolt of Italy, the temporal power of the popes, and the restoration of the Roman empire in the West.

The primitive Christians were possessed with an unconquerable repugnance to the use and abuse of images; and this aversion may be ascribed to their descent from the Jews, and their enmity to the Greeks. The Mosaic law had severely proscribed all representations of the Deity; and that precept was firmly established in the principles and practice of the chosen people. The wit of the Christian apologists was pointed against the foolish idolaters, who bowed before the workmanship of their own hands; the images of brass and marble, which, had they been endowed with sense and motion, should have fainted rather from the pedestal to adore the creative powers of the artist (2). Perhaps some recent and imperfect converts of the Gnostic tribe, might crown the statues of Christ and St. Paul with the profane honours which they paid to those of Aritos and Pythagoras (3); but the public religion of the Catholics was uniformly simple and spiritual; and the first notice of the use of pictures is in the council of Illyricus, three hundred years after the Christian era. Under the successors of Constantine, in the peace and luxury of the triumphant church, the more prudent bishops condescended to indulge a visible superstition, for the benefit of the multitude; and, after the ruin of Paganism, they were no longer restrained by the apprehension of an odious parallel. The

H 2 first
THE DECLINE AND FALL

first introduction of a symbolic worship was in the veneration of the cross, and of relics. The saints and martyrs, whose intercession was implored, were seated on the right-hand of God; but the gracious and often supernatural favours, which, in the popular belief, were showered round their tomb, conveyed an unquestionable sanction of the devout pilgrims, who visited, and touched, and kissed, these lifeless remains, the memorials of their merits and sufferings (4). But a memorial, more interesting than the skull or the sandals of a departed worthy, is the faithful copy of his person and features, delineated by the arts of painting or sculpture. In every age, such copies, so congenial to human feelings, have been cherished by the zeal of private friendship, or public esteem: the images of the Roman emperors were adored with civil, and almost religious honours; a reverence less ostentatious, but more sincere, was applied to the statues of sages and patriots; and these profane virtues, these splendid fins, disappeared in the presence of the holy men, who had died for their celestial and everlasting country. At first, the experiment was made with caution and scruple; and the venerable pictures were discreetly allowed to instruct the ignorant, to awaken the cold, and to gratify the prejudices of the heathen proselytes. By a slow though inevitable progression, the honours of the original were transferred to the copy: the devout Christian prayed before the image of a saint; and the Pagan rites of genuflexion, luminaries, and incense, again stole into the Catholic church. The scruples of reason, or piety, were silenced by the strong evidence of visions and miracles; and the pictures which speak, and move, and bleed, must

be endowed with a divine energy, and may be considered as the proper objects of religious adoration. The most audacious pencil might tremble in the rash attempt of defining, by forms and colours, the infinite Spirit, the eternal Father, who pervades and sustains the universe (5). But the superstitious mind was more easily reconciled to paint and to worship the angels, and, above all, the Son of God, under the human shape, which, on earth, they have condescended to assume. The second person of the Trinity had been clothed with a real and mortal body; but that body had ascended into heaven; and, had not some similitude been presented to the eyes of his disciples, the spiritual worship of Christ might have been obliterated by the visible relics and representations of the saints. A similar indulgence was requisite, and propitious, for the Virgin Mary: the place of her burial was unknown; and the assumption of her soul and body into heaven was adopted by the credulity of the Greeks and Latins. The use, and even the worship of images, was firmly established before the end of the sixth century: they were fondly cherished by the warm imagination of the Greeks and Asiatics: the Pantheon and Vatican were adorned with the emblems of a new superstition; but this semblance of idolatry was more coldly entertained by the rude Barbarians and the Arian clergy of the West. The bolder forms of sculpture, in brass or marble, which peopled the temples of antiquity, were offensive to the fancy or conscience of the Christian Greeks;

and a smooth surface of colours has ever been esteemed a more decent and harmless mode of imitation (6).

The merit and effect of a copy depends on its resemblance with the original; but the primitive Christians were ignorant of the genuine features of the Son of God, his mother, and his apostles: the statue of Christ at Paneas in Palestine (7) was more probably that of some temporal favour; the Gnostics and their profane monuments were reprobated; and the fancy of the Christian artists could only be guided by the clandestine imitation of some heathen model. In this distress, a bold and dextrous invention assured at once the likeness of the image and the innocence of the worship. A new superstructure of fable was raised on the popular basis of a Syrian legend, on the correspondence of Christ and Abgarus, so famous in the days of Eusebius, so reluctantly defected by our modern advocates. The bishop of Caesarea (8) records the epistle (9), but he most

(6) This general history of images is drawn from the xxxii book of the Hist. des Églises Réformées de Baliage, tom. ii. p 1316—1337. He was a protestant, but of a manly spirit; and on this held the protestants are so notoriously in the right, that they can venture to be impartial. See the perplexity of poor friar Pagi, Critica, tom. i. p. 42.

(7) After removing some rubbish of miracle and inconsistency, it may be allowed, that as late as the year 395, Paneas in Palestine was decorated with a bronze statue, representing a grave personage wrapped in a cloak, with a grateful or suppliant female kneeling before him, and that an inscription—τῷ Αβγαρῷ, τῷ ἁγίῳ—was perhaps inscribed on the pedestal. By the Christians, this group was foolishly explained of their founder and the βασίλισσι woman whom he had cured of the bloody flux (Euseb. vii. 18; Philobog. vii. 3, &c.) M. de Beausobre more reasonably conjectures the philosopher Apollonius, or the emperor Valerian: in the latter supposition, the female is a city, a province, or perhaps the queen Berenice (Bibliothèque Germanique, tom. xiii. p. 1—92).

(8) Euseb. Hist. Ecclef. i. i. c. 13. The learned Affmannus has brought up the collateral side of the three Syrians, St. Ephrem, Jesus Stylites, and James bishop of Sarug; but I do not find any notice of the Syriac original or the archives of Edessa (Bibl. Orient. tom. i. p. 318. 456. 554); their vague belief is probably derived from the Greeks.

(9) The evidence for these epistles is stated and rejected by the candid Lardner (Heathen Telestiotics, vol. i. p. 287—309.) Among the herd of bigots who are forcibly driven from this convenient, but unattainable, post, I am ashamed, with the Grabe, Cuvier, Tilllemont, &c.
most strangely forgets the picture, of Christ (10); the perfect impression of his face on a linen, with which he gratified the faith of the royal stranger, who had invoked his healing power, and offered the strong city of Edessa to protect him against the malice of the Jews. The ignorance of the primitive church is explained by the long imprisonment of the image in a niche of the wall, from whence, after an oblivion of five hundred years, it was released by some prudent bishop, and seasonably presented to the devotion of the times. Its first and most glorious exploit was the deliverance of the city from the arms of Chosroes Nushirvan; and it was soon revered as a pledge of the divine promise, that Edessa should never be taken by a foreign enemy. It is true indeed, that the text of Procopius ascribes the double deliverance of Edessa to the wealth and valour of her citizens, who purchased the absence and repelled the assaults of the Persian monarch. He was ignorant, the profane historian, of the testimony which he is compelled to deliver in the ecclesiastical page of Evagrius, that the Palladium was exposed on the rampart, and that the water which had been sprinkled on the holy face, instead of quenching, added new newfet to the flames of the besieged. After this important service, the image of Edessa was preserved with respect and gratitude; and if the

(10) From the silence of James of Sargu (Assenian. Biblioth. Orient, p. 318. 319.), and the testimony of Evagrius (Hist. Eccles. I. iv. c. 27), I conclude that this fable was invented between the years 521 and 594, most probably after the siege of Edessa in 540 (Assenian, tom. i, p. 416. Procopius, de Bell. Peric. I. ii.). It is the sword and buckler of Gregory II. (in Epist. I. ad Leon. Episc. Concil. tom. viii. p. 656, 657,) of John Damascenus (Ep. ep. tom. i. p. 281. edit. Armenians
Armenians rejected the legend, the more credulous Greeks adored the similitude, which was not the work of any mortal pencil, but the immediate creation of the divine original. The style and sentiments of a Byzantine hymn will declare how far their worship was removed from the grossest idolatry. "How can we with mortal eyes contemplate this image, whose celestial splendour the host of heaven presumes not to behold? He who dwells in heaven conceives this day to visit us by his venerable image: He who is seated on the cherubim, visits us this day by a picture, which the Father has delineated with his immaculate hand, which he has formed in an ineffable manner, and which we sanctify by adoring it with fear and love." Before the end of the sixth century, these images, made without hands (in Greek, it is a single word (11)), were propagated in the camps and cities of the Eastern empire (12): they were the objects of worship, and the instruments of miracles: and in the hour of danger or tumult, their venerable presence could revive the hope, rekindle the courage, or repress the fury, of the Roman legions. Of these pictures, the far greater part, the transcripts of a human pencil, could only pretend to a secondary likeness and improper title: but there were some of higher descent, who derived their remem-

blance from an immediate contact with the original, endowed, for that purpose, with a miraculous and prolific virtue. The most ambitious aspired from a filial to a fraternal relation with the image of Edessa; and such is the Veronica of Rome, or Spain, or Jerusalem, which Christ in his agony and bloody sweat applied to his face, and delivered to an holy matron. The fruitful precedent was speedily transferred to the Virgin Mary, and the saints and martyrs. In the church of Diospolis in Palestine, the features of the Mother of God (13) were deeply inscribed in a marble column: the East and West have been decorated by the pencil of St Luke; and the evangelist, who was perhaps a phlyician, has been forced to exercise the occupation of a painter, so profane and odious in the eyes of the primitive Christians. The Olympian Jove, created by the muse of Homer and the chisel of Phidias, might inspire a philosophic mind with momentary devotion; but these Catholic images were faintly and flatly delineated by monkish artists in the last degeneracy of taste and genius (14).

The worship of images had stolen into the church by insensible degrees, and each petty step was pleasing to the superstitious mind, as productive of comfort and innocent of sin. But in the beginning of the eighth century, in the full magnitude of the abuse, the more timorous Greeks were awakened by an apprehension, that under the mask of Christianity, they had

restored the religion of their fathers: they heard, with grief and impatience, the name of idolaters; the incessant charge of the Jews and Mahometans (15), who derived from the Law and the Koran an immortal hatred to graven images and all relative worship. The servitude of the Jews might curb their zeal and depreciate their authority; but the triumphant Musulmans, who reigned at Damascus, and threatened Constantinople, cast into the scale of reproach the accumulated weight of truth and victory. The cities of Syria, Palestine, and Egypt, had been fortified with the images of Christ, his mother, and his saints; and each city presumed on the hope or promise of miraculous defence. In a rapid conquest of ten years, the Arabs subdued those cities and these images; and in their opinion, the Lord of Hosts pronounced a decisive judgment between the adoration and contempt of these mute and inanimate idols. For a while Edessa had braved the Persian assaults; but the chosen city, the spouse of Christ, was involved in the common ruin; and his divine resemblance became the slave and trophy of the infidels. After a servitude of three hundred years, the Palladium was yielded to the devotion of Constantinople, for a ransom of twelve thousand pounds of silver, the redemption of two hundred Musulmans, and a perpetual truce for the territory of Edessa (16). In this season of distress and dismay, the eloquence of the monks was exercised in the

(15) By Cedrenus, Zonaras, Glycas, and Manasses, the origin of the Iconoclaists is imputed to the caliph Yezed and two Jews, who promised the empire to Leo: and the reproaches of these hostile sectaries are turned into an absurd conspiracy for restoring the purity of the Christian worship (see Spanheim, Hist. Imag. c. 2.).

defence of images; and they attempted to prove, that the sin and schism of the greatest part of the Orientals had forfeited the favour, and annihilated the virtue, of those precious symbols. But they were now opposed by the murmurs of many simple or rational Christians, who appealed to the evidence of texts, of facts, and of the primitive times, and secretly desired the reformation of the church. As the worship of images had never been established by any general or positive law, its progress in the Eastern empire had been retarded, or accelerated, by the differences of men and manners, the local degrees of refinement, and the personal characters of the bishops. The splendid devotion was fondly cherished by the levity of the capital, and the inventive genius of the Byzantine clergy; while the rude and remote districts of Asia were strangers to this innovation of sacred luxury. Many large congregations of Gnostics and Arians maintained, after their conversion, the simple worship which had preceded their separation; and the Armenians, the most warlike subjects of Rome, were not reconciled, in the twelfth century, to the sight of images (17). These various denominations of men afforded a fund of prejudice and aversion, of small account in the villages of Anatolia or Thrace, but which, in the fortune of a solder, a prelate, or an eunuch, might be often connected with the powers of the church and state.

THE DECLINE AND FALL

Leo the Iconoclast, and his successors, A.D. 726—840.

Of such adventurers, the most fortunate was the emperor Leo the third (18), who, from the mountains of Iauria, ascended the throne of the East. He was ignorant of sacred and profane letters; but his education, his reason, perhaps his intercourse with the Jews and Arabs, had inspired the martial peasant with an hatred of images; and it was held to be the duty of a prince, to impose on his subjects the dictates of his own conscience. But in the outset of an unsettled reign, during ten years of toil and danger, Leo submitted to the meanness of hypocrisy, bowed before the idols which he despised, and satisfied the Roman pontiff with the annual professions of his orthodoxy and zeal. In the reformation of religion, his first steps were moderate and cautious: he assembled a great council of senators and bishops, and enacted, with their consent, that all the images should be removed from the sanctuary and altar to a proper height in the churches, where they might be visible to the eyes, and inaccessible to the superstition, of the people. But it was impossible on either side to check the rapid though adverse impulse of veneration and abhorrence: in their lofty position, the sacred images still edified their votaries and reproached the tyrant. He was himself provoked by resistance and invective; and his own party accused him of an imperfect discharge of his duty, and urged for his imitation, the example of the Jewish king, who had broken without scruple the

(18) Our original, but not impartial, monuments of the Iconoclasts must be drawn from the Acta of the Councils, tom. viii and ix. Collect. Labbé, edit. Venet. and the historical writings of Theophanes, Nicephorus, Manassæ, Cedrenus, Zonaras, &c. Of the modern Catholicos, Baronius, Pagi, Natalis Alexander (Hist. Eccles. Seculum viii and ix.), and Maimbourg (Hist. des Iconoclastes), have treated the subject with learning, piety, and credulity. The protestant labours of Frederic Spanheim (Historia Imaginum Restituta) and James Bainage (Hist. des Eglises Reformées, tom. ii l. xxii. p. 1339—1385.) are cast into the Iconoclast scale. With this mutual aid, and opposite tendency, it is easy for us to poise the balance with philosophic indifference.
brazen serpent of the temple. By a second edict, he proscribed the existence as well as the use of religious pictures; the churches of Constantinople and the provinces were cleansed from idolatry; the images of Christ, the Virgin, and the Saints, were demolished, or a smooth surface of plaster was spread over the walls of the edifice. The feast of the Iconoclasts was supported by the zeal and despotism of six emperors, and the East and West were involved in a noisy conflict of one hundred and twenty years. It was the design of Leo the Ilaurian to pronounce the condemnation of Images, as an article of faith, and by the authority of a general council; but the convocation of such an assembly was reserved for his son Constantine (19); and though it is stigmatized by triumphant bigotry as a meeting of fools and atheists, their own partial and mutilated acts betray many symptoms of reason and piety.

The debates and decrees of many provincial synods introduced the summons of the general council which met in the suburbs of Constantinople, and was composed of the respectable number of three hundred and thirty-eight bishops of Europe and Anatolia; for the patriarchs of Antioch and Alexandria were the slaves of the caliph, and the Roman pontiff had withdrawn the churches of Italy and the West from the communion of the Greeks. This Byzantine synod assumed the rank and powers of the seventh general council: yet even this title was a recognition of the six preceding assemblies which had laboriously built the structure of the Catholic faith. After a

serious deliberation of six months, the three hundred and thirty-eight bishops pronounced and subscribed an unanimous decree, that all visible symbols of Christ, except in the Eucharist, were either blasphemous or heretical; that image-worship was a corruption of Christianity and a renewal of Paganism; that all such monuments of idolatry should be broken or erazed; and that those who should refuse to deliver the objects of their private superstition, were guilty of disobedience to the authority of the church and of the emperor. In their loud and loyal acclamations, they celebrated the merits of their temporal redeemer; and to his zeal and justice they entrusted the execution of their spiritual censures. At Constantinople, as in the former councils, the will of the prince was the rule of episcopal faith: but on this occasion, I am inclined to suspect that a large majority of the prelates sacrificed their secret conscience to the temptations of hope and fear. In the long night of superstition, the Christians had wandered far away from the simplicity of the gospel: nor was it easy for them to discern the clue, and tread back the mazes, of the labyrinth. The worship of images was inseparably blended, at least to a pious fancy, with the Cross, the Virgin, the Saints and their relics: the holy ground was involved in a cloud of miracles and visions; and the nerves of the mind, curiosity and scepticism, were benumbed by the habits of obedience and belief. Constantine himself is accused of indulging a royal licence to doubt, or deny, or de-ride the mysteries of the Catholics (20), but they were deeply inscribed in the public and private

(20) He is accused of profaning the title of saint; slaying the Virgin, mother of Christ; comparing her after her delivery to an empty purse; of Arianism, Nestorianism, &c. creed of his bishops; and the boldest Iconoclast
might assault with a secret horror, the monu-
ments of popular devotion, which were con-
secrated to the honour of his celestial patrons. In
the reformation of the sixteenth century, free-
dom and knowledge had expanded all the facul-
ties of man; the thirst of innovation superseded
the reverence of antiquity, and the vigour of
Europe could disdain those phantoms which ter-
riified the sickly and fervile weakness of the
Greeks.

The scandal of an abstract heresy can be only
proclaimed to the people by the blast of the ec-
clesiastical trumpet; but the most ignorant can
perceive, the most torpid must feel, the profa-
nation and downfall of their visible deities.
The first hostilities of Leo were directed against a
lofty Christ on the vestibule, and above the gate,
of the palace. A ladder had been planted for
the assault, but it was furiously shaken by a
crowd of zealots and women: they beheld,
with pious transport, the ministers of sacrilege
rumbling from on high, and dashed against the
pavement; and the honours of the ancient mar-
tyrs were prostituted to these criminals, who
justly suffered for murder and rebellion (2). The
execution of the Imperial edicts was resited by
frequent tumults in Constantinople and the pro-
vinces: the person of Leo was endangered, his
officers were massacred, and the popular en-
thusiasm was quelled by the strongest efforts of
the civil and military power. Of the Archi-
pelago, or Holy Sea, the numerous islands were
filled with images and monks: their votaries ab-
jured, without scruple, the enemy of Christ, his

mother, and the saints: they armed a fleet of boats and gallies, displayed their consecrated banners, and boldly steered for the harbour of Constantinople, to place on the throne a new favourite of God and the people. They depended on the succour of a miracle; but their miracles were inefficient against the Greek fire; and, after the defeat and conflagration of their fleet, the naked islands were abandoned to the clemency or justice of the conqueror. The son of Leo, in the first year of his reign, had undertaken an expedition against the Saracens: during his absence, the capital, the palace, and the purple, were occupied by his kinsman Arta-vasdes, the ambitious champion of the orthodox faith. The worship of images was triumphantly restored: the patriarch renounced his dissimulation, or dissembled his sentiments; and the righteous claim of the usurper was acknowledged, both in the new, and in ancient, Rome. Constantine flew for refuge to his paternal mountains; but he descended at the head of the bold and affectionate Isaurians; and his final victory confounded the arms and predictions of the fanatics. His long reign was distracted with clamour, sedition, conspiracy, and mutual hatred, and sanguinary revenge: the persecution of images was the motive, or pretence, of his adversaries; and, if they missed a temporal diadem, they were rewarded by the Greeks with the crown of martyrdom. In every act of open and clandestine treason, the emperor felt the unforgiving enmity of the monks, the faithful slaves of the superstition to which they owed their riches and influence. They prayed, they preached, they absolved, they inflamed, they conspired: the solitude of Palestine poured forth a torrent of invective; and the pen of St. John Damas-

Damaocesus (22), the last of the Greek fathers, devoted the tyrant’s head, both in this world and thenext (23). I am not at leisure to examine how far the monks provoked, nor how much they have exaggerated, their real and pretended sufferings, nor how many lost their lives or limbs, their eyes or their beards, by the cruelty of the emperor. From the chastisement of individuals, he proceeded to the abolition of the order; and, as it was wealthy and useless, his resentment might be stimulated by avarice and justified by patriotism. The formidable name and miffion of the Dragon (24), his visitor-general, excited the terror and abhorrence of the black nation: the religious communities were dissolved; the buildings were converted into magazines, or barracks; the lands, moveables, and cattle, were confiscated; and our modern precedents will support the charge, that much wanton or malicious havock was exercised against the relics, and even the books, of the monasteries. With the habit and profession of monks, the public and private worship of images was rigorously proscribed; and it should seem, that a solemn abjuration of

(22) John, or Mansur, was a noble Christian of Damascus, who held a considerable office in the service of the caliph. His zeal in the cause of images exposed him to the resentment and treachery of the Greek emperor; and on the suspicion of a treasonable correspondence, he was deprived of his right hand, which was miraculously restored by the Virgin. After this deliverance, he resigned his office, distributed his wealth, and buried himself in the monastery of St. Sabas, between Jerusalem and the Dead Sea. The legend is famous; but his learned editor, either Le- quien, has unhappily proved that St. John Damascenus was already a monk before the Iconoclast dispute (Opera, tom. i. vii. St. Joan. Damascen. p. 10-13. et Notas ad loc.).

(23) After sending Leo to the devil, he introduces his heir—to μακραν αυτο τε χρονον, και την ημας αυτον επεροναι en δεικτωειν, (Opera Damaecen. tom. i. p. 635.) If the authenticity of this piece be suspicious, we are sure that in other works, no longer extant, Damascenos bestowed on Constine the titles of τομ Μακαρι, Χρυσομακρο, μυκαγις (tom. i. p. 306.).

(24) In the narrative of this persecution from Theophanes and Cedrenus, Spanheim (p. 335-338.) is happy to compare the Dracon of Leo with the dogoons (Dracones) of Louis XIV.; and highly solaces himself with this controversial pan.
THE DECLINE AND FALL.

idolatry was exacted from the subjects, or at least from the clergy, of the Eastern empire (25).

The patient East abjured, with reluctance, her sacred images; they were fondly cherished, and vigorously defended, by the independent zeal of the Italians. In ecclesiastical rank and jurisdiction, the patriarch of Constantinople and the pope of Rome were nearly equal. But the Greek prelate was a domestic slave under the eye of his master, at whose nod he alternately passed from the convent to the throne and from the throne to the convent. A distant and dangerous station, amidst the Barbarians of the West, excited the spirit and freedom of the Latin bishops. Their popular election endeared them to the Romans: the public and private indigence was relieved by their ample revenue; and the weakness or neglect of the emperors compelled them to consult, both in peace and war, the temporal safety of the city. In the school of adversity the priest insensibly imbibed the virtues and the ambition of a prince; the same character was assumed, the same policy was adopted, by the Italian, the Greek, or the Syrian, who ascended the chair of St. Peter; and, after the loss of her legions and provinces, the genius and fortune of the popes again restored the supremacy of Rome. It is agreed, that in the eighth century their dominion was founded on rebellion, and that the rebellion was produced, and justified, by the heresy of the Iconoclasts; but the conduct of the second and third Gregory, in this memorable contest, is variously interpreted by the wishes of their friends and enemies. The Byzantine writers unanimously declare, that, after a fruitless admonition, they pronounced the fe-
pation of the East and West, and deprived the sacrilegious tyrant of the revenue and sovereignty of Italy. Their excommunication is still more clearly expressed by the Greeks, who beheld the accomplishment of the papal triumphs; and as they are more strongly attached to their religion than to their country, they praise, instead of blaming, the zeal and orthodoxy of these apostolical men (26). The modern champions of Rome are eager to accept the praise and the precedent; this great and glorious example of the deposition of royal heretics is celebrated by the cardinals Baronius and Bellarmine (27); and if they are asked, why the same thunders were not hurled against the Nerons and Julians of antiquity? they reply, that the weakness of the primitive church was the sole cause of her patient loyalty (28). On this occasion, the effects of love and hatred are the same; and the zealous protestants, who seek to kindle the indignation, and to alarm the fears, of princes and magistrates, expatiate on the insolence and treason of the two Gregories against their lawful sovereign. (29). They are defended only by the mode-

Zonaras specifies the thunder, καταδίωξις τοῦ θυγατέρου (Tom. ii. l. xv. p. 194, 195.). It may be observed, that the Greeks are apt to confound the times and actions of two Gregories.

Cardinal Perron adds a distinction more honorable to the first Christians, but not more satisfactory to modern princes—the treachery of heretics and apostates, who break their oath, belie their coin, and renounce their allegiance to Christ and his vicar (Perroniana, p. 89).

(29) Take, as a specimen, the cautious Balnage (Hist. de l'Église, p. 1350, 1351.) and the vehement Spanheim (Hist. Imaginum), who, with an hundred more, tread in the footsteps of the centurions of Magdeburgh.

I 2 rate
rate Catholics, for the most part, of the Gallican church (30), who respect the faint, without approving the fin. These common advocates of the crown and the mitre circumscribe the truth of facts by the rule of equity, scripture, and tradition; and appeal to the evidence of the Latins (31), and the lives (32) and epistles of the popes themselves.

Two original epistles, from Gregory the second to the emperor Leo, are still extant (33); and if they cannot be praised as the most perfect models of eloquence and logic, they exhibit the portrait, or at least the mark of the founder of the papal monarchy. "During ten pure and fortunate years," says Gregory to the emperor, "we have tasted the annual comfort of your royal letters, subscribed in purple ink, with your own hand, the sacred pledges of your

In the field of controversy I always pity the moderate party, who stand on the open middle ground exposed to the fire of both sides.

(32) With some minute difference, the most learned critics, Lucas Holleiniius, Scheltefrate, Ciampi, Bianchini, Muratori [Prolegomena ad tom. iii. paras i.], are agreed that the Liber Pontificalis was composed and continued by the apostolical librarians and notaries of the 6th and 7th centuries; and that the last and smallest part is the work of Anastasius, whose name it bears. The style is barbarous, the narrative partial, the details are trifling—yet it must be read as a curious authentic record of the times. The epistles of the popes are deciphered in the volumes of Councils.

(33) The two Epistles of Gregory ii. have been preferred in the Acts of the Nicene Council (tom. vii. p. 651—674.). They are without a date, which is variously fixed, by Baronius in the year 726, by Muratori (Annali d'Italia, tom. vi. p. 120.) in 729, and by Pagi in 730. Such is the force of prejudice that some papists have praised the good tenue and moderation of those letters.

"attachment"
attachment to the orthodox creed of our fathers.

How deplorable is the change! how tremendous the scandal! You now accuse the Catholics of idolatry; and, by the accusation, you betray your own impiety and ignorance. To this ignorance we are compelled to adapt the grossness of our style and arguments: the first elements of holy letters are sufficient for your confusion; and were you to enter a grammar-school, and avow yourself the enemy of our worship, the simple and pious children would be provoked to cast their horn-books at your head." After this decent salutation, the pope attempts the usual distinction between the idols of antiquity and the Christian images. The former were the fanciful representations of phantoms or demons, at a time when the true God had not manifested his person in any visible likeness. The latter are the genuine forms of Christ, his mother, and his saints, who had approved, by a crowd of miracles, the innocence and merit of this relative worship. He must indeed have trusted to the ignorance of Leo, since he could assert the perpetual use of images, from the apostolic age, and their venerable presence in the six synods of the Catholic church. A more specious argument is drawn from present possession and recent practice: the harmony of the Christian world supervenes the demand of a general council; and Gregory frankly confesses, that such assemblies can only be useful under the reign of an orthodox prince. To the impudent and inhuman Leo, more guilty than an heretic, he recommends peace, silence, and implicit obedience to his spiritual guides of Constantinople and Rome. The limits of civil and ecclesiastical powers are defined by the pontiff. To the former he appropriates the body; to the latter, the soul; the sword of justice is in the hands of the
the magistrate: the more formidable weapon of excommunication is entrusted to the clergy; and in the exercise of their divine commission, a zealous son will not spare his offending father: the successor of St. Peter may lawfully chastise the kings of the earth. "You assault us; O tyrant! with a carnal and military hand: unarmed and naked, we can only implore the Christ, the prince of the heavenly host, that he will send unto you a devil, for the destruction of your body and the salvation of your soul. You declare, with foolish arrogance; I will dispatch my orders to Rome; I will break in pieces the image of St. Peter; and Gregory, like his predecessor Martin, shall be transported in chains, and in exile, to the foot of the Imperial throne. "Would to God, that I might be permitted to tread in the footsteps of the holy Martin; but may the fate of Constans serve as a warning to the persecutors of the church. After his unjust condemnation by the bishops of Sicily, the tyrant was cut off, in the fullness of his sins, by a domestic servant: the saint is still adored by the nations of Scythia, among whom he ended his banishment and his life. But it is our duty to live for the edification and support of the faithful people; nor are we reduced to risk our safety on the event of a combat. Incapable as you are of defending your Roman subjects, the maritime situation of the city may perhaps expose it to your depredation; but we can remove to the distance of four-and-twenty fadie (34), to the first fortress of the "Lombards,

“Lombards, and then—you may pursue the winds. Are you ignorant that the popes are the bond of union, the mediators of peace, between the East and West? The eyes of the nations are fixed on our humility; and they revere, as a God upon earth, the apostle St. Peter, whose image you threaten to destroy (35). The remote and interior kingdoms of the West present their homage to Christ and his vicegerent; and we now prepare to visit one of their most powerful monarchs, who desires to receive from your hands the sacrament of baptism (36). The Barbarians have submitted to the yoke of the gospel, while you alone are deaf to the voice of the Shepherd. These pious Barbarians are kindled into rage: they thirst to avenge the persecution of the East. Abandon your rash and fatal enterprise; reflect, tremble, and repent. If you persist, we are innocent of the blood that will be spilt in the contest; may it fall on your own head.”

The first assault of Leo against the images of Constantinople had been witnessed by a crowd of strangers from Italy and the West, who related with grief and indignation the sacrilege of the emperor. But on the reception of his proscriptive edict, they trembled for their domestic deities; the images of Christ and the Virgin, of the angels, martyrs, and saints, were abo-

I rather believe that Gregory, with the pedantry of the age, employs stadia for miles, without much enquiry into the genuine measurement. (35) On di eisai basileiai tòu theou on eisai engeirin eunpē. (36) Aπo tòν ἐκμαθηματα τοῦ ἀρχηγοῦ Σπερτίου (p. 665.). The pope appears to have imposed on the ignorance of the Greeks; he lived and died in the Lateran; and in his time all the kingdoms of the West had embraced Christianity. May not this unknown Septimus have some reference to the chief of the Saxon Heptarchy, to his king of Wessex, who, in the pontificate of Gregory the Second, visited Rome, for the purpose, not of baptism, but of pilgrimage (Pagi, A. D. 689, No. 2, A. D. 716, No. 15.)?

lifted in all the churches of Italy; and a strong alternative was proposed to the Roman pontiff, the royal favour as the price of his compliance, degradation and exile as the penalty of his disobedience. Neither zeal nor policy allowed him to hesitate; and the haughty strain in which Gregory addressed the emperor displays his confidence in the truth of his doctrine or the powers of resitance. Without depending on prayers or miracles, he boldly armed against the public enemy, and his pastoral letters admonished the Italians of their danger and their duty (37). At this signal, Ravenna, Venice, and the cities of the Exarchate and Pentapolis, adhered to the cause of religion; their military force by sea and land consisted, for the most part, of the natives; and the spirit of patriotism and zeal was transfused into the mercenary strangers. The Italians swore to live and die in the defence of the pope and the holy images; the Roman people was devoted to their father, and even the Lombards were ambitious to share the merit and advantage of this holy war. The most treasonable act, but the most obvious revenge, was the destruction of the statues of Leo himself: the most effectual and pleasing measure of rebellion, was the withholding the tribute of Italy, and depriving him of a power which he had recently abused by the imposition of a new capitation (38).

(37) I shall transcribe the important and decisive passage of the Liber Pontificalis. Respiciens ergo pius vir profanam principis juvendem, jam contra Imperatorem quaest contra laetam se arma vis, reuenus hereo ejus, scribens ubique se caverre Christiannos, eo quod orta fusisset impietas talis. Igitur permoti orbes Pentapolenses, atque Venetiarum exercitus contra Imperatoris juvendem reliicerunt: dicentes se nonquam in ejusdem pontificis condeicendere necem, fed pro ejus magis defensiones virilitae decernere (p. 156).

(38) A census, or capitation, says Anastasius (p. 156); a most cruel tax, unknown to the Saracens themselves, exclaims the zealous Maimbourg (Hist. des Iconoclastes, l. i.), and Theophanes (p. 344.), who calls of Pharaoh's numbering the male children of Israel. This mode of taxation was familiar to the Saracens; and, most unluckily for the historian, it was imposed a few years afterwards in France by his patron Lewis XIV.

A form
OF THE ROMAN EMPIRE.

A form of administration was preserved by the election of magistrates and governors; and so high was the public indignation, that the Italians were prepared to create an orthodox emperor, and to conduct him with a fleet and army to the palace of Constantinople. In that palace, the Roman bishops, the second and third Gregory, were condemned as the authors of the revolt, and every attempt was made either by fraud or force to seize their persons, and to strike at their lives. The city was repeatedly visited or assaulted by captains of the guards, and dukes and exarchs of high dignity or secret trust; they landed with foreign troops, they obtained some domestic aid, and the superstition of Naples may blufh that her fathers were attached to the cause of heresy. But these clandestine or open attacks were repelled by the courage and vigilance of the Romans; the Greeks were overthrown and massacred, their leaders suffered an ignominious death, and the popes, however inclined to mercy, refused to intercede for these guilty victims. At Raven-va (39), the several quarters of the city had long exercised a bloody and hereditary feud; in religious controversy they found a new aliment of faction: but the votaries of images were superior in number or spirit, and the exarch, who attempted to stem the torrent, lost his life in a popular sedition. To punish this flagitious deed, and restore his dominion in Italy, the emperor sent a fleet and army into the Adriatic gulf. After suffering from the winds and waves much loss and delay, the Greeks made their descent in

Yet we are indebted to him for some curious and domestic facts—the quarters and factions of Ravenna (p. 154.), the revenge of Justinian II. the neighbourhood of Ravenna; they threatened to depopulate the guilty capital, and to imitate, perhaps, to surpass the example of Justinian the second, who had chastised a former rebellion by the choice and execution of fifty of the principal inhabitants. The women and clergy in sack-cloth and ashes, lay prostrate in prayer; the men were in arms for the defence of their country; the common danger had united the factions, and the event of a battle was preferred to the slow miseries of a siege. In a hard-fought day, as the two armies alternately yielded and advanced, a phantom was seen, a voice was heard, and Ravenna was victorious by the assurance of victory. The strangers retreated to their ships, but the populous sea-coast poured forth a multitude of boats; the waters of the Po were so deeply infected with blood, that during six years, the public prejudice abstained from the fish of the river; and the institution of an annual feast perpetuated the worship of images, and the abhorrence of the Greek tyrant. Amidst the triumph of the Catholic arms, the Roman pontiff convened a synod of ninety-three bishops against the heresy of the Iconoclasts. With their consent, he pronounced a general excommunication against all who by word or deed should attack the tradition of the fathers and the images of the saints; in this sentence the emperor was tacitly involved (40), but the vote of a laft and hopelesss remonstrance may seem to imply that the anathema was yet suspended over his guilty head. No sooner had they confirmed their own safety, the

Worship of images, and the freedom of Rome and Italy, than the popes appear to have relaxed of their severity, and to have spared the relics of the Byzantine dominion. Their moderate counsels delayed and prevented the election of a new emperor, and they exhorted the Italians not to separate from the body of the Roman monarchy. The exarch was permitted to reside within the walls of Ravenna, a captive rather than a master; and till the imperial coronation of Charlemagne, the government of Rome and Italy was exercised in the name of the successors of Constantine.(41)

The liberty of Rome, which had been oppressed by the arms and arts of Augustus, was rescued, after seven hundred and fifty years of servitude, from the persecution of Leo the Ilaurian. By the Caesars, the triumphs of the consuls had been annihilated: in the decline and fall of the empire, the god Terminus, the sacred boundary, had insensibly receded from the ocean, the Rhine, the Danube, and the Euphrates; and Rome was reduced to her ancient territory from Viterbo to Terracina, and from Narni to the mouth of the Tyber.(42). When the kings were banished, the republic reposed on the firm basis which had been founded by their wisdom and virtue. Their perpetual jurisdiction was divided between two annual magistrates: the senate con-

continued to exercise the powers of administration and counsel; and the legislative authority was distributed in the assemblies of the people, by a well-proportioned scale of property and service. Ignorant of the arts of luxury, the primitive Romans had improved the science of government and war: the will of the community was absolute: the rights of individuals were sacred: one hundred and thirty thousand citizens were armed for defence or conquest; and a band of robbers and outlaws was moulded into a nation, deserving of freedom and ambitious of glory (43). When the sovereignty of the Greek emperors was extinguished, the ruins of Rome presented the sad image of depopulation and decay: her slavery was an habit, her liberty an accident; the effect of superstition, and the object of her own amazement and terror. The last vestige of the substance, or even the forms, of the constitution, was obliterated from the practice and memory of the Romans; and they were devoid of knowledge, or virtue, again to build the fabric of a commonwealth. Their scanty remnant, the offspring of slave and stranger, was despicable in the eyes of the victorious Barbarians. As often as the Franks or Lombards expressed their most bitter contempt of a foe, they called him a Roman; "and in this name," says the bishop Liutprand, "we include whatever is base, what ever is cowardly, whatever is perfidious, the extremes of avarice and luxury, and every vice that can prostitute the dignity of human

"nature (44)." By the necessity of their situation, the inhabitants of Rome were cast into the rough model of a republican government: they were compelled to elect some judges in peace and some leaders in war: the nobles assembled to deliberate, and their resolves could not be executed without the union and consent of the multitude. The style of the Roman senate and people was revived (45), but the spirit was fled; and their new independence was disgraced by the tumultuous conflict of licentiousness and oppression. The want of laws could only be supplied by the influence of religion, and their foreign and domestic counsels were moderated by the authority of the bishop. His alms, his sermons, his correspondence with the kings and prelates of the West, his recent services, their gratitude, and oath, accustomed the Romans to consider him as the first magistrate or prince of the city. The Christian humility of the popes was not offended by the name of Dominus, or Lord; and their face and inscription are still apparent on the most ancient coins (46). Their temporal dominion is now confirmed by the reve-

rence of a thousand years; and their noblest title is the free choice of a people, whom they had redeemed from slavery.

In the quarrels of ancient Greece, the holy people of Elis enjoyed a perpetual peace, under the protection of Jupiter, and in the exercise of the Olympic games (47). Happy would it have been for the Romans, if a similar privilege had guarded the patrimony of St. Peter from the calamities of war; if the Christians, who visited the holy threshold, would have sheathed their swords in the presence of the apostle and his successor. But this mystic circle could have been traced only by the wand of a legislator and a sage: this pacific system was incompatible with the zeal and ambition of the popes: their Romans were not addicted, like the inhabitants of Elis, to the innocent and placid labours of agriculture; and the Barbarians of Italy, though softened by the climate, were far below the Grecian states in the institutions of public and private life. A memorable example of repentance and piety was exhibited by Liutprand king of the Lombards. In arms, at the gate of the Vatican, the conqueror listened to the voice of Gregory the second (48), withdrew his troops, resigned his conquests, respectfully visited the church of St. Peter, and, after performing his devotions, offered his sword and dagger, his cuirass and mantle, his silver cros, and his crown of gold, on the tomb of the apostle. But this religious fervour was the illusion, perhaps the artifice, of the moment; the sense of interest is strong and lasting; the love of arms and rapine

was congenial to the Lombards; and both the prince and people were irresistibly tempted by the disorders of Italy, the nakedness of Rome, and the unwarlike profession of her new chief. On the first edicts of the emperor, they declared themselves the champions of the holy images: Liutprand invaded the province of Romagna, which had already assumed that distinctive appellation; the Catholics of the Exarchate yielded without reluctance to his civil and military power; and a foreign enemy was introduced for the first time into the impregnable fortress of Ravenna. That city and fortress were speedily recovered by the active diligence and maritime forces of the Venetians; and those faithful subjects obeyed the exhortation of Gregory himself, in separating the personal guilt of Leo from the general cause of the Roman empire (49). The Greeks were less mindful of the service, than the Lombards of the injury: the two nations, hostile in their faith, were reconciled in a dangerous and unnatural alliance; the king and the exarch marched to the conquest of Spoleto and Rome: the storm evaporated without effect, but the policy of Liutprand alarmed Italy with a vexatious alternative of hostility and truce. His successor Aftolphus declared himself the equal enemy of the emperor and the pope: Ravenna was subdued by force or treachery (50), and this final conquest extinguished the series of the exarchs, who had reigned with a subordinate power since the time of Justinian and the ruin of

(49) The Venetian historians, John Sagorinus (Chron. Venet. p. 13.) and the doge Andrew Dandolo (Scriptores Rer. Ital. tom. xii. p. 116.), have preferred this epistle of Gregory. The losses and recovery of Ravenna are mentioned by Paulus Diaconus (de Gest. Longobard. i. vi. c. 49. 54. in Script. Ital. tom. i. pars i. p. 506...508.); but our chronologists, Pagi, Muratori, &c., cannot ascertain the date or circumstances.

the Gothic kingdom. Rome was summoned to acknowledge the victorious Lombard as her lawful sovereign; the annual tribute of a piece of gold was fixed as the ransom of each citizen, and the sword of destruction was unsheathed to exact the penalty of her disobedience. The Romans hesitated; they entreated; they complained; and the threatening Barbarians were checked by arms and negotiations, till the popes had engaged the friendship of an ally and avenger beyond the Alps (51).

In his distress, the first Gregory had implored the aid of the hero of the age, of Charles Martel, who governed the French monarchy with the humble title of mayor or duke; and who, by his signal victory over the Saracens, had faved his country, and perhaps Europe, from the Mahometan yoke. The ambassadors of the pope were received by Charles with decent reverence; but the greatness of his occupations, and the shortness of his life, prevented his interference in the affairs of Italy, except by a friendly and ineffectual mediation. His son Pepin, the heir of his power and virtues, assumed the office of champion of the Roman church; and the zeal of the French prince appears to have been prompted by the love of glory and religion. But the danger was on the banks of the Tyber, the succour on those of the Seine; and our sympathy is cold to the relation of distant misery. Amidst the tears of the city, Stephen the third embraced the generous resolution of visiting in person the courts of Lombardy and France, to deprecate the injustice

of his enemy, or to excite the pity and indignation of his friend. After soothing the public despair by litanies and orations, he undertook this laborious journey with the ambassadors of the French monarch and the Greek emperor. The king of the Lombards was inexorable; but his threats could not silence the complaints, nor retard the speed, of the Roman pontiff, who traversed the Pennine Alps, reposed in the abbey of St. Maurice, and hastened to grasp the right hand of his protector; a hand which was never lifted in vain, either in war or friendship. Stephen was entertained as the visible successor of the apostle; at the next assembly, the field of March or of May, his injuries were exposed to a devout and warlike nation, and he repassed the Alps, not as a suppliant, but as a conqueror, at the head of a French army, which was led by the king in person. The Lombards, after a weak resistance, obtained an ignominious peace, and swore to restore the possessions, and to respect the sanctity of the Roman church. But no sooner was Aftolphus delivered from the presence of the French arms, than he forgot his promise and resented his disgrace. Rome was again encompassed by his arms; and Stephen, apprehensive of fatiguing the zeal of his Transalpine allies, enforced his complaint and request, by an eloquent letter in the name and person of St. Peter himself (52). The apostle assures his adoptive sons, the king, the clergy, and the nobles of France, that dead in the flesh, he is still alive in the spirit; that they now hear, and must obey, the voice of the founder and guar-

dian of the Roman church: that the Virgin, the angels, the saints, and the martyrs, and all the host of heaven, unanimously urge the request, and will confess the obligation; that riches, victory, and paradise, will crown their pious enterprise, and that eternal damnation will be the penalty of their neglect, if they suffer his tomb, his temple, and his people, to fall into the hands of the perfidious Lombards. The second expedition of Pepin was not less rapid and fortunate than the first: St. Peter was satisfied, Rome was again saved, and Astolphus was taught the lessons of justice and sincerity by the scourge of a foreign master. After this double Salisbury, the Lombards languished about twenty years in a state of languor and decay. But their minds were not yet humbled to their condition; and instead of affecting the pacific virtues of the feeble, they perniciously harassed the Romans with a repetition of claims, evasions, and inroads, which they undertook without reflection and terminated without glory. On either side, their expiring monarchy was pressed by the zeal and prudence of pope Adrian the first, the genius, the fortune, and greatness of Charlemagne: the son of Pepin; these heroes of the church and state were united in public and domestic friendship; and while they trampled on the prostrate, they vanquished their proceedings with the fairest colours of equity and moderation (33). The passers of the Alps, and the walls of Pavia, were the only defence of the Lomb-

Bards; the former were surprised, the latter were invested, by the son of Pepin; and after a blockade of two years, Desiderius, the last of their native princes, surrendered his sceptre and his capital. Under the dominion of a foreign king, but in the possession of their national laws, the Lombards became the brethren, rather than the subjects, of the Franks; who derived their blood, and manners, and language, from the same Germanic origin.

The mutual obligations of the popes and the Carolingian family, form the important link of ancient and modern, of civil and ecclesiastical history. In the conquest of Italy, the champions of the Roman church obtained a favourable occasion, a fuscious title, the wishes of the people, the prayers and intrigues of the clergy. But the most essential gifts of the popes to the Carolingian race were the dignities of king of France, and of patrician of Rome. Under the sacerdotal monarchy of St. Peter, the nations began to resume the practice of seeking, on the banks of the Tyber, their kings, their laws, and the oracles of their fate. The Franks were perplexed between the name and substance of their government. All the powers of royalty were exercised by Pepin, mayor of the palace; and nothing, except the regal title, was wanting to his ambition. His enemies were crushed by his valour; his friends were multiplied by his liberality; his father had been the favour of Christendom; and the claims of personal merit were repeated and ennobled in a

A.D. 752, N° 1—10.), and Natalis Alexander (Hist. descent of four generations. The name and image of royalty was still preserved in the last descendant of Clovis, the feeble Childeric; but his obsolete right could only be used as an instrument of sedition: the nation was desirous of restoring the simplicity of the constitution; and Pepin, a subject and a prince, was ambitious to ascertain his own rank and the fortune of his family. The mayor and the nobles were bound, by an oath of fidelity, to the royal phantom: the blood of Clovis was pure and sacred in their eyes; and their common ambassadors addressed the Roman pontiff, to disbelieve their scruples, or to absolve their promise. The interest of pope Zachary, the successor of the two Gregories, prompted him to decide, and to decide in their favour: he pronounced that the nation might lawfully unite, in the same person, the title and authority of king; and that the unfortunate Childeric, a victim of the public safety, should be degraded, shaven, and confined in a monastery for the remainder of his days. An answer, so agreeable to their wishes, was accepted by the Franks, as the opinion of a casuist, the sentence of a judge, or the oracle of a prophet: the Merovingian race disappeared from the earth; and Pepin was exalted on a buckler by the suffrage of a free people, accustomed to obey his laws and to march under his standard. His coronation was twice performed, with the sanction of the popes, by their most faithful servant St. Boniface, the apostle of Germany, and by the grateful hands of Stephen the third, who, in the monastery of St. Denys, placed the diadem on the head of his benefactor. The royalunction of the kings of Israel was dextrously applied (56): the successor of St.

OF THE ROMAN EMPIRE.

St. Peter assumed the character of a divine ambassador: a German chieftain was transformed into the Lord's anointed; and this Jewish rite has been diffused and maintained by the superstition and vanity of modern Europe. The Franks were absolved from their ancient oath; but a dire anathema was thundered against them and their posterity, if they should dare to renew the same freedom of choice, or to elect a king, except in the holy and meritorious race of the Carolingian princes. Without apprehending the future danger, these princes gloried in their present security; the secretary of Charlemagne affirms, that the French sceptre was transferred by the authority of the popes (57); and, in their boldest enterprizes, they insist, with confidence, on this signal and successful act of temporal jurisdiction.

II. In the change of manners and language, the Patricians of Rome (58) were far removed from the senate of Romulus, or the palace of Constantine, from the free nobles of the republic, or the fictitious parents of the emperor. After the recovery of Italy and Africa by the arms of Justinian, the importance and danger of those remote provinces required the presence of a supreme magistrate; he was indifferently styled the exarch or the patrician; and these governors of

hopes of Britain and Spain. The royal union of Constantinople was borrowed from the Latins in the last age of the empire. Constantine Mancius mentions that of Charlemagne as a foreign, Jewish, incomprehensible ceremony. See Selden's Titles of Honour, in his Works, vol. iii. part i. p. 234.—419.

(57) See Egelnard, in Vita Caroli Magni, c. i. p. 9, &c. c. iii. p. 24. Childeric was deposed—juifit, the Carolingians were established—aucleritate, Postellis Romani. Launoy, &c. pretend that these strong words are susceptible of a very soft interpretation. Be it so; yet Eginhard understood the world, the court, and the Latin language.

(58) For the title and powers of patrician of Rome, see Ducange (Gloss. Lat. tom. v. p. 149—151.) Pagi Critica, A. Of these, the Franciscan Pagi is the most disposed to make the patrician a lieutenant of the church, rather than of the empire.

Ravenna,
THE DECLINE AND FALL

Ravenna, who fill their place in the chronology of princes, extended their jurisdiction over the Roman city. Since the revolt of Italy and, the loss of the Exarchate, the distress of the Romans had exacted some sacrifice of their independence. Yet, even in this act, they exercised the right of disposing of themselves; and the decrees of the senate and people successively invested Charles Martel and his posterity, with the honours of patronian of Rome. The leaders of a powerful nation would have disdained a servile title and subordinate office; but the reign of the Greek emperors was suspended; and, in the vacancy of the empire, they derived a more glorious commission from the pope and the republic. The Roman ambassadors presented these patricians with the keys of the shrine of St. Peter, as a pledge and symbol of sovereignty; with a holy banner, which it was their right and duty to unfurl in the defence of the church and city (59). In the time of Charles Martel and of Pepin, the interposition of the Lombard kingdom covered the freedom, while it threatened the safety, of Rome; and the patriciate represented only the title, the service, the alliance, of these distant protectors. The power and policy of Charlemagne annihilated an enemy, and imposed a master. In his first visit to the capital, he was received with all the honours which had formerly been paid to the exarch, the representative of the emperor; and these honours obtained some new decorations from the joy and gratitude of pope

(59) The papal advocates can soften the symbolic meaning of the banner and the keys; but the style of ad regnum diminius, or diecumus (Codex Carolini. epist. i. tom. iii. pars ii. p. 76.), seems to allow of no palliation or escape. In the MS. of the Vienna library, they read, instead of regnum, regnum, prayer or, request (see Ducange); and the royalty of Charles Martel is subverted by this important correction (Catalani, in his Critical Prefaces Annali d'Italia, tom. xvii. p. 95—99.).

Adrian
OF THE ROMAN EMPIRE:

Adrian the first (60). No sooner was he informed of the sudden approach of the monarch, than he dispatched the magistrates and nobles of Rome to meet him, with the banner, about thirty miles from the city. At the distance of one mile, the Flaminian way was lined with the schools, or national communities, of Greeks, Lombards, Saxons, &c.; the Roman youth was under arms; and the children of a more tender age, with palms and olive branches in their hands, chaunted the praises of their great deliverer. At the aspect of the holy cross, and ensigns of the saints, he dismounted from his horse, led the procession of his nobles to the Vatican, and, as he ascended the stairs, devoutly kissed each step of the threshold of the apostles. In the portico, Adrian expected him at the head of his clergy; they embraced, as friends and equals; but in their march to the altar, the king or patrician assumed the righthand of the pope. Nor was the Frank content with these vain and empty demonstrations of respect. In the twenty-six years that elapsed, between the conquest of Lombardy and his imperial coronation, Rome, which had been delivered by the sword, was subject, as his own, to the sceptre of Charlemagne. The people swore allegiance to his person and family; in his name money was coined, and justice was administered; and the election of the popes was examined and confirmed by his authority. Except an original and self-inherent claim of sovereignty, there was not any prerogative remaining, which the title of emperor could add to the patrician of Rome (61).

THE DECLINE AND FALL

Donations of Pepin and Charles-magne to the popes.

The gratitude of the Carolingians was adequate to these obligations, and their names are consecrated, as the saviours and benefactors of the Roman church. Her ancient patrimony of farms and houses was transformed by their bounty into the temporal dominion of cities and provinces; and the donation of the exarchate was the first fruits of the conquests of Pepin (62). Astolphus with a sigh relinquished his prey; the keys and the hostages of the principal cities were delivered to the French ambassadour; and, in his master's name, he presented them before the tomb of St. Peter. The ample measure of the Exarchate (63) might comprise all the provinces of Italy which had obeyed the emperor and his viceregent; but its strict and proper limits were included in the territories of Ravenna, Bologna, and Ferrara: its inseparable dependency was the Pentapolis, which stretched along the Adriatic from Rimini to Ancona, and advanced into the midland country as far as the ridges of the Apennine. In this transaction, the ambition and avarice of the popes has been severely condemned. Perhaps the humility of a Christian priest should have rejected an earthly kingdom, which it was not easy for him to govern without renouncing the virtues of his profession. Perhaps a faithful subject, or even a generous enemy, would have been less impatient to divide the spoils of the

(62) Mochetius (Institutiones Hist. Eccl. p. 263.) weighs this donation with fair and deliberate prudence. The original act has never been produced; but the Liber Pontificalis represents (p. 171.), and the Codex Carolinus supposes, this ample gift. Both are contemporary records; and the latter is the more authentic, since it has been preserved, not in the papal, but the Imperial library.

(63) Between the exorbitant claims, and narrow concessions, of interest and prejudice, from which even Muratori (Antiquitates. tom. 1. p. 63—68.) is not exempt, I have been guided, in the limits of the Exarchate and Pentapolis, by the Difertatio Chorographica Italiae Medii ævi, tom. x p. 160—180.

Barbarian;
OF THE ROMAN EMPIRE.

Barbarian; and if the emperor had entrusted Stephen to solicit in his name the restitution of the Exarchate, I will not absolve the pope from the reproach of treachery and falsehood. But in the rigid interpretation of the laws, every one may accept, without injury, whatever his benefactor can bestow without injustice. The Greek emperor had abdicated or forfeited his right to the Exarchate; and the sword of Astolphus was broken by the stronger sword of the Carlovigian. It was not in the cause of the Iconoclast that Pepin had exposed his person and army in a double expedition beyond the Alps: he possessed, and might lawfully alienate, his conquests; and to the importunities of the Greeks, he piously replied, that no human consideration should tempt him to refuse the gift which he had conferred on the Roman pontiff for the remission of his sins and the salvation of his soul. The splendid donation was granted in supreme and absolute dominion, and the world beheld for the first time a Christian bishop invested with the prerogatives of a temporal prince; the choice of magistrates, the exercise of justice, the imposition of taxes, and the wealth of the palace of Ravenna. In the dissolution of the Lombard kingdom, the inhabitants of the duchy of Spoleto (64) sought a refuge from the storm, shaved their heads after the Roman fashion, declared themselves the servants and subjects of St. Peter, and completed, by this voluntary surrender, the present circle of the ecclesiastical state. That mysterious circle was enlarged to an indefinite extent, by the verbal or written donation of Charlemagne (65), who in the

(65) The policy and donations of Charlemagne are carefully examined by St. Marc (Abrégé, tom. i. p. 390—408.) who has well studied the Codex Carolinian. I believe, with him, that they were only verbal. The

the first transports of his victory, despoiled himself and the Greek emperor of the cities and islands which had formerly been annexed to the Exarchate. But, in the cooler moments of absence and reflection, he viewed, with an eye of jealousy and envy, the recent greatness of his ecclesiastical ally. The execution of his own and his father’s promises was respectfully eluded: the king of the Franks and Lombards asserted the inalienable rights of the empire; and, in his life and death, Ravenna (66), as well as Rome, was numbered in the list of his metropolitan cities. The sovereignty of the Exarchate melted away in the hands of the popes: they found in the archbishops of Ravenna a dangerous and domestic rival (67): the nobles and people disdained the yoke of a priest; and, in the disorders of the times, they could only retain the memory of an ancient claim, which in a more prosperous age, they have revived and realized.

Fraud is the resource of weakness and cunning; and the strong, though ignorant, Barbarian was often entangled in the net of sacerdotal policy. The Vatican and Lateran were an arsenal and manufacture, which, according to the occasion, have produced or concealed a various collection of false or genuine, of corrupt or suspicious, acts, as they tended to promote the interest of the

Roman church. Before the end of the eighth century, some apostolical scribe, perhaps the notorious Isidore, composed the decretals, and the donation of Constantine, the two magic pillars of the spiritual and temporal monarchy of the popes. This memorable donation was introduced to the world by an epistle of Adrian the first, who exhorts Charlemagne to imitate the liberality, and revive the name, of the great Constantine (68). According to the legend, the first of the Christian emperors was healed of the leprosy, and purified in the waters of baptism, by St. Silvester, the Roman bishop; and never was physician more gloriously recompensed. His royal profelyte withdrew from the seat and patrimony of St. Peter: declared his resolution of founding a new capital in the East; and resigned to the popes the free and perpetual sovereignty of Rome, Italy and the provinces of the West (69). This fiction was productive of the most beneficial effects. The Greek princes were convicted of the guilt of usurpation; and the revolt of Gregory was the claim of his lawful inheritance. The popes were delivered from their debt of gratitude; and the nominal gifts of the Carlovingians were no more than the just and irrevocable restitution of a scanty portion of the ecclesiastical state. The sovereignty of Rome no longer depended on the choice of a fickle people; and the

Quia ecce novus Constantinus hic temporibus, sec. (Codex Carolini, epist. 49. in tom. iii. part ii. p. 195.). Pagi (Critica, A.D. 324, N°16.) ascribes them to an impostor of the viiiith century, who borrowed the name of St. Isidore: his humble title of Pecator was ignorantly, but aptly, turned into Mercator; his merchandise was indeed profitable, and a few sheets of paper were sold for much wealth and power.

(69) Fabricius (Bibl. Grœc. tom. vi. p. 4—7.) has enumerated the several editions of this Act, in Greek and Latin. The copy which Laurentius Valla recites and refutes, appears to be taken either from the spurious Acta of St. Silvester or from Gratian's Decree, to which, according to him and others, it has been surreptitiously tacked.
successors of St. Peter and Constantine were invested with the purple and prerogatives of the Caesars. So deep was the ignorance and credulity of the times, that the most absurd of fables was received, with equal reverence, in Greece and in France, and is still enrolled among the decrees of the capon law (70). The emperors, and the Romans, were incapable of discerning a forgery, that subverted their rights and freedom; and the only opposition proceeded from a Sabine monastery, which, in the beginning of the twelfth century, disputed the truth and validity of the donation of Constantine (71). In the revival of letters and liberty this fictitious deed was transpierced by the pen of Laurentius Valla, the pen of an eloquent critic and a Roman patriot (72). His contemporaries of the fifteenth century were astonished at his sacrilegious boldness; yet such is the silent and irresistible progress of reason, that before the end of the next age, the fable was rejected by the contempt of

They were formerly accessible to curious foreigners (Le Blanc and Mabillon), and would have enriched the first volume of the Historia Monastica Italiae of Quinini. But they are now imprisoned (Muratori, Scriptores R. I. tom. ii. pars ii. p. 369.) by the timid policy of the court of Rome; and the future cardinal yielded to the voice of authority and the whispers of ambition (Quinini, Comment. pars ii. p. 123—136.).

(72) I have read in the collection of Schardius (de Potestate Imperiali Ecclesiastica, p. 734—780.), this animated discourse, which was composed by the author A. D. 1440, six years after the flight of pope Eugenius IV. It is a most vehement party pamphlet: Valla justifies and animates the revolt of the Romans, and would even approve the use of a dagger against her facerdotal tyrant. Such a critic might expect the persecution of the clergy; yet he made his peace and is buried in the Lateran (Bayle, Dictionnaire Critique, VALLA; Vossius, de Historica Latina, p. 580.)

historians (73) and poets (74), and the tacit or modest cenure of the advocates of the Roman church (75). The popes themselves have indulged a simile at the credulity of the vugar (76); but a false and obsolete title still sanctifies their reign; and, by the same fortune which has attended the decretales and the Sibylline oracles, the edifice has subsisted after the foundations have been undermined.

While the popes establishe in Italy their freedom and dominion, the images, the first cause of their revolt, were restored in the Eastern empire (77). Under the reign of Constantine the fifth, the union of civil and ecclesiastical power had overthrown the tree, without extricating the root, of superstition. The idols, for such they were now held, were secretly cherishe by the order and the sex most prone to devotion; and

The cardinal wishes to suppose that Rome was offered by Constantine, and refused by Silvester. The act of donation he considers, strangely enough, as a forgery of the Greeks.

(77) The remaining history of images, from Irene to Theodora, is collected for the Catholics, by Bironius and Pagi (A. D. 780—840), Natalis Alexander (Hist. N. T. sectum viii. Panoplis adversus Heretics, p. 118—178.), and Dupin (Biblioth. Eccles. tom. vi. p. 136—154.); for the protestants, by Spanheim (Hist. Imag. p. 305—639.), Basnage (Hist. de l'Eglise, tom. i. p. 556—572. tom. ii. p. 136—1385.), and Mofheim (Institut. Hist. Eccles. fecul. viii. et ix.). The protestants, except Mofheim, are found with controversy; but the Catholics, except Dupin, are inflamed by the fury and superstition of the monks: and even Le Beau (Hist. du Bus Empire), a gentleman and a scholar, is infected by the odious contagion.
THE DECLINE AND FALL

the fond alliance of the monks and females, obtained a final victory over the reason and authority of man. Leo the fourth maintained with less rigour the religion of his father and grandfather; but his wife, the fair and ambitious Irene, had imbibed the zeal of the Athenians, the heirs of the idolatry, rather than the philosophy, of their ancestors. During the life of her husband, these sentiments were inflamed by danger and dissimulation, and she could only labour to protect and promote some favourite monks whom she drew from their caverns, and seated on the metropolitan thrones of the East. But as soon as she reigned in her own name and that of her son, Irene more seriously undertook the ruin of the Iconoclasts; and the first step of her future persecution, was a general edict for liberty of conscience. In the restoration of the monks, a thousand images were exposed to the public veneration; a thousand legends were invented of their sufferings and miracles. By the opportunities of death or removal, the episcopal seats were judiciously filled; the most eager competitors for earthly or celestial favour, anticipated and flattered the judgment of their sovereign; and the promotion of her secretary Tarasius, gave Irene the patriarch of Constantinople, and the command of the Oriental church. But the decrees of a general council could only be repealed by a similar assembly (78); the Iconoclasts whom she convened, were bold in possession, and averse to debate; and the feeble voice of the bishops was re-echoed by the more formidable clamour of the soldiers and people of Constantinople. The delay and intrigues of a year, the separation

of the disaffected troops, and the choice of
Nice for a second orthodox synod, removed
these obstacles; and the episcopal conscience
was again, after the Greek fashion, in the
hands of the prince. No more than eighteen
days were allowed for the consummation of this
important work: the Iconoclasts appeared, not
as judges, but as criminals or penitents; the
scene was decorated by the legates of pope
Adrian and the Eastern patriarchs (79), the
decrees were framed by the president Tara-
thus, and ratified by the acclamations and sub-
scriptions of three hundred and fifty bishops.
They unanimously pronounced that the wor-
ship of images is agreeable to scripture and
reason, to the fathers and councils of the
church: but they hesitate whether that wor-
ship be relative or direct; whether the Godhead,
and the figure, of Christ be entitled to the same
mode of adoration. Of this second Nicene
council, the acts are still extant; a curious mo-
ument of superstition and ignorance, of false-
hood and folly. I shall only notice the judgment
of the bishops, on the comparative merit of
image-worship and morality. A monk had con-
cluded a truce with the daemon of fermentation,
on condition of interrupting his daily prayers to
a picture that hung in his cell. His scruples
prompted him to consult the abbot. “Rather
than abstain from adoring Christ and his Mo-
ther in their holy images, it would be better
for you,” replied the caustic, “to enter every

(79) The pope’s legates were casual messengers, two priests without any
special commission, and who were disfavored on their return. Some
begabond monks were persuaded by the Catholics to represent the Oriental
patriarchs. This curious anecdote is revealed by Theodore Studites

For the honour of orthodoxy, at least the orthodoxy of the Roman church, it is somewhat
unfortunate, that the two princes who convened
the two councils of Nice, are both stained with
the blood of their sons. The second of these
assemblies was approved and rigorously executed
by the despotism of Irene, and she refused her
adversaries the toleration which at first she had
granted to her friends. During the five succeeding
reigns, a period of thirty-eight years, the
contest was maintained, with unabated rage and
various success, between the worshippers and
the breakers of the images; but I am not in-
clined to pursue with minute diligence the repe-
tition of the same events. Nicephorus allowed a
general liberty of speech and practice; and the
only virtue of his reign is accused by the monks
as the cause of his temporal and eternal perdi-
tion. Superstition and weakness formed the
character of Michael the first, but the saints and
images were incapable of supporting their votary
on the throne. In the purple, Leo the fifth af-
fected the name and religion of an Armenian;
and the idols, with their seditious adherents,
were condemned to a second exile. Their ap-
plause would have sanctified the murder of an
impious tyrant, but his assassin and successor, the
second Michael, was tainted from his birth with
the Phrygian heresies: he attempted to mediate
between the contending parties; and the in-
tractable spirit of the Catholics insensibly cast
him into the opposite scale. His moderation was

guarded
guarded by timidity; but his son Theophilus, alike ignorant of fear and pity, was the last and most cruel of the Iconoclasts. The enthusiasm of the times ran strongly against them; and the emperors, who stemmed the torrent, were exasperated and punished by the public hatred. After the death of Theophilus, the final victory of the images was achieved by a second female, his widow Theodora, whom he left the guardian of the empire. Her measures were bold and decisive. The fiction of a tardy repentance absolved the fame and the soul of her deceased husband: the sentence of the Iconoclast patriarch was commuted from the loss of his eyes to a whipping of two hundred lashes: the bishops trembled, the monks shouted, and the festival of orthodoxy preserves the annual memory of the triumph of the images. A single question yet remained, whether they are endowed with any proper and inherent sanctity: it was agitated by the Greeks of the eleventh century (81); and as this opinion has the strongest recommendation of absurdity, I am surprised that it was not more explicitly decided in the affirmative. In the West, pope Adrian the first accepted and announced the decrees of the Nicene assembly, which is now revered by the Catholics as the seventh in rank of the general councils. Rome and Italy were docile to the voice of their father; but the greatest part of the Latin Christians were far behind in the race of superstition. The churches of France, Germany, England, and Spain, steered a middle course between the adoration and the destruction of images, which they admitted into their temples, not as objects of worship, but as lively and useful memorials of

faith and history. An angry book of controversy was composed and published in the name of Charlemagne (82); under his authority a synod of three hundred bishops was assembled at Frankfort (83): they blamed the fury of the Iconoclasts, but they pronounced a more severe censure against the superstition of the Greeks, and the decrees of their pretended council, which was long despised by the Barbarians of the West (84). Among them the worship of images advanced with a silent and insensible progress; but a large atonement is made for their hesitation and delay, by the gross idolatry of the ages which precede the reformation, and of the countries, both in Europe and America, which are still immersed in the gloom of superstition.

It was after the Nicene synod, and under the reign of the pious Irene, that the popes consummated the separation of Rome and Italy, by the translation of the empire to the less orthodox Charlemagne. They were compelled to chuse between the rival nations: religion was not the sole motive of their choice; and while they disfamed the failings of their friends, they beheld, with reluctance and suspicion, the Catholic virtues of their foes. The difference of lan-

guage and manners had perpetuated the enmity of the two capitals; and they were alienated from each other by the hostile opposition of seventy years. In that schism the Romans had tasted of freedom, and the popes of sovereignty: their submission would have exposed them to the revenge of a jealous tyrant; and the revolution of Italy had betrayed the impotence, as well as the tyranny, of the Byzantine court. The Greek emperors had restored the images, but they had not restored the Calabrian estates (85) and the Illyrian diocese (86), which the Iconoclasts had torn away from the successors of St. Peter; and pope Adrian threatens them with a sentence of excommunication unless they speedily abjure this practical heresy (87). The Greeks were now orthodox, but their religion might be tainted by the breath of the reigning monarch: the Franks were now contumacious; but a discerning eye might discern their approaching conversion from the use, to the adoration, of images. The name of Charlemagne was stained by the polemic acrimony of his scribes; but the

conqueror himself conformed, with the temper- of a statesman, to the various practice of France and Italy. In his four pilgrimages or visits to the Vatican, he embraced the popes in the communion of friendship and piety; he knelt before the tomb, and consequently before the image, of the apostle; and joined without scruple, in all the prayers and processions of the Roman liturgy. Would prudence or gratitude allow the pontiffs to renounce their benefactor? Had they a right to alienate his gift of the Exarchate? Had they power to abolish his government of Rome? The title of patrician was below the merit and greatness of Charlemagne; and it was only by reviving the Western empire that they could pay their obligations or secure their establishments. By this decisive measure they would finally eradicate the claims of the Greeks: from the debasement of a provincial town, the majesty of Rome would be restored: the Latin Christians would be united, under a supreme head, in their ancient metropolis; and the conquerors of the West would receive their crown from the successors of St. Peter. The Roman church would acquire a zealous and respectable advocate; and, under the shadow of the Carolingian power, the bishop might exercise, with honour and safety, the government of the city (88).

Before the ruin of paganism in Rome, the competition for a wealthy bishopric had often been productive of tumult and bloodshed. The people was less numerous, but the times were

(88) Fontanini considers the emperors as no more than the advocates of the church (advocatus et defensor S. R. E. See Ducange, Gloss. Lat. tom. 1 p. 97). His antagonist Muratori reduces the popes to be no more than the exarchs of the emperor. In the more equitable view of Motheim, Instit. Hist. more savage, the prize more important, and the chair of St. Peter was fiercely disputed by the leading ecclesiastics who aspired to the rank of sovereign. The reign of Adrian the first (89) surpasses the measure of past or succeeding ages (90); the walls of Rome, the sacred patrimony, the ruin of the Lombards, and the friendship of Charlemagne, were the trophies of his fame: he secretly edified the throne of his successors, and displayed in a narrow space the virtues of a great prince. His memory was revered; but in the next election, a priest of the Lateran, Leo the third, was preferred to the nephew and the favourite of Adrian, whom he had promoted to the first dignities of the church. Their acquiescence or repentance disguised, above four years, the blackest intention of revenge, till the day of a procession, when a furious band of conspirators dispersed the unarmed multitude, and assaulted with blows and wounds the sacred person of the pope. But their enterprise on his life or liberty was disappointed, perhaps by their own confusion and remorse. Leo was left for dead on the ground; on his revival from the swoon, the effect of his loss of blood, he recovered his speech and sight; and this natural event was improved to the miraculous restoration of his eyes and tongue, of which he had been deprived, twice deprived, by the knife.

(89) His merits and hopes are summed up in an epistle of thirty-eight verses, of which Charlemagne declares himself the author (Concil. tom. viii. p. 540).

Post patrem lacrymam Carolus hic carmina scripsit.
To mihi dulcis amor, te modo plango pater...
Nomina juno simul titulis, clarissime, nostra
Adrianus, Carolus, rex ego, tuque pater.
The poetry might be supplied by Alcuin; but the tears the most glorious tribute, can only belong to Charlemagne.

of the assassins (91). From his prison, he escaped to the Vatican; the duke of Spoleto hastened to his rescue, Charlemagne sympathized in his injury, and in his camp of Paderborn in Westphalia, accepted or solicited a visit from the Roman Pontiff. Leo repassed the Alps with a commission of counts and bishops, the guards of his safety and the judges of his innocence; and it was not without reluctance, that the conqueror of the Saxons delayed till the ensuing year the personal discharge of this pious office. In his fourth and last pilgrimage, he was received at Rome with the due honours of king and patrician: Leo was permitted to purge himself by oath of the crimes imputed to his charge: his enemies were silenced, and the sacrilegious attempt against his life was punished by the mild and insufficient penalty of exile. On the festival of Christmas, the last year of the eighth century, Charlemagne appeared in the church of St. Peter; and, to gratify the vanity of Rome, he had exchanged the simple dress of his country for the habit of a patrician (92). After the celebration of the holy mysteries, Leo suddenly placed a precious crown on his head (93), and the

(91) The assurance of Anastasius (tom. iii. pars i. p. 197, 198) is supported by the credulity of some French annalists; but Eginhard, and other writers of the same age, are more natural and sincere. "Unus "ex oculus paullulum est lexus," says John the deacon of Naples (Vit. Episcop. Napol. in Scriptores Muratori, tom. i. pars ii. p. 312). Theodulfus, a contemporary bishop of Orleans, observes with prudence (l. iii. carm. 3).

"Reddita sunt mirum est: mirum est suferre nequiffe.
Eit tamen in dubio, hinc mier aut inde magis."

(92) Twice, at the request of Hadrian and Leo, he appeared at Rome—longa turbæ et chlamyde amicus, et calcamenti quoque Romano more formatos. Eginhard (c. xxiii. p. 109—115) describes, like Suetonius, the simplicity of his dress, so popular in the nation, that when Charles the Bald returned to France in a foreign habit, the patriotic dogs barked at the spot in the street (Gaillard, Vie de Charlemagne, tom. iv. p. 109).

(93) See Anastasius (p. 199) and Eginhard (c. xxviii. p. 124—128). The union is mentioned by Theophanes (p. 339), the oath by Sigonius (from the Ordo Romanus), and the pope’s adoration, more antiquorum principium, by the Annales Bertiniani (Script. Muratori. tom. ii. pars ii. p. 595).

dome resounded with the acclamations of the people, "Long life and victory to Charles, the "most pious Augustus, crowned by God the "great and pacific emperor of the Romans!" The head and body of Charlemagne were consecrated by the royal unction: after the example of the Caesars, he was saluted or adored by the pontiff; his coronation oath represents a promise to maintain the faith and privileges of the church; and the first fruits were paid in his rich offerings to the shrine of the apostle. In his familiar conversation, the emperor protested his ignorance of the intentions of Leo, which he would have disappointed by his absence on that memorable day. But the preparations of the ceremony must have disclosed the secret; and the journey of Charlemagne reveals his knowledge and expectation: he had acknowledged that the Imperial title was the object of his ambition, and a Roman synod had pronounced, that it was the only adequate reward of his merit and services (94).

The appellation of great has been often bestowed and sometimes deserved, but Charlemagne is the only prince in whose favour the title has been indissolubly blended with the name. That name, with the addition of saint, is inserted in the Roman calendar; and the saint, by a rare felicity, is crowned with the praises of the historians and philosophers of an enlightened age (95). His

His real merit is doubtless enhanced by the barbarism of the nation and the times from which he emerged; but the apparent magnitude of an object is likewise enlarged by an unequal comparison; and the ruins of Palmyra derive a casual splendour from the nakedness of the surrounding desert. Without injustice to his fame, I may discern some blemishes in the sanctity and greatness of the restorer of the Western empire. Of his moral virtues, chastity is not the most conspicuous (96); but the public happiness could not be materially injured by his nine wives or concubines, the various indulgence of meaner or more transient amours, the multitude of his ballards whom he bestowed on the church, and the long celibacy and licentious manners of his daughters (97), whom the father was suspected of loving with too fond a passion. I shall be scarcely permitted to accuse the ambition of a conqueror; but in a day of equal retribution, the sons of his brother Carloman, the Merovin- gian princes of Aquitain, and the four thousand five hundred Saxons who were beheaded on the same spot, would have something to allege against the justice and humanity of Charlemagne. His treatment of the vanquished Saxons (98) was an abuse.

lifed his Histoire de Charlemagne (in 4 vols. in 12mo.), which I have freely and profitably used. The author is a man of sense and humanity; and his work is laboured with industry and elegance. But I have like- wise examined the original monuments of the reigns of Pepin and Charlemagne, in the 4th volume of the Histoires of France.

(96) The vision of Weltin, composed by a monk, eleven years after the death of Charlemagne, shews him in purgatory, with a vulture, who is perpetually gnawing the guilty member, while the rest of his body, the emblem of his virtues, is found and perfect (see Caillard, tom. ii. p. 317-320).

(97) The marriage of Eginoard with Imma, daughter of Charlemagne, is, in my opinion, sufficiently refuted by the prorium and suspicus that fulfilled these fair damels, without excepting his own wife (c. xix. p. 98—100. *cum Notis Schmilcke*). The husband must have been too strong for the historian.

abuse of the right of conquest; his laws were not less sanguinary than his arms, and in the discussion of his motives, whatever is abstracted from bigotry must be imputed to temper. The sedentary reader is amazed by his incessant activity of mind and body; and his subjects and enemies were not less astonished at his sudden presence, at the moment when they believed him at the most distant extremity of the empire; neither peace nor war, nor summer nor winter, were a season of repose; and our fancy cannot easily reconcile the annals of his reign with the geography of his expeditions. But this activity was a national rather than a personal virtue; the vagrant life of a Frank was spent in the chase, in pilgrimage, in military adventures; and the journeys of Charlemagne were distinguished only by a more numerous train and a more important purpose. His military renown must be tried by the scrutiny of his troops, his enemies, and his actions. Alexander conquered with the arms of Philip, but the two heroes who preceded Charlemagne, bequeathed him their name, their examples, and the companions of their victories. At the head of his veteran and superior armies, he oppressed the savage or degenerate nations, who were incapable of confederating for their common safety: nor did he ever encounter an equal antagonist in numbers, in discipline, or in arms. The science of war has been lost and revived with the arts of peace; but his campaigns are not illustrated by any siege or battle, of singular difficulty and success; and he might behold,

But every crime might be expiated by baptism or penance (Gail- lard, tom. ii. p. 241—247.); and the Christian Saxons became the friends and equals of the Franks (Strav. Corpus Hist. with envy, the Saracen trophies of his grandfather. After his Spanish expedition, his rearguard was defeated in the Pyrenean mountains; and the soldiers, whose situation was irretrievable and whose valour was useless, might accuse, with their last breath, the want of skill or caution of their general (99). It is with reverence the laws of Charlemagne, so highly applauded by a respectable judge. They compose not a system, but a series, of occasional and minute edicts, for the correction of abuses, the reformation of manners, the economy of his farms, the care of his poultry, and even the sale of his eggs. He wished to improve the laws and the character of the Franks; and his attempts, however feeble and imperfect, are deserving of praise: the inveterate evils of the times were suspended or mollified by his government (100); but in his institutions I can seldom discover the general views and the immortal spirit of a legislator, who survives himself for the benefit of posterity. The union and stability of his empire depended on the life of a single man: he imitated the dangerous practice of dividing his kingdoms among his sons; and, after his numerous diets, the whole constitution was left to fluctuate between the disorders of anarchy and despotism. His esteem for the piety and knowledge of the clergy tempted him to entrust that aspiring order with temporal dominion and civil jurisdiction; and his son Lewis, when he was stripped and degraded by the bishops, might accuse, in some

measure, the imprudence of his father. His laws enforced the imposition of tythes, because the daemons had proclaimed in the air that the default of payment had been the cause of the last scarcity (101). The literary merits of Charlemagne are attested by the foundation of schools, the introduction of arts, the works which were published in his name, and his familiar connection with the subjects and strangers whom he invited to his court to educate both the prince and people. His own studies were tardy, laborious, and imperfect; if he spoke Latin, and understood Greek, he derived the rudiments of knowledge from conversation, rather than from books; and, in his mature age, the emperor strove to acquire the practice of writing, which every peasant now learns in his infancy (102). The grammar and logic, the music and astronomy, of the times, were only cultivated as the handmaids of superstition; but the curiosity of the human mind must ultimately tend to its improvement, and the encouragement of learning reflects the purest and most pleasing lustre on the character of Charlemagne (103). The dignity of his person (104), the length of his reign, the prosperity of his

Experimemto enim didicimus, in anno, quo illa valida fames irrepit, ebullire vacuas annonae a daemonibus devoratas, et voces exprobationis auditas. Such is the decree and assertion of the great Council of Frankfort (canon xxv. tom. ix. p. 105.). Both Selden (Hist. of Tythes ; Works, vol. iii. part ii. p. 1146.) and Montefigueu (Esprit des loix l. xxxii. c. 12.) represent Charlemagne as the first legal author of tythes. Such obligations have country gentlemen to his memory!

(102) Eginhard (c. 25. p. 119.) clearly affirms, tentabat et scribere . . . sed parum prospero succedessit lator praepositorus et fero inchoatus. The moderns have perverted and corrected this obvious meaning, and the title of M. Gaillard’s Differtation (tom. iii. p. 247—260.) betrays his partiality.

(104) M. Gaillard (tom. iii. p. 372.) fixes the true nature of Charlemagne (see a Differtation of Marquard Frcher ad calcem Eginhart. p. 220, &c.) at five feet nine inches of French, about six feet one inch and
his arms, the vigour of his government, and the reverence of distant nations, distinguish him from the royal crowd; and Europe dates a new æra from his restoration of the Western empire.

That empire was not unworthy of its title (105); and some of the fairest kingdoms of Europe were the patrimony or conquest of a prince, who reigned at the same time in France, Spain, Italy, Germany, and Hungary (106).

1. The Roman province of Gaul had been transformed into the name and monarchy of France; but, in the decay of the Merovingian line, its limits were contracted by the independence of the Britons and the revolt of Aquitaine. Charlemagne pursued, and confined, the Britons on the shores of the ocean; and that ferocious tribe, whose origin and language are so different from the French, was chastised by the imposition of tribute, hostages, and peace. After a long and evasive contest, the rebellion of the dukes of Aquitain was punished by the forfeiture of their province, their liberty, and their lives. Harsh and rigorous would have been such treatment of ambitious governors, who had too faithfully copied the mayors of the palace. But a recent

and a fourth English, measure. The romance writers have increased it to eight feet, and the giant was endowed with a matchless strength and appetite: at a single stroke of his good sword Œufens, he cut a funder an horseman and his horse; at a single repast he devoured a goose, two fowls, a quarter of mutton, &c.

(105) See the concise, but correct and original, work of d' Auriol (États formés en Europe après la Chute de l'Empire Romain en Occident, Paris, 1771, in 4to), whose map includes the empire of Charlemagne; the different parts are illustrated, by Valesius (Notitia Galliarum) for France, Beretti (Dissertatio Chorographica) for Italy, De Mara (Marea Hispanica) for Spain. For the middle geography of Germany, I confess myself poor and defitute.

(106) After a brief relation of his wars and conquests (Vit. Caroli c. 5—14), Eginhard recapitulates, in a few words (c. 15.), the countries subject to his empire. Stravius (Corpus Hist. German., p. 118—149.) has inferred in his Notes the texts of the old Chronicles.

discovery (107), has proved that these unhappy princes were the last and lawful heirs of the blood and sceptre of Clovis, a younger branch, from the brother of Dagobert, of the Merovingian house. Their ancient kingdom was reduced to the dutchy of Gascony, to the counties of Fesenzac and Armagnac, at the foot of the Pyrenees: their race was propagated till the beginning of the sixteenth century; and, after surviving their Carlovingian tyrants, they were resolved to feel the injustice, or the favours, of a third dynasty. By the re-union of Aquitain, France was enlarged to its present boundaries, with the additions of the Netherlands and Spain, as far as the Rhine. II. The Saracens had been expelled Spain, led from France by the grandfather and father of Charlemagne; but they still possessed the greatest part of Spain, from the rock of Gibraltar to the Pyrenees. Amidst their civil divisions, an Arabian emir of Saragossa implored his protection in the diet of Paderborn. Charlemagne undertook the expedition, restored the emir, and, without distinction of faith, impartially crushed the resistance of the Christians, and rewarded the obedience and service of the Mahometans. In his absence he instituted the Spanisb march (108), which extended from the Pyrenees to the river Ebro: Barcelona was the

(107) Of a charter granted to the monastery of Alsou (A.D. 845) by Charles the Bald, which deduces this royal pedigree. I doubt whether some subsequent links of the sixth and seventh centuries are equally firm; yet the whole is approved and defended by M. Gaillard (tom. ii. p. 60—81. 203—206), who affirms, that the family of Montefiquieu (not of the president de Montefiquieu) is descended, in the female line, from Clotaire and Clovis—an innocent pretension!

(108) The governors or counts of the Spanish march revolted from Charles the Simple about the year 906; and a poor pittance, the Rouffion, has been recovered in 1642 by the kings of France (Longueville, Déscriptive de la France, tom. 1 p. 220—222.). Yet the Rouffion contains 188, 900 subjects, and annually pays 4,600,000 livres (Necker, Administration des Finances, tom. i. p. 178, 279.); more people, perhaps, and doubtless more money, than the march of Charlemagne.

residence
residence of the French governor: he possessed the counties of Roussillon and Catalonia; and the infant kingdoms of Navarre and Aragon were subject to his jurisdiction. III. As king of the Lombards, and patron of Rome, he reigned over the greatest part of Italy (109), a tract of a thousand miles from the Alps to the borders of Calabria. The duchy of Beneventum, a Lombard fief, had spread, at the expence of the Greeks, over the modern kingdom of Naples. But Arrehis, the reigning duke, refused to be included in the slavery of his country; assumed the independent title of prince; and opposed his sword to the Carlovingian monarchy. His defence was firm, his submission was not inglorious, and the emperor was content with an easy tribute, the demolition of his fortresses, and the acknowledgment, on his coins, of a supreme lord. The artful flattery of his son Grimoald added the appellation of father, but he asserted his dignity with prudence, and Beneventum insensibly escaped from the French yoke (110). IV. Charlemagne was the first who united Germany under the same sceptre. The name of Oriental France is preferred in the circle of Franconia; and the people of Hesse and Thuringia were recently incorporated with the victors, by the conformity of religion and government. The Alamanni, so formidable to the Romans, were the faithful vassals and confederates of the Franks; and their country was inscribed within the modern limits of Alsace, Swabia, and Switzerland. The Bavarians, with a similar indulgence of their laws and manners, were less patient of a master: the repeated treasons of Tsilillo justified the abolition of their hereditary dukes; and

their power was shared among the counts, who judged and guarded that important frontier. But the north of Germany, from the Rhine and beyond the Elbe, was still hostile and Pagan; nor was it till after a war of thirty-three years that the Saxons bowed under the yoke of Christ and of Charlemagne. The idols and their votaries were extirpated: the foundation of eight bishoprics, of Munster, Osnaburgh, Paderborn, and Minden, of Bremen, Verden, Hildesheim, and Halberstadt, define, on either side of the Weser, the bonds of ancient Saxony; these episcopal seats were the first schools and cities of that savage land; and the religion and humanity of the children atoned, in some degree, for the massacre of the parents. Beyond the Elbe, the Slavi, or Sclavonians, of similar manners and various denominations, overspread the modern dominions of Prussia, Poland, and Bohemia, and some transient marks of obedience have tempted the French historian to extend the empire to the Baltic and the Vistula. The conquest or conversion of those countries is of a more recent age; but the first union of Bohemia with the Germanic body may be justly ascribed to the arms of Charlemagne. V. He retaliated on the Avars, or Huns of Pannonia, the same calamities which they had inflicted on the nations. Their rings, the wooden fortifications which encircled their districts and villages, were broken down by the triple effort of a French army, that was poured into their country by land and water, through the Carpathian mountains and along the plain of the Danube. After a bloody conflict of eight years, the loss of some French generals was avenged by the slaughter of the most noble Huns: the relics of the nation submitted: the royal residence of the chagan was left desolate and unknown; and the treasures, the rapine of two hundred and fifty years, enriched the victorious troops, or decorated

decorated the churches of Italy and Gaul (111) After the reduction of Pannonia, the empire of Charlemagne was bounded only by the conflux of the Danube with the Teyfs and the Save: the provinces of Istria, Liburnia, and Dalmatia, were an easy, though unprofitable, accession; and it was an effect of his moderation, that he left the maritime cities under the real or nominal sovereignty of the Greeks. But these distant possessions added more to the reputation than to the power of the Latin emperor; nor did he risk any ecclesiastical foundations to reclaim the Barbarians from their vagrant life and idolatrous worship. Some canals of communication between the rivers, the Saône and the Meuse, the Rhine and the Danube, were faintly attempted (112). Their execution would have vivified the empire; and more cost and labour were often wasted in the structure of a cathedral.

If we retrace the outlines of this geographical picture, it will be seen that the empire of the Franks extended, between east and west, from the Ebro to the Elbe or Vltula; between the north and south, from the duchy of Beneventum to the river Eyder, the perpetual boundary of Germany and Denmark. The personal and political importance of Charlemagne was magnified by the distress and division of the rest of Europe. The islands of Great Britain and Ireland were disputed by a crowd of princes of

(112) The junction of the Rhine and Danube was undertaken only for the service of the Pannonian war (Gaillard, Vie de Charlemagne, tom. ii. p. 312—315.). The canal, which would have been only two leagues in length, and of which some traces are still extant in Swabia, was interrupted by excessive rains, military avocations and superstitious fears (Schepelin, Hist. de l'Académie des Inscriptions, tom. xviii. p. 256. Saxon or Scottish origin; and, after the loss of Spain, the Christian and Gothic kingdom of Alphonso the chaste, was confined to the narrow range of the Asturian mountains. These petty sovereigns revered the power or virtue of the Carolingian monarch, implored the honour and support of his alliance, and styled him their common parent, the sole and supreme emperor of the West (113). He maintained a more equal intercourse with the caliph Harun al Rashid (114), whose dominion stretched from Africa to India, and accepted from his ambassadors a tent, a water clock, an elephant, and the keys of the holy sepulchre. It is not easy to conceive the private friendship of a Frank and an Arab, who were strangers to each other’s person, and language, and religion: but their public correspondence was founded on vanity, and their remote situation left no room for a competition of interest. Two-thirds of the Western empire of Rome were subject to Charlemagne, and the deficiency was amply supplied by his command of the inaccessible or invincible nations of Germany. But in the choice of his enemies, we may be reasonably surprised that he so often preferred the poverty of the north to the riches of the south. The three-and-thirty campaigns laboriously consummed in the woods and mountains of Germany, would have sufficed to assert the amplitude of his title by the expulsion of the Greeks from Italy and the Saracens from Spain. The weakness of the Greeks would have ensured

(113) See Eginhard, c. 196 and Galliard, tom. ii. p. 360—385, who mentions with a loose reference, the intercourse of Charlemagne and Egbert, the emperor’s gift of his own sword, and the modest answer of his Saxon disciple. The anecdote, if genuine, would have adorned our English histories.

an easy victory: and the holy crusade against the Saracens would have been prompted by glory and revenge, and loudly justified by religion and policy. Perhaps, in his expeditions beyond the Rhine and the Elbe, he aspired to save his monarchy from the fate of the Roman empire, to disarm the enemies of civilized society, and to eradicate the seed of future emigrations. But it has been wisely observed, that in a light of precaution, all conquest must be ineffectual, unless it could be universal; since the increasing circle must be involved in a larger sphere of hostility (115). The subjugation of Germany withdrew the veil which had so long concealed the continent or islands of Scandinavia from the knowledge of Europe, and awakened the torpid courage of their barbarous natives. The fiercest of the Saxon idolators escaped from the Christian tyrant to their brethren of the north; the Ocean and Mediterranean were covered with their pyrrhical fleets; and Charlemagne beheld with a sigh the destructive progress of the Normans, who, in less than seventy years, precipitated the fall of his race and monarchy.

Had the pope and the Romans revived the primitive constitution, the titles of emperor and Augustus were conferred on Charlemagne for the term of his life; and his successors, on each vacancy, must have ascended the throne by a formal or tacit election. But the association of his son Lewis the Pious affords the independent right of monarchy and conquest, and the emperor seems on this occasion to have foreseen and prevented the latent claims of the clergy. The royal youth was commanded to take the crown from

the altar, and with his own hands to place it on his head, as a gift which he held from God, his father, and the nation (116). The same ceremony was repeated, though with less energy, in the subsequent associations of Lothaire and Lewis the second; the Carolingian sceptre was transmitted from father to son in a lineal descent of four generations; and the ambition of the popes was reduced to the empty honour of crowning and anointing these hereditary princes who were already invested with their power and dominions. The pious Lewis survived his brothers, and embraced the whole empire of Charlemagne; but the nations and the nobles, his bishops and his children, quickly discerned that this mighty mass was no longer inspired by the same soul; and the foundations were undermined to the centre, while the external surface was yet fair and entire. After a war, or battle, which consumed one hundred thousand Franks, the empire was divided by treaty between his three sons who had violated every filial and fraternal duty. The kingdoms of Germany and France were forever separated; the provinces of Gaul, between the Rhone and the Alps, the Meuse and the Rhine, were assigned, with Italy, to the Imperial dignity of Lothaire. In the partition of his share, Lorraine and Arles, two recent and transitory kingdoms, were bestowed on the younger children; and Lewis the second, his eldest son, was content with the realm of Italy, the proper and sufficient patrimony of a Roman emperor. On his death without any

(116) Theegan, the biographer of Lewis, relates this coronation; and Baroniuss has honestly transcribed it (A. D. 813, No. 13, &c. male issue, the vacant throne was disputed by his uncles and cousins, and the popes most dexterously seized the occasion of judging the claims and merits of the candidates, and of bestowing on the most obsequious or most liberal, the Imperial office of advocate of the Roman church. The dregs of the Carlingian race no longer exhibited any symptoms of virtue or power, and the ridiculous epithets of the *bald*, the *hammerer*, the *fat*, and the *simple*, distinguished the tame and uniform features of a crowd of kings alike deserving of oblivion. By the failure of the collateral branches, the whole inheritance devolved to Charles the Fat, the last emperor of his family: his infancy authorised the desertion of Germany, Italy, and France: he was deposed in a diet, and solicited his daily bread from the rebels, by whose contempt his life and liberty had been spared. According to the measure of their force, the governors, the bishops, and the lords, usurped the fragments of the falling empire; and some preference was shewn to the female or illegitimate blood of Charlemagne. Of the greater part, the title and possession were alike doubtful, and the merit was adequate to the contracted scale of their dominions. Those who could appear with an army at the gates of Rome were crowned emperors in the Vatican; but their modesty was more frequently satisfied with the appellation of kings of Italy; and the whole term of seventy-four years may be deemed a vacancy, from the abdication of Charles the Fat to the establishment of Otho the first.

Otho (117) was of the noble race of the dukes of Saxony; and if he truly descended from

from Witikind, the adversary and proselyte of Charlemagne, the posterity of a vanquished people was exalted to reign over their conquerors. His father Henry the Fowler was elected, by the suffrage of the nation, to save and institute the kingdom of Germany. Its limits (118) were enlarged on every side by his son, the first and greatest of the Othos. A portion of Gaul to the west of the Rhine, along the banks of the Meuse and the Moselle, was assigned to the Germans, by whose blood and language it has been tinged since the time of Caesar and Tacitus. Between the Rhine, the Rhone, and the Alps, the successors of Otho acquired a vain supremacy over the broken kingdoms of Burgundy and Arles. In the north, Christianity was propagated by the sword of Otho, the conqueror and apostle of the Slavic nations of the Elbe and Oder: the marches of Brandenburg and Slefwick were fortified with German colonies; and the king of Denmark, the dukes of Poland and Bohemia, confessed themselves his tributary vassals. At the head of a victorious army, he passed the Alps, subdued the kingdom of Italy, delivered the pope, and for ever fixed the Imperial crown in the name and nation of Germany. From that memorable era, two maxims of public jurisdiction were introduced by force and ratified by time. I. (118) See the treatise of Corioquis (de Plaibus Imperii Germanici, Francofort. 1680, in 4to.) he rejects the extravagant and improper scale of the Roman and Carolingian empires, and discourses with moderation the rights of Germany, her vassals and her neighbours.
of emperor and Augustus, till he had received the crown from the hands of the Roman pontiff (119).

The Imperial dignity of Charlemagne was announced to the East by the alteration of his style; and instead of saluting his fathers, the Greek emperors, he presumed to adopt the more equal and familiar appellation of brother (120). Perhaps in his connection with Irene, he aspired to the name of husband: his embassy to Constantinople spoke the language of peace and friendship, and might conceal a treaty of marriage with that ambitious princess, who had denounced the most sacred duties of a mother. The nature, the duration, the probable consequences of such an union between two distant and dissimilar empires, it is impossible to conjecture; but the unanimous silence of the Latins may teach us to suspect, that the report was invented by the enemies of Irene, to charge her with the guilt of betraying the church and state to the strangers of the West (121). The French ambassadors were the spectators, and had nearly been the victims, of the conspiracy of Nicephorus, and the national hatred. Constantinople was exasperated by the treason and sacrilege of ancient Rome: a proverb, "That the Franks were "good friends and bad neighbours," was in every one's mouth; but it was dangerous to

(119) The power of custom forces me to number Conrad I. and Henry I. the Fowler, in the list of emperors, a title which was never assumed by those kings of Germany. The Italians, Muratori for instance, are more scrupulous and correct, and only reckon the princes who have been crowned at Rome.

(120) Invidiam tamen suscepit nominis (C. P. imperatoribus super hoc indignantibus magno tumultu patientis, vicinique eorum concussissimae mitiendo ad eos crebras legationes, et in epistolis fratres eos appellando.EGINHARD, c. 28, p. 118.). Perhaps it was on their account that, like Augustus, he affected some reluctance to receive the empire.

(121) Theophanes speaks of the coronation and union of Charles-Constantine (Chronograph. p. 309.), and of his treaty of marriage with Irene (p. 402.), which is unknown to the Latins. Gaillard relates his transactions with the Greek empire (tom. ii. p. 446—468.).

provoke a neighbour who might be tempted to reiterate, in the church of St. Sophia, the ceremony of his Imperial coronation. After a tedious journey of circuit and delay, the ambassadors of Nicephorus found him in his camp, on the banks of the river Sala; and Charlemagne affected to confound their vanity by displaying, in a Franconian village, the pomp, or at least the pride, of the Byzantine palace (122). The Greeks were successively led through four halls of audience; in the first they were ready to fall prostrate before a splendid personage in a chair of state, till he informed them that he was only a servant, the constable, or master of the horse of the emperor. The same mistake, and the same answer, were repeated in the apartments of the count palatine, the steward, and the chamberlain; and their impatience was gradually heightened, till the doors of the presence-chamber were thrown open, and they beheld the genuine monarch, on his throne, enriched with the foreign luxury which he despised, and encircled with the love and reverence of his victorious chiefs. A treaty of peace and alliance was concluded between the two empires, and the limits of the East and West were defined by the right of present possession. But the Greeks (123) soon forgot this humiliating equality, or remembered it only to hate the Barbarians by whom it was extorted. During the short union of virtue and power, they respectfully saluted the august Charlemagne with the acclamations of basileus,

(122) Gaillard very properly observes, that this pageant was a farce suitable to children only; but that it was indeed represented in the presence, and for the benefit, of children of a larger growth.

(123) Compare, in the original texts collected by Pagi (Tom. iii. A.D. 812, No. 7. A.D. 814, No. 10, &c.), the contrast of Charlemagne and his son to the former the ambassadors of Michael (who were indeed disavowed) more suo, in est lingua Graecâ laudes dixerunt, imperatorum eum et Basiliæ appellantes; to the latter, Vocae imperatoris Francorum, &c.
and emperor of the Romans. As soon as these qualities were separated in the person of his pious son, the Byzantine letters were inscribed, "To the king, or, as he styles himself, the emperor of the Franks and Lombards." When both power and virtue were extinct, they despoiled Lewis the second of his hereditary title, and, with the barbarous appellation of rex or rega, degraded him among the crowd of Latin princes. His reply (124) is expressive of his weakness: he proves, with some learning, that, both in sacred and profane history, the name of king is synonymous with the Greek word basilicus: if, at Constantinople, it were assumed in a more exclusive and imperial sense, he claims from his ancestors, and from the pope, a just participation of the honours of the Roman purple. The same controversy was revived in the reign of the Othos; and their ambassador describes, in lively colours, the insolence of the Byzantine court (125). The Greeks affected to desire the poverty and ignorance of the Franks and Saxons; and in their last decline, refused to prostitute to the kings of Germany the title of Roman emperors.

These emperors, in the election of the popes, continued to exercise the powers which had been assumed by the Gothic and Grecian princes; and the importance of this prerogative encreased with the temporal estate and spiritual jurisdiction.

(124) See the epistle, in Paralipomena, of the anonymous writer of Salerno (Script. Ital. tom. ii. pars ii. p. 243—254. c. 93—107.), whom Baronius (A. D. 871, No 51—71.) mistook for Euchempert, when he transcribed it in his Annals.

of the Roman church. In the Christian aristocracy, the principal members of the clergy still formed a senate to assist the administration, and to supply the vacancy of the bishop. Rome was divided into twenty-eight parishes, and each parish was governed by a cardinal-priest, or presbyter, a title which, however common and modest in its origin, has aspired to emulate the purple of kings. Their number was enlarged by the association of the seven deacons of the most considerable hospitals, the seven palatine judges of the Lateran, and some dignitaries of the church. This ecclesiastical senate was directed by the seven cardinal bishops of the Roman province, who were less occupied in the suburb dioceses of Oldia, Porto, Velitrae, Tuculum, Prænesta, Tibur, and the Sabines, than by their weekly service in the Lateran, and their superior share in the honours and authority of the apostolic see. On the death of the pope, these bishops recommended a successor to the suffrage of the college of cardinals (126), and their choice was ratified or rejected by the applause or clamour of the Roman people. But the election was imperfect; nor could the pontiff be legally consecrated till the emperor, the advocate of the church, had graciously signified his approbation and consent. The royal commissioner examined, on the spot, the form and freedom of the proceedings; nor was it, till after a previous scrutiny into the qualifications of the candidates, that he accepted an oath of fidelity, and confirmed the donations which had successively enriched the patrimony of St.

(126) The origin and progress of the title of cardinal may be found in Thomasius (Disciplina de l'Église, tom. i. p. 1261—1298.), Muratori (Antiquitates Italicae Medii Aevi, tom. vii. dissert. 16 p. 189—181.), and Mosheim (Epitome Hist. Eccles. p. 345—347.), who accurately remarks the forms and changes of the election. The cardinal bishops, so highly praised by Peter Damianus, are sunk to a level with the rest of the laic clergy.

Peter.
THE DECLINE AND FALL

Peter. In the frequent schisms, the rival claims were submitted to the sentence of the emperor; and in a synod of bishops he presumed to judge, to condemn, and to punish, the crimes of a guilty pontiff. Otho the first imposed a treaty on the senate and people, who engaged to prefer the candidate most acceptable to his majesty (127); his successors anticipated or prevented their choice: they bestowed the Roman benefice, like the bishoprics of Cologne or Bamberg, on their chancellors or preceptors; and whatever might be the merit of a Frank or Saxon, his name sufficiently attests the interposition of foreign power. These acts of prerogative were most speciously excused by the vices of a popular election. The competitor who had been excluded by the cardinals, appealed to the passions or avarice of the multitude; the Vatican and the Lateran were stained with blood; and the most powerful senators, the marquises of Tuscany and the counts of Tusculum, held the apostolic see in a long and disgraceful servitude. The Roman pontiffs, of the ninth and tenth centuries, were insulted, imprisoned, and murdered, by their tyrants; and such was their indigence after the loss and usurpation of the ecclesiastical patrimonies, that they could neither support the state of a prince nor exercise the charity of a priest (128). The influence of two sister prof-

(127) Firmiæ jurantæ, nonquant sc papam eleuctarum sunt ordinarios, præter consensum et electionem Othonis et filii sui (Liuitrand, l. vi. c. 6. p. 472.). This important concession may either supply or confirm the decree of the clergy and people of Rome, to freely reject by Baronius, Pagi, and Muratori (A. D. 964), and so well defended and explained by St. Marc (Abregé, tom. ii. p. 808—816. tom. iv. p. 1167—1185.). Consult that historical critic, and the Annals of Muratori, for the election and confirmation of each pope.

(128) The oppression and vices of the Roman church in the xth century are strongly painted in the history and legation of Liutprand (see p. 440. 450. 471—476. 479. &c.) and it is whimsical enough to observe Muratori tempering the invective of Baronius against the popes, but these popes had been chosen, not by the cardinals, but by lay-patrons.

stitutes, Marozia, and Theodora, was founded on their wealth and beauty, their political and amorous intrigues: the most strenuous of their lovers were rewarded with the Roman mitre, and their reign (129) may have suggested to the darker ages (130) the fable (131) of a female pope (132). The bastard son, the grandson and the great-grandson of Marozia, a rare genealogy, were seated in the chair of St. Peter, and it was at the age of nineteen years that the second of these became the head of the Latin church. His youth and manhood were of a suitable complexion; and the nations of pilgrims could bear testimony to the charges that were urged against him in a Roman synod, and in the presence of Othon the great. As John XII. had renounced the dress and decencies of

(129) The time of pope Joan (papissa Joanne) is placed somewhat earlier than Theodora or Marozia; and the two years of her imaginary reign are forcibly inferred between Leo IV. and Benedict III. But the contemporary Anastasius indubitably links the death of Leo and the elevation of Benedict (illico max., p. 247); and the accurate chronology of Pagi, Muratori, and Leibnitz, fixes both events to the year 857.

(130) The advocates for pope Joan produce one hundred and fifty witnesses, or rather echoes, of the xivth, xvth, and xviith centuries. They bear testimony against themselves and the legend, by multiplying the proof that so curious a story must have been repeated by writers of every description to whom it was known. On these of the xivth and xviith centuries, the recent events would have flashed with a double force. Would Photius have spared such a reproach? Could Liutprand have misst such scandal? It is scarcely worth while to discuss the various readings of Martinus Polonus, Sigebert of Gemblours, or even Marianus Scoto; but a most palpable forgery is the passage of pope Joan, which has been shifted into some MSS. and editions of the Roman Anastasius.

(131) As falsa, it defiles that name; but I would not pronounce it incredible. Suppose a famous French chevalier of our own times to have been born in Italy, and educated in the church, instead of the army; her merit or fortune might have raised her to St. Peter's chair; her amours would have been natural; her delivery in the streets unlucky, but not improbable.

(132) Till the reformation, the tale was repeated, and believed without offence; and Joan's female stature long occupied her place among the popes in the cathedral of Sienna (Pagi, Critica, tom. iii. p. 624—626.). She has been annihilated by two learned protestants, Blondel and Bayle (Dictionnaire Critique, Papessa, Polonus, Blowdel); but their brethren were scandalised by this equitable and generous criticism. Spanheim and Lenfant attempted to save this poor engine of controversy; and even Mosheim condescends to cherish some doubt and suspicion (p. 299).
his profession, the soldier may not perhaps be dishonoured by the wine which he drank, the blood that he spilt, the flames that he kindled, or the licentious pursuits of gaming and hunting. His open simony might be the consequence of distress: and his blasphemous invocation of Jupiter and Venus, if it be true, could not possibly be serious. But we read with some surprise, that the worthy grandson of Marozia lived in public adultery with the matrons of Rome; that the Lateran palace was turned into a school for prostitution, and that his rapes of virgins and widows had deterred the female pilgrims from visiting the tomb of St. Peter, left, in the devout act, they should be violated by his successor (133). The protestants have dwelt with malicious pleasure on these characters of anti-christ; but to a philosophic eye, the vices of the clergy are far less dangerous than their virtues. After a long series of scandal, the apostolic see was reformed and exalted by the austerity and zeal of St. Peter. That ambitious monk devoted his life to the execution of two projects. I. To fix in the college of cardinals the freedom and independence of election, and for ever to abolish the right or usurpation of the emperors and the Roman people. II. To bequeath and re-fume the Western empire as a fief or benefice (134) of the church, and to extend his temporal dominion over the kings and kingdoms of

the earth. After a contest of fifty years, the first of these designs was accomplished by the firm support of the ecclesiastical order, whose liberty was connected with that of their chief. But the second attempt, though it was crowned with some partial and apparent success, has been vigorously refuted by the secular power, and finally extinguished by the improvement of human reason.

In the revival of the empire of Rome, neither the bishop nor the people could bestow on Charlemagne or Otho, the provinces which were lost, as they had been won, by the chance of arms. But the Romans were free to choose a master for themselves; and the powers which had been delegated to the patrician, were irrevocably granted to the French and Saxon emperors of the West. The broken records of the times (135) preserve some remembrance of their palace, their mint, their tribunal, their edicts, and the sword of justice, which, as late as the thirteenth century, was derived from Caesar to the prefect of the city (136). Between the arts of the popes and the violence of the people, this supremacy was crushed and annihilated. Content with the titles of emperor and Augustus, the successors of Charlemagne neglected to assert this local jurisdiction. In the hour of prosperity, their ambition was distracted by more alluring objects; and in the decay and division of the empire, they were oppressed by the defence of their hereditary provinces. Amidst the ruins of Italy, the famous Marozia invited one of the usurpers to assume the character of

her third husband; and Hugh, king of Burgundy, was introduced by her faction into the mole of Hadrian or castle of St. Angelo, which commands the principal bridge and entrance of Rome. Her son by the first marriage, Alberic, was compelled to attend at the nuptial banquet; but his reluctant and ungraceful service was chastised with a blow by his new father. The blow was productive of a revolution. "Roman," exclaimed the youth, "once you were the masters of the world, and these Burgundians the most abject of your slaves. They now reign, these voracious and brutal savages, and my injury is the commencement of your servitude (137)." The alarum bell rung to arms in every quarter of the city: the Burgundians retreated with haste and shame; Marozia was imprisoned by her victorious son; and his brother, pope John XI. was reduced to the exercise of his spiritual functions. With the title of prince, Alberic possessed above twenty years the government of Rome, and he is said to have gratified the popular prejudice, by restoring the office, or at least the title, of consuls and tribunes. His son and heir Octavian assumed, with the pontificate, the name of John XII.; like his predecessor, he was provoked by the Lombard princes to seek a deliverer for the church and republic; and the services of Otho were rewarded with the Imperial dignity. But the Saxon was imperious, the Romans were impatient, the festival of the coronation was disturbed by the secret conflict of prerogative and freedom, and Otho commanded his sword-bearer

not to stir from his person, lest he should be assaulted and murdered at the foot of the altar (138). Before he repassed the Alps, the emperor chastised the revolt of the people and the ingratitude of John XII. The pope was degraded in a synod; the praefect was mounted on an ass, whipped through the city and cast into a dungeon; thirteen of the most guilty were hanged, others were mutilated or banished; and this severe process was justified by the ancient laws of Theodosius and Justinian. The voice of fame has accused the second Otho of a perfidious and bloody act, the massacre of the senators, whom he had invited to his table under the fair semblance of hospitality and friendship (139). In the minority of his son Otho the third, Rome made a bold attempt to shake off the Saxon yoke, and the consul Crescentius was the Brutus of the republic. From the condition of a subject and an exile, he twice rose to the command of the city, oppressed, expelled, and created the popes, and formed a conspiracy for restoring the authority of the Greek emperors. In the fortrefs of St. Angelo, he maintained an obstinate siege, till the unfortunate consul was betrayed by a promise of safety: his body was suspended on a gibbet, and his head was exposed on the battlements of the castle. By a reverse of fortune, Otho, after separating his troops, was besieged three days, without food, in his palace; and a disgraceful escape saved him from the justice or fury of the Romans. The senator Ptolemy was the leader of the people, and the widow of Crescentius en-

(139) This bloody feast is described in Leonine verse, in the Pantheon of Godfrey of Viterbo (Script. Mansi); but his evidence, which imposed on Sigonius, is reasonably suspected by Muratori (Annali, tom. viii. p. 177.).
joyed the pleasure of revenging her husband, by a poison which she administered to her Imperial lover. It was the design of Otho the third to abandon the ruder countries of the north, to erect his throne in Italy, and to revive the institutions of the Roman monarchy. But his successors only once in their lives appeared on the banks of the Tyber, to receive their crown in the Vatican (140). Their absence was contemptible, their presence odious and formidable. They descended from the Alps, at the head of their Barbarians, who were strangers and enemies to the country; and their transient visit was a scene of tumult and bloodshed (141). A faint remembrance of their ancestors still tormented the Romans; and they beheld with pious indignation the succession of Saxons, Franks, Swabians, and Bohemians, who usurped the purple and prerogatives of the Caesars.

There is nothing perhaps more adverse to nature and reason than to hold in obedience remote countries and foreign nations, in opposition to their inclination and interest. A torrent of Barbarians may pass over the earth, but an extensive empire must be supported by a refined system of policy and oppression: in the centre, an absolute power, prompt in action, and rich in resources; a swift and easy communication with the extreme parts; fortifications to check the first effort of rebellion: a regular administration to protect and punish; and a well-disciplined army to inspire fear, without provoking discontent and

defpair. Far different was the situation of the German Caesars, who were ambitious to enslave the kingdom of Italy. Their patrimonial estates were stretched along the Rhine, or scattered in the provinces; but this ample domain was alienated by the imprudence or distress of successive princes; and their revenue, from minute and vexatious prerogative, was scarcely sufficient for the maintenance of their household. Their troops were formed by the legal or voluntary service of their feudal vassals, who passed the Alps with reluctance, assumed the licence of rapine and disorder, and capriciously deserted before the end of the campaign. Whole armies were swept away by the pestiferal influence of the climate; the survivors brought back the bones of their princes and nobles (142), and the effects of their own intemperance were often imputed to the treachery and malice of the Italians, who rejoiced at least in the calamities of the Barbarians. This irregular tyranny might contend on equal terms with the petty tyrants of Italy; nor can the people, or the reader, be much interested in the event of the quarrel. But in the eleventh and twelfth centuries, the Lombards rekindled the flame of industry and freedom; and the generous example was at length imitated by the republics of Tuscany. In the Italian cities a municipal government had never been totally abolished; and their first privileges were granted by the favour and policy of the emperors, who were desirous of erecting a plebeian barrier against the independence of the nobles. But their rapid progress, the daily extension of their power and

pretensions were founded on the numbers and spirit of these rising communities (143). Each city filled the measure of her diocese or district; the jurisdiction of the counts and bishops, of the marquises and counts, was banished from the land; and the proudest nobles were persuaded or compelled to desert their solitary castles, and to embrace the more honourable character of freemen and magistrates. The legislative authority was inherent in the general assembly; but the executive powers were entrusted to three consuls, annually chosen from the three orders of captains, valiantors (144), and commons, into which the republic was divided. Under the protection of equal law, the labours of agriculture and commerce were gradually revived; but the martial spirit of the Lombards was nourished by the presence of danger; and as often as the bell was rung, or the standard (145) erected, the gates of the city poured forth a numerous and intrepid band, whose zeal in their own cause was soon guided by the use and discipline of arms. At the foot of these popular ramparts, the pride of the Cisalpini was overthrown; and the invincible genius of liberty prevailed over the two Frederics, the greatest princes of the middle-age: the first, superior perhaps in military prowess; the second, who undoubtedly excelled in the softer accomplishments of peace and learning.

Ambitious
of the splendour of the purple, Frederic the first invaded the republics of Lombardy, with the arts of a statesman, the valour of a soldier, and the cruelty of a tyrant. The recent discovery of the Pandects had renewed a science most favourable to despotism; and his venal advocates proclaimed the emperor the absolute master of the lives and properties of his subjects. His royal prerogatives, in a less odious shape, were acknowledged in the diet of Roncaglia; and the revenue of Italy was fixed at thirty thousand pounds of silver (146), which were multiplied to an indefinite demand, by the rapine of the fiscal officers. The obstinate cities were reduced by the terror or the force of his arms; his captives were delivered to the executioner, or shot from his military engines; and, after the siege and surrender of Milan, the buildings of that stately capital were razed to the ground, three hundred hostages were sent into Germany, and the inholders were dispersed in four villages, under the yoke of the inflexible conqueror (147). But Milan soon rose from her ashes; and the league of Lombardy was cemented by dissatisfaction: their cause was espoused by Venice, pope Alexander the third, and the Greek emperor: the fabric of oppression was overturned in a day; and in the treaty of Constance, Frederic subscribed, with some reservations, the freedom of four-and-twenty cities. His grandson contended with their vigour and maturity; but Frederic

the second (148) was endowed with some personal and peculiar advantages. His birth and education recommended him to the Italians; and in the implacable discord of the two factions, the Ghibelins were attached to the emperor, while the Guelfs displayed the banner of liberty and the church. The court of Rome had slumbered, when his father Henry the sixth was permitted to unite with the empire the kingdoms of Naples and Sicily; and from these hereditary realms, the son derived an ample and ready supply of troops and treasure. Yet Frederic the second was finally oppressed by the arms of the Lombards and the thunders of the Vatican; his kingdom was given to a stranger, and the last of his family was beheaded at Naples on a public scaffold. During sixty years, no emperor appeared in Italy, and the name was remembered only by the ignominious fate of the last relics of sovereignty.

--The Barbarian conquerors of the West were pleased to decorate their chief with the title of emperor; but it was not their design to invest him with the despotism of Constantine and Justinian. The persons of the Germans were free, their conquests were their own, and their national character was animated by a spirit which scorned the servile jurisprudence of the new or the ancient Rome. It would have been a vain and dangerous attempt to impose a monarch, on the armed freemen who were impatient of a magistrate; on the bold, who refused to obey; on the powerful, who aspired to command. The empire of Charlemagne and Otho was distributed among the dukes of the nations or provinces, the counts of the smaller districts, and

the margraves of the marches or frontiers, who all united the civil and military authority as it had been delegated to the lieutenants of the first Caesars. The Roman governors, who, for the most part, were soldiers of fortune, seduced their mercenary legions, assumed the Imperial purple, and either failed or succeeded in their revolt, without wounding the power and unity of government. If the dukes, margraves, and counts of Germany, were less audacious in their claims, the consequences of their success were more lasting and pernicious to the state. Instead of aiming at the supreme rank, they silently laboured to establish and appropriate their provincial independence. Their ambition was seconded by the weight of their estates and vassals, their mutual example and support, the common interest of the subordinate nobility, the change of princes and families, the minorites of Otho the third and Henry the fourth, the ambition of the popes, and the vain pursuit of the fugitive crowns of Italy and Rome. All the attributes of regal and territorial jurisdiction were gradually usurped by the commanders of the provinces; the right of peace and war, of life and death, of coinage and taxation, of foreign alliance and domestic economy. Whatever had been seized by violence, was ratified by favour or distress, was granted as the price of a doubtful vote or a voluntary service; whatever had been granted to one, could not, without injury, be denied to his successor, or equal; and every act of local or temporary possession was insensibly moulded into the constitution of the Germanic kingdom. In every province, the visible presence of the duke or count was interposed between the throne and the nobles; the subjects of the law became the vassals of a private chief; and the standard, which be received from
from his sovereign, was often raised against him in the field. The temporal power of the clergy was cherished and exalted by the superstition of policy of the Carolingian and Saxon dynasties, who blindly depended on their moderation and fidelity; and the bishoprics of Germany were made equal in extent and privilege; superior in wealth and population to the most ample states of the military order. As long as the emperors retained the prerogative of bestowing on every vacancy these ecclesiastic and secular benefices, their cause was maintained by the gratitude or ambition of their friends and favourites. But in the quarrel of the investitures, they were deprived of their influence over the episcopal chapters; the freedom of election was restored, and the sovereign was reduced, by a solemn mockery, to his first prayers, the recommendation, once in his reign, to a single prebend in each church. The secular governors, instead of being recalled at the will of a superior, could be degraded only by the sentence of their peers. In the first age of the monarchy, the appointment of the son to the duchy or county of his father, was solicited as a favour; it was gradually obtained as a custom, and exerted as a right: the lineal succession was often extended to the collateral or female branches; the states of the empire (their popular, and at length their legal, appellation) were divided and alienated by testament and sale; and all idea of a public trust was lost in that of a private and perpetual inheritance. The emperor could not even be enriched by the casualties of forfeiture and extinction: within the term of a year, he was obliged to dispose of the vacant seat, and in the choice of the candidate, it was his duty to consult either the general or the provincial diet.

After
OF THE ROMAN EMPIRE. 185.

After the death of Frederic the Second, Germany was left a monster with a hundred heads. A crowd of princes and prelates disputed the ruins of the empire: the lords of innumerable castles were less prone to obey, than to imitate, their superiors; and according to the measure of their strength, their incessant hostilities received the names of conquest or robbery. Such anarchy was the inevitable consequence of the laws and manners of Europe; and the kingdoms of France and Italy were shivered into fragments by the violence of the same tempest. But the Italian cities and the French vassals were divided and destroyed, while the union of the Germans has produced, under the name of an empire, a great system of a federative republic. In the frequent and annual perpetual institution of diets, a national spirit was kept alive, and the powers of a common legislature are still exercised by the three branches of the electors, the princes, and the free and Imperial cities of Germany. 1. Seven of the most powerful feudatories were permitted to assume, with a distinguished name and rank, the exclusive privilege of choosing the Roman emperor; and these electors were the king of Bohemia, the duke of Saxony, the margrave of Brandenburgh, the count palatine of the Rhine, and the three archbishops of Mentz, of Treves, and of Cologne. II. The college of princes and prelates purged themselves of a promiscuous multitude: they reduced to four representative votes, the long series of independent counts, and excluded the nobles or equestrian order, sixty thousand of whom, as in the Polish diets, had appeared on horseback in the field of election. III. The pride of birth and dominion, of the sword and the mitre, wisely adopted the commons as the third branch of the legislature, and, in the progress of society,
THE DECLINE AND FALL

ety, they were introduced about the same era into the national assemblies of France, England, and Germany. The Hanseatic league commanded the trade and navigation of the north: the confederates of the Rhine secured the peace and intercourse of the inland country: the influence of the cities has been adequate to their wealth and policy, and their negative still invalidates the acts of the two superior colleges of electors and princes (149).

It is in the fourteenth century, that we may view in the strongest light the state and contrast of the Roman empire of Germany, which no longer held, except on the borders of the Rhine and Danube, a single province of Trajan or Constantine. Their unworthy successors were the counts of Hapsburgh, of Nassau, of Luxemburgh, and of Schwartzburgh: the emperor Henry the seventh procured for his son the crown of Bohemia, and his grand-son Charles the fourth was born among a people, strange and barbarous in the estimation of the Germans themselves (150). After the excommunication of Lewis of Bavaria, he received the gift or promise of the vacant empire from the Roman

(149) In the immense labyrinth of the jus publicum of Germany, I must either quote one writer or a thousand; and I had rather trust to one faithful guide, than transcribe, on credit, a multitude of names and passages. That guide is M. Pfeffel, the author of the best legal and constitutional history that I know of any country (Nouvel Abrégé Chronologique de l'Histoire et du Droit Public d'Allemagne; Paris, 1776, 12 Vol., in 4°). His learning and judgment have discerned the most interesting facts; his simple brevity comprehses them in a narrow space; his chronological order distributes them under the proper dates; and an elaborate index collects them under their respective heads. To this work, in a most perfect state, Dr. Robertson was gratefully indebted for that masterly sketch which traces even the modern changes of the Germanic body. The Corpus Historiae Germaniae of Struvinus has been likewise consulted, the more usefully, as that huge compilation is fortified in every page with the original texts.

(150) Yet, personally, Charles IV. must not be considered as a Barbarian. After his education at Paris, he recovered the use of the Bohemian, his native, idiom; and the emperor conversed and wrote with equal facility in French, Latin, Italian, and German (Struvinus, p. 615, 616). Petrarcli always represents him as a polite and learned prince.
pontiffs, who, in the exile and captivity of Avignon, affected the dominion of the earth. The death of his competitors united the electorial college, and Charles was unanimously saluted king of the Romans, and future emperor: a title which in the same age was prostituted to the Caesars of Germany and Greece. The German emperor was no more than the elective and impotent magistrate of an aristocracy of princes, who had not left him a village that he might call his own. His best prerogative was the right of presiding and proposing in the national senate, which was convened at his summons; and his native kingdom of Bohemia, lefs opulent than the adjacent city of Nurembergh, was the firmest seat of his power and the richest source of his revenue. The army with which he passed A.D. 1355, the Alps, consisted of three hundred horse. In the cathedral of St. Ambrofe, Charles was crowned with the iron crown, which tradition ascribed to the Lombard monarchy; but he was admitted only with a peaceful train; the gates of the city were shut upon him; and the king of Italy was held a captive by the arms of the Visconti, whom he confirmed in the sovereignty of Milan. In the Vatican he was again crowned with the golden crown of the empire; but, in obedience to a secret treaty, the Roman emperor immediately withdrew, without reposing a single night within the walls of Rome. The eloquent Patriarch (151), whose fancy revived the visionary glories of the Capitol, deprecates and upbraids the ignominious flight of the Bohemian; and even his contemporaries could ob-

(151) Besides the German and Italian historians, the expedition of Charles IV. is painted in lively and original colours in the curious Memoires sur la Vie de Petarque, tom. iii. p. 376—432. by the abbe de Sade, whose probity has never been blamed by any reader of taste and curiosity.
serve, that the sole exercise of his authority was in the lucrative sale of privileges and titles. The gold of Italy secured the election of his son; but such was the shameful poverty of the Roman emperor, that his person was arrested by a butcher in the streets of Worms, and was detained in the public inn, as a pledge or hostage for the payment of his expenses.

From this humiliating scene, let us turn to the apparent majesty of the same Charles in the diets of the empire. The golden bull, which fixes the Germanic constitution, is promulgated in the style of a sovereign and legislator. A hundred princes bowed before his throne, and exalted their own dignity by the voluntary honours which they yielded to their chief or minister. At the royal banquet, the hereditary great officers, the seven electors, who in rank and title were equal to kings, performed their solemn and domestic service of the palace. The seals of the triple kingdom were borne in state by the archbishops of Mentz, Cologne, and Treves, the perpetual arch-chancellors of Germany, Italy, and Arles. The great marshal, on horseback, exercised his function with a silver measure of oats, which he emptied on the ground, and immediately dismounted to regulate the order of the guests. The great steward, the count palatine of the Rhine, placed the dishes on the table. The great chamberlain, the margrave of Brandenburgh, presented, after the repast, the golden ewer and basin to wash. The king of Bohemia, as great cup-bearer, was represented by the emperor's brother, the duke of Luxemburgh and Brabant; and the procession was closed by the great huntmen, who introduced a boat and a stag, with a loud chorus of horns and bounds. (152)

(152) See the whole ceremony, in Struvin, p. 629. Nor
OF THE ROMAN EMPIRE.

Not was the supremacy of the emperor confined to Germany alone: the hereditary monarchs of Europe confessed the pre-eminence of his rank and dignity: he was the first of the Christian princes, the temporal head of the great republic of the West (153): to his person the title of majesty was long appropriated; and he disputed with the pope the sublime prerogative of creating kings and assembling councils. The oracle of the civil law, the learned Bartolus, was a pensioner of Charles the fourth; and his school refounded with the doctrine, that the Roman emperor was the rightful sovereign of the earth, from the rising to the setting sun. The contrary opinion was condemned, not as an error, but as an heresy, since even the gospel had pronounced, "And there went forth a decree from Caesar Augustus, that all the world should be taxed (154)."

If we annihilate the interval of time and space between Augustus and Charles, strong and striking will be the contrast between the two Cæsars; the Bohemian, who concealed his weakness under the mask of ostentation, and the Roman, who disguised his strength under the semblance of modesty. At the head of his victorious legions, in his reign over the sea and land, from the Nile and Euphrates to the Atlantic ocean, Augustus professed himself the servant of the state and the equal of his fellow-citizens. The conqueror of Rome and her provinces assumed the popular and legal form of a censor, a consul, and a tribune. His will was the law of mankind, but in the declaration of his laws he borrowed the voice of the senate and people; and,

(153) The republic of Europe, with the pope and emperor at its head, was never represented with more dignity than in the council of Constance. See Le Fèvre’s History of that assembly.

from their decrees, their master accepted and
renewed his temporary commission to adminis-
ter the republic. In his dress, his domestics (155),
his titles, in all the offices of social life, Au-
gustus maintained the character of a private
Roman; and his most artful flatterers respected
the secret of his absolute and perpetual monar-
chy.

(155) Six thousand were have been discovered of the slaves and freed-
men of Augustus and Livia. So minute was the division of office, that
one slave was appointed to weigh the wool which was spun by the em-
press’s maids, another for the care of her lapdog, &c. (Camere Sepol-
chrale, &c. by Bianchini. Extract of his work, in the Bibliothèque
Italique, tom. iv. p. 175. His euloge, by Fontenelle, tom. vi. p. 356.).
But these servants were of the same rank, and possibly not more numero-
sous than those of Pollio or Lentulus. They only prove the general
riches of the city.

Description of Arabia and its inhabitants.—Birth, Character, and Doctrine of Mahomet.—He preaches at Mecca.—Flies to Medina.—Propagates his Religion by the Sword.—Voluntary or reluctant Submission of the Arabs.—His Death and Successors.—The claims and Fortunes of Ali and his Descendants.

After pursuing above six hundred years the fleeting Caesars of Constantinople and Germany, I now descend in the reign of Heraclius, on the Eastern borders of the Greek monarchy. While the state was exhausted by the Persian war, and the church was distracted by the Nestorian and Monophysite sects, Mahomet, with the sword in one hand and the Koran in the other, erected his throne on the ruins of Christianity and of Rome. The genius of the Arabian prophet, the manners of his nation, and the spirit of his religion, involve the causes of the decline and fall of the Eastern empire; and our eyes are curiously intent on one of the most memorable revolutions, which have impressed a new and lasting character on the nations of the globe (1).

In the vacant space between Persia, Syria, Egypt, and Ethiopia, the Arabian peninsula (2) may

(1) As in this and the following chapter I shall display much Arabic learning, I must profess my total ignorance of the Oriental tongues, and my gratitude to the learned interpreters, who have transused their science into the Latin, French, and English languages. Their collections, versions, and histories, I shall occasionally notice.

(2) The geographers of Arabia may be divided into three classes: 1. The Greeks and Latins, whose progressive knowledge may be traced in Agatharcides
may be conceived as a triangle of spacious but irregular dimensions. From the northern point of Bales (3) on the Euphrates, a line of fifteen hundred miles is terminated by the freights of Babelmandel and the land of frankincense. About half this length may be allowed for the middle-breadth, from east to west, from Baffora to Suez, from the Persian Gulf to the Red Sea (4). The sides of the triangle are gradually enlarged, and the southern basis presents a front of a thousand miles to the Indian Ocean. The entire surface of the peninsula exceeds in a fourfold proportion that of Germany or France; but the far greater part has been justly stigmatized with the epithets of the "fairy and the study." Even the wildest of Tartary are decked, by the hand of nature, with lofty trees and luxuriant herbage; and the lonesome traveller derives a sort of comfort and society from the presence of vegetable life. But in the dreary waste of Arabia, a boundless level of sand is intersected by sharp

Agatharchides (de Masi Babro, in Hadrian, Geography, Digby, tom. ii. 3.), Dioscorus Siculus (tom. i. 1. ii. p. 159—167. 1. iii. p. 211—216. edit. Weigel), Strabo (i. xvi. p. 149—151. 1. xii. p. 122—133. from Arato, Dionysius, (Periplus. 47—39.). Ptolemy (Hist. Natur. v. 1. 32.), and Ptolemy (Descript. et Tabulis Urbiana, in Hadrian, tom. iii.) in The Arabic writers, who have treated the subject with the zeal of patriarchs or devocons, the accounts of Poseid [Specimen Hist. Ar. Bum., p. 125—128.] from the Geography of the Sheikh, ed. Ruse, are still more dissatisfied with the version or abridgment. (p. 34—37. 44—56. 108. &c. 119. &c.) which the Marsianas have published under the abrid title of Geographia Nabium, [Paris, 1619:] but the Latin and French translators, Gessner, [in Hadrian, tom. iii.] and Galland (Voyage de la Paleolite par La Roque, p. 269—346.), have opened to us the Arabia of Abuflida, the most curious and correct account of the peninsula; which may be enriched; however, from the Bibliothèque Orientale of d'Herbelot, p. 112. et ebi: quinim. 3. The European travellers; among whom Shaw, (p. 416—525.) and Niebuhr (Description, 1773. Voyages, tom. i. 1776) desire an honorable distinction: Burchel (Geographie par Berenger, vol. viii. p. 516—510.) has compiled with judgment; and d'Anville's Maps (Orbis Veteribus Notus, and "Partie de l'Axe") should be before the reader, with his Geographie Ancienne, tom. ii. p. 208—331.

(3) Abulfed. Descript. Arabie, p. 1. D'Anville, L'Euphrat et le Tigre, p. 19. 40. It was in this place, the paradise or garden of a trap, that Xenophon and the Greeks first past the Euphrates (Anabasis, l. i. c. 10. p. 29. edit. Wells), and
and naked mountains; and the face of the desert, without shade or shelter, is scorched by the direct and intense rays of a tropical sun. Instead of refreshing breezes, the winds, particularly from the south-west, diffuse a noxious and even deadly vapour; the hillocks of sand which they alternately raise and scatter, are compared to the billows of the ocean, and whole caravans, whole armies, have been lost and buried in the whirlwind. The common benefits of water are an object of desire and contest; and such is the scarcity of wood, that some art is requisite to preserve and propagate the element of fire. Arabia is destitute of navigable rivers, which fertilise the soil, and convey its produce to the adjacent regions: the torrents that fall from the hills are imbibed by the thirsty earth: the rare and hardy plants, the tamarind or the acacia, that strike their roots into the clefts of the rocks, are nourished by the dews of the night; a scanty supply of rain is collected in cisterns and aqueducts: the wells and springs are the secret treasure of the desert; and the pilgrim of Mecca (4), after many a dry and barren march, is digusted by the taste of the waters, which have rolled over a bed of sulphur or salt. Such is the general and genuine picture of the climate of Arabia. The experience of evil enhances the value of any local or partial enjoyment. A shady grove, a green pasture, a stream of fresh water, are sufficient to attract a colony of sedentary Arabs to the fortunate spots

(4) Reisd has proved, with much superious learning, 1. That our Red Sea (the Arabian-Gulf) is no more than a part of the Mers Rubrum, the Euphrates of the ancients, which was extended to the indefinite space of the Indian ocean. 2. That the synonymous words red, sable, allude to the colour of the hides or negroes (Dibart. Miscell. tom. i. p. 59-117).

which can afford food and refreshment to themselves and their cattle, and which encourage their industry in the cultivation of the palm tree and the vine. The high lands that border on the Indian ocean are distinguished by their superior plenty of wood and water: the air is more temperate, the fruits are more delicious, the animals and the human race more numerous; the fertility of the soil invites and rewards the toil of the husbandman; and the peculiar gifts of frankincense (6) and coffee have attracted in different ages the merchants of the world. If it be compared with the rest of the peninsula, this sequestered region may truly deserve the appellation of the happy; and the splendid colouring of fancy and fiction has been suggested by contrast and counterenanced by distance. It was for this earthly paradise that nature had reserved her choicest favours and her most curious workmanship: the incompatible blessings of luxury and innocence were ascribed to the natives: the soil was impregnated with gold (7) and gems, and both the land and sea were taught to exhale the odours of aromatic sweets. This division of the sandy, the stony, and the happy, so familiar to the Greeks and Latins, is unknown to the Arabians themselves; and it is singular enough, that a country, whose language and inhabitants have ever been the same, should scarcely retain a vestige of its ancient geography. The maritime

(6) The aromatics, especially the thu or frankincense, of Arabia, occupy the xiith book of Pliny. Our great poet (Paradisus Lust., l. iv.) introduces, in a simile, the spicy odours that are blown by the north-east wind from the Sabæan coast:

Fless'd with the grateful scent old Ocean smiles.

(Plin Hist. Natur. xii. 43.)

(7) Agatharchides affirms, that lumps of pure gold were found, from the size of an olive to that of a nut; that iron was twice, and silver ten times, the value of gold (de Mari Rubro, p. 60.). These real or imaginary treasures are vanished; and no gold mines are at present known in Arabia (Niesbuhr, Description, p. 124.).

districts of Babrein and Oman are opposite to the realm of Persia. The kingdom of Yemen displays the limits, or at least the situation, of Arabia Felix: the name of Neged is extended over the inland space; and the birth of Mahomet has illustrated the province of Hejas along the coast of the Red Sea.

The measure of population is regulated by the means of subsistence; and the inhabitants of this vast peninsula might be out-numbered by the subjects of a fertile and industrious province. Along the shores of the Persian gulf, of the ocean, and even of the Red Sea, the Ithyophagi (9), or fish-eaters, continued to wander in quest of their precarious food. In this primitive and abject state, which ill deserves the name of society, the human brute, without arts or laws, almost without sense or language, is poorly distinguished from the rest of the animal creation. Generations and ages might roll away in silent oblivion, and the helpless savage was restrained from multiplying his race, by the wants and pursuits which confined his existence to the narrow margin of the sea-coast. But in an early period of antiquity the great body of the Arabs had emerged from this scene of misery; and as the naked wilderness could not maintain a people of hunters, they rose at once to the more secure and plentiful condition of the pastoral life. The same life is uniformly pursued by the

[8] Consult, peruse, and study, the Specimen Historiae Arabum of Pocock! (Oxon. 1650, in 4to.) The thirty pages of text and version are extracted from the Dynasties of Gregory Abulpharagius, which Pocock afterwards translated (Oxon. 1663, in 4to): the three hundred and fifty-eight notes form a classic and original work on the Arabian antiquities.

(9) Arrian remarks the Ithyophagi of the coast of Hejas (Periplus Maris Erythraei, p. 12) and beyond Aden (p. 15). It seems probable that the shores of the Red Sea (in the largest sense) were occupied by these savages in the time, perhaps, of Cyrus; but I can hardly believe that any cannibals were left among the savages in the reign of Justinian (Procop. de Bell. Persic. I. i. c. 19.).

Vol. IX. O roving
roving tribes of the desert, and in the portrait of the modern Bedoweens, we may trace the features of their ancestors (10), who, in the age of Moses or Mahomet, dwelt under similar tents, and conducted their horses, and camels, and sheep, to the same springs and the same pastures. Our toil is lessened, and our wealth is encreased, by our dominion over the useful animals; and the Arabian shepherd had acquired the absolute possession of a faithful friend and a laborious slave (11). Arabia, in the opinion of the naturalist, is the genuine and original country of the horse; the climate most propitious, not indeed to the size, but to the spirit and swiftness, of that generous animal. The merit of the Barb, the Spanish, and the English breed, is derived from a mixture of Arabian blood (12): the Bedoweens preserve, with superstitious care, the honours and the memory of the purest race: the males are sold at a high price, but the females are seldom alienated: and the birth of a noble foal was esteemed, among the tribes, as a subject of joy and mutual congratulation. These horses are educated in the tents, among the children of the Arabs, with a tender familiarity, which trains them in the habits of gentleness and attachment. They are

The journey of M. d'Arvieux, in 1664, to the camp of the emir of Mount Carmel (Voyage de la Palestine, Amsterdam, 1718), exhibits a pleasing and original picture of the life of the Bedoweens, which may be illustrated from Niebuhr (Description de l'Arabie, p. 347—344) and Volney (tom. 1. p. 343—345), the last and most judicious of our Syrian travellers.

(11) Read (it is an unpleasing task) the incomparable articles of the Horse and the Camel, in the Natural History of M. de Buffon.

(12) For the Arabian horses, see d'Arvieux (p. 159—173.) and Niebuhr (p. 148—144.) At the end of the xiiiith century, the horses of Neger were esteemed tare-footed, those of Yemen strong and serviceable, those of Hejaz most noble. The horses of Europe, the tenth and last clafs, were generally despised, as having too much body and too little spirit (d'Herbelot, Bibliot. Orient. p. 339.); their strength was requisite to bear the weight of the knight and his armour.

accustomed only to walk and to gallop: their sensations are not blunted by the incessant abuse of the spur and the whip: their powers are reserved for the moments of flight and pursuit; but no sooner do they feel the touch of the hand or the stirrup, than they dart away with the swiftness of the wind; and if their friend be dismounted in the rapid career, they instantly stop till he has recovered his feat. In the sands of Afric and Arabia, the camel is a sacred and precious gift. That strong and patient beast of burden can perform, without eating or drinking, a journey of several days; and a reservoir of fresh water is preserved in a large bag, a fifth stomach of the animal, whose body is imprinted with the marks of servitude: the larger breed is capable of transporting a weight of a thousand pounds; and the dromedary, of a lighter and more active frame, outstrips the fleetest courser in the race. Alive or dead, almost every part of the camel is serviceable to man: her milk is plentiful and nutritious: the young and tender flesh has the taste of veal: a valuable salt is extracted from the urine: the dung supplies the deficiency of fuel; and the long hair, which falls each year and is renewed, is coarsely manufactured into the garments, the furniture, and the tents, of the Bedoweens. In the rainy seasons they consume therare and insufficient herbage of the desert: during the heats of summer and the scarcity of winter, they remove their encampments to the sea-coast, the hills of Yemen, or the neighbourhood of the Euphrates, and have often extorted the dangerous licence of visiting the banks of the Nile, and the villages of

(13) Qui carnibus camelorum vexi solent odii tenaces sunt, was the opinion of an Arabian physician (Pocock, Specimen, p. 83.). Mahomet himself, who was fond of milk, prefers the cow, and does not even mention the camel; but the diet of Mecca and Medina was already more luxurious (Gagnier, Vie de Mahomet, tom. iii, p. 404.).

O 2 Syria
THE DECLINE AND FALL

Syria and Palestine. The life of a wandering Arab is a life of danger and distress; and though sometimes, by rapine or exchange, he may appropriate the fruits of industry, a private citizen in Europe is in the possession of more solid and pleasing luxury than the proudest emir, who marches in the field at the head of ten thousand horses.

Yet an essential difference may be found between the bords of Scythia and the Arabian tribes, since many of the latter were collected into towns, and employed in the labours of trade and agriculture. A part of their time and industry was still devoted to the management of their cattle: they mingled, in peace and war, with their brethren of the desert; and the Bedouins derived from their useful intercourse, some supply of their wants, and some rudiments of art and knowledge. Among the forty-two cities of Arabia (14), enumerated by Abulfeda, the most ancient and populous were situate in the happy Yemen: the towers of Saana (15), and the marvellous reservoir of Merab (16), were constructed by the kings of the Hothrites; but their profane lustre was eclipsed by the prophetic glories of Medina (17) and Mecca.

(14) Yet Marcellus of Heraclea (in Periplo, p. 16. in tom. i Hudson, Minor Geograph.) reckons one hundred and sixty-four towns in Arabia Felix. The size of the towns might be small—the faith of the writer might be large.

(15) It is compared by Abulfeda (in Hudson, tom. iii p. 54.) to Damascus, and is still the residence of the Imam of Yemen (Voyages de Niebuhr, tom. i. p. 331—342.). Saana is twenty-four parishes from Dair (Abulfeda, p. 57.), and sixty-eight from Aden (p. 53.)

(16) Pocock, Specimen, p. 57. Geograph Nubienae, p. 52. Mecca, or Merab, six miles in circumference, was destroyed by the legions of Augustus (Plin Hift. Nat. vi. 50.), and had not revived in the xivth century (Abulfed. Descript. Arab. p. 58.).

(17) The name of city, Medina, was appropriated, zan' ad, to Yathrib (the istrippa of the Greeks), the feast of the prophet. The distances from Medina are reckoned by Abulfeda in Itinera, or days journey, of a caravan (p. 15.): to Bahrein, xv. to Bafors, xvii.; to Curiab, xii.; to Damascus or Palestine, xx.; to Cairo, xxv.; to Mecca, x;
OF THE ROMAN EMPIRE.

Mecca (18), near the Red Sea, and at the distance from each other of two hundred and seventy miles. The last of these holy places was known to the Greeks under the name of Macoraba; and the termination of the word is expressive of its greatness, which has not indeed, in the most flourishing period, exceeded the size and population of Marsillices. Some latent motive, perhaps of superstition, must have impelled the founders, in the choice of a most unpromising situation. They erected their habitations of mud or stone, in a plain about two miles long and one mile broad, at the foot of three barren mountains; the soil is a rock; the water even of the holy well of Zemzem is bitter or brackish; the pastures are remote from the city; and grapes are transported above seventy miles from the gardens of Tayef. The fame and spirit of the Korciishites, who reigned in Mecca, were conspicuous among the Arabian tribes; but their ungrateful soil refused the labours of agriculture, and their position was favourable to the enterprises of trade. By the sea-port of Gedda, at the distance only of forty miles, they maintained an easy correspondence with Abyssinia; and that Christian kingdom afforded the first refuge to the disciples of Mahomet. The treasures of Africa were conveyed over the peninsula to Gerrha or Katif in the

w; from Mecca to Saana (p. 52.) or Aden, xxx; to Cairo, xxxi days, or 412 hours (Shaw's Travels, p. 477.); which, according to the editum of D'Anville (Mémoires Itinéraires, p. 99.), allows about twenty-five English miles for a day's journey. From the land of frankincense (Hadramaut, in Yemen, between Aden and Cape Faree) to Gass, in Syria, Pliny (Hist. Nat. xii. 32.) computes 150. manisons of camels. These measures may affix fancy and elucidate facts.

(18) Our notions of Mecca must be drawn from the Arabian (d'Herbelot, Bibliothèque Orientale, p. 368—371. Focock, Specimen, p. 125—128. Abulfeda, p. 11—40.) As no unbeliever is permitted to enter the city, our travellers are silent; and the short hints of Thevenot (Voyages du Levant, part i. p. 490.) are taken from the suspicious mouth of an African renegade. Some Persians counted 6000 houses (Chardin, tom. iv. p. 167.).
province of Bahrein, a city built, as it is said, of rock-salt, by the Chaldean exiles (19): and from thence, with the native pearls of the Persian Gulf, they were floated on rafts to the mouth of the Euphrates. Mecca is placed almost at an equal distance, a month's journey, between Yemen on the right, and Syria on the left hand. The former was the winter, the latter the summer station of her caravans; and their seasonable arrival relieved the ships of India from the tedious and troublesome navigation of the Red Sea. In the markets of Saana and Merab, in the harbours of Oman and Aden, the camels of the Koreishites were laden with a precious cargo of aromatics; a supply of corn and manufactures was purchased in the fairs of Bostra and Damascus; the lucrative exchange diffused plenty and riches in the streets of Mecca; and the noblest of her sons united the love of arms with the profession of merchandize (20).

The perpetual independence of the Arabs has been the theme of praise among strangers and natives; and the arts of controversy transform this singular event into a prophecy and a miracle, in favour of the posterity of Ismael (21). Some exceptions, that can neither be dissembled nor eluded, render this mode of reasoning as indiscriminate as it is superfluous: the kingdom of Yemen has been successively subdued by the Abyssinians,

 финания, the Persians, the sultans of Egypt (22), and the Turks (23): the holy cities of Mecca and Medina have repeatedly bowed under a Scythian tyrant; and the Roman province of Arabia (24) embraced the peculiar wilderness in which Ímāl and his sons must have pitched their tents in the face of their brethren. Yet these exceptions are temporary or local; the body of the nation has escaped the yoke of the most powerful monarchies: the arms of Selōtris and Cyrus, of Pompey and Trajan, could never atchieve the conquest of Arabia; the present sovereign of the Turks (25) may exercise a shadow of jurisdiction, but his pride is reduced to solicit the friendship of a people, whom it is dangerous to provoke and fruitless to attack. The obvious causes of their freedom are inscribed on the character and country of the Arabs. Many ages before Mahomet (26), their intrepid valour

(24) Of the Roman province, under the name of Arabia and the third Palestine, the principal cities were Bostra and Petra, which dated their era from the year 105, when they were subdued by Palma a lieutenant of Trajan (Dion Cassius, l. xviii.). Petra was the capital of the Nabathæans, whose name is derived from the eldest of the sons of Ímāl (Genef. xxi. 12, &c. with the Commentaries of Jerom, Le Clerc, and Calmet). Jusitinius relinquished a palm country of ten days journey to the south of Aelah (Procop. de Bell. Persic. l. i. c. 17.), and the Romans maintained a centurion and a custom-house (Arrian in Periπlo Maria Erythraei, p. 11. in Hudson, tom. i.), at a place (Arab. Xamah, Pagus Albus Hawara) in the territory of Medina (d’Anville Memoire sur l’Egypte, p. 243.). Thrice real possessions, and some naval inroads of Trajan (Periπ. l. 14, 15.), are magnified by history and medals into the Roman conquest of Arabia.

had been severely felt by their neighbours in offensive and defensive war. The patient and active virtues of a soldier are insensibly nursed in the habits and discipline of a pastoral life. The care of the sheep and camels is abandoned to the women of the tribe; but the martial youth under the banner of the emir, is ever on horseback, and in the field, to practice the exercise of the bow, the javelin, and the cymetar. The long memory of their independence is the firmest pledge of its perpetuity, and succeeding generations are animated to prove their descent and to maintain their inheritance. Their domestic feuds are suspended on the approach of a common enemy; and in their last hostilities against the Turks, the caravan of Mecca was attacked and pillaged by fourscore thousand of the confederates. When they advance to battle, the hope of victory is in the front; in the rear, the assurance of a retreat. Their horses and camels, who in eight or ten days can perform a march of four or five hundred miles, disappear before the conqueror; the secret waters of the desert elude his search; and his victorious troops are consumed with thirst, hunger, and fatigue, in the pursuit of an invisible foe, who scorns his efforts, and safely reposés in the heart of the burning solitude. The arms and deserts of the Bedouins are not only the safeguards of their own freedom, but the barriers also of the happy Arabia, whose inhabitants, remote from war, are enervated by the luxury of the soil and climate. The legions of Augustus melted away in disease and latitu{27}; and it is only by a naval power that the reduction of Yemen has

been successfully attempted. When Mahomet erected his holy standard (28), that kingdom was a province of the Persian empire; yet seven princes of the Homeric still reigned in the mountains; and the vicegerent of Chosroes was tempted to forget his distant country and his unfortunate master. The historians of the age of Justinian represent the state of the independent Arabs, who were divided by interest or affection in the long quarrel of the East: the tribe of Gasfin was allowed to encamp on the Syrian territory; the princes of Hira were permitted to form a city about forty miles to the southward of the ruins of Babylon. Their service in the field was speedy and vigorous; but their friendship was venal, their faith inconstant, their enmity capricious: it was an easier task to excite than to disarm these roving Barbarians; and, in the familiar intercourse of war, they learned to see, and to despise, the splendid weakness both of Rome and of Persia. From Mecca to the Euphrates, the Arabian tribes (29) were confounded by the Greeks and Latins, under the general appellation of Saracens (30), a name which

(28) See the imperfect history of Yemen in Pocock, Specimen, p. 55-66. of Hira, p. 66-74. of Gasfin, p. 75-78. as far as it could be known or preserved in the time of ignorance.

(29) The Saracens futi, μουριακες τωντα, και τα πλασμαν εκτην οργανωμενα, και αδημονωτα, are described by Menander (Excerpt. Legation. p. 149.). Procopius (de Bell Persic. l. i. c. 17, 19. l. ii. c. 18.) and, in the most lively colours, by Ammianus Marcellinus (l. xiv. c. 4.), who had spoken of them as early as the reign of Marcus.

(30) The name, which, used by Prolemy and Pliny in a more confined, by Ammianus, and Procopius in a larger, sense, has been derived, ridiculously, from Sarah, the wife of Abrahah, obscurely from the village of Saraka, (vulgo Nablitesus. Stephani, de Urbibus), more plausibly from the Arabic words, which signify a thirsty character, or Oriental situation, (Heltinger, Hist. Oriental. l. i. c. t. p. 7, 8. Pocock, Specimen, p. 33-35. Affeman, Biblot. Orient. tom. iv. p. 567.). Yet the last and most popular of these etymologies, is refused by Prolemy (Arabia, p. 2. 18. in Hadrian, tom iv.), who expressly remarks the western and southern position of the Saracens, than an obscure tribe on the borders of Egypt. The appellation cannot therefore allude to any natural character; and, since it was imposed by strangers, it must be found, not in the Arabic, but in a foreign language.

every
every Christian mouth has been taught to pronounce with terror and abhorrence.

— The slaves of domestic tyranny may vainly exult in their national independence; but the Arab is personally free; and he enjoys, in some degree, the benefits of society, without forfeiting the prerogatives of nature. In every tribe, superstition, or gratitude, or fortune, has exalted a particular family above the heads of their equals. The dignities of sheich and emir invariably descend in this chosen race; but the order of succession is loose and precarious; and the most worthy or aged of the noble kinsmen are preferred to the simple, though important, office of composing disputes by their advice, and guiding valour by their example. Even a female of sense and spirit has been permitted to command the countrymen of Zenobia (31). The momentary junction of several tribes produces an army: their more lasting union constitutes a nation; and the supreme chief, the emir of emirs, whose banner is displayed at their head, may deserve, in the eyes of strangers, the honours of the kingly name. If the Arabian princes abuse their power, they are quickly punished by the desertion of their subjects, who had been accustomed to a mild and parental jurisdiction. Their spirit is free, their steps are unconfined, the desert is open, and the tribes and families are held together by a mutual and voluntary compact. The softer natives of Yemen supported the pomp and majesty of a monarch; but if he could not leave his palace without endangering his life (32),

the active powers of government must have been devolved on his nobles and magistrates. The cities of Mecca and Medina present, in the heart of Asia, the form, or rather the substance, of a commonwealth. The grandfather of Mahomet, and his lineal ancestors, appear in foreign and domestic transactions as the princes of their country; but they reigned, like Pericles at Athens, or the Medici at Florence, by the opinion of their wisdom and integrity; their influence was divided with their patrimony; and the sceptre was transferred from the uncles of the prophet to a younger branch of the tribe of Korish. On solemn occasions they convened the assembly of the people; and, since mankind must be either compelled or persuaded to obey, the use and reputation of oratory among the ancient Arabs is the clearest evidence of public freedom. But their simple freedom was of a very different cast from the nice and artificial machinery of the Greek and Roman republics, in which each member possessed an undivided share of the civil and political rights of the community. In the more simple state of the Arabs, the nation is free, because each of her sons disdains a base submission to the will of a master. His breast is fortified with the austere virtues of courage, patience, and sobriety: the love of independence prompts him to exercise the habits of self-command; and the fear of dishonour guards him from the meaner apprehension of pain, of danger, and of death. The gravity and firm-

this is one of the popular tales, or extraordinary accidents, which the credulity of travellers so often transforms into a fact, a custom, and a law.

(33) Non gloriamur antiquitus Arabes, nis gladio, hospite, et eloquentia (Sephadius, apud Pocock, Specimen, p. 161, 162.). This gift of speech they shared only with the Persians; and the contentious Arabs would probably have disdained the simple and sublime logic of Demosthenes.
ness of the mind is conspicuous in his outward
demeanor: his speech is slow, weighty, and
concise, he is seldom provoked to laughter, his
only gesture is that of stroking his beard, the
venerable symbol of manhood; and the sense of
his own importance teaches him to accept his
equals without levity, and his superiors without
awe (34). The liberty of the Saracens survived
their conquests: the first caliphs indulged the
bold and familiar language of their subjects:
they ascended the pulpit to persuade and edify
the congregation; nor was it before the seat of
empire was removed to the Tigris, that the Ab-
bassides adopted the proud and pompous cere-
monial of the Persian and Byzantine courts.

In the study of nations and men, we may ob-
sERVE the causes that render them hostile or
friendly to each other, that tend to narrow or
enlarge, to mollify or exasperate, the social cha-
Racter. The separation of the Arabs from the rest
of mankind, has accustomed them to confound the
ideas of stranger and enemy; and the poverty
of the land has introduced a maxim of jurisprudence,
which they believe and practise to the present
hour. They pretend, that in the division of the
earth the rich and fertile climates were assigned
to the other branches of the human family; and
that the posterity of the outlaw Ismael might re-
cover, by fraud or force, the portion of inherit-
tance of which he had been unjustly deprived.
According to the remark of Pliny, the Arabian
tribes are equally addicted to theft and merchan-
dize: the caravans that traverse the desert are
raffomed or pillaged; and their neighbours, since

(34) I must remind the reader that d'Arvieux, d'Herbelot, and Nie-
buh, represent, in the most lively colours, the manners and government
of the Arabs, which are illustrated by many incidental passages in the
life of Mahomet.

the remote times of Job and Sefoltris (35), have been the victims of their rapacious spirit. If a Bedoueen discovers from afar a solitary traveller, he rides furiously against him, crying with a loud voice, "Undress thyself, thy aunt (my wife) is without a garment." A ready submission entitles him to mercy; resistance will provoke the aggressor, and his own blood must expiate the blood which he presumes to shed in legitimate defence. A single robber, or a few associates, are branded with their genuine name; but the exploits of a numerous band assume the character of lawful and honourable war. The temper of a people, thus armed against mankind, was doubly inflamed by the domestic licence of rapiers, murder, and revenge. In the constitution of Europe the right of peace and war is now confined to a small, and the actual exercise to a much smaller, list of respectable potentates; but each Arab, with impunity and renown, might point his javelin against the life of his countryman. The union of the nation consisted only in a vague resemblance of language and manners; and in each community, the jurisdiction of the magistrate was mute and impotent. Of the time of ignorance which preceded Mahomet; seventeen hundred battles (36) are recorded by tradition: hostility was embittered with the rancour of civil faction; and the recital, in prose or verse, of an obsolete feud was sufficient to rekindle the same passions among the descendants.

(35) Observe the first chapter of Job, and the long wall of 1500 stadia, which Sefoltris built from Pelusium to Heliopolis (Diodor Sicul. tom. i. l. i. p. 67.). Under the name of hyæna, the shepherd-kings, they had formerly subdued Egypt (Marshall, Canon. Chron. p. 58. 163, &c.).

(36) Or, according to another account, 1200 (d'Herbelot, Bibliothèque Orientale, p. 75.): the two historians who wrote of the Hyæm al Arab, the battles of the Arabs, lived in the 6th and 7th century. The famous war of Dahes and Gabrah was occasioned by two horses, lasled forty years, and ended in a proverb (Pococke, Specimens, p. 48.).
of the hostile tribes. In private life, every man, at least every family, was the judge and avenger of its own cause. The nice sensibility of honour, which weighs the insults rather than the injury, sheds its deadly venom on the quarrels of the Arabs: the honour of their women, and of their beards, is most easily wounded; an indecent action, a contemptuous word, can be expiated only by the blood of the offender; and such is their patient inveteracy, that they expect whole months and years the opportunity of revenge. A fine or compensation for murder is familiar to the Barbarians of every age: but in Arabia the kinsmen of the dead are at liberty to accept the atonement, or to exercise with their own hands the law of retaliation. The refined malice of the Arabs refuses even the head of the murderer, substitutes an innocent to the guilty person, and transfers the penalty to the beast and most considerable of the race by whom they have been injured. If he falls by their hands, they are exposed in their turn to the danger of reprisals, the interest and principal of the bloody debt are accumulated; the individuals of either family lead a life of malice and suspicion, and fifty years may sometimes elapse before the account of vengeance be finally settled (37). This sanguinary spirit, ignorant of pity or forgiveness, has been moderated, however, by the maxims of honour, which require in every private encounter some decent equality of age and strength, of numbers and weapons. An annual festival of two, perhaps of four, months, was observed by the Arabs before the time of Mahomet, during which their swords were religiously sheathed.

sheathed both in foreign and domestic hostility; and this partial truce is more strongly expressive of the habits of anarchy and warfare (38).

But the spirit of rapine and revenge was at-tempered by the milder influence of trade and literature. The solitary peninsula is encompassed by the most civilized nations of the ancient world: the merchant is the friend of mankind; and the annual caravans imported the first seeds of knowledge and politeness into the cities, and even the camps of the desert. Whatever may be the pedigree of the Arabs, their language is derived from the same original stock with the Hebrew, the Syriac, and the Chaldaean tongues; the independence of the tribes was marked by their peculiar dialects (39); but each, after their own, allowed a just preference to the pure and perspicuous idiom of Mecca. In Arabia as well as in Greece, the perfection of language outstripped the refinement of manners; and her speech could diversify the fourscore names of honey, the two hundred of a serpent, the five hundred of a lion, the thousand of a sword, at a time when this copious dictionary was entrust-ed to the memory of an illiterate people. The monuments of the Homerites were inscribed with an obsolete and mysterious character; but the Cufic letters, the ground-work of the present alphabet, were invented on the banks of the

(38) Procopius (de Bell. Persic. i. c. 16.) places the two holy months about the summer solstice. The Arabsians consecrate four months of the year—the first, seventh, eleventh, and twelfth; and pretend, that in a long series of ages the truce was infringed only four or six times (Salie's Preliminary Discourse, p. 147—150. and Notes on the 18th chapter of the Koran, p. 154, &c. Caiiri. Biblio. Hispano-Arabica, tom. ii. p. 20, 21.)

(39) Arrian, in the second century, remarks (in Periplo Maris Erythrai, p. 12.) the partial or total difference of the dialects of the Arabs. Their language and letters are copiously treated by Pocock (Specimen, p. 130—154), Caiiri (Biblio. Hispano-Arabica, tom. i. p. 1. 83: 192 tom. ii. p. 25, &c.), and Niebuhr (Déscription de l'Arabie, p. 72—80.). I pass slightly; I am not fond of repeating words like a parrot.

Euphrates;
Euphrates; and the recent invention was taught at Mecca by a stranger who settled in that city after the birth of Mahomet. The arts of grammar, of metre, and of rhetoric, were unknown to the freeborn eloquence of the Arabians; but their penetration was sharp, their fancy luxuriant, their wit strong and sententious (40), and their more elaborate compositions were addressed with energy and effect to the minds of their hearers. The genius and merit of a rising poet was celebrated by the applause of his own and the kindred tribes. A solemn banquet was prepared, and a chorus of women, striking their tymbals, and displaying the pomp of their nuptials, sang in the presence of their sons and husbands the felicity of their native tribe; that a champion had now appeared to vindicate their rights; that a herald had raised his voice to immortalize their renown. The distant or hostile tribes resorted to an annual fair which was abolished by the fanaticism of the first Moslems; a national assembly that must have contributed to refine and harmonize the Barbarians. Thirty days were employed in the exchange, not only of corn and wine, but of eloquence and poetry. The prize was disputed by the generous emulation of the bards; the victorious performance was deposited in the archives of princes and emirs; and we may read in our own language, the seven original poems which were inscribed in letters of gold, and suspended in the temple of

(40) A familiar tale in Voltaire's Zadig (le Chien et le Cheval) is related, to prove the natural sagacity of the Arabs (d'Herbelot, Biblioth. Orient. p. 120, 121. Gagnier, Vie de Mahomet, tom. i. p. 37–46); but d'Arvieux, or rather La Roque (Voyage de Palestine, p. 93.) denies the boasted superiority of the Bedowees. The one hundred and fifty-nine sentences of Ali (translated by Ockley, London, 1715) afford a just and favourable specimen of Arabian wit.
Mecca (41). The Arabian poets were the historians and Moralist of the age; and if they sympathised with the prejudices, they inspired and crowned the virtues of their countrymen. The indissoluble union of generosity and valour was the darling theme of their song; and when they pointed their keeneat satire against a despicable race, they affirmed, in the bitterness of reproach, that the men knew not how to give, nor the women to deny (42). The same hospitality, which was practised by Abraham and celebrated by Homer, is still renewed in the camps of the Arabs. The ferocious Bedoweens, the terror of the desert, embrace, without enquiry or hesitation, the stranger who dares to confide in their honour and to enter their tent. His treatment is kind and respectful: he shares the wealth or the poverty of his host; and, after a needful repose, he is dismissed on his way, with thanks, with blessings, and perhaps with gifts. The heart and hand are more largely expanded by the wants of a brother or a friend; but the heroic acts that could deserve the public applause, must have farpassed the narrow measure of discretion and experience. A dispute had arisen, who, among the citizens of Mecca, was entitled to the prize of generosity; and a successive application was made to the three who were deemed most worthy of the trial. Abdallah, the son of Abbas, had undertaken a distant journey, and his foot was in the stirrup when he heard the voice of a suppliant, "O son of the "uncle of the apostle of God, I am a trav," "eller and in distress." He instantly dis-

mounted to present the pilgrim with his camel, her rich caparison, and a purge of four thousand pieces of gold, excepting only the sword, either for its intrinsic value, or as the gift of an honoured kinsman. The servant of Kais informed the second suppliant that his master was asleep; but he immediately added, "Here is a "purse of seven thousand pieces of gold (it is all "we have in the house), and here is an order, "that will entitle you to a camel and a slave;" the master, as soon as he awoke, praised and en-franchised his faithful steward, with a gentle re-proof, that by respecting his slumbers he had flinted his bounty. The third of these heroes, the blind Arabah, at the hour of prayer, was supporting his steps on the shoulders of two slaves. "Alas!" he replied, "my coffers are "empty! but these you may fell; if you refuse, "I renounce them." At these words, pushing away the youths, he groped along the wall with his staff. The character of Hatem is the perfect model of Arabian virtue (43); he was brave and liberal, an eloquent poet and a successful robber: forty camels were roasted at his hospitable feasts; and at the prayer of a suppliant enemy, he restored both the captives and the spoil. The freedom of his countrymen disdained the laws of justice: they proudly indulged the spontaneous impulse of pity and benevolence.

The religion of the Arabs (44), as well as of the Indians, consisted in the worship of the sun,

Caub and Hefnus (Pocock, Specimen, p. 43, 46, 48.) were likewise conspicuous for their liberality; and the latter is elegantly praised by an Arabian poet: "Videbis eum cum acceperis exultantem, "ac si daret illi quod ab illo petis."

(44) Whatever can now be known of the idolatry of the ancient Arabians, may be found in Pocock (Specimen, p. 89—136. 163, 164.). His profound erudition is more clearly and concisely interpreted by Sale (Preliminary Discourse, p. 14—24.) and Allemann (Bibliot. Orient. tom. iv. p. 580—590.) has added some valuable remarks.

the moon, and the fixed stars, a primitive and
specious mode of superstition. The bright lu-
minaries of the sky display the visible image of
a Deity: their number and distance convey to a
philosophic, or even a vulgar, eye, the idea of
boundless space: the character of eternity is
marked on these solid globes, that seem incapable
of corruption or decay: the regularity of their
motions may be ascribed to a principle of reason
or instinct; and their real or imaginary influence
courages the vain belief that the earth and its
inhabitants are the object of their peculiar care.
The science of astronomy was cultivated at Ba-
bylon; but the School of the Arabs was a clear
firmament and a naked plain. In their noctur-
mal marches, they steered by the guidance of the
stars: their names, and order, and daily station,
were familiar to the curiosity and devotion of the
Bedoween; and he was taught by experience to
divide in twenty-eight parts, the zodiac of the
moon, and to bless the constellations who re-
freshed, with salutary rains, the thirst of the
desert. The reign of the heavenly orbs could
not be extended beyond the visible sphere; and
some metaphysical powers were necessary to sus-
tain the transmigration of souls and the resurrec-
tion of bodies: a camel was left to perish on the
grave, that he might serve his master in another
life; and the invocation of departed spirits im-
plies that they were still endowed with conscious-
ness and power. I am ignorant, and I am care-
less, of the blind mythology of the Barbarians;
of the local deities, of the stars, the air, and the
earth, of their sex or titles, their attributes or
subordination. Each tribe, each family, each in-
dependent warrior, created and changed the
rites and the object of his fantastic worship; but
the nation, in every age, has bowed to the re-
ligion, as well as to the language, of Mecca.

The genuine antiquity of the Caaba ascends beyond the Christian era: in describing the coast of the Red Sea, the Greek historian Diodorus (45) has remarked, between the Thamudites and the Sabaeans, a famous temple, whose superior sanctity was revered by all the Arabians: the line or filken veil, which is annually renewed by the Turkish emperor, was first offered by a pious king of the Homerites, who reigned seven hundred years before the time of Mahomet (46).

A tent or a cavern might suffice for the worship of the savages, but an edifice of stone and clay has been erected in its place; and the art and power of the monarchs of the East have been confined to the simplicity of the original model (47). A spacious portico incloses the quadrangle of the Caaba; a square chapel, twenty-four cubits long, twenty-three broad, and twenty-seven high: a door and a window admit the light; the double roof is supported by three pillars of wood; a spout (now of gold) discharges the rain-water, and the well Zemzem is protected by a dome from accidental pollution. The tribe of Koreish, by fraud or force, had acquired the custody of the Caaba: the sacerdotal office devolved

The character and position are so correctly apposite, that I am surprised how this curious passage should have been read without notice or application. Yet this famous temple had been overlooked by Agatharcides (de Mari Rubro, p. 58. in Hudson, tom. i.), whom Diodorus copies in the rest of the description. Was the Siciliana more knowing than the Egyptian? Or was the Caaba built between the years of Rome 650 and 746, the dates of their respective histories? (Dodwell, in Dissert. ad tom. i. Hudson, p. 72. Fabricius, Biblia. Grec. tom. ii. p. 770.)

(47) The original plan of the Caaba (which is servilely copied in Sale, the Universal History, &c.) was a Turkish draught, which Roland (de Religione Mohammedica, p. 113—123.) has corrected and explained from the best authorities. For the description and legend of the Caaba, consult Pocock. through
through four lineal descents to the grandfathers of Mahomet; and the family of the Hashemites, from whence he sprung, was the most respectable and sacred in the eyes of their country. The precincts of Mecca enjoyed the rights of sanctuary; and, in the last month of each year, the city and the temple were crowded with a long train of pilgrims, who presented their vows and offerings in the house of God. The same rites, which are now accomplished by the faithful Musulman, were invented and practised by the superstitious of the idolators. At an awful distance they cast away their garments; seven times, with haity steps, they encircled the Caaba, and kissed the black stone; seven times they visited and adored the adjacent mountains; seven times they threw stones into the valley of Mina; and the pilgrimage was achieved, as at the present hour, by a sacrifice of sheep and camels, and the burial of their hair and nails in the consecrated ground. Each tribe either found or introduced in the Caaba their domestic worship: the temple was adorned, or defiled, with three hundred and sixty idols of men, eagles, lions, and antelopes; and most conspicuous was the statue of Hebal, of red agate, holding in his hand seven arrows, without heads or feathers, the instruments and symbols of profane divination. But this statue was a monument of Syrian arts: the devotion of the ruder ages was content with a pillar or a tablet; and the rocks of the desert were hewn into gods or altars, in imitation of the black stone (49) of Mecca, which

(48) Cosæ, the fifth ancestor of Mahomet, must have usurped the Caaba A. D. 440; but the story is differently told by Jannizi (Oegniër, Vie de Mahomet, tom. i. p. 65—69.) and by Abulfeda (in Vit. Moham. c. 6. p. 13.).

(49) In the second century, Maximus of Tyre attributes to the Arabs the worship of a stone—Arabum est diversus mores, ostina de un oidas, te de angnlyma ducor ivit ad terraeis (dissert. viii. tom. i. p. 145. edit. Reiske), and the reproach is fearfully re-echoed by the Chiistians (Clemens Alex. in Prototypica, p. 40. Arnobius contra Gentes, l. vi. p. 246.). Yet these

is deeply tainted with the reproach of an idolatrous origin. From Japan to Peru, the use of sacrifice has universally prevailed; and the votary has expressed his gratitude, or fear, by destroying or consuming, in honour of the gods, the dearest and most precious of their gifts. The life of a man (50) is the most precious oblation to deprecate a public calamity: the altars of Phœnicia and Egypt, of Rome and Carthage, have been polluted with human gore: the cruel practice was long preserved among the Arabs; in the third century, a boy was annually sacrificed by the tribe of Dumatians (51); and a royal captive was piously slaughtered by the prince of the Saracens, the ally and soldier of the emperor Justinian (52). A parent who drags his son to the altar, exhibits the most painful and sublime effort of fanaticism: the deed, or the intention, was sanctified by the example of saints and heroes; and the father of Mahomet himself was devoted by a rash vow, and hardly racnied for the equivalent of an hundred camels. In the time of ignorance, the Arabs, like the Jews and Egyptians, abstained from the taste of

Roman were no other than the Sarraim of Syria and Greece; so renowned in sacred and profane antiquity (Eulch. Prep. Evangel. l. i. p. 37. Mari- tham. Canon. Chron. p. 54—56).

(50) The two horrid subjects of Arabodias and Phœnicia, are accurately discussed by the learned Sir John Marsham (Canon. Chron. p. 76—78. 301—304.). Sanchoniatho derives the Phœnician sacrifices from the example of Chronus; but we are ignorant whether Chronus lived before or after Abraham, or indeed whether he lived at all.

(51) Καντις χιλιας γιατρα πατερα δοκιμα; is the reproach of Porphyry; but he likewise imputes to the Romans the same barbarous custom, which, A. U. C. 657, had been finally abolished. Dumasth, Daumit al Gadal, is noticed by Ptolemy (Tabul. p. 37. Arabia, p. 9.—29.) and Abulfeda (p. 57); and may be found in d'Anville's maps, in the midst of the sea between Chaibar and Tadmor.

(52) Procopius (de Bell. Persico, l. i. c. 28.), Evagrius (l. vi. c. 21.), and Pocock (Specimen, p. 72. 86.), attest the human sacrifices of the Arabs in the 7th century. The danger and escape of Abdallah, is a tradition rather than a fact (Gagnier, Vie de Mahomet, tom i. p. 81—84).

swine's flesh (53); they circumcised (54) their children at the age of puberty; the same customs, without the censure or the precept of the Koran, have been silently transmitted to their posterity and profelytes. It has been sagaciously conjectured, that the artful legislator indulged the stubborn prejudices of his countrymen. It is more simple to believe that he adhered to the habits and opinions of his youth, without foreseeing that a practice congenial to the climate of Mecca, might become useless or inconvenient on the banks of the Danube or the Volga.

Arabia was free: the adjacent kingdoms were shaken by the storms of conquest and tyranny, and the persecuted fects fled to the happy land where they might profess what they thought; and practice what they professed. The religions of the Sabians and Magians, of the Jews and Christians, were disseminated from the Persian Gulf to the Red Sea. In a remote period of antiquity, Sabianism was diffused over Asia by the science of the Chaldæans (55) and the arms of the Assyrians. From the observations of two thousand years, the priests and astronomers of Babylon (56) deduced the eternal laws of nature and providence. They adored the seven gods or angels

(53) Suillis carnibus abscisit, fays Solimins (Polyhistror. c. 33) who copies Pliny (l. viii. c. 68) in the strange supposition, that hogs cannot live in Arabia. The Egyptians were satiated by a natural and superstitious horror for that unclean beast (Marbam, Canon p. 205.). The old Arabsians likewise practised, post cuturem, the rise of ablation (Herodot. i. i. c. 80.), which is sanctioned by the Mahometan law (Reland, p. 75, &c. Charon, or rather the Molla of Shaw Abbas, tom. iv. p. 71, &c.).

(54) The Mahometan doctors are not fond of the subject; yet they hold circumcision necessary to salvation, and even pretend that Mahomet was miraculously born without a fore-skin (Pocock, Specimen, p. 319, 320. Sale's Preliminary Discourse, p. 106, 107.).

(55) Diodorus Siculus (tom. i. i. ii. p. 142—145.) has cast on their religion the curious but superficial glance of a Greek. Their astronomy would be far more valuable: they had looked through the telescope of reason, since they could doubt whether the sun were in the number of the planets or of the fixed stars.

The attributes of the seven planets; with the twelve signs of the zodiac, and the twenty-four constellations of the northern and southern hemisphere, were represented by images and talismans; the seven days of the week were dedicated to their respective deities; the Sabians prayed thrice each day; and the temple of the moon at Haran was the term of their pilgrimage (57). But the flexible genius of their faith was always ready either to teach or to learn: in the tradition of the creation, the deluge, and the patriarchs, they held a singular agreement with their Jewish captives; they appealed to the secret books of Adam, Seth, and Enoch; and a slight infusion of the gospel has transformed the last remnant of the Polytheists into the Christians of St. John, in the territory of Basflora (58). The altars of Babylon were overturned by the Magians; but the injuries of the Sabians were revenged by the sword of Alexander; Persia groaned above five hundred years under a foreign yoke; and the purest disciples of Zoroaster escaped from the contagion of idolatry, and breathed with their adversaries the freedom of the desert (59). (58) D'Anville (l'Enphraim et le Tigre, p. 130—147.) will fix the position of these ambiguous Christians; Ademannus (Biblire. Oriental. tom. iv. p. 607—614.) may explain their tenets. But it is a slippery task to ascertain the creed of an ignorant people, soiled and stained to diffuslie their secret traditions.

(59) The Magi were fixed in the province of Bahrein. (Gagnier, Vie de Mahomet, tom. iii. p. 144.), and mingled with the old Arabians (Pocock, Specimen, p. 146—159.).

years
years before the death of Mahomet, the Jews were settled in Arabia; and a far greater multitude was expelled from the holy land in the wars of Titus and Hadrian. The industrious exiles aspired to liberty and power; they erected synagogues in the cities and castles in the wilderness, and their Gentile converts were confounded with the children of Israel, whom they resembled in the outward mark of circumcision. The Christian missionaries were still more active and successful: the Catholics asserted their universal reign; the sects whom they oppressed successively retired beyond the limits of the Roman empire; the Marcionites and Manichæans defied their phantastick opinions and apocryphal gospels; the churches of Yemen, and the princes of Hira and Gassan, were instructed in a purer creed by the Jacobite and Nestorian bishops (60). The liberty of choice was presented to the tribes; each Arab was free to elect or to compose his private religion; and the rude superstition of his house was mingled with the sublime theology of saints and philosophers. A fundamental article of faith was inculcated by the consent of the learned strangers; the existence of one supreme God, who is exalted above the powers of heaven and earth, but who has often revealed himself to mankind by the ministr y of his angels and prophets, and whose grace or justice has interrupted, by seasonable miracles, the order of nature. The most rational of the Arabs acknowledged his power, though they neglected his worship (61);

(61) In their offerings it was a maxim to defraud God for the profit of the idol, not a more potent, but a more irritable patron (Pocock, Specimen, p. 108, 109.).

and
and it was habit rather than conviction that still attached them to the relics of idolatry. The Jews and Christians were the people of the book; the Bible was already translated into the Arabic language (62), and the volume of the old testament was accepted by the concord of these implacable enemies. In the story of the Hebrew patriarchs, the Arabs were pleased to discover the fathers of their nation. They applauded the birth and promises of Ismael; revered the faith and virtue of Abraham; traced his pedigree and their own to the creation of the first man, and imbued with equal credulity, the prodigies of the holy text, and the dreams and traditions of the Jewish rabbis.

The base and plebeian origin of Mahomet is an unskilful calumny of the Christians (63), who exalt instead of degrading the merit of their adversary. His descent from Ismael was a national privilege or fable; but if the first steps of the pedigree (64) are dark and doubtful, he could produce many generations of pure and genuine nobility: he sprung from the tribe of

(62) Our versions now extant, whether Jewish or Christian, appear more recent than the Koran; but the existence of a prior translation may be fairly inferred. 1. From the perpetual practise of the synagogue, of expounding the Hebrew lessons by a paraphrase in the vulgar tongue of the country. 2. From the analogy of the Armenian, Persian, Ethiopic versions, expressly quoted by the fathers of the fifth century, who assert that the Scriptures were translated into all the barbarous languages (Walton, Prolegomena ad Biblia Polyglott. p. 34 93—97. Simon, Hist. Critique du V. et du N. Testament, tom. i. p. 180, 181, 282—286, 293, 305, 306. tom. iv. p. 206.).

(63) In eo conveniunt omnes, ut plebeio vilique genere orsum, &c. (Houtinger, Hist. Orient. p. 136.). Yet Theophanes, the most ancient of the Greeks, and the father of many a lie, confesstes that Mahomet was of the race of Ismael, ex magno patriarchae filio (Chronograph. p. 277.).

(64) Abulfeda (in Vit. Mohammed. c. 1, 2.) and Gagnier (Vie de Mahomet, p. 25—7.) describe the popular and approved genealogy of the prophet. At Mecca, I would not dispute its authenticity; at Lafeane, I will venture to observe, 1. That from Ismael to Mahomet, a period of 2500 years, they reckon thirty, instead of seventy-five, generations. 2. That the modern Bedoween are ignorant of their history and careles of their pedigree (Voyage de d'Arvieux, p. 100. 103.).

Koreith
Koreish and the family of Hashem, the most illustrious of the Arabs, the prince of Mecca, and the hereditary guardians of the Caaba. The grandfather of Mahomet was Abdol Motalleb, the son of Hashem, a wealthy and generous citizen, who relieved the distresses of famine with the supplies of commerce. Mecca which had been fed by the liberality of the father, was savied by the courage of the son. The kingdom of Yemen was subject to the Christian princes of Abyssinia; their vassal Abrahah was provoked by an insult to avenge the honour of the cross; and the holy city was invested by a train of elephants and an army of Africans. A treaty was proposed; and in the first audience, the grandfather of Mahomet demanded the restitution of his cattle. "And why," said Abrahah, "do you not rather implore my clemency in favour of your temple, which I have threatened to destroy?" "Because," replied the intrepid chief, "the cattle is my own; the Caaba belongs to the gods, and they will defend their house from injury and sacrilege." The want of provisions, or the valor of the Koreish, compelled the Abyssinians to a disgraceful retreat; their discomfort has been adorned with a miraculous flight of birds, who showered down stones on the heads of the infidels; and the deliverance was long commemorated by the era of the elephant (65). The glory of Abdol Motalleb.
THE DECLINE AND FALL

talleb was crowned with domestic happiness, his life was prolonged to the age of one hundred and ten years, and he became the father of six daughters and thirteen sons. His best beloved Abdallah was the most beautiful and modest of the Arabian youth; and in the first night, when he consummated his marriage with Amina, of the noble race of the Zahrites, two hundred virgins are said to have expired of jealousy and despair. Mahomet, or more properly Mohammed, the only son of Abdallah and Amina, was born at Mecca, four years after the death of Justinian, and two months after the defeat of the Abyssinians (66), whose victory would have introduced into the Caaba the religion of the Christians. In his early infancy, he was deprived of his father, his mother, and his grandfather; his uncles were strong and numerous; and in the division of the inheritance, the orphan's share was reduced to five camels and an Ethiopian maidservant. At home and abroad, in peace and war, Abu Taleb, the most respectable of his uncles, was the guide and guardian of his youth; in his twenty-fifth year, he entered into the service of Cadighah, a rich and noble widow of Mecca, who soon rewarded his fidelity with the gift of her hand and fortune. The marriage-contract, in the simple style of antiquity, recites the mutual love of Mahomet and Cadighah, describes him as the most accomplished of the tribe of Koreish; and stipulates a dowry of

(66) The safest era of Abulfeda (in Vit. c. i. p. 6.), of Alexander, or the Greeks, 882, of Bocht Naier, or Nabonasier, 1516, equally lead us to the year 569. The old Arabian calendar is too dark and uncertain to support the Benedicines (Art. de vérifier les Dates, p. 15.), who from the day of the month and week deduce a new mode of calculation, and remove the birth of Mahomet to the year of Christ 570, the 10th of November. Yet this date would agree with the year 882 of the Greeks, which is assigned by Elmelein (Hist. Saracen. p. 62) and Abulpharagius (Dynast. p. 301, and Errata Pocock's version). While we refine our chronology, it is possible that the illiterate prophet was ignorant of his own age.

twelve ounces of gold and twenty camels, which was supplied by the liberality of his uncle (67).

By this alliance, the son of Abdallah was restored to the station of his ancestors; and the judicious matron was content with his domestic virtues, till, in the fortieth year of his age (68), he assumed the title of a prophet, and proclaimed the religion of the Koran.

According to the tradition of his companions, Mahomet (69) was distinguished by the beauty of his person, an outward gift which is seldom despised, except by those to whom it has been refused. Before he spoke, the orator engaged on his side the affections of a public or private audience. They applauded his commanding presence, his majestic aspect, his piercing eye, his gracious smile, his flowing beard, his countenance that painted every sensation of the soul, and his gestures that enforced each expression of the tongue. In the familiar offices of life he scrupulously adhered to the grave and ceremonious politeness of his country: his respectful attention to the rich and powerful was dignified by his condescension and affability to the poorest citizens of Mecca: the frankness of his manner concealed

(68) The private life of Mahomet, from his birth to his mission, is preferred by Abulfeda (in Vit. c. 3—7.), and the Arabian writers of genuine or apocryphal note, who are accused by Houtinger (Hist. Orient. p. 214—21), Marcucci (tom. i. p. 10—14), and Gagnier (Vie de Mahomet, tom. i. p. 97—134.).

concealed the artifice of his views; and the habits of courtesy were imputed to personal friendship or universal benevolence. His memory was capacious and retentive, his wit eya and social, his imagination sublime, his judgment clear, rapid, and decisive. He possessed the courage both of thought and action; and, although his designs might gradually expand with his success, the first idea which he entertained of his divine mission bears the stamp of an original and superior genius. The son of Abdallah was educated in the bosom of the noblest race, in the use of the purest dialect of Arabia; and the fluency of his speech was corrected and enhanced by the practice of discreet and seasonable silence. With these powers of eloquence, Mahomet was an illiterate Barbarian: his youth had never been instructed in the arts of reading and writing (70); the common ignorance exempted him from shame and reproach, but he was reduced to a narrow circle of existence, and deprived of those faithful mirrors, which reflect to our mind the minds of sages and heroes. Yet the book of nature and of man was open to his view; and some fancy has been indulged in the political and philosophical observations which are ascribed

(70) Those who believe that Mahomet could read or write, are incapable of reading what is written, with another pen, in the Suras, or chapters of the Koran vii. xxix. xvi. These texts, and the tradition of the Sona, are admitted, without doubt, by Abulfeda (in Vit. c. vii.) Gagnié: (Not. ad Abulfed. p. 15.), Pocock (Specimen, p. 151.), Reland (de Religione Mohammedica, p. 236.), and Sale (Preliminary Discourse, p. 41.). Mr. White, almost alone, denies the ignorance, to accuse the imposture, of the prophet. His arguments are far from satisfactory. Two short trading journeys to the fairs of Syria, were surely not sufficient to infuse a science so rare among the citizens of Mecca: it was not in the cool deliberate act of a treaty, that Mahomet would have drop the mask; nor can any conclusion be drawn from the words of delirium. The lettered youth, before he aspired to the prophetic character, must have often exercised, in private life, the arts of reading and writing; and his first converts, of his own family, would have been the first to detect and upbraid his scandalous hypocrisy (White's Sermons, p. 203, 204. Notes, p. xxxvi—xxxviii.).
to the Arabian traveller (71). He compares the nations and the religions of the earth; discovers the weakness of the Persian and Roman monarchies; beholds, with pity and indignation, the degeneracy of the times; and resolves to unite, under one God and one king, the invincible spirit and primitive virtues of the Arabs. Our more accurate enquiry will suggest, that instead of visiting the courts, the camps, the temples of the East, the two journeys of Mahomet into Syria were confined to the fairs of Bostra and Damascus: that he was only thirteen years of age when he accompanied the caravan of his uncle, and that his duty compelled him to return as soon as he had disposed of the merchandise of Cadijah. In these hasty and superficial excursions, the eye of genius might discern some objects invisible to his grosser companions; some seeds of knowledge might be cast upon a fruitful soil; but his ignorance of the Syriac language must have checked his curiosity; and I cannot perceive, in the life or writings of Mahomet, that his prospect was far extended beyond the limits of the Arabian world. From every region of that solitary world, the pilgrims of Mecca were annually assembled, by the calls of devotion and commerce: in the free concourse of multitudes, a simple citizen, in his native tongue, might study the political state and character of the tribes, the theory and practice of the Jews and Christians. Some useful strangers might be tempted, or forced, to implore the rights of hospitality; and the ene-

(71) The Count de Boulainvilliers (Vie de Mahomed, p. 202—218.) leads his Arabian pupil, like the Telemachus of Penelon, or the Cyrus of Ramsay. His journey to the court of Persia is probably a fiction; nor can I trace the origin of his exclamation, "Les Grecs sont pourtant des hommes." The two Syrian journeys are expressed by almost all the Arabic writers, both Mahometans and Christians (Gagnaier ad Abul- fed, p. 10).
THE DECLINE AND FALL

mies of Mahomet have named the Jew, the Persian, and the Syrian monk, whom they accuse of lending their secret aid to the composition of the Koran (72). Conversation enriches the understanding, but solitude is the school of genius; and the uniformity of a work denotes the hand of a single artist. From his earliest youth, Mahomet was addicted to religious contemplation: each year, during the month of Ramadan, he withdrew from the world, and from the arms of Cadijah: in the cave of Hera, three miles from Mecca (73), he consulted the spirit of fraud or enthusiasm, whose abode is not in the heavens, but in the mind of the prophet. The faith which, under the name of Islam, he preached to his family and nation, is compounded of an eternal truth, and a necessary fiction, THAT THERE IS ONLY ONE GOD, AND THAT MAHOMET IS THE APOSTLE OF GOD.

One God.

It is the boast of the Jewish apologists, that while the learned nations of antiquity were deluded by the fables of polytheism, their simple ancestors of Palestine preferred the knowledge and worship of the true God. The moral attributes of Jehovah may not easily be reconciled with the standard of human virtue: his metaphysical qualities are darkly expressed; but each page of the Pentateuch and the Prophets is an evidence of his power: the unity of his name is inscribed on the first table of the law; and his sanctuary was never defiled by any visible

(72) I am not at leisure to pursue the fables or conjectures which name the strangers accused or suspected by the infidels of Mecca (Koran, c. 16. p. 223. c. 35. p. 297. with Sale's Remarks. Pridex's Life of Mahomet, p. 112—79. Gagnier, Not. ad Abulfed. p. 11. 74. Maracci, tom. ii. p. 400.). Even Pridex has observed, that the transaction must have been secret, and that the scene lay in the heart of Arabia.

essence
OF THE ROMAN EMPIRE.

Essence. After the ruin of the temple, the faith of the Hebrew exiles was purified, fixed, and enlightened, by the spiritual devotion of the synagogue; and the authority of Mahomet will not justify his perpetual reproach, that the Jews of Mecca or Medina adored Ezra as the son of God (74). But the children of Israel had ceased to be a people; and the religions of the world were guilty, at least in the eyes of the prophet, of giving sons, or daughters, or companions, to the supreme God. In the rude idolatry of the Arabs, the crime is manifest and audacious: the Sabians are poorly excused by the pre-eminence of the first planet, or intelligence, in their celestial hierarchy; and in the Persian system the conflict of the two principles betrays the imperfection of the conqueror. The Christians of the seventh century had infamously relapsed into a semblance of paganism: their public and private vows were addressed to the relics and images that disgraced the temples of the East: the throne of the Almighty was darkened by a cloud of martyrs, and saints, and angels, the objects of popular veneration; and the Collyridian heretics, who flourished in the fruitful soil of Arabia, invested the Virgin Mary with the name and honours of a goddess (75).

The mysteries of the Trinity and Incarnation appear to contradict the principle of the divine unity. In their obvious sense, they introduce three equal deities, and transform the man.

(74) Koran, c. 9, p. 153. Al Baidawi, and the other commentators quoted by Sale, adhere to the charge; but I do not understand that it is coloured by the most obscure or absurd tradition of the Talmudist.

(75) Holtinger, Hist. Orient, p. 225—228. The Collyridian heresy was carried from Thrace to Arabia by some women, and the name was borrowed from the κολυρίον, or cake, which they offered to the goddess. This example, that of Beryllus bishop of Bohra (Euseb. Hist. Eccl. 1. vi. c. 33.), and several others, may excuse the reproach, Arabia herefes xenax.
THE DECLINE AND FALL

Jesus into the substance of the son of God (76); an orthodox commentary will satisfy only a believing mind: intemperate curiosity and zeal had torn the veil of the sanctuary; and each of the Oriental sects was eager to confess that all, except themselves, deserved the reproach of idolatry and polytheism. The creed of Mahomet is free from suspicion or ambiguity; and the Koran is a glorious testimony to the unity of God. The prophet of Mecca rejected the worship of idols and men, of stars and planets, on the rational principle that whatever rises must set, that whatever is born must die, that whatever is corruptible must decay and perish (77). In the Author of the universe, his rational enthusiasm confessed and adored an infinite and eternal being, without form or place, without issue or similitude, present to our most secret thoughts, existing by the necessity of his own nature, and deriving from himself all moral and intellectual perfection. These sublime truths, thus announced in the language of the prophet (78), are firmly held by his disciples, and defined with metaphysical precision by the interpreters of the Koran. A philosophic theist might subscribe the popular creed of the Mahometans (79); a creed too sublime

(76) The three gods in the Koran, (c. 4. p. 81. c. 5. p. 92.) are obviously directed against our Catholic mystery; but the Arabic commentators understand them of the Father, the Son, and the Virgin Mary, an heretical Trinity, maintained, as it is said, by some Barbarians at the council of Nice (Euseb. Annoal. tom. i. p. 440.;). But the existence of the Marianistes is denied by the candid Beaufour (Hist. de Manichèisme, tom. i. p. 532.) and he derives the mistake from the word Rosab, the Holy Chrift, which in some Oriental tongues is of the feminine gender, and is figuratively styled the mother of Christ in the gospel of the Nazarenes.

(77) This train of thought is philosophically exemplified in the character of Abraham, who opposed in Chaldea the first introduction of idolatry (Korah, c. 6. p. 106. d’Herbelot, Bibl. Orient. p. 13.).

(78) See the Koran, particularly the second (p. 30.), the fifty-seventh (p. 437.), the fifty-eighth (p. 441.) chapter, which proclaim the omnipotence of the Creator.

sublime perhaps for our present faculties. What object remains for the fancy, or even the understanding, when we have abstracted from the unknown substance all ideas of time and space, of motion and matter, of sensation and reflection? The first principle of reason and revelation was confirmed by the voice of Mahomet: his proselytes, from India to Morocco, are distinguished by the name of Unitarians; and the danger of idolatry has been prevented by the interdiction of images. The doctrine of eternal decrees and absolute predestination is strictly embraced by the Mahometans; and they struggle with the common difficulties, how to reconcile the predestination of God with the freedom and responsibility of man; how to explain the permission of evil under the reign of infinite power and infinite goodness.

The God of nature has written his existence on all his works, and his law in the heart of man. To restore the knowledge of the one and the practice of the other, has been the real or pretended aim of the prophets of every age: the liberality of Mahomet allowed to his predecessors the same credit which he claimed for himself; and the chain of inspiration was prolonged from the fall of Adam to the promulgation of the Koran (80). During that period, some rays of prophetic light had been imparted to one hundred and twenty-four thousand of the elect, discriminated by their respective measure of virtue and grace; three hundred and thir-
teen apostles were sent with a special commis-
sion to recall their country from idolatry and
vice; one hundred and four volumes have been
dictated by the holy spirit; and six legislators of
transcendent brightness have announced to man-
kind the six successive revelations of various rites,
but of one immutable religion. The authority
and station of Adam, Noah, Abraham, Moses,
Christ, and Mahomet, rise in just gradation
above each other; but whosoever hates or re-
jects any one of the prophets, is numbered with
the infidels. The writings of the patriarchs
were extant only in the apocryphal copies of the
Greeks and Syrians (81): the conduct of Adam
had not entitled him to the gratitude or respect
of his children; the seven precepts of Noah
were observed by an inferior and imperfect class
of the proselytes of the synagogue (82); and
the memory of Abraham was obscurely revered
by the Sabians in his native land of Chaldaea:
of the myriads of prophets, Moses and Christ
alone lived and reigned; and the remnant of
the inspired writings was comprised in the books
of the Old and the New Testament. The mi-
raculous story of Moses is consecrated and em-
bellished in the Koran (83); and the captive
Jews enjoy the secret revenge of imposing their
own belief on the nations whose recent creeds
they deride. For the author of Christianity,
the Mahometans are taught by the prophet to

by the quotation of the apostle St. Jude; and a long legendary frag-
ment is alleged by Syncellus and Scaliger.

entertain an high and mysterious reverence (84). "Verily, Christ Jesus, the son of Mary, is the "apostle of God, and his word, which he con- "veyed unto Mary, and a Spirit proceeding "from him: honourable in this world, and in "the world to come; and one of those who "approach near to the presence of God (85)." The wonders of the genuine and apocryphal gospels (86) are profusely heaped on his head; and the Latin church has not disdained to bor- row from the Koran the immaculate conception (87) of his virgin mother. Yet Jesus was a mere mortal; and, at the day of judgment, his testi- mony will serve to condemn both the Jews, who reject him as a prophet, and the Christians, who adore him as the Son of God. The ma- lice of his enemies asperfed his reputation, and conspired against his life; but their intention only was guilty, a phantom or a criminal was substituted on the cross, and the innocent saint was translated to the seventh heaven (88). (87) It is darkly hinted in the Koran (c. 3. p. 39.), and more clearly explained by the tradition of the Sonnites (Sale's Note, and Maracci, tom. ii. p. 112.) In the xith century, the immaculate conception was condemned by St. Bernard as a presumptuous novelty (Fra Paolo, Historia del Concilio di Trento, 1. ii.).
(88) See the Koran, c. 3. v. 53. and c. 4. v. 156. of Maracci's edition. Deus est præfentissimus deosce agentium (an odd phrase) . . . nec crucifixsum eum, sed objecta est eis similitudo: an expression that may suit with the system of the Docetes; but the commentators believe (Maracci, tom. ii. p. 113-115. 173. Sale, p. 42. 43. 79.); that another man, a friend or an enemy, was crucified in the likeness of Jesus; a fable which they had read in the gospel of St. Bernabas, and which had been started as early as the time of Irenæus, by some Ebionite her- etics (Beauë stirre, Hist. du Manichæisme, tom. ii. p. 25. Molheim de Reb. Christ. p. 353.).
ing six hundred years the gospel was the way of truth and salvation; but the Christians intently forgot both the laws and the example of their founder; and Mahomet was instructed by the Gnostics to accuse the church, as well as the synagogue, of corrupting the integrity of the sacred text (89). The piety of Moses and of Christ rejoiced in the assurance of a future prophet, more illustrious than themselves: the evangelical promise of the Paraclete, or Holy Ghost, was prefigured in the name, and accomplished in the person, of Mahomet (go), the greatest and the last of the apostles of God.

The Koran. — The communication of ideas requires a similitude of thought and language: the discourse of a philosopher would vibrate without effect on the ear of a peasant; yet how minute is the distance of their understandings, if it be compared with the contact of an infinite and a finite mind, with the word of God expressed by the tongue or the pen of a mortal? The inspiration of the Hebrew prophets, of the apostles and evangelists of Christ, might not be incompatible with the exercise of their reason and memory; and the diversity of their genius is strongly marked in the style and composition of the books of the Old and New Testament. But Mahomet was content with a character, more humble, yet more sublime, of a simple editor:

(89) This charge is obscurely urged in the Koran (c. 3. p. 45.); but neither Mahomet, nor his followers, are sufficiently versed in languages and criticism to give any weight or colour to their suspicions. Yet the Arians and Nestorians could relate some stories, and the illiterate prophet might listen to the bold assertions of the Manichaeans. See Beaujoubré, tom. i. p. 291—300.

(90) Among the prophecies of the Old and New Testament, which are perverted by the fraud or ignorance of the Musulmans, they apply to the prophet the promise of the Paraclete, or Comforter, which had been already usurped by the Monophysites and Manichaeans (Beaujoubré, Hist. Critique du Manichéisme, tom. i. p. 265, &c.); and the easy change of letters, محمر for محمد, affords the etymology of the name of Mohammed (Maracci, tom. i. part i. p. 14—48).
the substance of the Koran (91), according to himself or his disciples, is uncreated and eternal; subsisting in the essence of the Deity, and inscribed with a pen of light on the table of his everlasting decrees. A paper copy in a volume of silk and gems, was brought down to the lowest heaven by the angel Gabriel, who, under the Jewish economy, had indeed been dispatched on the most important errands; and this trusty messenger successively revealed the chapters and verses to the Arabian prophet. Instead of a perpetual and perfect measure of the divine will, the fragments of the Koran were produced at the discretion of Mahomet; each revelation is suited to the emergencies of his policy or passion; and all contradiction is removed by the saving maxim, that any text of scripture is abrogated or modified by any subsequent passage. The word of God, and of the apostle, was diligently recorded by his disciples on palm-leaves and the shoulder bones of mutton; and the pages, without order or connection, were cast into a domestic chest in the custody of one of his wives. Two years after the death of Mahomet, the sacred volume was collected and published by his friend and successor Abu-beker; the work was revised by the caliph Othman, in the thirtieth year of the Hegira; and the various editions of the Koran assert the same miraculous privilege of an uniform and incorruptible text. In the spirit of enthusiasm or vanity, the prophet rests the truth of his mission on the merit of his book, audaciously challenges both men and angels to imitate the beauties of a single page, and presumes to assert that God alone could dictate this

incomparable performance (92). This argument is most powerfully addressed to a devout Arabian, whose mind is attuned to faith and rapture, whose ear is delighted by the music of sounds, and whose ignorance is incapable of comparing the productions of human genius (93). The harmony and copiousness of style will not reach in a version, the European infidel: he will peruse with impatience the endless incoherent rhapsody of fable, and precept, and declamation, which seldom excites a sentiment or an idea, which sometimes crawls in the dust, and is sometimes lost in the clouds. The divine attributes exalt the fancy of the Arabian missionary; but his loftiest strains must yield to the sublime simplicity of the book of Job, composed in a remote age, in the same language (94). If the composition of the Koran exceed the faculties of a man, to what superior intelligence should we ascribe the Iliad of Homer or the Philippics of Demosthenes? In all religions, the life of the founder supplies the silence of his written revelation: the sayings of Mahomet were so many lessons of truth; his actions so many examples of virtue; and the public and private memorials were preferred by his wives and companions. At the end of two hundred years, the Sonna or oral law was fixed and consecrated by

the labours of Al Bochari, who discriminated seven thousand two hundred and seventy-five genuine traditions, from a mass of three hundred thousand reports, of a more doubtful or spurious character. Each day the pious author prayed in the temple of Mecca, and performed his ablutions with the water of Zemzem: the pages were successively deposited on the pulpit, and the sepulchre of the apostle; and the work has been approved by the four orthodox sects of the Sonnites (95).

The mission of the ancient prophets, of Moses and of Jesus, had been confirmed by many splendid prodigies; and Mahomet was repeatedly urged, by the inhabitants of Mecca and Medina, to produce a similar evidence of his divine legation; to call down from heaven the angel or the volume of his revelation, to create a garden in the desert, or to kindle a conflagration in the unbelieving city. As often as he is pressed by the demands of the Koreish, he involves himself in the obscure boast of vision and prophesy, appeals to the internal proofs of his doctrine, and shields himself behind the providence of God, who refuses those signs and wonders that would depreciate the merit of faith and aggravate the guilt of infidelity. But the modest or angry tone of his apologies betrays his weakness and vexation; and these passages of scandal establish, beyond suspicion, the integrity of the Koran (96). The votaries of Mahomet are more assurèd than himself of his miraculous gifts, and their confidence and credulity encreas as they are farther removed from

Maracci, with a more learned apparatus, has shewn that the passages which deny his miracles are clear and positive (Alcoran, toin. i. part ii. p. 8—12.), and those which seem to assert them, are ambiguous and insufficient (p. 12—22.).

the time and place of his spiritual exploits. They believe or affirm that, trees went forth to meet him; that he was saluted by stones; that water gushed from his fingers; that he fed the hungry, cured the sick, and raised the dead; that a beam groaned to him; that a camel complained to him; that a shoulder of mutton informed him of its being poisoned; and that both animate and inanimate nature were equally subject to the apostle of God (97). His dream of a nocturnal journey is seriously described as a real and corporeal transtion. A mysterious animal, the Borak, conveyed him from the temple of Mecca to that of Jerusalem: with his companion Gabriel, he successively ascended the seven heavens, and received and repaid the salutations of the patriarchs, the prophets, and the angels, in their respective mansions. Beyond the seventh heaven, Mahomet alone was permitted to proceed; he passed the veil of unity, approached within two bow-shots of the throne, and felt a cold that pierced him to the heart, when his shoulder was touched by the hand of God. After this familiar though important conversation, he again descended in Jerusalem, remounted the Borak, returned to Mecca, and performed in the tenth part of a night the journey of many thousand years (98). According to another legend, the apostle confounded in a

Maracci (Alcoran, tom. i. p. 32-64), has most laboriously collected and confuted the miracles and prophecies of Mahomet, which, according to some writers, amount to three thousand.

(98) The nocturnal journey is circumstantially related by Abulfeda (in Vit. Mohammed. c. 19. p 33.), who wishes to think it a vision; by Prie deaux (p. 31-40), who aggravates the absurdities; and by Gagnier (tom. i. p. 343-343), who declares, from the zealous Al Janabi, that to deny this journey, is to disbelieve the Koran. Yet the Koran, without naming either heaven, or Jerusalem, or Mecca, has only dropped a mysterious hint: Laus illi qui transiuit farum faum ab oratorio Haram ad oratorium remotissimum (Koran, c. 17. v. 1. in Maracci, tom. ii. p. 407.; for Sale's version is more licentious). A slender basis for the aerial structure of tradition.
national assembly the malicious challenge of the Koreith. His resolute word split asunder the orb of the moon: the obedient planet stooped from her station in the sky, accomplished the seven revolutions round the Caaba, saluted Mahomet in the Arabian tongue, and suddenly contracting her dimensions, entered at the collar, and issued forth through the sleeve, of his shirt (99). The vulgar are amused with these marvellous tales; but the gravest of the Muhammadan doctors imitate the modesty of their master, and indulge a latitude of faith or interpretation (100). They might speciously alledge, that in preaching the religion, it was needless to violate the harmony, of nature; that a creed unclouded with mystery may be excused from miracles; and that the sword of Mahomet was not less potent than the rod of Moses.

The polytheist is oppressed and distracted by the variety of superstition: a thousand rites of Egyptian origin were interwoven with the essence of the Mosaic law; and the spirit of the gospel had evaporated in the pageantry of the church. The prophet of Mecca was tempted by prejudice, or policy, or patriotism, to sanctify the rites of the Arabians, and the custom of visiting the holy stone of the Caaba. But

(99) In the prophetic style, which uses the present or past for the future, Mahomet had said: `ibi opinuavis hora et festa illa' (Koran, c. 54 v. i. in Maracci, tom. ii. p. 668.). This figure of rhetoric has been converted into a fact, which is said to be ascertained by the most respectable eye-witnesses (Maracci, tom. ii. p. 690.). The festival is still celebrated by the Persians (Chardin, tom. iv. p. 197;) and the legend is tediously spun out by Gagnier (Vie de Mahomet, tom. i. p. 183—134.) on the faith, as it should seem, of the credulous Al Jannabi. Yet a Mahometan doctor has assigned the credit of the principal winefs (spud Pocock, Specimen, p. 187;) to the best interpreters are content with the simplest sense of the Koran (Al Reildawi, spud Holtinger, Hist. Orient, l. ii. p. 302;) and the silence of Abulfeda is worthy of a prince and a philosopher.

the precepts of Mahomet himself inculcate a more simple and rational piety: prayer, fasting, and alms, are the religious duties of a Musulman; and he is encouraged to hope, that prayer will carry him halfway to God, fasting will bring him to the door of his palace, and alms will gain him admittance (101). I. According to the tradition of the nocturnal journey, the apostle in his personal conference with the Deity, was commanded to impose on his disciples the daily obligation of fifty prayers. By the advice of Moses, he applied for an alleviation of this intolerable burthen; the number was gradually reduced to five; without any dispensation of business or pleasure, or time or place: the devotion of the faithful is repeated at day-break, at noon, in the afternoon, in the evening, and at the first watch of the night; and, in the present decay of religious fervour, our travellers are edified by the profound humility and attention of the Turks and Persians. Cleanliness is the key of prayer: the frequent lustration of the hands, the face, and the body, which was practised of old by the Arabs, is solemnly enjoined by the Koran; and a permission is formally granted to supply with sand the scarcity of water. The words and attitudes of supplication, as it is performed either sitting, or standing, or prostrate on the ground, are prescribed by custom or authority, but the prayer is poured forth in short and fervent ejaculati-

(101) The most authentic account of these precepts, pilgrimage, prayer, fasting, alms, and ablations, is extracted from the Persian and Arabian theologians by Maracci (Prodom part iv. p. 9–14). Reland (in his excellent tracts de Religione Mohammedica, Utrecht, 1717, p. 67–123.); and Chardin (Voyages en Perse, tom iv. p. 47–195.). Maracci is a partial scoffer; but the jeweller, Chardin, had the eyes of a philosopher; and Reland, a judicious student, had travelled over the east in his closet at Utrecht. ons; the measure of zeal is not exhausted by a tedious liturgy; and each Musulman, for his own person, is invested with the character of a priest. Among the heathens, who reject the use of images, it has been found necessary to restrain the wanderings of the fancy, by directing the eye and the thought towards a kebla, or visible point of the horizon. The prophet was at first inclined to gratify the Jews by the choice of Jerusalem; but he soon returned to a more natural partiality; and five times every day the eyes of the nations at Astrakan, at Fez, at Delhi, are devoutly turned to the holy temple of Mecca. Yet every spot for the service of God is equally pure: the Mahometans indifferently pray in their chamber or in the street. As a distinction from the Jews and Christians, the Friday in each week is set apart for the useful institution of public worship: the people is assembled in the masjid and the imam: some respectable elder ascends the pulpit, to begin the prayer and pronounce the sermon. But the Mahometan religion is destitute of priesthood or sacrifice; and the independent spirit of fanaticism looks down with contempt on the ministers and the slaves of superstition. II. The voluntary (102) penance of the ascetics, the torment and glory of their lives, was odious to a prophet who censured in his companions a rash vow of abstaining from flesh, and women, and sleep; and firmly declared, that he would suffer no monks in his religion (103). Yet he instituted, in each year,

chos. 9. p. 153.) reproaches the Christians with taking their priests and monks for their lords, besides God. Yet Maracci (Prodomus, part iii. p. 69, 70) excuses the worship, especially of the pope, and quotes, from the Koran itself, the case of Esblis, or Satan, who was cast from heaven for refusing to adore Adam. a fast of thirty days; and strenuously recommended the observance, as a discipline which purifies the soul and subdues the body, as a salutary exercise of obedience to the will of God and his apostle. During the month of Ramadan, from the rising to the setting of the sun, the Musulman abstains from eating, and drinking, and women, and baths, and perfumes; from all nourishment that can restore his strength, from all pleasure that can gratify his senses. In the revolution of the lunar year, the Ramadan coincides by turns with the winter cold and the summer heat; and the patient martyr, without allaying his thirst with a drop of water, must expect the close of a tedious and sultry day. The interdiction of wine, peculiar to some orders of priests or hermits, is converted by Mahomet alone into a positive and general law (104); and a considerable portion of the globe has abjured at his command, the use of that salutary, though dangerous, liquor. These painful restraints are, doubtless, infringed by the libertine and eluded by the hypocrite; but the legislator, by whom they are enacted, cannot surely be accused of alluring his disciples by the indulgence of their sensual appetites. III. The charity of the Mahometans descends to the animal creation; and the Koran repeatedly inculcates, not as a merit, but as a strict and indispensable duty, the relief of the indigent and unfortunate. Mahomet, perhaps, is the only lawgiver who has defined the precise measure of charity: the standard may vary with the degree and nature of property, as it consists either in money, in corn or cattle, in fruits or merchandise; but the

Musulman does not accomplish the law, unless he beholds a tenth of his revenue; and if his conscience accuses him of fraud or extortion, the tenth under the idea of restitution, is enlarged to a fifth (105). Benevolence is the foundation of justice, since we are forbid to injure those whom we are bound to assist. A prophet may reveal the secrets of heaven and of futurity; but in his moral precepts he can only repeat the lessons of our own hearts.

The two articles of belief, and the four practical duties of Islam, are guarded by rewards and punishments; and the faith of the Musulman is devoutly fixed on the event of the judgment and the last day. The prophet has not presumed to determine the moment of that awful catastrophe, though he darkly announces the signs, both in heaven and earth, which will precede the universal dissolution, when life shall be destroyed, and the order of creation shall be confounded in the primitive chaos. At the blast of the trumpet, new worlds will start into being; angels, genii, and men, will arise from the dead, and the human soul will again be united to the body. The doctrine of the resurrection was first entertained by the Egyptians (106); and their mummies were embalmed, their pyramids were constructed, to preserve the ancient mansion of the soul, during

(105) The jealousy of Maracci (Petrarca, part iv. p. 33.) prompts him to enumerate the more liberal alms of the Catholics of Rome. Fifteen great hospitals are open to many outland patients and pilgrims, fifteen hundred maidens are annually portioned, fifty-six charity schools are founded for both sexes, one hundred and twenty confraternities relieve the wants of their brethren, &c. The benevolence of London is still more extensive; but I am afraid that much more is to be ascribed to the humanity, than to the religion, of the people.

(106) See Herodotus (I. ii. c. 123.) and our learned countryman Sir John Marsham (Canon Chronicus, p. 46.). The Ais of the same writer (p. 254—274.) is an elaborate sketch of the infernal regions, as they were painted by the fancy of the Egyptians and Greeks, of the poets and philosophers of antiquity.

a period
a period of three thousand years. But the attempt is partial and unavailing; and it is with a more philosophic spirit that Mahomet relies on the omnipotence of the Creator, whose word can reanimate the breathless clay, and collect the innumerable atoms, that no longer retain their form or substance (107). The intermediate state of the soul it is hard to decide; and those who most firmly believe her immaterial nature, are at a loss to understand how she can think or act without the agency of the organs of sense.

The reunion of the soul and body will be followed by the final judgment of mankind; and, in his copy of the Magian picture, the prophet has too faithfully represented the forms of proceeding, and even the flow and successive operations of an earthly tribunal. By his intolerant adversaries he is upbraided for extending, even to themselves, the hope of salvation, for ascertaining theblackest heresy, that every man who believes in God, and accomplishes good works, may expect in the last day a favourable sentence. Such rational indifference is ill adapted to the character of a fanatic; nor is it probable that a messenger from heaven should depreciate the value and necessity of his own revelation. In the idiom of the Koran (108), the belief of God is inseparable from that of Mahomet: the good works are those which he has enjoined; and the two qualifications imply the profession of Islam.

(107) The Koran (c. 2 p. 259, &c.; of Sale, p. 32; of Maracci, p. 97) relates an ingenious miracle, which satisfied the curiosity, and confirmed the faith, of Abraham.

(108) The candid Reiland has demonstrated, that Mahomet pronounces all unbelievers (de Religion. Moham. p. 128—143.), that devils will not be finally saved (p. 196—199); that paradise will not solely consist of corporeal delights (p. 199—205); and that women’s souls are immortal (p. 205—209).
to which all nations and all sects are equally invited. Their spiritual blindness, though excused by ignorance and crowned with virtue, will be scourged with everlasting torments; and the tears which Mahomet shed over the tomb of his mother, for whom he was forbidden to pray, display a striking contrast of humanity and enthusiasm (109). The doom of the infidels is common: the measure of their guilt and punishment is determined by the degree of evidence which they have rejected, by the magnitude of the errors which they have entertained: the eternal mansions of the Christians, the Jews, the Sabians, the Magians, and the idolators, are sunk below each other in the abyss; and the lowest hell is reserved for the faithless hypocrites who have assumed the mask of religion. After the greater part of mankind has been condemned for their opinions, the true believers only will be judged by their actions. The good and evil of each Mussulman will be accurately weighed in a real or allegorical balance, and a singular mode of compensation will be allowed for the payment of injuries: the aggressor will refund an equivalent of his own good actions, for the benefit of the person whom he has wronged; and if he should be destitute of any moral property, the weight of his sins will be loaded with an adequate share of the demerits of the sufferer. According as the shares of guilt or virtue shall preponderate, the sentence will be pronounced, and all, without distinction, will pass over the sharp and perilous bridge of the abyss; but the innocent, treading in the

footssteps of Mahomet, will gloriously enter the gates of paradise, while the guilty will fall into the first and mildest of the seven hells. The term of expiation will vary from nine hundred to seven thousand years; but the prophet has judiciously promised, that all his disciples, whatever may be their sins, shall be saved, by their own faith and his intercession, from eternal damnation. It is not surprising that superstition should act most powerfully on the fears of her votaries, since the human fancy can paint with more energy the misery than the bliss of a future life. With the two simple elements of darkness and fire, we create a sensation of pain, which may be aggravated to an infinite degree by the idea of endless duration. But the same idea operates with an opposite effect on the continuity of pleasure; and too much of our present enjoyments is obtained from the relief or the comparison of evil. It is natural enough that an Arabian prophet should dwell with rapture on the groves, the fountains, and the rivers, of paradise; but instead of inspiring the blessed inhabitants with a liberal taste for harmony and science, conversation and friendship, he idly celebrates the pearls and diamonds, the robes of silk, palaces of marble, dishes of gold, rich wines, artificial dainties, numerous attendants, and the whole train of sensual and costly luxury, which becomes insipid to the owner, even in the short period of this mortal life. Seventy-two Houris, or black-eyed girls, of resplendent beauty, blooming youth, virgin purity, and exquisite sensibility, will be created for the use of the meanest believer; a moment of pleasure will be prolonged to a thousand years, and his faculties will be encreased an hundred fold, to render him worthy of his felicity. Notwithstanding a vulgar prejudice, the gates of heaven will be open

open to both sexes; but Mahomet has not specified the male companions of the female elect, lest he should either alarm the jealousy of their former husbands, or disturb their felicity, by the suspicion of an everlasting marriage. This image of a carnal paradise has provoked the indignation, perhaps the envy, of the monks: they declaim against the impure religion of Mahomet; and his modest apologists are driven to the poor excuse of figures and allegories. But the founder and more consistent party adhere, without shame, to the literal interpretation of the Koran: useles would be the resurrection of the body, unless it were restored to the possession and exercise of its worthiest faculties; and the union of sensual and intellectual enjoyment is requisite to complete the happiness of the double animal, the perfect man. Yet the joys of the Mahometan paradise will not be confined to the indulgence of luxury and appetite; and the prophet has expressly declared, that all meaner happiness will be forgotten and despised by the saints and martyrs, who shall be admitted to the beatitude of the divine vision (110).

The first and most arduous conquests of Mahomet (111) were those of his wife, his servant, his A.D. 609.

Reland, p. 47—61.; and Sale (p. 76—103). The original ideas of the Magi are darkly and doubtfully explored by their apologist Dr. Hyde (Hist. Religionis Persarum, c. 33. p 404—412. Oxon. 1760). In the article of Mahomet, Bayle has shown how indifferently wit and philosophy supply the absence of genuine information.

(111) Before I enter on the history of the prophet, it is incumbent on me to produce my evidence. The Latin, French, and English versions of the Koran are preceded by historical discourses, and the three translators, Maracci (tom. i. p. 10—31.), Savary (tom. i. p. 1—238.), and Sale (Preliminary Disobuse, p. 33—56.), had accurately studied the language and character of their author. his pupil, and his friend (112); since he presented himself as a prophet to those who were most convertant with his infirmities as a man. Yet Cadijah believed the words, and cherished the glory, of her husband; the obsequious and affectionate Zeid was tempted by the prospect of freedom; the illustrious Ali, the son of Abu Taleb, embraced the sentiments of his cousin with the spirit of a youthful hero; and the wealth, the moderation, the veracity of Abubeker, confirmed the religion of the prophet whom he was destined to succeed. By his persuasion, ten of the most respectable citizens of Mecca were introduced to the private lessons of Islam; they yielded to the voice of reason and enthusiasm: they repeated the fundamental creed; “there is but one God, and Mahomet is the "apostle of God;” and their faith, even in this life, was rewarded with riches and honours, with the command of armies and the government of kingdoms. La Vie de Mahomet traduite et complétée de l’Ancien, des Traductions authentiques de la Sonne et des meilleurs Auteurs Arabes; Amsterdam, 1748, 3 vols. in 8vo) he has interpreted, illustrated, and supplied the Arabic text of Abulfeda and Al Janabi, the first, an enlightened prince, who reigned at Hamah, in Syria, A. D. 1310—1332 (viz Gagnier Prefet. Abulfeda, i.e.); the second, a credulous doctor, who visited Mecca A. D. 1256 (d’Herbelot, p. 397. Gagnier, tom. iii. p. 500, 510). Their are my general vouchsafes, and the inquisitive reader may follow the order of time, and the division of chapters. Yet I must observe, that both Abulfeda and Al Janabi are modern historians, and that they cannot appeal to any system of the first century of the Hegira.

lytes, the first fruits of his mission; but in the fourth year he assumed the prophetic office, and resolving to impart to his family the light of divine truth, he prepared a banquet, a lamb, as it is said, and a bowl of milk, for the entertainment of forty guests of the race of Hashem. "Friends and kinsmen," said Mahomet to the assembly, "I offer you, and I alone can offer, the most precious of gifts, the treasures of this world and of the world to come. God has commanded me to call you to his service. Who among you will support my burthen? Who among you will be my companion and my vizir (113)?"

No answer was returned, till the silence of astonishment, and doubt, and contempt, was at length broken by the impatient courage of Ali, a youth in the fourteenth year of his age. "O prophet, I am the man: whosoever riseth against thee, I will dash out his teeth, tear out his eyes, break his legs, rip up his belly. O prophet, I will be thy vizir over them." Mahomet accepted his offer with transport, and Abu Taleb was ironically exhorited to respect the superior dignity of his son. In a more serious tone, the father of Ali advised his nephew to relinquish his impracticable design. "Spare your remonstrances," replied the intrepid fanatic to his uncle and benefactor; "if they should place the sun on my right-hand and the moon on my left, they should not divert me from my course." He persevered ten years in the exercise of his mission; and the religion which has overspread the East and the West, advanced with a slow and painful progress within the walls of Mecca. Yet Mahomet enjoyed the satisfac-

by the timely conversion of his uncle Hamza,
and of the fierce and inflexible Omar, who sig-
nalised in the cause of Islam the same zeal which
he had exerted for its destruction. Nor was
the charity of Mahomet confined to the tribe of
Koreith or the precincts of Mecca: on solemn
festivals, in the days of pilgrimage, he fre-
quented the Caaba, accosted the strangers of
every tribe, and urged, both in private conver
course and public discourse, the belief and worship of
a sole Deity. Conscious of his reason and of his
weakness, he asserted the liberty of con-
science, and disclaimed the use of religious vi-
olence (114): but he called the Arabs to re-
pentance, and conjured them to remember the
ancient idolators of Ad and Thamud, whom the
divine justice had swept away from the face of
the earth (115).

The people of Mecca was hardened in their
unbelief by superstition and envy. The elders

the son of Abdallah was ever dear to the aged chief; and he protected the same and person of his nephew against the assaults of the Koreihi-
tes, who had long been jealous of the pre-emi-
nence of the family of Hashem. Their malice
was coloured with the pretence of religion: in
the age of Job, the crime of impiety was pun-
ished by the Arabian magistrate (116); and
Mahomet was guilty of deserting and denying
the national deities. But so loose was the policy
of Mecca, that the leaders of the Koreish, in-
stead of accusing a criminal, were compelled to
employ the measures of persuasion or violence.
They repeatedly addressed Abu Taleb in the
style of reproach and menace. "Thy nephew

and moderation of Abu Taleb eluded the vio-
lence of religious faction; the most helpless or
timid of the disciples retired to Ethiopia, and
the prophet withdrew himself to various places
of strength in the town and country. As he
was still supported by his family, the rest of the
tribe of Koreish engaged themselves to renounce

all intercourse with the children of Hashem; neither to buy nor sell, neither to marry nor to give in marriage, but to pursue them with implacable enmity, till they should deliver the person of Mahomet to the justice of the gods. The decree was suspended in the Caaba before the eyes of the nation; the messengers of the Koreish pursued the Musulman exiles in the heart of Africa: they besieged the prophet and his most faithful followers, intercepted their water, and inflamed their mutual animosity by the retaliation of injuries and insults. A doubtful truce restored the appearances of concord; till the death of Abu Taleb abandoned Mahomet to the power of his enemies, at the moment when he was deprived of his domestic comforts by the loss of his faithful and generous Cadjjah. Abu Sophian, the chief of the branch of Om- miyah, succeeded to the principality of the republic of Mecca. A zealous votary of the idols, a mortal foe of the line of Hashem, he convened an assembly of the Koreishites and their allies, to decide the fate of the apostle. His imprisonment might provoke the despair of his enthusiast; and the exile of an eloquent and popular fanatic would diffuse the mischief through the provinces of Arabia. His death was resolved; and they agreed that a sword from each tribe should be buried in his heart, to divide the guilt of his blood and balance the vengeance of the Hashemites. An angel or a spy revealed their conspiracy; and flight was the only resource of Mahomet (117). At the dead of night, accompanied by his friend Abubeker, he silently escaped from his house: the assassins watched at the door; but they were deceived by the figure of Ali, who reposed on the bed,

and
and was covered with the green vestment of the apostle. The Koreish respected the piety of the heroic youth; but some verses of Ali, which are still extant, exhibit an interesting picture of his anxiety, his tenderness, and his religious confidence. ‘Three days Mahomet and his companion were concealed in the cave of Thor, at the distance of a league from Mecca; and in the close of each evening, they received from the son and daughter of Abubeker, a secret supply of intelligence and food. The diligence of the Koreish explored every haunt in the neighbourhood of the city, they arrived at the entrance of the cavern; but the providential deceit of a spider’s web and a pigeon’s nest, is supposed to convince them that the place was solitary and inviolate. “We are only two,” said the trembling Abubeker. “There is a third,” replied the prophet; “it is God himself.” No sooner was the pursuit abated, than the two fugitives issued from the rock, and mounted their camels: on the road to Medina, they were overtaken by the emissaries of the Koreish; they redeemed themselves with prayers and promises from their hands. In this eventful moment, the lance of an Arab might have changed the history of the world. The flight of the prophet from Mecca to Medina has fixed the memorable æra of the Hegira (118), which, at the end of twelve centuries, still discriminates the lunar years of the Mahometan nations (119).

(118) The Hegira was instituted by Omar, the second caliph, in imitation of the æra of the martyrs of the Chriists (d’Herbelot, p. 444); and properly commenced sixty-eight days before the flight of Mahomet, with the first of Moharran, or first day of that Arabian year, which coincides with Friday July 16th, A. D. 622 (Abulseds, Vit. Moham. c. 22, 23, p. 45—50; and Greaves’s edition of Ulug Beig’s Epochæ Arabum, &c. c. i. p. 8. 10, &c.).

(119) Mahomet’s life, from his mission to the Hegira, may be found in Abulseds (p. 14—45.) and Gignier (tom i. p. 134—251, 342—383.) The legend from p. 187—234. is vouched by Al Jannabi, and disclaimed by Abulseds.

The
The religion of the Koran might have perished in its cradle, had not Medina embraced with faith and reverence the holy outcasts of Mecca. Medina, or the city, known under the name of Yathreb, before it was sanctified by the throne of the prophet, was divided between the tribes of the Charegites and the Awsites, whose hereditary feud was rekindled by the slightest provocations: two colonies of Jews, who boasted a facerdotal race, were their humble allies, and without converting the Arabs, they introduced the taste of science and religion, which distinguished Medina as the city of the book. Some of her noblest citizens, in a pilgrimage to the Caaba, were converted by the preaching of Mahomet; on their return they diffused the belief of God and his prophet, and the new alliance was ratified by their deputies in two secret and nocturnal interviews on a hill in the suburbs of Mecca. In the first, ten Charegites and two Awsites united in faith and love, protested in the name of their wives, their children, and their absent brethren, that they would for ever profess the creed, and observe the precepts, of the Koran. The second was a political association, the first vital spark of the empire of the Saracens (120). Seventy-three men and two women of Medina held a solemn conference with Mahomet, his kinsmen, and his disciples; and pledged themselves to each other by a mutual oath of fidelity. They promised in the name of the city, that if he should be banished, they would receive him as a confederate, obey him as a leader, and defend him to the last extremity, like their wives and children. "But if you are recalled by your country," they asked

(120) The triple inauguration of Mahomet is described by Abulfeda (p. 30, 33, 40, 86) and Gagner (tom. i. p. 342, &c. 349, &c. tom. ii. p. 213, &c.).

with a flattering anxiety, " will you not abandon your new allies?" "All things," replied Mahomet with a smile, "are now common between us; your blood is as my blood, your ruin as my ruin. We are bound to each other by the ties of honour and interest. I am your friend, and the enemy of your foes." But if we are killed in your service, what," exclaimed the deputies of Medina, "will be our reward?" "Paradise," replied the prophet. "Stretch forth thy hand." He stretched it forth, and they reiterated the oath of allegiance and fidelity. Their treaty was ratified by the people, who unanimously embraced the profession of Islam; they rejoiced in the exile of the apostle, but they trembled for his safety, and impatiently expected his arrival. After a perilous and rapid journey along the sea-coast, he halted at Koba, two miles from the city, and made his public entry into Medina, sixteen days after his flight from Mecca. Five hundred of the citizens advanced to meet him; he was hailed with acclamations of loyalty and devotion; Mahomet was mounted on a she-camel, an umbrella shaded his head, and a turban was unfurled before him to supply the deficiency of a standard. His bravest disciples, who had been scattered by the storm, assembled round his person: and the equal, though various, merit of the Moslems was distinguished by the names of Mabragerians and Anfars, the fugitives of Mecca, and the auxiliaries of Medina. To eradicate the seeds of jealousy, Mahomet judiciously coupled his principal followers with the rights and obligations of brethren, and when Ali found himself without a peer, the prophet tenderly declared, that he would be the companion and brother of the noble youth. The expedient was crowned with success;
success; the holy fraternity was respected in peace and war, and the two parties vied with each other in a generous emulation of courage and fidelity. Once only the concord was slight-ly ruffled by an accidental quarrel; a patriot of Medina arraigned the infolence of the strangers, but the hint of their expulsion was heard with abhorrence, and his own son most eagerly of-fered to lay at the apostle’s feet the head of his father.

From his establishment at Medina, Mahomet assumed the exercise of the regal and sacerdotal office; and it was impious to appeal from a judge whose decrees were inspired by the divine wisdom. A small portion of ground, the patri-mony of two orphans, was acquired by gift or purchase (121); on that chosen spot, he built an house and mosch more venerable in their rude simplicity than the palaces and temples of the Assyrian caliphs. His seal of gold, or silver, was inscribed with the apostolic title; when he prayed and preached in the weekly assembly, he leaned against the trunk of a palm-tree; and it was long before he indulged him-self in the use of a chair or pulpit of rough tim-ber (122). After a reign of six years, fifteen hundred Mojlems, in arms and in the field, re-newed their oath of allegiance; and their chief repeated the assurance of protection till the death

(121) Prétreaux (Life of Mahomet, p. 44) relates the wickedness of the impostor, who defrauded two poor orphans, the sons of a carpenter: a reproach which he drew from the Disputatio contra Saracenos, composed in Arabic before the year 1304; but the honest Gagnier (ad Abulfeda, p. 33.) has shewn that they were deceived by the word Al Nagjar, which signifies in this place, not an obscure trade, but a noble tribe of Arabs. The defolate state of the ground is described by Abulfeda; and his worthy interpreter has proved, from Al Bochari, the offer of a price, from Al Jannabi, the fair purchase; and from Ahmed Ben Joseph, the payment of the money by the generous Ababeker. On these grounds the prophet must be honourably acquitted.

(122) Al Jannabi (and Gagnier, tom. ii. p. 245. 324.) describes the seal and pulpit, as two venerable relics of the apostle of God; and the portrait of his court is taken from Abulfeda (c. 44. p. 15.).

of the last member, or the final dissolution of the party. It was in the same camp that the deputy of Mecca was astonished by the attention of the faithful to the words and looks of the prophet, by the eagerness with which they collected his spittle, an hair that dropped on the ground, the refuse water of his lustrations, as if they participated in some degree of the prophetic virtue. "I have seen," said he, "the Chosroes of Persia and the Caesar of Rome, but never did I behold a king among his subjects like Mahomet among his companions." The devout fervour of enthusiasm acts with more energy and truth than the cold and formal fervility of courts.

In the state of nature every man has a right to defend, by force of arms, his person and his possessions; to repel, or even to prevent, the violence of his enemies, and to extend his hostilities to a reasonable measure of satisfaction and retaliation. In the free society of the Arabs, the duties of subject and citizen imposed a feebler restraint; and Mahomet, in the exercise of a peaceful and benevolent mission had been despised and banished by the injustice of his countrymen. The choice of an independent people had exalted the fugitive of Mecca to the rank of a sovereign; and he was invested with the just prerogative of forming alliances, and of waging offensive or defensive war. The imperfection of human rights was supplied and armed by the plenitude of divine power: the prophet of Medina assumed, in his new revelations, a fiercer and more sanguinary tone, which proves that his former moderation was the effect of weakness (123): the means of persuasion had been tried,

(123) The viiith and ixth chapters of the Koran are the loudest and most vehement; and Maracci (Prodromus, part iv. p. 69-64) has it weighed with more justice than discretion against the double-dealing of the impostor.
THE DECLINE AND FALL

the season of forbearance was elapsed, and he was now commanded to propagate his religion by the sword, to destroy the monuments of idolatry, and, without regarding the sanctity of days or months, to pursue the unbelieving nations of the earth. The same bloody precepts, so repeatedly inculcated in the Koran, are ascribed by the author to the Pentateuch and the Gospel. But the mild tenor of the evangelical style may explain an ambiguous text, that Jesus did not bring peace on the earth, but a sword: his patient and humble virtues should not be confounded with the intolerant zeal of princes and bishops, who have disgraced the name of his disciples. In the prosecution of religious war, Mahomet might appeal with more propriety to the example of Moses, of the judges and the kings of Israel. The military laws of the Hebrews are still more rigid than those of the Arabian legislator (124). The Lord of hosts marched in person before the Jews: if a city refused their summons, the males, without distinction, were put to the sword: the seven nations of Canaan were devoted to destruction; and neither repentance nor conversion could shield them from the inevitable doom, that no creature within their precincts should be left alive. The fair option of friendship, or submission, or battle, was proposed to the enemies of Mahomet. If they professed the creed of Islam, they were admitted to all the temporal and spiritual benefits of his primitive disciples, and marched under the same banner to extend the religion which they had embraced.

(124) The xth and xxth chapters of Deuteronomy, with the practical comments of Joshua, David, &c. are read with more awe than satisfaction by the pious Christians of the present age. But the bishops, as well as the rabbis of former times, have beat the drum ecclesiastic with pleasure and success (Sale's Preliminary Discourse, p. 142, 143).
OF THE ROMAN EMPIRE.

The clemency of the prophet was decided by his interest, yet he seldom trampled on a prostrate enemy; and he seems to promise, that, on the payment of a tribute, the least guilty of his unbelieving subjects might be indulged in their worship, or at least in their imperfect faith. In the first months of his reign, he practised the lessons of holy warfare, and displayed his white banner before the gates of Medina: the martial apostle fought in person at nine battles or sieges (125); and fifty enterprises of war were achieved in ten years by himself or his lieutenants. The Arab continued to unite the professions of a merchant and a robber; and his petty excursions for the defence or the attack of a caravan insensibly prepared his troops for the conquest of Arabia. The distribution of the spoil was regulated by a divine law (126): the whole was faithfully collected in one common mass: a fifth of the gold and silver, the prisoners and cattle, the moveables and immovable, was reserved by the prophet for pious and charitable uses; the remainder was shared in adequate portions by the soldiers who had obtained the victory or guarded the camp: the rewards of the slain devolved to their widows and orphans; and the encrease of cavalry was encouraged by the allotment of a double share to the horse and to the man. From all sides the roving Arabs were allured to the standard of religion and plunder: the apostle sanctified the licence of embracing the female captives as their wives or concu-

The private arsenal of the apostle consisted of nine swords, three lances, seven pikes or half-pikes, a quiver and three bows, seven cuirasses, three shields, and two helmets (Gagnier, tom. iii. p. 328—334.), with a large white standard, a black banner (p. 335.), twenty horses (p. 323.), &c. Two of his martial sayings are recorded by tradition (Gagnier, tom. ii. p. 88: 337.).

bines; and the enjoyment of wealth and beauty was a feeble type of the joys of paradise prepared for the valiant martyrs of the faith. "The sword," says Mahomet, is the key of heaven and of hell: a drop of blood shed in the cause of God, a night spent in arms, is of more avail than two months of fasting or prayer: whosoever falls in battle, his sins are forgiven: at the day of judgment his wounds shall be resplendent as vermillion and odoriferous as musk; and the loss of his limbs shall be supplied by the wings of angels and cherubim." The intrepid souls of the Arabs were fired with enthusiasm: the picture of the invisible world was strongly painted on their imagination; and the death which they had always despised became an object of hope and desire. The Koran inculcates, in the most absolute sense, the tenets of fate and predestination, which would extinguish both industry and virtue, if the actions of man were governed by his speculative belief. Yet their influence in every age has exalted the courage of the Saracens and Turks. The first companions of Mahomet advanced to battle with a fearless confidence: there is no danger where there is no chance: they were ordained to perish in their beds; or they were safe and invulnerable amidst the darts of the enemy (127).

Perhaps the Koreish would have been content with the flight of Mahomet, had they not been provoked and alarmed by the vengeance of an enemy, who could intercept their Syrian trade as it passed and repassed through the territory of

(127) The doctrine of absolute predestination, on which few religions can reproach each other, is sternly exposed in the Koran (c. 3. p. 52. 53. c. 4. p. 70. &c. with the notes of Sale, and c. 17. p. 413. with those of Masary). Reland, (de Relig. Mohamm. p. 61—64.) and Sale (Psalim. Discourse. p. 103.) represent the opinions of the doctors, and our modern travellers the confidence, the lauding confidence, of the Turks.

Medina. Abu Sophian himself, with only thirty or forty followers, conducted a wealthy caravan of a thousand camels: the fortune or dexterity of his march escaped the vigilance of Mahomet; but the chief of the Koreiñh was informed that the holy robbers were placed in ambush to await his return. He dispatched a messenger to his brethren of Mecca, and they were roused by the fear of losing their merchandise and their provisions, unless they hastened to his relief with the military force of the city. The sacred band of Mahomet was formed of three hundred and thirteen Moslems, of whom seventy-seven were fugitives, and the rest auxiliaries: they mounted by turns a train of seventy camels (the camels of Yathreb were formidable in war); but such was the poverty of his first disciples, that only two could appear on horseback in the field. In the fertile and famous vale of Beder, three stations from Medina, he was informed by his scouts of the caravan that approached on one side; of the Koreiñh, one hundred horse, eight hundred and fifty foot, who advanced on the other. After a short debate, he sacrificed the prospect of wealth to the pursuit of glory and revenge; and a flight entrenchment was formed, to cover his troops, and a stream of fresh water that glided through the valley. "O God," he exclaimed as the numbers of the Koreiñh descended from the hills, "O God, if these are destroyed, by whom wilt thou be worshipped.

(128) Al Jannabi (apud Gagnier, tom. ii. p. 9.) allows him seventy or eighty horses; and on two other occasions prior to the battle of Ohad, he enlists a body of thirty (p. 10), and of 550 (p. 66.), tumopers. Yet the Musulmans, in the field of Ohad, had no more than two horses, according to the better sense of Abulfeda (in Vit. Mahum. p. xxxi. p. 65.). In the sandy province, the camels were numerous; but the horse appears to have been less common than in the Happy or the Desert Arabia.

Vol. IX. S "on
THE DECLINE AND FALL

"On the earth? Courage, my children, close your ranks; discharge your arrows, and the day is your own." At these words he placed himself, with Abubeker, on a throne or pulpit (130), and instantly demanded the succour of Gabriel and three thousand angels. His eye was fixed on the field of battle: the Musulmans fainted and were pressed: in that decisive moment the prophet started from his throne, mounted his horse, and cast a handful of sand into the air; "Let their faces be covered with confusion."

Both armies heard the thunder of his voice: their fancy beheld the angelic warriors (131): the Koreish trembled and fled: seventy of the bravest were slain; and seventy captives adorned the first victory of the faithful. The dead bodies of the Koreish were deplored and insulted; two of the most obnoxious prisoners were punished with death; and the ransom of the others, four thousand drams of silver, compensated in some degree the escape of the caravan. But it was in vain that the camels of Abu Sophian explored a new road through the defiles and along the Euphrates: they were overtaken by the diligence of the Musulmans; and wealthy must have been

(130) The place to which Mahomet retired during the action is styled by Damer, Abulpharag, &c. 1. 29, p. 35: "Vex de Mahommed, sous le 36 arbre qu'on appelle de son nom une peste." The same Arabic word is rendered by Reiske (Ammies Moslemici, p. 23.) by θολοον, σκευης, &c. and the suffix is of the utmost moment for the honour both of the messenger and of the hero. I am sorry to observe the polite and solemn manner with which Reiske characterizes his fellow-believers: "sept cent varth de l'isle de Mathurinrigi: Arabici non suae celebrata et caritas judicio critico. Alteranam, tom. ii. p. 171.) Yet the same theologian confesses, that this angelic band was not visible to any mortal eye (Metacel. p. 101.) They are on the words (c. 8. 16), "not thou, but God, &c." the prize; if twenty thousand drams could be set apart for the fifth of the apostle. The resentment of the public and private loss stimulated Abu Sophian to collect a body of three thousand men, seven hundred of whom were armed with cuirasses, and two hundred were mounted on horseback; three thousand camels attended his march; and his wife Henda, with fifteen matrons of Mecca, incessantly sounding their timbrels to animate the troops, and to magnify the greatness of Hobal, the most popular deity of the Caaba. The standard of God and Mahomet was upheld by nine hundred and fifty believers: the disproportion of numbers was not more alarming than in the field of Badr, and their presumption of victory prevailed against the divine and human sense of the apostle. The second battle was fought on mount Ohud, six miles to the north of Medina (132): the Koreish advanced in the form of a crescent; and the sight wing of cavalry was led by Caled, the fiercest and most successful of the Arabian warriors. The troops of Mahomet were skilfully posted on the declivity of the hill; and their rear was guarded by a detachment of fifty archers. The weight of their charge impelled and broke the centre of the idolaters; but in the pursuit they lost the advantage of their ground: the archers defended their station; the Musulmans were tempted by the spoil; disobeyed their general, and disordered their ranks. The intrepid Caled, wheeling his cavalry on their flank and rear, exclaimed, with a loud voice, that Mahomet was slain. He was indeed wounded in the face with a javelin: two of his teeth were shattered with a stone; yet, in the midst of tumult and din, he reproached the infidels.

(134) Geograph. Nubienus, p. 43.
with the murder of a prophet; and blessed the friendly hand that stayed his blood, and conveyed him to a place of safety. Seventy martyrs died for the sins of the people: they fell, said the apostle, in pairs, each brother embracing his lifeless companion (133): their bodies were mangled by the inhuman females of Mecca; and the wife of Abu Sophian tasted the entrails of Hamza, the uncle of Mahomet. They might applaud their superflition and satiate their fury; but the Mussulmans soon rallied in the field, and the Koreish wanted strength or courage to undertake the siege of Medina. It was attacked the ensuing year by an army of ten thousand enemies; and this third expedition is variously named from the nations, which marched under the banner of Abu Sophian, from the ditch which was drawn before the city, and a camp of three thousand Mussulmans. The prudence of Mahomet declined a general engagement: the valour of Ali was signalized in single combat; and the war was protracted twenty days, till the final separation of the confederates. A tempest of wind, rain, and hail, overturned their tents: their private quarrels were fomented by an insidious adversary; and the Koreish, deflected by their allies, no longer hoped to subvert the throne, or to check the conquests, of their invincible exile (134).

The choice of Jerusalem for the first kebla of prayer, discovers the early propensity of Mahomet in favour of the Jews; and happy would it have been for their temporal interest, had they

recognized,
recognised, in the Arabian prophet, the hope of Israel and the promised Messiah. Their obstinacy converted his friendship into implacable hatred, with which he pursued that unfortunate people to the last moment of his life: and in the double character of an apostle and a conqueror, his persecution was extended to both worlds (135). The Kainoka dwelt at Medina under the protection of the city; he seized the occasion of an accidental tumult, and summoned them to embrace his religion, or contend with him in battle. "Alas," replied the trembling Jews, "we are ignorant of the use of arms, but we persevere in the faith and worship of our fathers; why wilt thou reduce us to the necessity of just defence?" The unequal conflict was terminated in fifteen days; and it was with extreme reluctance that Mahomet yielded to the importunity of his allies, and consented to spare the lives of the captives. But their riches were confiscated, their arms became more effectual in the hands of the Musulmans; and a wretched colony of seven hundred exiles was driven with their wives and children to implore a refuge on the confines of Syria. The Nadhirites were more guilty, since they conspired in a friendly interview to assassinate the prophet. He besieged their castle three miles from Medina, but their resolute defence obtained an honourable capitulation; and the garrison, sounding their trumpets and beating their drums, was permitted to depart with the honours of war. The Jews had excited and joined the war of the Koreish: no sooner had the nations retired from the ditch, than Mahomet;
without laying aside his armour, marched on the same day to extirpate the hostile race of the children of Koraidha. After a resistance of twenty-five days, they surrendered at discretion. They trusted to the intercession of their old allies of Medina; they could not be ignorant that fanaticism obliterates the feelings of humanity. A venerable elder, to whose judgment they appealed, pronounced the sentence of their death; seven hundred Jews were dragged in chains to the market-place of the city: they descended alive into the grave prepared for their execution and burial; and the apostle beheld with an inflexible eye the slaughter of his helpless enemies. Their sheep and camels were inherited by the Muslims: three hundred cuirasses, five hundred pikes, a thousand lances, composed the most useful portion of the spoil. Six days journey to the north-east of Medina, the ancient and wealthy town of Chaibar was the seat of the Jewish power in Arabia; the territory, a fertile spot in the desert, was covered with plantations and cattle, and protected by eight castles, some of which were esteemed of impregnable strength. The forces of Mahomet consisted of two hundred horse and fourteen hundred foot: in the succession of eight regular and painful sieges they were exposed to danger, and fatigue, and hunger; and the most undaunted chiefs despairing of the event. The apostle revived their faith and courage by the example of Ali, on whom he bestowed the surname of the Lion of God: perhaps we may believe that an Hebrew champion of gigantic stature was chosen to the chief by his irresistible Cyntalgar, but we cannot praise the modesty of romance, which represents him as tearing from its hinges the gate of a fortress, and wielding the ponderous buckler in his left hand.
hand (136). After the reduction of the castles, the town of Chaibar submitted to the yoke. The chief of the tribe was tortured, in the presence of Mahomet, to force a confession of his hidden treasure: the industry of the shepherds and husbandmen was rewarded with a precarious toleration: they were permitted, so long as it should please the conqueror, to improve their patrimony, in equal shares, for his emolument and their own. Under the reign of Omar, the Jews of Chaibar were transplanted to Syria; and the caliph alluded the injunction of his dying master, that one and the true religion should be professed in his native land of Arabia (137).

Five times each day the eyes of Mahomet were turned towards Mecca (138), and he was urged by the most sacred and powerful motives to revisit, as a conqueror, the city and the temple from whence he had been driven as an exile. The Caaba was present to his waking and sleeping fancy: an idle dream was translated into vision and prophecy; he unfurled the holy banner; and a rash promise of successes too hastily dropped from the lips of the apostle. His march from Medina to Mecca, displayed the peaceful and solemn pomp of a pilgrimage: seventy camels chofen and bedecked for sacrif...

fire, preceded the van; the sacred territory was respected, and the captives were dismissed without ransom to proclaim his clemency and devotion. But no sooner did Mahomet descend into the plain, within a day's journey of the city, than he exclaimed, "they have cloathed themelves with the skins of tigers;" the numbers and resolution of the Koreish opposed his progress; and the roving Arabs of the desert might desert or betray a leader whom they had followed for the hopes of spoil. The intrepid fanatic sunk into a cool and cautious politician: he waved in the treaty his title of apostle of God, concluded with the Koreish and their allies a truce of ten years, engaged to restore the fugitives of Mecca who should embrace his religion, and stipulated only, for the ensuing year, the humble privilege of entering the city as a friend, and of remaining three days to accomplish the rites of the pilgrimage. A cloud of shame and sorrow hung on the retreat of the Musulmans, and their disappointment might justly accuse the failure of a prophet who had so often appealed to the evidence of success. The faith and hope of the pilgrims were rekindled by the prospect of Mecca: their swords were sheathed; seven times in the footsteps of the apostle they encompassed the Caaba: the Koreish had retired to the hills, and Mahomet, after the customary sacrifice, evacuated the city on the fourth day. The people was edified by his devotion; the hostile chiefs were awed or divided, or seduced; and both Caled and Amrou, the future conquerors of Syria and Egypt, most seasonably deserted the sinking cause of idolatry. The power of Mahomet was encreased by the submission of the Arabian tribes; ten thousand soldiers were assembled for the conquest of Mecca, and the idolaters, the weaker party, were easily
easily convicted of violating the truce. Enthusiasm and discipline impelled the march and preserved the secret, till the blaze of ten thousand fires proclaimed to the astonished Koreish, the design, the approach, and the irresistible force of the enemy. The haughty Abu Sophian presented the keys of the city, admired the variety of arms and ensigns that passed before him in review; observed that the son of Abdallah had acquired a mighty kingdom, and confessed, under the scymetar of Omar, that he was the apostle of the true God. The return of Marius and Sulla was stained with the blood of the Romans: the revenge of Mahomet was stimulated by religious zeal, and his injured followers were eager to execute or to prevent the order of a massacre. Instead of indulging their passions and his own (139), the victorious exile forgave the guilt, and united the factions, of Mecca. His troops, in three divisions, marched into the city: eight and twenty of the inhabitants were slain by the sword of Caled; eleven men and six women were proscribed by the sentence of Mahomet; but he blamed the cruelty of his lieutenant; and several of the most obnoxious victims were indebted for their lives to his clemency or contempt. The chiefs of the Koreish were prostrate at his feet. "What mercy can "you expect from the man whom you have "wronged?" "We confide in the generosity "of our kinsman." "And you shall not con- "fide in vain: begone! you are safe, you are

(139) After the conquest of Mecca, the Mahomet of Voltaire imagines and perpetrates the most horrid crimes. The poet confesses, that he is not supported by the truth of history, and can only allege, que c'est lui qui fait la guerre à sa patrie au nom de Dieu, est capable de tout (Oeuvres de Voltaire, tom. xvi. p. 282.). The maxim is neither charitable nor philosophic; and some reverence is surely due to the fame of heroes and the religion of nations. I am informed that a Turkish ambassador at Paris was much scandalized at the representation of this tragedy.

THE DECLINE AND FALL

"free." The people of Mecca desired their pardon by the profession of Islam; and after an exile of seven years, the fugitive missionary was enthroned as the prince and prophet of his native country (140). But the three hundred and sixty idols of the Caaba were ignominiously broken: the house of God was purified and adorned; as an example to future times, the apostle again fulfilled the duties of a pilgrim; and a perpetual law was enacted that no unbeliever should dare to set his foot on the territory of the holy city (141).

The conquest of Mecca determined the faith and obedience of the Arabian tribes (143); who, according to the vicissitudes of fortune, had obeyed or disregarded the eloquence of the arms of the prophet. Indifference for rites and opinions still marks the character of the Bedouins; and they might accept, as loosely as they held, the doctrine of the Koran. Yet an obstinate remnant still adhered to the religion and liberty of their ancestors, and the war of Hrnain derived a proper appellation from the idow, whom Mahomet had vowed to destroy, and whom the confederates of Tayef had sworn to defend (143).

(140) The Mahometan doctors still dispute, whether Mecca was reduced by force or consent (Abulfeda, p. 107, et Gagnier ad locum); and this verbal controversy is of as much moment, as our own about William the Conqueror.

(141) In excluding the Christians from the peninsula of Arabia, the province of Hejaz, or the navigation of the Red Sea, Chardin (Voyages en Perse, tom. iv. p. 166.) and Reland (Differt. Millef. tom. iii. p. 51) are more rigid than the Muhyians themselves. The Christians are received without scruple into the parts of Mocha, and even of Jedda; and it is only the city and precincts of Mecca that are inaccessible to the profane (Niebuhr, Description de l'Arabie, p. 308, 309. Voyage en Arabie, tom. i. p. 305. 445, &c.).

(143) The siege of Tayef, division of the spoil, &c. are related by Abulfeda (p. 117-123); and Gagnier, (tom. ii. p. 88-111). It is Al Jannabi who mentions the engines and engines of the tribe of Dawas. The fertile spot of Tayef was supposed to be a piece of the land of Syria detached and dropped in the general deluge.
Four thousand pagans advanced with secrecy and speed to surprise the conqueror; they pitied and despised the supine negligence of the Korish, but they depended on the wishes, and perhaps the aid, of a people who had so lately renounced their gods, and bowed beneath the yoke of their enemy. The banners of Medina and Mecca were displayed by the prophet; a crowd of Bedouins increased the strength or numbers of the army, and twelve thousand Muslims entertained a rash and sinful presumption of their invincible strength. They descended without precaution into the valley of Honain: the heights had been occupied by the archers and slingers of the confederates; their numbers were oppressed, their discipline was confounded, their courage was appalled, and the Korish smiled at their impending destruction. The prophet, on his white mule, was encompassed by the enemies; he attempted to rush against their spears in search of a glorious death: ten of his faithful companions interposed their weapons and their breasts; three of these fell dead at his feet: "O my brethren," he repeatedly cried with sorrow and indignation, "I am the son of Abdallah, I am the apostle of truth! O man stand fast in the faith! O God send down thy succour!" His uncle Abbas, who, like the heroes of Homer, excelled in the loudness of his voice, made the valley resound with the recital of the gifts and promises of God: the flying Moslems returned from all sides to the holy standard; and Mahomet observed with pleasure, that the furnace was again rekindled: his conduct and example restored the battle, and he animated his victorious troops to inflict a merciless revenge on the authors of their shame. From the field of Honain, he marched without delay to the siege of Tayef, sixty
sixty miles to the south-east of Mecca, a fortress of strength, whose fertile lands produce the fruits of Syria in the midst of the Arabian desert. A friendly tribe, instructed (I know not how) in the art of sieges, supplied him with a train of battering rams and military engines, with a body of five hundred artificers. But it was in vain that he offered freedom to the slaves of Tayef; that he violated his own laws by the extirpation of the fruit-trees; that the ground was opened by the miners; that the breach was assaulted by the troops. After a siege of twenty days, the prophet founded a retreat, but he retreated with a song of devout triumph, and affected to pray for the repentance and safety of the unbelieving city. The spoil of this fortunate expedition amounted to six thousand captives, twenty-four thousand camels, forty thousand sheep, and four thousand ounces of silver: a tribe who had fought at Honain, redeemed their prisoners by the sacrifice of their idols; but Mahomet compensated the loss, by resigning to the soldiers his fifth of the plunder, and wished for their sake, that he possessed as many head of cattle as there were trees in the province of Tehama. Instead of chastising the disaffection of the Koreish, he endeavoured to cut out their tongues (his own expression), and to secure their attachment by a superior measure of liberality; Abu Sophian alone was presented with three hundred camels and twenty ounces of silver; and Mecca was sincerely converted to the profitable religion of the Koran. The fugitives and auxiliaries complained, that they who had borne the burden were neglected in the season of victory. "Alas," replied their artful leader, "suffer me to con-

"fortunes. You are the companions of my " exile, of my kingdom, of my paradise." He was followed by the deputies of Tayef, who dreaded the repetition of a siege. "Grant us, "O apostle of God! a truce of three years, "with the toleration of our ancient worship." "Not a month, not an hour." "Excuse us "at least from the obligation of prayer." With-" out prayer religion is of no avail." They submitted in silence; their temples were de-"molished, and the same sentence of destruction was executed on all the idols of Arabia. His "lieutenants, on the shores of the Red Sea, the "Ocean, and the Gulf of Persia, were saluted by the acclamations of a faithful people; and the ambassadors who knelt before the throne of Medina, were as numerous (says the Arabian proverb) as the dates that fall from the maturity of a palm-tree. The nation submitted to the God and the sceptre of Mahomet: the oppro-"brious name of tribute was abolished: the spontaneous or reluctant oblations of alms and "tithes were applied to the service of religion: and one hundred and fourteen thousand Mos-"lems accompanied the last pilgrimage of the apostle (144).

When Heraclius returned in triumph from the Persian war, he entertained, at Emesa, one of the ambassadors of Mahomet, who invited the princes and nations of the earth to the pro-"feSSION of Islam. On this foundation the zeal of the Arabians has supposed the secret conver-"sion of the Christian emperor: the vanity of the Greeks has reigned a personal visit of the prince of Medina, who accepted from the royal

bounty a rich domain, and a secure retreat, in the province of Syria (145). But the friendship of Heraclius and Mahomet was of short continuance: the new religion had inflamed rather than assuaged the rapacious spirit of the Saracens; and the murder of an envoy afforded a decent pretence for invading, with three thousand soldiers, the territory of Palestine, that extends to the eastward of the Jordan. The holy banner was entrusted to Zaid; and such was the discipline or enthusiasm of the rising sect, that the noblest chiefs served, without reluctance, under the slave of the prophet. On the event of his defeat, Jasfar and Abdallah were successively substituted to the command; and if the three should perish in the war, the troops were authorised to elect their general. The three leaders were slain in the battle of Muta (146), the first military action which tried the valour of the Moors against a foreign enemy. Zaid fell, like a soldier, in the foremost ranks; the death of Jasfar, was heroic and memorable; he left his right-hand; he raised the standard to his left; the left was severed from his body; he embraced the standard with his bleeding limbs, till he was transfixed to the ground with fifty honourable wounds. ‘Advance, cried Abdallah, who stepped into the vacant place, ‘and with confidence; either victory or victory is our own.’ The lance of a Roman decided the alternative; but the falling standard was rescued by Chid, the prophet of Mecca: nine swords were broken in his hand, and his valour withstood and repulsed the superior num-

bers of the Christians. In the nocturnal council of the camp he was chosen to command: his skilful evolutions of the ensuing day secured either the victory or the retreat of the Saracens; and Caled is renowned among his brethren and his enemies by the glorious appellation of the Sword of God. In the pulpit, Mahomet described, with prophetic rapture, the crowns of the blessed martyrs; but in private he betrayed the feelings of human nature: he was surprised as he wept over the daughter of Zeid: "What do I see?" said the astonished votary. "You see," replied the apostle, "a friend, who is deploring the loss of his most faithful friend."

After the conquest of Mecca the sovereign of Arabia affected to prevent the hostile preparations of Heraclius; and solemnly proclaimed war against the Romans, without attempting to disguise the hardships and dangers of the enterprise (147). The Medifics were discouraged: they alleged the want of money, or horses, or provisions: the season of harvest, and the intolerable heat of the summer: "Hell is much hotter," said the indignant prophet. He disdained to compel their service; but on his return he admonished the most guilty, by an excommunication of fifty days. Their defection enhanced the merit of Abubeker, Othman, and the faithful companions who devoted their lives and fortunes; and Mahomet displayed his banner at the head of ten thousand horse and twenty thousand foot. Painful indeed was the distress of the march: latitude and thirst were aggravated by the scorching and pestilential winds of

(147). The expedition of Tabuie is recorded by our ordinary historians, Abul-ala (Vie Mahomet, p. 129–137) and Gagnier (Vie de Mahomet, tom. III. p. 137–152); but we have the advantage of appealing to the original evidence of the Koran (c. 9. p. 155, 165); with Saîde's learned and rational notes.
the desert; ten men rode by turns on the same camel; and they were reduced to the shameful necessity of drinking the water from the belly of that useful animal. In the mid-way, ten days journey from Medina and Damascus, they reposed near the grove and fountain of Tabuc. Beyond that place, Mahomet declined the prosecution of the war; he declared himself satisfied with the peaceful intentions, he was more probably daunted by the martial array, of the emperor of the East. But the active and intrepid Caled spread around the terror of his name; and the prophet received the submission of the tribes and cities, from the Euphrates to Ailah, at the head of the Red Sea. To his Christian subjects, Mahomet readily granted the security of their persons, the freedom of their trade, the property of their goods, and the toleration of their worship. (148). The weakness of their Arabian brethren had restrained them from opposing his ambition; the disciples of Jesus were endeared to the enemy of the Jews; and it was the interest of a conqueror to propose a fair capitulation to the most powerful religion of the earth.

Till the age of sixty-three years, the strength of Mahomet was equal to the temporal and spiritual fatigues of his mission. His epileptic fits, an absurd calumny of the Greeks, would be an

(148) The Diploma securitatis Ailenhus, is attested by Ahmed Ben Joseph, and the author Libri Splendorum (Gagnier, Not. ad Abulfedam, p. 135); but Abulfeda himself, as well as Elmacin (Hist. Saracen. p. 18), though he owns Mahomet's regard for the Christians (p. 13.), only mentions peace and tribute. In the year 1630, Sionis published at Paris the text and version of Mahomet's patent in favour of the Christians; which was admitted and reprobated by the opposite taste of Salmasius and Grotius (Bayle, Mahomet. Rem. AA.). Hottinger doubts of its authenticity (Hist. Orient. p. 237.); Renaudot urges the content of the Mahometans (Hist. Patriarch. Alex. p. 169.); but Mofheim (Hist. Ecclef. p. 244.) shews the futility of their opinion, and inclines to believe it spurious. Yet Abulpharagius quotes the impostor's treaty with the Nestorian patriarch (Affemen. Bibliot. object of pity rather than abhorrence (149); but he seriously believed that he was poisoned at Chaibar by the revenge of a Jewish female (150). During four years, the health of the prophet declined; his infirmities encreased; but his mortal diseafe was a fever of fourteen days, which deprived him by intervals of the use of reason. As soon as he was conscious of his danger, he edified his brethren by the humility of his virtue or penitence. "If there be any man," said the apostle from the pulpit, "whom I have unjustly scourged, I submit my own back to the lash of retaliation. Have I aspersed the reputation of a Muslim? let him proclaim my faults in the face of the congregation. Has any one been despoiled of his goods? the little that I possess shall compensate the principal and the interest of the debt." "Yes," replied a voice from the crowd, "I am entitled to three drams of silver." Mahomet heard the complaint, satisfied the demand, and thanked his creditor for accusing him in this world rather than at the day of judgment. He beheld with temperate firmness the approach of death; enfranchised his slaves (seventeen men, as they are named, and eleven women); minutely directed the order of his funeral, and moderated the lamentations of his weeping friends, on whom he

(149) The epilepsy, or falling-sicknes, of Mahomet, is affected by the phænes, Zonars, and the rest of the Greeks; and is greedily swallowed by the gross bigotry of Hottinger (Hist. Orient. p. 10, 11.), Prideaux (Life of Mahomet, p. 12.), and Martini (tom. ii.), Alcoran (p. 762, 763.). The titles (the wrapped-up, the covered) of two chapters of the Koran (73, 74.), can hardly be strained to such an interpretation; the silence, the ignorance of the Mahometan commentators, is more conclusive than the most peremptory denial; and the charitable side is espoused by Ockley (Hist. of the Saracens, tom. i. p. 301.), Gagnier (ad Abulfeda, p. 9. Vie de Mahomet. tom. i. p. 118.), and Sale (Koran. p. 469—474.).

(150) This poison (more ignominious since it was offered as a test of his prophetic knowledge) is frankly confessed by his zealous votaries, Abulfeda (p. 92.), and Al Jannabi (spud Gagnier, tom. ii. p. 286—288.).

bestowed the benediction of peace. Till the third day before his death, he regularly performed the function of public prayer; the choice of Abubekr to supply his place, appeared to mark that ancient and faithful friend as his successor in the facerdotal and regal office; but he prudently declined the risk and envy of a more explicit nomination. At a moment when his faculties were visibly impaired, he called for pen and ink, to write, or, more properly, to dictate, a divine book, the sum and accomplishment of all his revelations: a dispute arose in the chamber, whether he should be allowed to supersede the authority of the Koran; and the prophet was forced to reprove the indecent vehemence of his disciples. If the slightest credit may be afforded to the traditions of his wives and companions, he maintained, in the bosom of his family, and in the last moments of his life, the dignity of an apostle and the faith of an enthusiast; described the visits of Gabriel, bade an everlasting farewell to the earth, and expressed his lively confidence, not only of the mercy, but of the favour, of the Supreme Being. In a familiar discourse he had mentioned his special prerogative, that the angel of death was not allowed to take his soul till he had respectfully asked the permission of the prophet. The request was granted; and Mahomet immediately fell into the agony of his dissolution; his head was reclined on the lap of Ayesha, the best beloved of all his wives; he fainted with the violence of pain; recovering his spirits, he raised his eyes towards the roof of the house, and, with a steady look, though a faltering voice, uttered the last broken, though articulate words: "O God! . . . . . pardon my sins . . . . . Yes, . . . . . "I come, . . . . . among my fellow-citizens on "high:" and thus peaceably expired on a carpet spread

Spread upon the floor. An expedition for the conquest of Syria was stopped by this mournful event: the army halted at the gates of Medina; the chiefs were assembled round their dying master. The city, more especially the house, of the prophet was a scene of clamorous sorrow or silent despair; fanaticism alone could suggest a ray of hope and consolation. "How can he "be dead, our witness, our intercessor, our "mediator, with God? By God he is not dead; "like Moses and Jesus he is wrapped in a holy "trance, and speedily will he return to his "faithful people." The evidence of sense was disregarded; and Omar, unsheathing his scythe, threatened to strike off the heads of the insidels, who should dare to affirm that the prophet was no more. The tumult was appeased by the weight and moderation of Abubeker. "Is it Mahomet," said he to Omar and the multitude, "or the God of Mahomet, whom "you worship. The God of Mahomet liveth "for ever, but the apostle was a mortal like "ourselves, and according to his own predic-
"tion, he has experienced the common fate of "mortality." He was piously interred by the hands of his nearest kinsman, on the same spot on which he expired (151); Medina has been sanctified by the death and burial of Mahomet; and the innumerable pilgrims of Mecca often turn aside from the way, to bow, in voluntary

devotion (152), before the simple tomb of the prophet (153).

At the conclusion of the life of Mahomet, it may perhaps be expected, that I should balance his faults and virtues, that I should decide whether the title of enthusiast or impostor more properly belongs to that extraordinary man. Had I been intimately conversant with the son of Abdallah, the task would still be difficult, and the success uncertain: at the distance of twelve centuries, I darkly contemplate his shade through a cloud of religious incense; and could I truly delineate the portrait of an hour, the fleeting resemblance would not equally apply to the solitary of mount Hera, to the preacher of Mecca, and to the conqueror of Arabia. The author of a mighty revolution appears to have been endowed with a pious and contemplative disposition: so soon as marriage had raised him above the pressure of want, he avoided the paths of ambition and avarice; and till the age of forty, he lived with innocence, and would have died without a name. The unity of God is an idea most congenial to nature and reason; and a flight conversation with the Jews and Christians would teach him to despise and detest the idolatry of Mecca. It was the duty of a man and a citizen to impart the doctrine of salvation, to rescue his country from the dominion of sin and error. The energy of a mind incessantly bent

(152) Al Jassabi enumerates (Vie de Mahomet, tom. iii. p. 373—391) the multifarious duties of a pilgrim who visits the tombs of the prophet and his companions; and the learned casuist decides, that this act of devotion is nearest in obligation and merit to a divine precept. The doctors are divided which, of Mecca or Medina, be the most excellent (p. 391—394).

(145) The last sickness, death, and burial of Mahomet, are described by Abuflada and Gagnier (Vie de Moham. p. 139—142. Vie de Mahomet, tom. iii. p. 326—371). The most private and interesting circumstances were originally received from Ayetha, Ali, the sons of Abbas, &c.; and as they dwelt at Medina, and survived the prophet many years, they might repeat the pious tale to a second or third generation of pilgrims.

on the same object, would convert a general obligation into a particular call; the warm suggestions of the understanding or the fancy; would be felt as the inspirations of heaven; the labour of thought would expire in rapture and vision; and the inward sensation, the invisible monitor, would be described with the form and attributes of an angel of God (154). From enthusiasm to imposture, the step is perilous and slippery: the daemon of Socrates (155) affords a memorable instance, how a wise man may deceive himself, how a good man may deceive others, how the conscience may slumber in a mixed and middle state between self-illusion and voluntary fraud. Charity may believe that the original motives of Mahomet were those of pure and genuine benevolence; but a human missionary is incapable of cherishing the obstinate unbelievers who reject his claims, despite his arguments, and pervert his life; he might forgive his personal adversaries, he may lawfully hate the enemies of God; the stern passions of pride and revenge were kindled in the bosom of Mahomet, and he sighed, like the prophet of

(154) The Christians, rashly enough, have assigned to Mahomet a same pigeon, that seemed to descend from heaven and whisper in his ear. As this pretended miracle is urged by Grotius (De Veritate Religionis Christiana), his Arabic translator, the learned Pocock, enquired of him the names of his authors; and Grotius confessed, that it is unknown to the Mahometans themselves. Left it should provoke their indignation and laughter, the pious lie is suppressed in the Arabic version; but it has maintained an edifying place in the numerous editions of the Latin text (Pocock, Specimen Hist. Arabum, p. 186, 187. Ralain, De Religion Moham. I. ii. c. 39. p. 259—262.).

Niniveh,
THE DECLINE AND FALL

Niniveh, for the destruction of the rebel whom he had condemned. The injustice of Mecca, and the choice of Medina, transformed the citizen into a prince, the humble preacher into the leader of armies; but his sword was consecrated by the example of the saints; and the same God who afflicts a sinful world with pestilence and earthquakes, might inspire for their conversion or chastisement the valour of his servants.

In the exercise of political government, he was compelled to abate of the stern rigour of fanaticism, to comply in some measure with the prejudices and passions of his followers, and to employ even the vices of mankind as the instruments of their salvation. The use of fraud and perfidy, of cruelty and injustice, were often subservient to the propagation of the faith: and Mahomet commanded or approved the assassination of the Jews and idolaters who had escaped from the field of battle. By the repetition of such acts, the character of Mahomet must have been gradually stained; and the influence of such pernicious habits would be poorly compensated by the practice of the personal and social virtues which are necessary to maintain the reputation of a prophet among his sectaries and friends. Of his last years, ambition was the ruling passion; and a politician will suspect, that he secretly smiled (the victorious impostor!) at the enthusiasm of his youth and the credulity of his proselytes (156). A philosopher will observe, that their credulity and his success, would tend more strongly to fortify the assurance of his divine mission, that his interest and religion were inseparably connected, and that his conscience would be soothed by the persuasion, that he

(156) In some passage of his voluminous writings, Voltaire compares the prophet, in his old age, to a fakir: "qui détache la chaîne de son cou pour en donner sur les oreilles à ses confères."
alone was abdicated by the Deity from the obligation of positive and moral laws. If he retained any vestige of his native innocence, the sins of Mahomet may be allowed as an evidence of his sincerity. In the support of truth, the arts of fraud and fiction may be deemed less criminal; and he would have started at the foulness of the means, had he not been satisfied of the importance and justice of the end. Even in a conqueror or a priest, I can surmise a word or action of unaffected humanity; and the decree of Mahomet, that, in the fate of captives, the mothers should never he separated from their children, may suspend or moderate the cenfare of the historian (157).

The good sense of Mahomet (158) despised the pomp of royalty: the apostle of God submitted to the menial offices of the family: he kindled the fire, swept the floor, milked the ewes, and mended with his own hands his shoes and his woollen garment. Disdaining the penance and merit of an hermit, he observed without effort or vanity, the abstemious diet of an Arab and a soldier. On solemn occasions he feasted his companions with rustic and hospitable plenty; but in his domestic life, many weeks would elapse without a fire being kindled on the hearth of the prophet. The intemperance of wine was confirmed by his example; his hunger was appeased with a sparing allowance of barley-

(158) For the domestic life of Mahomet, consult Gagnier, and the corresponding chapters of Abulfeda; for his diet (tom. iii. p. 785—786.), his children (p. 189. 289.), his wives (p. 290—303.) his marriage with Zeideb (tom. iii. p. 284—86.), his amours with Mary (p. 303—309.), the false accusation of Ayessa (p. 186—189.). The most original evidence of the three last translations, is contained in the xxivth, xxvith, and xxvith chapters of the Koran, with Sale’s Commentary. Prideaux (Life of Mahomet, p. 80—90.) and Maracci (Prodrom. Algeran, part iv. p. 49—59.) have maliciously exaggerated the frailties of Mahomet.
bread; he delighted in the taste of milk and honey: but his ordinary food consisted of dates and water. Perfumes and women were the two sensual enjoyments which his nature required and his religion did not forbid; and Mahomet affirmed, that the fervour of his devotion was encreased by these innocent pleasures. The heat of the climate inflames the blood of the Arabs; and their licentious complexion has been noticed by the writers of antiquity (159). Their incontinence was regulated by the civil and religious laws of the Koran; their incestuous alliances were blamed, the boundless licence of polygamy was reduced to four legitimate wives or concubines; their rights; both of bed and of dowry, were equitably determined; the freedom of divorce was discouraged, adultery was condemned as a capital offence, and fornication, in either sex, was punished with a hundred stripes (160). Such were the calm and rational precepts of the legislator: but in his private conduct, Mahomet indulged the appetites of a man, and abused the claims of a prophet. A special revelation dispensed him from the laws which he had imposed on his nation; the female sex, without reserve, was abandoned to his desires; and this singular prerogative excited the envy, rather than the scandal, the veneration, rather than the envy, of the devout Mufulmans. If we remember the seven hundred wives and three hundred concubines of the wife Solomon, we shall applaud the modesty of the Arabian who espoused no more than seventeen or fifteen wives; eleven are numerated who occupied at Medina their separate apart-

ments round the house of the apostle, and enjoyed in their turns the favour of his conjugal society. What is singular enough, they were all widows, excepting only Ayeshah, the daughter of Abubeker. She was doubtless a virgin, since Mahomet consummated his nuptials (such is the premature ripeness of the climate) when she was only nine years of age. The youth, the beauty, the spirit of Ayeshah, gave her a superior ascendant: she was beloved and trusted by the prophet; and, after his death, the daughter of Abubeker was long revered as the mother of the faithful. Her behaviour had been ambiguous and indiscreeet; in a nocturnal march, she was accidentally left behind; and in the morning Ayeshah returned to the camp with a man. The temper of Mahomet was inclined to jealousy; but a divine revelation assured him of her innocence: he chastised her accusers, and published a law of domestic peace, that no woman should be condemned unless four male witnesses had seen her in the act of adultery (161). In his adventures with Zeineb, the wife of Zeid, and with Mary, an Egyptian captive, the amorous prophet forgot the interest of his reputation. At the house of Zeid, his freedman and adopted son, he beheld, in a loose undress, the beauty of Zeineb, and burst forth into an ejaculation of devotion and desire. The servile, or grateful, freedman understood the hint, and yielded without hesitation to the love of his benefactor. But as the filial relation had excited some doubt and scandal, the angel Gabriel descended from heaven to ratify the deed, to annul the adoption, and gently to reprove the apostle for disturbing the indul-

gence of his God. One of his wives, Hafta, the daughter of Omar, surprised him on her own bed, in the embraces of his Egyptian captive: he promised secrecy and forgiveness: he swore that he would renounce the possession of Mary. Both parties forgot their engagements; and Gabriel again descended with a chapter of the Koran, to absolve him from his oath, and to exhort him freely to enjoy his captives and consorts, without listening to the clamours of his wives. In a solitary retreat of thirty days, he laboured, alone with Mary, to fulfill the commands of the angel. When his love and revenge were satiated, he summoned to his presence his eleven wives, reproached their disobedience and indiscretion, and threatened them with a sentence of divorce, both in this world and in the next: a dreadful sentence, since those who had ascended the bed of the prophet were for ever excluded from the hope of a second marriage. Perhaps the incontinence of Mahomet may be palliated by the tradition of his natural or preternatural gifts (162): he united the manly virtue of thirty of the children of Adam; and the apostle might rival the thirteenth labour (163) of the Grecian Hercules (164). ferious
Serious and decent excuse may be drawn from his fidelity to Cadijah. During the twenty-four years of their marriage, her youthful husband abstained from the right of polygamy, and the pride or tenderness of the venerable matron was never inflected by the society of a rival. After her death, he placed her in the rank of the four perfect women, with the sister of Mozes, the mother of Jesus, and Fatima, the best beloved of his daughters. "Was she not old?" said Ayesha, with the insolence of a blooming beauty; "has not God given you a better in her place?" "No, by God," said Mahomet, with an effusion of honest gratitude, "there never can be a better! She believed in me, when men despised me: she relieved my wants, when I was poor and persecuted by the world (165)."

In the largest indulgence of polygamy, the founder of a religion and empire might aspire to multiply the chances of a numerous posterity and a lineal succession. The hopes of Mahomet were fatally disappointed. The virgin Ayesha, and his ten widows of mature age and approved fertility, were barren in his potent embraces. The four sons of Cadijah died in their infancy. Mary, his Egyptian concubine, was endeared to him by the birth of Ibrahim. At the end of fifteen months the prophet wept over his grave; but he sustained with firmness the raillery of his enemies, and checked the adulation or credulity of the Moslems, by the assurance that an eclipse of the sun was not occasioned by the death of the infant. Cadijah had likewise given him four daughters, who were married

to the most faithful of his disciples: the three eldest died before their father; but Fatima, who possessed his confidence and love, became the wife of her cousin Ali, and the mother of an illustrious progeny. The merit and misfortunes of Ali and his descendants will lead me to anticipate, in this place, the series of the Saracenic caliphs, a title which describes the commanders of the faithful as the vicars and successors of the apostle of God (166).

The birth, the alliance, the character of Ali, which exalted him above the rest of his countrymen, might justify his claim to the vacant throne of Arabia. The son of Abu Taleb was, in his own right, the chief of the family of Hashem, and the hereditary prince or guardian of the city and temple of Mecca. The light of prophecy was extinct; but the husband of Fatima might expect the inheritance and blessing of her father: the Arabs had sometimes been patient of a female reign; and the two grandsons of the prophet had often been fondled in his lap, and shewn in his pulpit, as the hope of his age, and the chief of the youth of paradise. The first of the true believers might aspire to march before them in this world and in the next; and if some were of a graver and more rigid cast, the zeal and virtue of Ali were never outstripped by any recent proselyte. He united the qualifications of a poet, a soldier, and a saint:

(166) This outline of the Arabian history is drawn from the Bibliothèque Orientale of d'Herbelot (under the names of Aboubeck, Omar, Othman, Ali, &c.); from the Annals of Abulfeda, Abulpharagius, and Elmasin (under the proper years of the Hegira), and especially from Ockley's History of the Saracens (vol. i. p. 115—156. 229. 240. 363—373, 378—391. and almost the whole of the second volume). Yet we should weigh with caution the traditions of the hostile sects; a stream which becomes still more muddy as it flows farther from the source. Sir John Chardin has too faithfully copied the fables and errors of the modern Persians (Voyages, tom. ii. p. 235—250, &c.).
his wisdom still breathes in a collection of moral and religious sayings (167); and every antagonist, in the combats of the tongue or of the sword, was subdued by his eloquence and valour. From the first hour of his mission, to the last rites of his funeral, the apostle was never forsworn by a generous friend, whom he delighted to name his brother, his vicegerent, and the faithful Aaron of a second Moses. The son of Abu Taleb was afterwards reproached for neglecting to secure his interest by a solemn declaration of his right, which would have silenced all competition, and sealed his succession by the decrees of heaven. But the unsuspecting hero confided in himself: the jealousy of empire, and perhaps the fear of opposition, might suspend the resolutions of Mahomet; and the bed of sickness was besieged by the artful Ayesha, the daughter of Abubeker, and the enemy of Ali.

The silence and death of the prophet restored the liberty of the people; and his companions convened an assembly to deliberate on the choice of his successor. The hereditary claim and lofty spirit of Ali, were offensive to an aristocracy of elders, desirous of bestowing and resuming the sceptre by a free and frequent election: the Korish could never be reconciled to the proud pre-eminence of the line of Hashem; the ancient discord of the tribes was rekindled; the fugitives of Mecca and the auxiliaries of Medina asserted their respective merits, and the rash proposal of chusing two independent caliphs would have crushed in their infancy the religion and empire of the Saracens. The tumult was appeased by the disinterested resolution of Omar, who, sud-

(167) Ockley (at the end of his second volume) has given an English version of 169 sentences, which he ascribes, with some hesitation, to Ali, the son of Abu Taleb. His preface is coloured by the enthusiasm of a translator; yet these sentences delineate a characteristic, though dark, picture of human life.
denly renouncing his own pretensions, stretched forth his hand, and declared himself the first subject of the mild and venerable Abubeker. The urgency of the moment, and the acquiescence of the people, might excuse this illegal and precipitate measure; but Omar himself confessed from the pulpit, that if any Mussulman should hereafter presume to anticipate the suffrage of his brethren, both the elector and the elected would be worthy of death (168). After the simple inauguration of Abubeker, he was obeyed in Medina, Mecca, and the provinces of Arabia; the Hashemites alone declined the oath of fidelity; and their chief, in his own house, maintained, above six months, a sullen and independent reserve; without listening to the threats of Omar, who attempted to confound with fire the habitation of the daughter of the apostle. The death of Fatima, and the decline of his party, subdued the indignant spirit of Ali: he condescended to salute the commander of the faithful, accepted his excuse of the necessity of preventing their common enemies, and wisely rejected his courteous offer of abdicating the government of the Arabians. After a reign of two years, the aged caliph was summoned by the angel of death. In his testament, with the tacit approbation of the companions, he bequeathed the sceptre to the firm and intrepid virtue of Omar. "I have no occasion," said the modest candidate, "for the place." "But the place has occasion for you," replied Abubeker; who expired with a fervent prayer, that the God of Mahomet would ratify his choice,

(168) Ockley (Hist. of the Saracens, vol. i. p. 5, 6.) from an Arabic MS. represents Ayetha as adverse to the sublimination of her father in the place of the apostle. This fact, so improbable in itself, is unnoticed by Abulfeda, Al Jawabi, and Al Bochari, the last of whom quotes the tradition of Ayetha herself (Vit. Mohammed, p. 136. Vie de Mahomet, tom. iii. p. 136).
and direct the Musulmans in the way of concord and obedience. The prayer was not ineffectual, since Ali himself, in a life of privacy and prayer, professed to revere the superior worth and dignity of his rival; who comforted him for the loss of empire, by the most flattering marks of confidence and esteem. In the twelfth year of his reign, Omar received a mortal wound from the band of an assassin: he rejected with equal impartiality the names of his son and of Ali, refused to load his conscience with the sins of his successor, and devolved on six of the most respectable companions, the arduous task of electing a commander of the faithful. On this occasion, Ali was again blamed by his friends (169) for submitting his right to the judgment of men, for recognizing their jurisdiction by accepting a place among the six electors. He might have obtained their suffrage, had he desired to promise a strict and servile conformity, not only to the Koran and tradition, but likewise to the determinations of two seniors (170). With these limitations, Othman, the secretary of Mahomet, accepted the government; nor was it till after the third caliph, twenty-four years after the death of the prophet, that Ali was invested, by the popular choice, with the regal and sacerdotal office. The manners of the Arabians retained their primitive simplicity, and the son of Abu Taleb despised the pomp and vanity of this world. At the hour of prayer, he repaired to the mosch

(169) Particularly by his friend and confidant Abdallah, the son of Abbas, who died A. D. 687, with the title of grand doctor of the Moislens. In Abdallah he recapitulated the important occasions in which Ali had neglected his salutary advice (p. 76. verf. Reiske); and concludes (p. 85.), O princeps sidereum, ubique controversia tu quidem vere foris es, at inops boni consilii, et terram gerendarum parum callens.

(170) I suspect that the two seniors (Abulpharagius, p. 115. Ockley, tom. i. p. 371.) may signify not two actual counsellors, but his two predecessors, Abubeker and Omar.
of Medina, clothed in a thin cotton gown, a coarse turban on his head, his slippers in one hand, and his bow in the other, instead of a walking staff. The companions of the prophet and the chiefs of the tribes saluted their new sovereign, and gave him their right hands as a sign of fealty and allegiance.

The mischiefs that flow from the contests of ambition are usually confined to the times and countries in which they have been agitated. But the religious discord of the friends and enemies of Ali has been renewed in every age of the Hegira, and is still maintained in the immortal hatred of the Persians and Turks (171). The former, who are branded with the appellation of Shiites or sectaries, have enriched the Mahometan creed with a new article of faith; and if Mahomet be the apostle, his companion Ali is the vicar, of God. In their private converse, in their public worship, they bitterly execrate the three usurpers who intercepted his indefeasible right to the dignity of Imam and Caliph; and the name of Omar expresses in their tongue the perfect accomplishment of wickedness and impiety (172). The Sunnites, who are supported by the general consent and orthodox tradition of the Musulmans, entertain a more impartial, or at least a more decent opinion. They respect the memory of Abubeker, Omar, Othman, and Ali, the holy and legitimate successors of the

(171) The schism of the Persians is explained by all our travellers of the last century, especially in the ii4 and ivth volume of their master, Chardin. Niebuhr, though of inferior merit, has the advantage of writing so late as the year 1764 (Voyages en Arabie, &c. tom. ii. p. 206—233.), since the ineffectual attempt of Nadir Shah to change the religion of the nation (see his Persian History translated into French by Sir William Jones, tom. ii. p. 5, 6, 47, 48, 144—155.).

(172) Omar is the name of the devil; his murderer is a saint. When the Persians foes with the bow, they frequently cry, "May this arrow go to the heart of Omar!" (Voyages de Chardin, tom. ii. p. 239, 240, 259, &c.)
prophet. But they assign the last and most humble place to the husband of Fatima, in the persuasion that the order of succession was determined by the degrees of sanctity (173). An historian who balances the four caliphs with a hand unshaken by superstition, will calmly pronounce, that their manners were alike pure and exemplary; that their zeal was fervent, and probably sincere; and that, in the midst of riches and power, their lives were devoted to the practice of moral and religious duties. But the public virtues of Abubeker and Omar, the prudence of the first, the severity of the second, maintained the peace and prosperity of their reigns. The feeble temper and declining age of Othman were incapable of sustaining the weight of conquest and empire. He chose, and he was deceived; he trusted, and he was betrayed: the most deserving of the faithful became useless or hostile to his government, and his lavish bounty was productive only of ingratitude and discontent. The spirit of discord went forth in the provinces, their deputies assembled at Medina, and the Charegites, the desperate fanatics who disclaimed the yoke of subordination and reason, were confounded among the free-born Arabs, who demanded the redress of their wrongs and the punishment of their oppressors. From Cufa, from Bassora, from Egypt, from the tribes of the desert, they rose in arms, encamped about a league from Medina, and dispatched an haughty mandate to their sovereign, requiring him to execute justice, or to defend from the throne. His repentance

(173) This gradation of merit is distinctly remarked in a creed illustrated by Roland (de Relig. Mohammed. I. i. p. 37.); and a Sunni theology inferred by Ockley (Hist. of the Saracens, tom. ii. p. 230.). The practice of cursing the memory of Ali was abolished, after forty years, by the Ommanides themselves (d'Herbelot, p. 660.); and there are few among the Turks who presume to revile him as an infidel (Voyager de Chardin, tom. iv. p. 45.).

Vol. IX. U began
THE DECLINE AND FALL

began to disarm and disperse the insurgents; but their fury was rekindled by the arts of his enemies; and the forgery of a pernicious secretary was contrived to blast his reputation and precipitate his fall. The caliph had lost the only guard of his predecessors, the esteem and confidence of the Moslems; during a siege of six weeks his water and provisions were intercepted, and the feeble gates of the palace were protected only by the scruples of the more timorous rebels. Forsaken by those who had abused his simplicity, the helpless and venerable caliph expected the approach of death: the brother of Ayesha marched at the head of the assassins; and Othman, with the Koran in his lap, was pierced with a multitude of wounds. A tumultuous anarchy of five days was appealed by the inauguration of Ali; his refusal would have provoked a general massacre. In this painful situation he supported the becoming pride of the chief of the Hashemites; declared that he had rather serve than reign; rebuked the presumption of the strangers; and required the formal, if not the voluntary, assent of the chiefs of the nation. He has never been accused of prompting the assassin of Omar; though Persia indifferently celebrates the festival of that holy martyr. The quarrel between Othman and his subjects was allayed by the early mediation of Ali; and Hassán, the eldest of his sons, was insulted and wounded in the defence of the caliph. Yet it is doubtful whether the father of Hassán was strenuous and sincere in his opposition to the rebels; and it is certain that he enjoyed the benefit of their crime. The temptation was indeed of such magnitude as might stagger and corrupt the most obdurate virtue. The ambitious candidate no longer aspired to the barren sceptre of Arabia: the Saracens had been victorious in the
OF THE ROMAN EMPIRE.

the East and West; and the wealthy kingdoms of Persia, Syria, and Egypt, were the patrimony of the commander of the faithful.

A life of prayer and contemplation had not chilled the martial activity of Ali; but in a mature age, after a long experience of mankind, he still betrayed in his conduct the rashness and indiscretion of youth. In the first days of his reign, he neglected to secure, either by gifts or fetters, the doubtful allegiance of Telha and Zobeir, two of the most powerful of the Arabian chiefs. They escaped from Medina to Mecca, and from thence to Baffora; erected the standard of revolt; and usurped the government of Irak, or Assyria, which they had vainly solicited as the reward of their services. The mark of patriotism is allowed to cover the most glaring inconsistencies; and the enemies, perhaps the assassins, of Othman now demanded vengeance for his blood. They were accompanied in their flight by Ayesha, the widow of the prophet, who cherished, to the last hour of her life, an implacable hatred against the husband and the posterity of Fatima. The most reasonable Moslems were scandalised, that the mother of the faithful should expose in a camp her person and character; but the superstitious crowd was confident that her presence would sanctify the justice, and assure the success of their cause. At the head of twenty thousand of his loyal Arabs, and nine thousand valiant auxiliaries of Cufa, the caliph encountered and defeated the superior numbers of the rebels under the walls of Baffora. Their leaders, Telha and Zobeir, were slain in the first battle that stained with civil blood the arms of the Moslems. After passing through the ranks to animate the troops, Ayesha had chosen her post amidst the dangers of the field. In the heart of the action,
seventy men, who held the bridle of her camel, were successively killed or wounded; and the cage or litter in which she sat, was decked with javelins and darts like the quills of a porcupine. The venerable captive sustained with firmness the reproaches of the conqueror, and was speedily dismissed to her proper station, at the tomb of Mahomet, with the respect and tenderness that was still due to the widow of the apostle. After this victory, which was styled the Day of the Camel, Ali marched against a more formidable adversary; against Moawiyah, the son of Abu Sophian, who had assumed the title of caliph, and whose claim was supported by the forces of Syria and the interest of the house of Ommiyah. From the passage of Thapsacus, the plain of Siffin (174) extends along the western bank of the Euphrates. On this spacious and level theatre, the two competitors waged a deferentary war of one hundred and ten days. In the course of ninety actions or skirmishes, the loss of Ali was estimated at twenty-five, that of Moawiyah at forty-five, thousand soldiers; and the lift of the plain was dignified with the names of five and twenty veterans who had fought at Beder under the standard of Mahomet. In this sanguinary contest, the lawful caliph displayed a superior character of valour and humanity. His troops were strictly enjoined to await the first onset of the enemy, to spare their flying brethren, and to respect the bodies of the dead, and the chastity of the female captives. He generously proposed to save the blood of the Molems by a single combat; but his trembling rival declined the challenge as a sentence of inevitable death. The ranks of the Syrians were broken by the charge of a hero who was mount-

ed on a pychabald horse, and wielded with irresistible force his ponderous and two edged sword. As often as he smote a rebel, he shouted the Allah Acbar, "God is victorious;" and in the tumult of nocturnal battle, he was heard to repeat four hundred times that tremendous exclamation. The prince of Damascus already meditated his flight, but the certain victory was snatched from the grasp of Ali by the disobedience and enthusiasm of his troops. Their conscience was awed by the solemn appeal to the books of the Koran which Moawiyah exposed on the foremost lances; and Ali was compelled to yield to a disgraceful truce and an insidious compromise. He retreated with sorrow and indignation to Cufa; his party was discouraged; the distant provinces of Persia, of Yemen, and of Egypt, were subdued or seduced by his crafty rival; and the stroke of fanaticism which was aimed against the three chiefs of the nation, was fatal only to the cousin of Mahomet. In the temple of Mecca, three Charegites or enthusiasts discoursed of the disorders of the church and state: they soon agreed, that the deaths of Ali, of Moawiyah, and of his friend Amrou, the viceroy of Egypt, would restore the peace and unity of religion. Each of the assassins chose his victim, poisoned his dagger, devoted his life, and secretly repaired to the scene of action. Their resolution was equally desperate: but the first mistook the person of Amrou, and stabbed the deputy who occupied his seat; the prince of Damascus was dangerously hurt by the second; the lawful caliph, in the midst of Cufa, received a mortal wound from the hand of the third. He expired in the sixty-third year of his age, and mercifully recommended to his children, that they would dispatch the murderer by a single stroke. The sepul-
THE DECLINE AND FALL

The sepulchre of Ali (175) was concealed from the tyrants of the house of Ommiyah (176); but in the fourth age of the Hegira, a tomb, a temple, a city, arose near the ruins of Cufa (177). Many thousands of the Shiites repose in holy ground at the feet of the vicar of God; and the desert is vivified by the numerous and annual visits of the Persians, who esteem their devotion not less meritorious than the pilgrimage of Mecca.

The persecutors of Mahomet usurped the inheritance of his children; and the champions of idolatry became the supreme heads of his religion and empire. The opposition of Abu Sophian had been fierce and obstinate; his conversion was tardy and reluctant; his new faith was fortified by necessity and interest; he served, he fought, perhaps he believed; and the sins of the time of ignorance were expiated by the recent merits of the family of Ommiyah. Moawiyah, the son of Abu Sophian, and of the cruel Henda, was dignified in his early youth with the office or title of secretary of the prophet: the judgment of Omar entrusted him with the government of Syria; and he administered that important province above forty years either in a subordinate or supreme rank. Without renouncing the fame of valour and liberality, he affected the reputation of humanity and moderation: a grateful people was attached to their benefactor; and the

(175) Abulfeda, a modern Sonnâî, relates the different opinions concerning the burial of Ali, but adopts the sepulchre of Cufa, hodie famâ numeroque religioso frequentantium celebratum. This number is reckoned by Niebuhr to amount annually to 2000 of the dead, and 5000 of the living (tom. ii. p. 208, 189).

(176) All the tyrants of Persia, from Ahad el Dowlat (A. D. 977, d’Herbelot, p. 58, 59, 95.) to Nadir Shab (A. D. 1743, Hist. de Nadir Shab, tom. ii. p. 155.), have enriched the tomb of Ali with the spoils of the people. The dome is copper, with a bright and masy gilding, which glitters to the sun at the distance of many a mile.

(177) The city of Mehad Ali, five or six miles from the ruins of Cufa, and one hundred and twenty to the south of Bagdad, is of the size and form of the modern Jerusalem. Mehad Hofein, larger and more populous, is at the distance of thirty miles.
victorious Moslems were enriched with the spoils of Cyprus and Rhodes. The sacred duty of pursuing the assassins of Othman was the engine and pretence of his ambition. The bloody shirt of the martyr was exposed in the mosch of Damascus: the emir deplored the fate of his injured kinsman; and sixty-thousand Syrians were engaged in his service by an oath of fidelity and revenge. Amrou, the conqueror of Egypt, himself an army, was the first who saluted the new monarch, and divulged the dangerous secret, that the Arabian caliphs might be created elsewhere than in the city of the prophet (178). The policy of Moawiyah eluded the valour of his rival; and, after the death of Ali, he negotiated the abdication of his son Haslan, whose mind was either above or below the government of the world, and who retired without a sigh from the palace of Cufa to an humble cell near the tomb of his grandfather. The aspiring wishes of the caliph were finally crowned by the important change of an elective to an hereditary kingdom. Some murmurs of freedom or fanaticism attested the reluctance of the Arabs, and four citizens of Medina refused the oath of fidelity; but the designs of Moawiyah were conducted with vigour and address; and his son Yezid, a feeble and dissolute youth, was proclaimed as the commander of the faithful and the successor of the apostle of God.

A familiar story is related of the benevolence of one of the sons of Ali. In serving at table, a slave had inadvertently dropped a dish of scalding broth on his master: the heedless wretch fell prostrate, to deprecate his punishment, and repeated a verse of the Koran: "Paradise is for

(178) I borrow, on this occasion, the strong sense and expression of Tacitus (Hist. 1. 4.): Evulgates imperii arcana post imperatorem alibi quam Romae fieri.

"those
"those who command their anger:"—"I am not angry:"—"and for those who pardon offences:"—"I pardon your offence:"—"and for those who return good for evil:"—"I give you your liberty, and four hundred pieces of silver." With an equal measure of piety, Hosein, the younger brother of Hassan, inherited a remnant of his father's spirit, and served with honour against the Christians in the siege of Constantinople. The primogeniture of the line of Hassam, and the holy character of grandson of the apostle, had centered in his person, and he was at liberty to prosecute his claim against Yezid the tyrant of Damascus, whose vices he despised, and whose title he had never deigned to acknowledge. A lift was secretly transmitted from Cufa to Medina, of one hundred and forty thousand Moslems, who professed their attachment to his cause, and who were eager to draw their swords so soon as he should appear on the banks of the Euphrates. Against the advice of his wifest friends, he resolved to trust his person and family in the hands of a perfidious people. He traversed the desert of Arabia with a timorous retinue of women and children; but as he approached the confines of Irak, he was alarmed by the solitary or hostile face of the country, and suspected either the defection or ruin of his party. His fears were just; Obaidollah, the governor of Cufa, had extinguished the first sparks of an insurrection; and Hosein in the plain of Kerbelah, was encompassed by a body of five thousand horse, who intercepted his communication with the city and the river. He might still have escaped to a fortress in the desert, that had defied the power of Caesar and Chosroes, and confided in the fidelity of the tribe of Tai, which would have armed ten thousand warriors in his defence. In a conference with the chief

of the enemy, he proposed the option of three honourable conditions; that he should be allowed to return to Medina, or be stationed in a frontier garrison against the Turks, or safely conducted to the presence of Yezid. But the commands of the caliph, or his lieutenant, were stern and absolute; and Hossein was informed that he must either submit as a captive and a criminal to the commander of the faithful, or expect the consequences of his rebellion. "Do you think," replied he, "to terrify me with death?" And, during the short respite of a night, he prepared with calm and solemn resignation to encounter his fate. He checked the lamentations of his sister Fatima, who deplored the impending ruin of his house. "Our trust," said Hossein, "is in God alone. All things, "both in heaven and earth, must perish and "return to their Creator. My brother, my "father, my mother, were better than me; "and every Mosulman has an example in the "prophet." He pressed his friends to consult their safety by a timely flight; they unanimously refused to desert or survive their beloved master; and their courage was fortified by a fervent prayer and the assurance of paradise. On the morning of the fatal day, he mounted on horseback, with his sword in one hand and the Koran in the other; his generous band of martyrs consisted only of thirty-two horse and forty foot; but their flanks and rear were secured by the tent-ropes, and by a deep trench which they had filled with lighted faggots, according to the practice of the Arabs. The enemy advanced with reluctance; and one of their chiefs deserted, with thirty followers, to claim the partnership of inevitable death. In every close onset, or single combat, the despair of the Fatimites was invincible; but the surrounding multitudes galloped them from

from a distance with a cloud of arrows, and the horses and men were successively slain: a truce was allowed on both sides for the hour of prayer; and the battle at length expired by the death of the last of the companions of Hosein. Alone, weary, and wounded, he seated himself at the door of his tent. As he tasted a drop of water, he was pierced in the mouth with a dart; and his son and nephew, two beautiful youths, were killed in his arms. He lifted his hands to heaven, they were full of blood, and he uttered a funeral prayer for the living and the dead. In a transport of despair his sifter issued from the tent, and adjured the general of the Cufians, that he would not suffer Hosein to be murdered before his eyes: a tear trickled down his venerable beard; and the boldest of his soldiers fell back on every side as the dying hero threw himself among them. The remorseless Shamer, a name detested by the faithful, reproached their cowardice; and the grandson of Mahomet was slain with three and thirty strokes of lances and swords. After they had trampled on his body, they carried his head to the castle of Cufa, and the inhuman Obeidollah struck him on the mouth with a cane: "Alas!" exclaimed an aged Musulman, "on these lips "have I seen the lips of the apostle of God!"

In a distant age and climate the tragic scene of the death of Hosein will awaken the sympathy of the coldest reader (179). On the annual festival of his martyrdom, in the devout pilgrimage to his sepulchre, his Persian votaries abandon

their souls to the religious frenzy of sorrow and indignation (180).

When the sisters and children of Ali were brought in chains to the throne of Damascus, the caliph was advised to extirpate the enmity of a popular and hostile race, whom he had injured beyond the hope of reconciliation. But Yezid preferred the counsels of mercy; and the mourning family was honourably dismissed to mingle their tears with their kindred at Medina. The glory of martyrdom superseded the right of primogeniture; and the twelve IMAMS (181), or pontiffs, of the Persian creed are Ali, Hassian, Hosein, and the lineal descendants of Hosein to the ninth generation. Without arms, or treasures, or subjects, they successively enjoyed the veneration of the people, and provoked the jealousy of the reigning caliphs: their tombs at Mecca or Medina, on the banks of the Euphrates, or in the province of Chorasan, are still visited by the devotion of their sect. Their names were often the pretence of sedition and civil war; but these royal saints despised the pomp of the world, submitted to the will of God and the injustice of man, and devoted their innocent lives to the study and practice of religion. The twelfth and last of the Imams, conspicuous by the title of Mahadi, or the Guide, surpassed the solitude and sanctity of his predecessors. He concealed himself in a cavern near Bagdad: the time and place of his death are unknown; and his votaries pretend, that he still lives, and will ap-

(180) Niebuhr the Dane (Voyages en Arabe, &c. tom. ii. p. 108, &c.) is perhaps the only European traveller who has dared to visit Meshed Ali and Meshed Hosein. The two sepulchres are in the hands of the Turks, who tolerate and tax the devotion of the Persian heretics. The festival of the death of Hosein is annually described by Sir John Chartz, a traveller whom I have often praised.

pear before the day of judgment to overthrow the tyranny of Dejal, or the Antichrist (182). In the lapse of two or three centuries the posterity of Abbas, the uncle of Mahomet, had multiplied to the number of thirty-three thousand (183): the race of Ali might be equally prolific; the meanest individual was above the first and greatest of princes; and the most eminent were supposed to excel the perfection of angels. But their adverse fortune, and the wide extent of the Muslim empire, allowed an ample scope for every bold and artful impostor, who claimed affinity with the holy seed; the sceptre of the Almohades in Spain and Africa, of the Fatimites in Egypt and Syria (184), of the Sultans of Yemen, and of the Sophis of Persia (185), has been consecrated by this vague and ambiguous title. Under their reigns it might be dangerous to dispute the legitimacy of their birth; and one of the Fatimite caliphs silenced an inquisitive question, by drawing his scythe; “This,” said Moez, is my pedigree; and these,” casting an handful of gold to his soldiers, “and these

(182) The name of Antichrist may seem ridiculous, but the Mahometans have liberally borrowed the fables of every religion (Sale’s Preliminary Discourse, p. 80. 82.). In the royal table of Iphianan, two horses were always kept saddled, one for the Mahadi himself, the other for his lieutenant, Jesus the son of Mary.

(184) D’Herbelot, p. 342. The enemies of the Fatimites disfigured them by a Jewish origin. Yet they accurately deduced their genealogy from Jaafar, the fifth Imam; and the impartial Abulfeda allows (Annal. Mollem, p. 230.) that they were owned by many, who abased controversy genuini sumus Alidum ex homine propaginum sue gentis excite calientes. (185) The kings of Persia of the last dynasty are descended from Sheik Sef, a saint of the xivth century, and through him from Monifa Caffem, the son of Hofein, the son of Ali (Olearius, p. 957. Chardin, tom. iil, p. 288.) But I cannot trace the intermediate degrees in any genuine or fabulous pedigree. If they were truly Fatimites, they might draw their origin from the princes of Massanderan, who reigned in the xivth century (d’Herbelot, p. 96.).

"are my kindred and my children." In the various conditions of princes, or doctors, or nobles, or merchants, or beggars, a swarm of the genuine or fictitious descendants of Mahomet and Ali is honoured with the appellation of sheiks, or sherifs, or emirs. In the Ottoman empire, they are distinguished by a green turban, receive a stipend from the treasury, are judged only by their chief, and however debased by fortune or character, still assert the proud pre-eminence of their birth. A family of three hundred persons, the pure and orthodox branch of the caliph Hatban, is preserved without taint or suspicion in the holy cities of Mecca and Medina, and still retains, after the revolutions of twelve centuries, the custody of the temple and the sovereignty of their native land. The fame and merit of Mahomet would ennoble a plebeian race, and the ancient blood of the Koreish transcends the recent majesty of the kings of the earth (186).

The talents of Mahomet are entitled to our applause, but his success has perhaps too strongly attracted our admiration. Are we surprised that a multitude of proselytes should embrace the doctrine and the passions of an eloquent fanatic? In the heresies of the church, the same seduction has been tried and repeated from the time of the apostles to that of the reformers. Does it seem incredible that a private citizen should grasp the sword and the sceptre, subdue his native country, and erect a monarchy by his victorious arms? In the moving picture of the dynasties of the East, an hundred fortunate usurpers have arisen from a baser origin, surmounted more formidable

(186) The present state of the family of Mahomet and Ali is most accurately described by Demetrius Cantemir (Hist. of the Ottoman Empire, p. 94.) and Niebuhr (Description de l'Arabie, p. 9—16. 317, &c.). It is much to be lamented, that the Danish traveller was unable to purchase the chronicles of Arabia.
THE DECLINE AND FALL

ble obstacles, and filled a larger scope of empire and conquest. Mahomet was alike instructed to preach and to fight, and the union of these opposite qualities, while it enhanced his merit, contributed to his success: the operation of force and persuasion, of enthusiasm and fear, continually acted on each other, till every barrier yielded to their irresistible power. His voice invited the Arabs to freedom and victory, to arms and rapine, to the indulgence of their darling passions in this world and the other; the restraints which he imposed were requisite to establish the credit of the prophet, and to exercise the obedience of the people; and the only objection to his success, was his rational creed of the unity and perfections of God. It is not the propagation but the permanency of his religion that deserves our wonder; the same pure and perfect impression which he engraved at Mecca and Medina, is preserved, after the revolutions of twelve centuries, by the Indian, the African, and the Turkish proselytes of the Koran. If the Christian apostles, St. Peter or St. Paul, could return to the Vatican, they might possibly enquire the name of the Deity who is worshipped with such mysterious rites in that magnificent temple: at Oxford or Geneva, they would experience less surprise; but it might still be incumbent on them to peruse the catechism of the church, and to study the orthodox commentators on their own writings and the words of their master. But the Turkish dome of St. Sophia, with an encafe of splendor and size, represents the humble tabernacle erected at Medina by the hands of Mahomet. The Mahometans have uniformly withstood the temptation of reducing the object of their faith and devotion to a level with the senses and imagination of man. "I believe in one "God, and Mahomet the apostle of God," is the
the simple and invariable profession of Islam. The intellectual image of the Deity has never been degraded by any visible idol; the honours of the prophet have never transgressed the measure of human virtue; and his living precepts have restrained the gratitude of his disciples within the bounds of reason and religion. The votaries of Ali have indeed consecrated the memory of their hero, his wife, and his children, and some of the Persian doctors pretend that the divine essence was incarnate in the person of the Imams; but their superstition is universally condemned by the Sonnites; and their impiety has afforded a reasonable warning against the worship of saints and martyrs. The metaphysical questions on the attributes of God, and the liberty of man, have been agitated in the schools of the Mahometans, as well as in those of the Christians; but among the former they have never engaged the passions of the people or disturbed the tranquillity of the state. The cause of this important difference may be found in the separation or union of the regal and sacerdotal characters. It was the interest of the caliphs, the successors of the prophet and commanders of the faithful, to repress and discourage all religious innovations: the order, the discipline, the temporal and spiritual ambition of the clergy, are unknown to the Moslems; and the sages of the law are the guides of their conscience and the oracles of their faith. From the Atlantic to the Ganges, the Koran is acknowledged as the fundamental code, not only of theology but of civil and criminal jurisprudence; and the laws which regulate the actions and the property of mankind, are guarded by the infallible and immutable sanction of the will of God. This religious servitude is attended with some practical disadvantage; the illiterate legislator had been often

often misled by his own prejudices and those of his country; and the institutions of the Arabian desert may be ill-adapted to the wealth and numbers of Ipahan and Constantinople. On these occasions, the Cadhi respectfully places on his head the holy volume, and substitutes a dextrous interpretation more apposite to the principles of equity, and the manners and policy of the times.

His beneficial or pernicious influence on the public happiness is the last consideration in the character of Mahomet. The most bitter or most bigotted of his Christian or Jewish foes, will surely allow that he assumed a false commission to inculcate a salutary doctrine, less perfect only than their own. He piously supposed, as the basis of his religion, the truth and sanctity of their prior revelations, the virtues and miracles of their founders. The idols of Arabia were broken before the throne of God; the blood of human victims was expiated by prayer, and fasting, and alms, the laudable or innocent arts of devotion; and his rewards and punishments of a future life were painted by the images most congenial to an ignorant and carnal generation. Mahomet was perhaps incapable of dictating a moral and political system for the use of his countrymen: but he breathed among the faithful a spirit of charity and friendship, recommended the practice of the social virtues, and checked, by his laws and precepts, the thirst of revenge and the oppression of widows and orphans. The hostile tribes were united in faith and obedience, and the valour which had been idly spent in domestic quarrels, was vigorously directed against a foreign enemy. Had the impulse been less powerful, Arabia, free at home, and formidable abroad, might have flourished under a succession of her native monarchs. Her sovereignty was
was lost by the extent and rapidity of conquest. The colonies of the nation were scattered over the East and West, and their blood was mingled with the blood of their converts and captives. After the reign of three caliphs, the throne was transported from Medina to the valley of Damascus and the banks of the Tigris; the holy cities were violated by impious war; Arabia was ruled by the rod of a subject, perhaps of a stranger; and the Bedoueens of the desert, awakening from their dream of dominion, resumed their old and solitary independence (187).

(187) The writers of the Modern Universal History (vol. i. and ii.) have compiled, in 850 folio pages, the life of Mahomet and the annals of the caliphs. They enjoyed the advantage of reading, and sometimes correcting, the Arabic texts; yet, notwithstanding their high-sounding boasts, I cannot find, after the conclusion of my work, that they have afforded me much (if any) additional information. The dull mass is not quickened by a spark of philosophy or taste: and the compilers indulge the criticism of scornful bigotry against Bougainvilliers, Sale, Gagnier, and all who have treated Mahomet with favour, or even justice.
The revolution of Arabia had not changed the character of the Arabs; the death of Mahomet was the signal of independence; and the hasty structure of his power and religion tottered to its foundations. A small and faithful band of his primitive disciples had listened to his eloquence, and shared his distresses; had fled with the apostle from the persecution of Mecca, or had received the fugitive in the walls of Medina. The ever-increasing myriads, who acknowledged Mahomet as their king and prophet, had been compelled by his arms, or allured by his prosperity. The polytheists were confounded by the simple idea of a solitary and invisible God: the pride of the Christians and Jews disdained the yoke of a mortal and contemporary legislator. Their habits of faith and obedience were not sufficiently confirmed; and many of the new converts regretted the venerable antiquity of the law of Moses, or the rites and mysteries of the Catholic church, or the idols, the sacrifices, the joyous festivals, of their Pagan ancestors. The jarring interests and hereditary feuds of the Arabian tribes had not yet coales-
ced in a system of union and subordination; and the Barbarians were impatient of the mildest and most salutary laws that curbed their passions, or violated their customs. They submitted with reluctance to the religious precepts of the Koran, the abstinence from wine, the fast of the Ramadan, and the daily repetition of five prayers; and the alms and tithes, which were collected for the treasury of Medina, could be distinguished only by a name from the payment of a perpetual and ignominious tribute. The example of Mahomet had excited a spirit of fanaticism or imposture, and several of his rivals presumed to imitate the conduct and defy the authority of the living prophet. At the head of the fugitives and auxiliaries, the first caliph was reduced to the cities of Mecca, Medina, and Tayef; and perhaps the Koreish would have restored the idols of the Caaba, if their levy had not been checked by a reasonable reproof.

"Ye men of Mecca, will ye be the last to embrace and the first to abandon the religion of Islam?" After exhorting the Molems to confide in the aid of God and his apostle, Abu-beker resolved, by a vigorous attack, to prevent the junction of the rebels. The women and children were safely lodged in the caviies of the mountains: the warriors, marching under eleven banners, diffused the terror of their arms; and the appearance of a military force revived and confirmed the loyalty of the faithful. The inconstant tribes accepted with humble repentance, the duties of prayer, and fasting, and alms; and, after some examples of success and severity, the most daring apostates fell prostrate before the sword of the Lord and of Caled. In the fertile province of Yemana (1),

between the Red Sea and the Gulph of Perlia, in a city not inferior to Medina itself, a powerful chief, his name was Moseilama, had assumed the character of a prophet, and the tribe of Hanifa listened to his voice. A female prophetess was attracted by his reputation: the decencies of words and actions were spurned by these favourites of heaven (2); and they employed several days in mystic and amorous converse. An obscure sentence of his Koran, or book, is yet extant (3); and, in the pride of his mission, Moseilama condescended to offer a partition of the earth. The proposal was answered by Mahomet with contempt; but the rapid progress of the impostor awakened the fears of his successor: forty thousand Mollems were assembled under the standard of Caled; and the existence of their faith was resigned to the event of a decisive battle. In the first action, they were repulsed with the loss of twelve hundred men; but the skill and perseverance of their general prevailed: their defeat was avenged by the slaughter of ten thousand infidels; and Moseilama himself was pierced by an Ethiopian slave with the same

(2) Their first salvation may be transferred, but cannot be translated.

It was thus that Moseilama said or sung:

Surgis tandem istaque strenuus permolenda; nam stratus tibi thorum est.

Aut in propastulo tectore st velis, aut in additio cereculo si malis;

Aut sopinam se humi exprosectare fuisse, aut velis, aut si malis manibus pedibusque nitant.

Aut si velis ejus (Priapi) gemino triunc, aut si malis tenuis veniam,

The prophetess Segish, after the fall of her lover, returned to idolatry; but, under the reign of Moswiya, she became a Mosulman and died at Baffra. (Abulfeda, Annal., veri. Retske, p. 63.)

javelin which had mortally wounded the uncle of Mahomet. The various rebels of Arabia, without a chief or a cause, were speedily suppressed by the power and discipline of the rising monarchy; and the whole nation again professed, and more stedfastly held, the religion of the Koran. The ambition of the caliphs provided an immediate exercise for the restless spirit of the Saracens: their valour was united in the prosecution of an holy war; and their enthusiasm was equally confirmed by opposition and victory.

From the rapid conquests of the Saracens a presumption will naturally arise, that the first caliphs commanded in person the armies of the faithful, and fought the crown of martyrdom in the foremost ranks of the battle. The courage of Abubeker (4), Omar (5), and Othman (6), had indeed been tried in the persecution and wars of the prophet; and the personal assurance of paradise must have taught them to despise the pleasures and dangers of the present world. But they ascended the throne in a venerable or mature age, and esteemed the domestic cares of religion and justice the most important duties of a sovereign. Except the presence of Omar at the siege of Jerusalem, their longest expeditions were the frequent pilgrimage from Medina to Mecca; and they calmly received the tidings of victory as they prayed or preached before the sepulchre of the prophet. The austere and frugal measure of their lives was the effect of virtue or habit, and the pride of their simplicity inulfted the vain magnificence of the kings of

THE DECLINE AND FALL

the earth. When Abubeker assumed the office of caliph, he enjoined his daughter Ayesha to take a strict account of his private patrimony, that it might be evident whether he were enriched or impoverished by the service of the state. He thought himself entitled to a stipend of three pieces of gold, with the sufficient maintenance of a single camel and a black slave; but on the Friday of each week, he distributed the residue of his own and the public money, first to the most worthy, and then to the most indigent, of the Moslems. The remains of his wealth, a coarse garment, and five pieces of gold, were delivered to his successor, who lamented with a modest sigh his own inability to equal such an admirable model. Yet the abstinence and humility of Omar were not inferior to the virtues of Abubeker; his food consisted of barley-bread or dates; his drink was water; he preached in a gown that was torn or tattered in twelve places; and a Persian satrap who paid his homage to the conqueror, found him asleep among the beggars on the steps of the mosque of Medina.

Oeconomy is the source of liberality, and the encrease of the revenue enabled Omar to establish a just and perpetual reward for the past and present services of the faithful. Careless of his own emolument, he assigned to Abbas, the uncle of the prophet, the first and most ample allowance of twenty-five thousand drams or pieces of silver. Five thousand were allotted to each of the aged warriors, the relics of the field of Badr, and the last and meanest of the companions of Mahomet was distinguished by the annual reward of three thousand pieces. One thousand was the stipend of the veterans who had fought in the first battles against the Greeks and Persians, and the decreasing pay, as low as fifty pieces of silver, was adapted to the respective
tive merit and seniority of the soldiers of Omar. Under his reign, and that of his predecessor, the conquerors of the East, were the trusty servants of God and the people: the mass of the public treasure was consecrated to the expenses of peace and war; a prudent mixture of justice and bounty, maintained the discipline of the Saracens, and they united, by a rare felicity, the dispatch and execution of despotism, with the equal and frugal maxims of a republican government. The heroic courage of Ali (7), and the consummate prudence of Moawiyah (8), excited the emulation of their subjects; and the talents which had been exercised in the school of civil discord, were more usefully applied to propagate the faith and dominion of the prophet. In the sloth and vanity of the palace of Damascus, the succeeding princes of the house of Ommiyiah were alike destitute of the qualifications of statesmen and of saints (9). Yet the spoils of unknown nations were continually laid at the foot of their throne, and the uniform ascent of the Arabian greatness must be ascribed to the spirit of the nation rather than the abilities of their chiefs. A large deduction must be allowed for the weakness of their enemies. The birth of Mahomet was fortunately placed in the most degenerate and disorderly period of the Persians, the Romans, and the Barbarians of Europe: the empires of Trajan, or even of Constantine or Charlemagne, would have repelled the assault of the naked

Saracens, and the torrent of fanaticism might have been obscurely lost in the sands of Arabia. In the victorious days of the Roman republic, it had been the aim of the senate to confine their counsels and legions to a single war, and completely to suppress a first enemy before they provoked the hostilities of a second. These timid maxims of policy were disdained by the magnanimity or enthusiasm of the Arabian caliphs. With the same vigour and success they invaded the succours of Augustus and those of Artaxerxes; and the rival monarchies at the same instant became the prey of an enemy whom they had been so long accustomed to despise. In the ten years of the administration of Omar, the Saracens reduced to his obedience thirty-six thousand cities or castles, destroyed four thousand churches or temples of the unbelievers, and edified fourteen hundred mosques for the exercise of the religion of Mahomet. One hundred years after his flight from Mecca, the arms and the reign of his succours extended from India to the Atlantic Ocean, over the various and distant provinces, which may be comprised under the names of, I. Persia; II. Syria; III. Egypt; IV. Africa; and, V. Spain. Under this general division, I shall proceed to unfold these memorable transactions; dispatching with brevity the remote and less interesting conquests of the East, and reserving a fuller narrative for those domestic countries, which had been included within the pale of the Roman empire. Yet I must excuse my own defects by a just complaint of the blindness and insufficiency of my guides. The Greeks, so loquacious in controversy, have not been anxious to celebrate the triumphs of their enemies.

enemies (10). After a century of ignorance, the first annals of the Muslims were collected in a great measure from the voice of tradition (11). Among the numerous productions of Arabic and Persian literature (12), our interpreters have selected the imperfect sketches of a more recent age (13). The art and genius of

(10) For the viiith and viiith century, we have scarcely any original evidence of the Byzantine historian, except the Chronicles of Theophanes (Theophanes Continens Chronographia, Gr. et Lat., cum notis Jacobi Guérard. Paris, 1655, in folio); and the Abridgment of Nicephorus (Nicephori Patriarchi, C. P. Brevisarium Historicum, Gr. et Lat. Paris, 1640, in folio), who both lived in the beginning of the ixth century (see Harleian Scripta, Byzant. p. 200-246). Their contemporary Placida does not seem to be more copious. After prizing the style of Nicephorus, he adds, έσείς ξάρος παλαιόν αι ταύτα και ουκ ἔχεις τούτον αὐτοκράτοραν τὰ τὰς ισχίας τὰ σύγχρονα, and only complains of his extreme brevity (Phot. Biblioth. cod. lxvi. p. 100). Some additions may be gleaned from the more recent histories of Cedrenus and Zonaras of the ixth century.

(11) Tabari, or Al Tabari, a native of Taborestan, a famous Imām of Bagdad, and the Livy of the Arabians, finished his general history in the year of the Hegira 301 (A. D. 914): At the request of his friends, he reduced a mass of 30,000 sheets to a more reasonable size. But his Arabic original is known only by the Persian and the Turkish versions. The Saracen history of Ebn Amid, or Eblam, is said to be an abridgment of the great Tabari (Ockley's Hist. of the Saracens, vol. ii. p. xxxix, and, list of authors, d'Herbelot, p. 866, 870. 1014).

(12) Besides the lists of authors framed by Pridanus (Life of Mahomet, p. 170-189.), Ockley (at the end of his second volume), and Petit de la Croix (Hist. de Gengifian, p. 525-550.), we find in the Bibliothèque Orientale Parièse, a catalogue of two or three hundred histories or chronicles of the East, of which not more than three or four are older than Tabari. A lively sketch of Oriental literature is given by Reiff (in his Prudisgamenta ad Hagi Chalise librum memoriam ad exvam Abulfedam Tabuse Syri, Lipsia, 1766); but his project and the French version of Petit de la Croix (Hist. de Timur B.c. tom. i. preface, p. xiv.) have fallen to the ground.

(13) The particular historians and geographers will be occasionally introduced. The four following titles reprezent the annals, which have been introduced me in this general narrative. 1. Annales Euthobi, Patriarcha Alexandrini, ab Eudocia de Pococke, Oxon, 1656, 2 vol. in 40. A pomoous edition of an indifferet author, translated by Pocock to gratify the Presbyterian prejudices of his friend Selden. 2. Historia Saracena Georgii Elmacini, operi et studio Thomaso Ermenius, in 40, Lugd. Batavorum, 1665. He is said to have hastily translated a corrupt MS. and his version is often deficient in style and substance. 3. Historia compendiōsa Dynastiarum ab Gregorio Abulfarago, interprete Edwardo de Pococke, in 40, Oxon, 1663. More useful for the literary than the civil history of the East. 4. Abulfedae Annales Meclemonici ad Ann. Hegiræ, ccccvi. a jfo. Jac Reiff, in 40, Lipsia, 1764. The best of our Chronicles, both for the original and version, yet how far below the name of Abulfeda. We know that he wrote at Hamah, in the viith century. The three former were Christians of the xth, xith, and xith centuries; the two first natives of Egypt, a Melchite patriarch, and a Jacobite scribe.
THE DECLINE AND FALL

history have ever been unknown to the Asiatics (14); they are ignorant of the laws of criticism; and our monkish chronicles of the same period may be compared to their most popular works, which are never vivified by the spirit of philosophy and freedom. The Oriental library of a Frenchman (15) would instruct the most learned mufti of the East; and perhaps the Arabs might not find in a single historian, so clear and comprehensive a narrative of their own exploits, as that which will be deduced in the ensuing sheets.

I. In the first year of the first caliph, his lieutenant Caled, the sword of God, and the scourge of the infidels, advanced to the banks of the Euphrates, and reduced the cities of Anbar and Hira. Westward of the ruins of Babylon, a tribe of sedentary Arabs had fixed themselves on the verge of the desert; and Hira was the seat of a race of kings who had embraced the Christian religion, and reigned above five hundred years under the shadow of the throne of Persia (16). The last of the Mardars was defeated and slain by Caled; his son was sent a captive to Medina; his nobles bowed before the successor of the prophet; the people was tempted by the example and success of their country-

(15) Bibliothèque Orientale, par M. d'Herbelot, in folio, Paris, 1697. For the character of the respectable author, consult his friend Thévenot (Voyages du Levant, part i. ch. 1.). His work is an agreeable miscellany, which must gratify every taste; but I never can digest the alphabetical order, and I find him more satisfactory in the Persian than in the Arabic history. The recent supplement from the papers of M. M. Vifelot and Gailand (in folio, La Haye, 1779) is of a different cast, a medley of tales, proverbs, and Chinefe antiquities.

(16) Pocock will explain the chronology (Specimen, Hift. Arabum, p. 66—74.), and d'Anville the Geography (l'Euphrate et le Tigre, p. 122.), of the Dynasty of the Almohads. men; and the caliph accepted as the first fruits of foreign conquest, an annual tribute of seventy thousand pieces of gold. The conquerors, and even their historians, were astonished by the dawn of their future greatness: "In the same year, says Elmacin, "Caed was fought many single battles; an immense multitude of the infidels was slaughtered; and spoils, infinite and innumerable, were acquired by the victorious Moslems (17)." But the invincible Caed was soon transferred to the Syrian war: the invasion of the Persian frontier was conducted by less active or less prudent commanders: the Saracens were repulsed with loss in the passage of the Euphrates; and, though they chastised the insolent pursuit of the Magians, their remaining forces still remained in the desert of Babylon.

The indignation and fear of the Persians suspended for a moment their intestine divisions. By the unanimous sentence of the priests and nobles, their queen Arzema was deposed; the sixth of the transient usurpers who had arisen and vanished in three or four years, since the death of Chosroes and the retreat of Heraclius. Her tiara was placed on the head of Yezelegard, the grandson of Chosroes; and the same era, which coincides with an astronomical period (18), has recorded the fall of the

In a great revolution of 1440 years, this intercalation was successively removed from the first to the twelfth month; but Hyde and Pierres are involved in a profound controversy, whether the twelve, or only eight of these changes were accomplished before the era of Yezelegard, which is unanimously fixed to the 16th of June A.D. 632. How laboriously does the curious spirit of Europe explore the darkest and most distant

the Sassanian dynasty and the religion of Zoro-
after (19). The youth and inexperience of the
prince, he was only fifteen years of age, declined
a perilous encounter: the royal standard was de-
liberated into the hands of his general Rusufam;
and a remnant of thirty thousand regular troops
was swelled in truth, or in opinion, to one hun-
dred and twenty thousand subjects, or allies, of
the great king. The Moflems, whose numbers
were reinforced from twelve to thirty thousand,
had pitched their camp in the plains of Cadefia
(20): and their line, though it consisted of fewer
men, could produce more soldiers than the un-
wieldy host of the infidels. I shall here observe
what I must often repeat, that the charge of the
Arabs was not like that of the Greeks and Ro-
mans, the effort of a firm and compact infantry:
their military force was chiefly formed of cavalry
and archers; and the engagement, which was
often interrupted and often renewed by single
combats—and flying skirmishes, might be pro-
tracted without any decisive event to the con-
tinuance of several days. The periods of the bat-
tle of Cadefia were distinguished by their pecu-
liar appellations. The first, from the well-timed
appearance of six thousand of the Syrian bre-
thren, was denominated the day of succour.
The day of confusion might express the disorder
of one, or perhaps of both, of the contending

armies. The third, a nocturnal tumult, received the whimsical name of the night of barking, from the discordant clamours, which were compared to the inarticulate sounds of the fiercest animals. The morning of the succeeding day determined the fate of Persia; and a reasonable whirlwind drove a cloud of dust against the faces of the unbelievers. The clangor of arms was re-echoed to the tent of Rustam, who, far unlike the ancient hero of his name, was gently reclining in a cool and tranquil shade, amidst the baggage of his camp, and the train of mules that were laden with gold and silver. On the sound of danger he started from his couch; but his flight was overtaken by a valiant Arab, who caught him by the foot, struck off his head, hoisted it on a lance, and instantly returning to the field of battle, carried slaughter and dismay among the thickest ranks of the Persians. The Saracens confess a loss of seven thousand five hundred men; and the battle of Cadesia is justly described by the epithets of obstinate and atrocious (21). The standard of the monarchy was overthrown and captured in the field—a leathern apron of a blacksmith, who, in ancient times, had arisen the deliverer of Persia; but this badge of heroic poverty was disguised, and almost concealed by a profusion of precious gems (22). After this victory, the wealthy province of Irak or Assyria submitted to the caliph, and his conquests were firmly established by the speedy foundation of Bassora (23), a place which ever

ever commands the trade and navigation of the Persians. At the distance of fourscore miles from the Gulf, the Euphrates and Tigris unite in a broad and direct current, which is aptly styled the river of the Arabs. In the mid-way, between the junction and the mouth of these famous streams, the new settlement was planted on the western bank: the first colony was composed of eight hundred Moslems; but the influence of the situation soon reared a flourishing and populous capital. The air, though excessively hot, is pure and healthy: the meadows are filled with palm-trees and cattle; and one of the adjacent valleys has been celebrated among the four paradises or gardens of Asia. Under the first caliphs, the jurisdiction of this Arabian colony extended over the southern provinces of Persia: the city has been sanctified by the tombs of the companions and martyrs; and the vessels of Europe still frequent the port of Bassyra, as a convenient station and passage of the Indian trade.

After the defeat of Cadesia, a country intersected by rivers and canals might have opposed an insuperable barrier to the victorious cavalry; and the walls of Ctesiphon or Madayn, which had resisted the battering-rams of the Romans, would not have yielded to the darts of the Saracens. But the flying Persians were overcome by the belief, that the last day of their religion and empire was at hand: the strongest posts were abandoned by treachery or cowardice; and the king, with a part of his family and treasures, escaped to Holwan at the foot of the Median hills. In the third month after the battle, Said, the lieutenant of Omar, passed the Tigris.

without opposition; the capital was taken by assault; and the disorderly resistence of the people gave a keener edge to the fabres of the Mo-lemens, who shouted with religious transport, "This is the white palace of Chosroes, this is " the promise of the apostle of God!" The naked robbers of the desert were suddenly enriched beyond the measure of their hope or knowledge. Each chamber revealed a new treasure secreted with art, or ostentatiously displayed; the gold and silver, the various wardrobes and precious furniture, surpassed (says Abulfeda) the estimate of fancy or numbers; and another historian defines the untold and almost infinite mafs, by the fabulous computation of three thousands of thousands of thousands of pieces of gold (24). Some minute though curious facts represent the contrast of riches and ignorance. From the remote islands of the Indian Ocean, a large provision of camphire (25) had been imported, which is employed with a mixture of wax to illuminate the palaces of the East. Strangers to the name and properties of that odoriferous gum, the Saracens, mistaking it for salt, mingled the camphire in their bread, and were astonished at the bitterness of the taste. One of the apartments of the palace was decorated with a carpet of silk, sixty cubits in length, and as many in breadth: a paradise or garden was depicted on the ground; the flowers, fruits, and shrubs

Yet I still suspect that the extravagant numbers of Elmacia may be the error, not of the text, but of the version. The best translators from the Greek, for instance, I find to be very poor arithmeticians.

(25) The Camphire tree grows in China and Japan; but many hundred weight of those meanser sorts are exchanged for a single pound of the more precious gum of Borneo and Sumairs (Raynal, Hist. Philosoph. tom. i. p. 365—366. Dictionnaire d'Hist. Naturelle par Bontare. Müller's Gardener's Dictionarly). These may be the islands of the first name from whence the Arabs imported their camphire (Oeograph. Nub. p. 34, 35. d'Herbelot, p. 331.).
were imitated by the figures of the gold embroidery, and the colours of the precious stones; and the ample square was encircled by a variegated and verdant border. The Arabian general persuaded his soldiers to relinquish their claim, in the reasonable hope, that the eyes of the caliph would be delighted with the splendid workmanship of nature and industry. Regardless of the merit of art and the pomp of royalty, the rigid Omar divided the prize among his brethren of Medina: the picture was destroyed; but such was the intrinsic value of the materials, that the share of Ali alone was sold for twenty thousand drams. A mule that carried away the tiara and cuirass, the belt and bracelets of Chosroes, was overtaken by the pursuers; the gorgeous trophy was presented to the commander of the faithful, and the graven of the companions condescended to smile when they beheld the white beard, hairy arms, and uncouth figure of the veteran, who was invested with the spoils of the great king (26). The sack of Ctesiphon was followed by its desertion and gradual decay. The Saracens disliked the air and situation of the place, and Omar was advised by his general to remove the seat of government to the western side of the Euphrates. In every age the foundation and ruin of the Assyrian cities has been easy and rapid; the country is destitute of stone and timber, and the most solid structures (27) are composed of bricks baked in the sun, and joined by a cement of the native bitumen. The

name of Cufa (28) describes an habitation of reeds and earth; but the importance of the new capital was supported by the numbers, wealth, and spirit of a colony of veterans; and their licentiousness was indulged by the wildest caliphs who were apprehensive of provoking the revolt of an hundred thousand swords: "Ye "men of Cufa," said Ali, who solicited their aid, "you have been always conspicuous by "your valour. You conquered the Persian "king, and scattered his forces, till you had "taken possession of his inheritance." This mighty conquest was atchieved by the battles of Jalula and Nehavend. After the loss of the former, Yezdegerd fled from Holwan and concealed his shame and despair in the mountains of Farsistan, from whence Cyrus had descended with his equal and valiant companions. The courage of the nation survived that of the monarch; among the hills to the south of Ecbatana or Hamadan, one hundred and fifty thousand Persians made a third and final stand for their religion and country; and the decisive battle of Nehavend was styled by the Arabs the victory of victories. If it be true that the flying general of the Persians was stopt and overtaken in a crowd of mules and camels laden with honey, the incident, however flight or singular, will denote the luxurious impediments of an Oriental army (29).

The geography of Persia is darkly delineated by the Greeks and Latins; but the most illustrious of her cities appear to be more ancient than the invasion of the Arabs. By the reduction of

Hamadan and Isphahan, of Caspian, Tauris, and Rei, they gradually approached the shores of the Caspian Sea; and the orators of Mecca might applaud the success and spirit of the faithful, who had already lost sight of the northern bear, and had almost transcended the bounds of the habitable world (30). Again turning towards the West and the Roman empire, they repassed the Tigris over the bridge of Mosul, and, in the captive provinces of Armenia and Mesopotamia, embraced their victorious brethren of the Syrian army. From the palace of Madayn their Eastern progress was not less rapid or extensive. They advanced along the Tigris, and the Gulf; penetrated through the passes of the mountains into the valley of Estachar or Persepolis; and profaned the last sanctuary of the Magian empire. The grandiose of Chofroes was nearly surprised among the falling columns and mutilated figures; a sad emblem of the past and present fortune of Persia (31): he fled with accelerated haste over the desert of Kirman, implored the aid of the warlike Segestans, and sought an humble refuge on the verge of the Turkish and Chinese power. But a victorious army is insensible of fatigue: the Arabs divided their forces in the pursuit of a timorous enemy; and the caliph Othman promised the government of Chorasan to the first general who should enter that large and populous country, the kingdom of

(30) It is in such a style of ignorance and wonder that the Athenian orator describes the Arctic conquests of Alexander, who never advanced beyond the shores of the Caspian. (before Christ 330), in the autumn (Taylor, prefat. p. 370 &c.), about a year after the battle of Arbela; and Alexander, in the pursuit of Darius, was marching towards Hyrcania and Bactrians.

(31) We are indebted for this curious particular to the Dynasties of Abulpharagius, p. 116; but it is needless to prove the identity of Estachar and Persepolis (d'Herbelot, p. 327); and still more needless to copy the drawings and descriptions of Sir John Chardin, or Cosinille le Bruyn.

The ancient Bactrians.—The condition was accepted; the prize was deserved; the standard of Mahomet was planted on the walls of Herat, Merou, and Balch, and the successful leader neither halted nor repose till his foaming cavalry had tasted the waters of the Oxus. In the public anarchy, the independent governors of the cities and castles obtained their separate capitulations: the terms were granted or imposed by the esteem, the prudence, or the compassion, of the victors; and a simple profession of faith established the distinction between a brother and a slave. After a noble defence, Harmozan, the prince or satrap of Ahwaz and Susa, was compelled to surrender his person and his state to the discretion of the caliph; and their interview exhibits a portrait of the Arabian manners. In the presence, and by the command, of Omar, the gay Barbarian was despoiled of his silken robes embroidered with gold, and of his tiara bedecked with rubies and emeralds: “Are you now sensible,” said the conqueror to his naked captive; “are you now sensible of the judgment of God, and of the different rewards of infidelity and obedience?” “Alas!” replied Harmozan, “I feel them too deeply. In the days of our common ignorance, we fought with the weapons of the flesh, and my nation was superior. God was then neuter: since he has espoused your quarrel, you have subverted our kingdom and religion.” Oppressed by this painful dialogue, the Persian complained of intolerable thirst, but discovered some apprehension left he should be killed whilst he was drinking a cup of water. “Be of good courage,” said the caliph, “your life is safe till you have drank this water:” the crafty satrap accepted the assurance, and instantly dashed the vase against the ground. Omar would have avenged the deceit; but his companions represented

represented the sanctity of an oath; and the speedy conversion of Harmozan entitled him not only to a free pardon, but even to a stipend of two thousand pieces of gold. The administration of Persia was regulated by an actual survey of the people, the cattle, and the fruits of the earth (32); and this monument which attests the vigilance of the caliphs, might have instructed the philosophers of every age (33).

The flight of Yezeqerd had carried him beyond the Oxus, and as far as the Jaxartes, two rivers (34) of ancient and modern renown, which descend from the mountains of India towards the Caspian Sea. He was hospitably entertained by Tarkhan, prince of Fergana (35), a fertile province on the Jaxartes; the king of Samarcand, with the Turkish tribes of Sogdiana and Scythia, were moved by the lamentations and promises of the fallen monarch; and he solicited by a suppliant embassay, the more solid and powerful friendship of the emperor of China (36). compared with the Antonines of Rome: his people enjoyed the blessings of prosperity and peace; and his dominion was acknowledged by forty-four hords of the Barbarians of Tartary. His last garrisons of Cashgar and Khoten maintained a frequent intercourse with their neighbours of the Jaxartes and Oxus; a recent colony of Persians had introduced into China the astronomy of the Magi; and Taitsong might be alarmed by the rapid progress and dangerous vicinity of the Arabs. The influence, and perhaps the supplies, of China revived the hopes of Yezdegerd and the zeal of the worshippers of fire; and he returned with an army of Turks to conquer the inheritance of his fathers. The fortunate Moslems, without unsheathing their swords, were the spectators of his ruin and death. The grandson of Chosroes was betrayed by his servant, insulted by the seditious inhabitants of Merou, and oppressed, defeated, and pursued, by his Barbarian allies. He reached the banks of a river, and offered his rings and bracelets for an instant passage in a miller's boat. Ignorant or insensible of royal distress, the rustic replied, that four drams of silver were the daily profit of his mill, and that he would not suspend his work unless the loss was repaid. In this moment of hesitation and delay, the last of the Sassanian kings was overtaken and slaughtered by the Turkish cavalry, in the nineteenth year of his unhappy reign (38). His son Firuz, an humble client of the Chinese emperor, accepted the station of captain of his guards; and the Magian worship was long preferred by a colony of loyal exiles in the province of Bucharia.

(38) I have endeavoured to harmonize the various narratives of Elmasin (Hist Saracen. p. 371), Abulpharagius (Dynast. p. 116), Abulfeda (Annal. p. 74. 79), and d'Herbelot (p. 485). The end of Yezdegerd was not only unfortunate but obscure.
THE DECLINE AND FALL

His grandson inherited the regal name; but after a faint and fruitless enterprise, he returned to China, and ended his days in the palace of Sigan. The male line of the Sassanides was extinct; but the female captives, the daughters of Persia, were given to the conquerors in servitude or marriage; and the race of the caliphs and imams was ennobled by the blood of their royal mothers (39).

After the fall of the Persian kingdom, the river Oxus divided the territories of the Saracens and of the Turks. This narrow boundary was soon overleaped by the spirit of the Arabs: the governors of Chorasan extended their successive inroads; and one of their triumphs was adorned with the bustkin of a Turkish queen, which the dropt in her precipitate flight beyond the hills of Bochara (40). But the final conquest of Transoxiana (41), as well as of Spain, was reserved for the glorious reign of the inactive Walid; and the name of Catibah, the camel-driver, declares the origin and merit of his successful lieutenant. While one of his colleagues displayed the first Mahometan banner on the banks of the Indus, the spacious regions be-

(39) The two daughters of Yezdegerd married Hassan, the son of Ali, and Mohammed, the son of Abubaker; and the first of these was the father of a numerous progeny. The daughter of Shirouz became the wife of the caliph Walid, and their son Yezid derived his genuine or fabulous descent from the Chosroes of Persia, the Caesars of Rome, and the Chagans of the Turks or Avars (d'Herbelot, Bibl. Orientale, p. 96. 487).

(40) It was valued at 2000 pieces of gold, and was the prize of Obeidollah, the son of Ziyad, a name afterwards infamous by the murder of Hafein (Ockley's History of the Saracen, vol. ii. p. 142, 143.). His brother Salem was accompanied by his wife, the first Arabian woman (A. D. 680.) who passed the Oxus: she borrowed, or rather stole, the crown and jewels of the princes of the Sogdians (p. 234. 235.).

(41) A part of Abulfeda's geography is translated by Greaves, inserted in Hudson's collection of the minor geographers (tom. iii.), and entitled, Descriptio Chorasmiae et Mesopotamiae, id est, regionum extra fluvium Oxum, p. 80. The name of Transoxiana, softer in sound, equivalent in sense, is aptly used by Petit de la Croix (Hist. de Géorgi- can, &c.), and some modern Orientalists, but they are mistaken in ascribing it to the writers of antiquity.

twaen the Oxus, the Jazartes, and the Caspian Sea, were reduced by the arms of Catibah to the obedience of the prophet and of the caliph (42). A tribute of two millions of pieces of gold was imposed on the infidels; their idols were burnt or broken; the Musulman chief pronounced a sermon in the new mosque of Carizme; after several battles, the Turkum hordes were driven back to the desert; and the emperors of China solicited the friendship of the victorious Arabs. To their industry, the prosperity of the province, the Sogdiana of the ancients, may in a great measure be ascribed; but the advantages of the soil and climate had been understood and cultivated since the reign of the Macedonian kings. Before the invasion of the Saracens, Carizme, Bochara, and Samarcand, were rich and populous under the yoke of the shepherds of the north. These cities were surrounded with a double wall; and the exterior fortification, of a larger circumference, inclosed the fields and gardens of the adjacent district. The mutual wants of India and Europe were supplied by the diligence of the Sogdian merchants; and the inestimable art of transforming linen into paper, has been diffused from the manufacture of Samarcand over the western world (43).

II. No sooner had Abubeker restored the unity of faith and government, than he dispatched a circular letter to the Arabian tribes, "In the name of the most merciful God, to the rest of the true believers. Health and hap-

(42) The conquests of Catibah are faintly marked by Elmacin (Hist. Saracen. p. 84.), d'Herbelot (Bibl. Orient. Catibab, Samarcand Kalide.), and de Guignes (Hist. des Huns, tom. i. p. 58, 59.)

(43) A curious description of Samarcand is inserted in the Bibliotheca Arabico-Hispiana, tom. i. p. 208, &c. The librarian Casiri (tom. ii. 9.) relates, from credible testimony, that paper was first imported from China to Samarcand, A. H. 30, and invented, or rather introduced, at Mecca. A. H. 88. The Escorial library contains paper MSS. as old as the 4th or 5th century of the Hegira.

“piness, and the mercy and blessing of God be

I pray for his prophet Mahomet. This is to

dour which they had kindled in every province;
and the camp of Medina was successively filled
with the intrepid bands of the Saracens, who
panted for action, complained of the heat of the
season and the scarcity of provisions; and
accused with impatient murmurs the de-
lays of the caliph. As soon as their numbers
were complete, Abubeker ascended the hill,

cess of their undertaking. In person, and on foot,
he accompanied the first day’s march; and when
the blustering leaders attempted to dismount,
the caliph removed their scruples by a de-
claration, that those who rode, and those
who walked in the service of religion, were
equally meritorious. His instruction (45) to

(44) A separate history of the conquest of Syria has been composed by
Al Wakidi, cali of Bagdad, who was born A. D. 748, and died A. D.
824; he likewise wrote the conquest of Egypt, of Diarbekir, &c.
Above the meagre and recent chronicles of the Arabs, Al Wakidi
has the double merit of antiquity and copiousness. His tales and traditi-
on are afforded pictures of the men and the times. Yet his narrative
is too often defective, trifling, and improbable. Till something better
shall be found, his learned and spirited interpreter (Ockley, in his history
of the Saracens, vol i. p. 21—342.) will not defer the petulant an-
ecdote version of Reiske (Prodigies et Hagji Chalil et Tabulae, p. 235.)
I am sorry to think that the labours of Ockley were consummated in a
jail (see his two prefaces to the 1st vol. A. D. 1708, to the 2d 1718,
with the help of authors at the end.)

(45) The instructions, &c. of the Syrian war, are described by Al
Wakidi and Ockley, tom. i. p. 22—27, &c. In the sequel it is neces-
sary to contract, and needless to quote their circumstantial narrative.
My obligations to others shall be noticed.

the chiefs of the Syrian army, were inspired by the warlike fanaticism which advances to seize, and affects to despise, the objects of earthly ambition. "Remember," said the successor of the prophet, "that you are always in the presence of God, on the verge of death, in the assurance of judgment, and the hope of paradise. Avoid injustice and oppression; consult with your brethren, and study to preserve the love and confidence of your troops. When you fight the battles of the Lord, acquit yourselves like men, without turning your backs; but let not your victory be stained with the blood of women or children. Destroy no palm-trees, nor burn any fields of corn. Cut down no fruit-trees, nor do any mischief to cattle, only such as you kill to eat. When you make any covenant or article, stand to it, and be as good as your word. As you go on, you will find some religious persons who live retired in monasteries, and propose to themselves to serve God that way: let them alone, and neither kill them nor destroy their monasteries (46): And you will find another sort of people that belong to the synagogue of Satan, who have shaven crowns (47); be sure you cleave their skulls, and give them no quarter till they either turn "Mahometans or pay tribute." All profane or frivolous conversation; all dangerous recollection of ancient quarrels was severely prohib-

(46) Notwithstanding this precept, M. Paw (Recherches sur les Egyptiens, tom. ii. p. 192. edit. Lapienne) represents the Bedoueens as the implacable enemies of the Christian monks. For my own part I am more inclined to suspect the avarice of the Arabian robbers, and the prejudices of the German philosopher.

(47) Even in the seventh century, the monks were generally laymen; they wore their hair long and dishevelled, and shaved their heads when they were ordained priests. The circular tonsure was sacred and mysterious: it was the crown of thorns; but it was likewise a royal diadem, and every priest was a king, &c. (Thomassin, Discipline de l'Eglise, tom. ii. p. 721—758. especially p. 737, 738.)

bited among the Arabs; in the tumult of a
camp, the exercises of religion were assiduously
practised; and the intervals of action were em-
ployed in prayer, meditation, and the study of
the Koran. The abuse, or even the use of
wine was chastised by fourscore strokes on the
foals of the feet, and in the fervour of their
primitive zeal many secret sinners revealed their
fault, and solicited their punishment. After
some hesitation the command of the Syrian
army was delegated to Abu Obeidah, one of the
fugitives of Mecca and companions of Mahom-
et, whose zeal and devotion were unflagged,
without being abated, by the singular mildness
and benevolence of his temper. But in all the
emergencies of war, the soldiers demanded the
superior genius of Caled; and whoever might
be the choice of the prince, the sword of God
was both in fact and fame the foremost leader
of the Saracens. He obeyed without reluct-
tance; he was consulted without jealousy; and
such was the spirit of the man, or rather of the
times, that Caled professed his readiness to serve
under the banner of the faith, though it were
in the hands of a child or an enemy. Glory,
and riches, and dominion, were indeed pro-
mised to the victorious Musulman; but he was
carefully instructed, that if the goods of this
life were his only incitement, they likewise would
be his only reward.

tional right. The country was invaded by the various benefits of trade, by the vigilance of the emperors it was covered with a line of forts; and the populous cities of Gerasa, Philadelphia; and Bosra (49), were secure, at least from a surprisal, by the solid structure of their walls. The last of these cities was the eighteenth station from Medina: the road was familiar to the caravans of Hejaz and Irak, who annually visited this plenteous market of the province; and the desert: the perpetual jealousy of the Arabs had trained the inhabitants to arms; and twelve thousand horse could fall from the gates of Bosra, an appellation which signifies, in the Syrian language, a strong tower of defence... Encouraged by their first success against the open towns and flying parties of the borders, a detachment of four thousand Moslems presumed to summon and attack the fortress of Bosra. They were oppressed by the numbers of the Syrians; they were sowed by the presence of Caled, with fifteen hundred horse: he blamed the enterprise, restored the battle, and rescued his friend, the venerable Serjabil, who had vainly invoked the unity of God and the promises of the apostle. After a short repose, the Moslems performed their ablutions with sand instead of water (50); and the morning prayer was recited by Caled before they mounted on horseback. Confident in their strength, the people of Bosra threw open their gates, drew their forces into the plain;

(49) With Gerasa and Philadelphia, Ampudius praises the fortifications of Bosra, firmitate cautiissima. They deserve the same praise in the time of Abulfeda (Tabul. Syriz. p. 99), who describes this city, the metropolis of Hawran (Aramith), four days' journey from Damascus. The Hebrew etymology I learn from Reland, Palestinum tom. ii. p. 666.

(50) The apostles of a nearer and an army was obliged to allow this ready succedaneum for water (Koran, c. iii. p. 66; c. v. p. 83); but the Arabian and the Persian califs have embarrassed him in permission with many niceties and distinctions (Reland de Relig. Mohammed, l. i. p. 82; 83. Chardin, Voyages en Perse, tom. iv.).
and swore to die in the defence of their religion. But a religion of peace was incapable of withstanding the fanatic cry of "Fight, fight! Peace, paradise!" that re-echoed in the ranks of the Saracens; and the uproar of the town, the ringing of bells (51), and the exclamations of the priests and monks encreased the dismay and disorder of the Christians. With the loss of two hundred and thirty men, the Arabs remained masters of the field; and the ramparts of Bosra, in expectation of human or divine aid, were crowned with holy crosses and consecrated banners. The governor Romanus had recommended an early submission: despised by the people, and degraded from his office, he still retained the desire and opportunity of revenge. In a nocturnal interview, he informed the enemy of a subterraneous passage from his house under the wall of the city; the son of the caliph, with an hundred volunteers, were committed to the faith of this new ally, and their successful intrepidity gave an easy entrance to their companions. After Caled had imposed the terms of servitude and tribute, the apostate or convert avowed in the assembly of the people his meritorious treason. "I renounce your society," said Romanus, "both in this world, and the world to come. And I deny him that was crucified, and whosoever worships him. And I choose God for my Lord, Islam for my faith, Mecca for my temple, the Moslems for my brethren, and Mahomet for my prophet; who was sent to lead us into the right way, and to

(51) The bells rung! Ockley, vol. i. p. 38. Yet I much doubt whether this expression can be justified by the text of Al Wakidi, or the practice of the times. Ad Grac. says the learned Ducange (Glossar. med. et in fin. Graeciat. tom. i. p. 774.) campanarum usus ferius transibat etiamnum rarissimus est. The oldest example which he can find in the Byzantine writers is of the year 1040; but the Venetians pretend, that they introduced bells at Constantinople in the 18th century.

“exalt the true religion in spite of those who
join partners with God.”

The conquest of Bosra, four days journey from Damascus (52), encouraged the Arabs to besiege the ancient capital of Syria (53). At some distance from the walls, they encamped among the groves and fountains of that delicious territory (54), and the usual offer of the Mahometan faith, of tribute or of war, was proposed to the refolute citizens, who had been lately strengthened by a reinforcement of five thousand Greeks. In the decline as in the infancy of the military art, an hostile defiance was frequently offered and accepted by the generals themselves (55): many a lance was shivered in the plain of Damascus, and the personal prowess of Caled was signalized in the first sally of the besieged. After an obstinate combat, he had overthrown and made prisoner one of the Christian leaders, a stout and worthy antagonist. He instantly mounted a fresh horse, the gift of the governor of l’almyra, and pushed forwards

Julian, epit. xxiv. p. 392. These splendid epithets are occasioned by the sagacity of Damascus, of which the author feasts an hundred to his friend Serapion, and this rhetorical theme is inferred by Petavius, Spanheim, &c. (p. 390—396.) among the genuine epistles of Julian. How could they overlook that the writer is an inhabitant of Damascus (he thrice affirms, that this peculiar fig grows only παρὰ αὐτό), a city which Julian never entered or approached?

to the front of the battle. "Repose yourself, "for a moment," said his friend Derar, "and permi t me to supply your place: you are fatigued with fighting with this dog." "O Derar!" replied the indefatigable Saracen, "we shall rest in the world to come. He that labours to-day, shall rest to-morrow." With the same unabated ardour, Caled answered, encountered and vanquished a second champion; and the heads of his two captives who refused to abandon their religion were indignantly hurled into the midst of the city. The event of some general and partial actions reduced the Damascenes to a cloister defence: but a messenger whom they dropped from the walls, returned with the promise of speedy and powerful succour, and their tumultuous joy conveyed the intelligence to the camp of the Arabs. After some debate it was resolved by the generals to raise or rather to suspend the siege of Damascus, till they had given battle to the forces of the emperor. In the retreat Caled would have chosen the more perilous station of the rear-guard; he modestly yielded to the wishes of Abu Obeidah. But in the hour of danger he flew to the rescue of his companion, who was rudely pressed by a sally of six thousand horse and ten thousand foot, and few among the Christians could relate at Damascus the circumstances of their defeat. The importance of the contest required the junction of the Saracens who were dispersed on the frontiers of Syria and Palestine; and I shall transcribe one of the circular mandates which was addressed to Amrou the future conqueror of Egypt: "In the name of the most merciful God from Caled to Amrou, health and happiness. Know that thy brethren the Moors design to march to Aiznadin, where there is an army of seventy thousand Greeks, who purpose

obeyed, and the forty-five thousand Moslems

their activity and zeal.

About four years after the triumphs of the
Persian war, the repose of Heraclius and the
empire was again disturbed by a new enemy; the
power of whose religion was more strongly felt
than it was clearly understood by the Christians
of the East. In his palace of Constantinople or
Antioch, he was awakened by the invasion of
Syria, the loss of Bosra, and the danger of Da-
mascus. An army of seventy thousand vege-
trains, or new levies, was assembled at Hems or
Emesa, under the command of his general Wer-
dan (57); and these troops, consisting chiefly
of cavalry, might be indifferently styled either
Syrians, or Greeks, or Romans: Syrians from
the place of their birth or warfare; Greeks from
the religion and language of their sovereign; and
Romans, from the proud appellation which was
still profaned by the successors of Constantine:

(56) These words are a text of the Koran, c. ix. 32. lxi. 5. Like our
fanatics of the last century, the Moslems, on every familiar, or impor-
tant occasion, spoke the language of their scriptures; a style more na-
ural in their mouths, than the Hebrew idiom transplanted into the climate
and dialect of Britain.

(57) The name of Werdan is unknown to Theophanes, and, though
it might belong to an Armenian chief, has very little of a Greek appear-
or sound. If the Byzantine historians have mangled the Oriental names,
the Arabs, in this instance, likewise have taken ample revenge on their
enemies. In transposing the Greek character from right to left, might
they not produce, from the familiar appellation of Andrew, something
like the hangman Werdan?
THE DECLINE AND FALL.

On the plain of Aiznadin, as Werdan rode on a white mule decorated with gold chains, and surrounded with ensigns and standards, he was surprised by the near approach of a fierce and naked warrior, who had undertaken to view the state of the enemy. The adventurous valour of Derar was inspired, and has perhaps been adorned, by the enthusiasm of his age and country. The hatred of the Christians, the love of spoil, and the contempt of danger, were the ruling passions of the audacious Saracen; and the prospect of instant death could never shake his religious confidence, or ruffle the calmness of his resolution, or even suspend the frank and martial pleasantries of his humour. In the most hopeless enterprises, he was bold, and prudent, and fortunate: after innumerable hazards, after being thrice a prisoner in the hands of the infidels, he still survived to relate the achievements, and to enjoy the rewards, of the Syrian conquest. On this occasion, his single lance maintained a flying fight against thirty Romans, who were detached by Werdan; and after killing or unhorsing seventeen of their number, Derar returned in safety to his applauding brethren. When his rashness was mildly censured by the general, he excused himself with the simplicity of a soldier. “Nay,” said Derar, “I did not begin first: but they came out to take me, and I was afraid that God should see me turn my back; and indeed I fought in good earnest, and without doubt God assisted me against them; and had I not been apprehensive of disobeying your orders, I should not have come away as I did; and I perceive already that they will fall into our hands.” In the presence of both armies, a venerable Greek advanced from the ranks with a liberal offer of peace; and the departure of the Saracens would have been purchased.
chased by a gift to each soldier, of a turban, a robe, and a piece of gold; ten robes, and an hundred pieces to their leader; one hundred robes, and a thousand pieces to the caliph. A smile of indignation expressed the refusal of Caled. "Ye Christian dogs, you know your option; the koran, the tribute, or the sword. We are a people whose delight is in war, rather than in peace; and we despise your pitiful alms, since we shall be speedily masters of your wealth, your families, and your persons." Notwithstanding this apparent disdain, he was deeply conscious of the public danger: those who had been in Persia, and had seen the armies of Chosroes, confessed that they never beheld a more formidable array. From the superiority of the enemy, the artful Saracen derived a fresh incentive of courage: "You see before you, said he, the united force of the Romans, you cannot hope to escape, but you may conquer Syria in a single day. The event depends on your discipline and patience. Reserve yourselves till the evening. It was in the evening that the prophet was accustomed to vanquish." During two successive engagements, his temperate firmness sustained the darts of the enemy, and the murmurs of his troops. At length, when the spirits and quivers of the adverse line were almost exhausted, Caled gave the signal of onset and victory. The remains of the Imperial army fled to Antioch, or Caesarea, or Damascus; and the death of four hundred and seventy Moors was compensated by the opinion that they had sent to hell above fifty thousand of the infidels. The spoil was inestimable; many banners and croffes of gold and silver, precious stones, silver and gold chains, and innumerable suits of the richest armour and apparel. The general distribution...
tion was postponed till Damascus should be taken; but the seizable supply of arms became the instrument of new victories. The glorious intelligence was transmitted to the throne of the caliph, and the Arabian tribes, the coldest or most hostile to the prophet's mission, were eager and importunate to share the harvest of Syria.

The sad tidings were carried to Damascus by the speed of grief and terror; and the inhabitants beheld from their walls the return of the heroes of Aiznadin. Amrou led the van at the head of nine thousand horse: the bands of the Saracens succeeded each other in formidable review; and the rear was closed by Caled in person, with the standard of the black eagle. To the activity of Derar he entrusted the commission of patrolling round the city with two thousand horse, of scouring the plain, and of intercepting all succour or intelligence. The rest of the Arabian chiefs were fixed in their respective stations before the seven gates of Damascus; and the siege was renewed with fresh vigour and confidence. The art, the labour, the military engines, of the Greeks and Romans are seldom to be found in the simple, though successful, operations of the Saracens: it was sufficient for them to invest a city with arms, rather than with trenches; to repel the fallies of the besieged; to attempt a stratagem or an assault; or to expect the progress of famine and discontent. Damascus would have acquiesced in the trial of Aiznadin, as a final and peremptory sentence between the emperor and the caliph: her courage was rekindled by the example and authority of Thomas, a noble Greek, illustrious in a private condition by the alliance of Hera-

clius (58). The tumult and illumination of the night proclaimed the design of the morning fallly; and the Christian hero, who affected to despise the enthusiasm of the Arabs, employed the resource of a similar superstition. At the principal gate, in the sight of both armies, a lofty crucifix was erected; the bishop with his clergy, accompanied the march, and laid the volume of the New Testament before the image of Jesus; and the contending parties were scandalised or edified by a prayer, that the Son of God would defend his servants and vindicate his truth. The battle raged with incessant fury; and the dexterity of Thomas (59), an incomparable archer, was fatal to the boldest Saracens, till their death was avenged by a female heroine. The wife of Aban, who had followed him to the holy war, embraced her expiring husband. "Happy, said "she," happy art thou, my dear; thou art gone to "thy Lord who first joined us together, and "then parted us asunder. I will revenge thy "death, and endeavour to the utmost of my "power to come to the place where thou art, "because I love thee. Henceforth shall no man "ever touch me more, for I have dedicated "myself to the service of God." Without a "groan, without a tear, she washed the corpse of "her husband, and buried him with the usual "rites. Then grasping the manly weapons, which "in her native land she was accustomed to wield, "the intrepid widow of Aban fought the place "where his murderer fought in the thickest of

(58) Vanity prompted the Arabs to believe, that Thomas was the son-in-law of the emperor. We know the children of Heraclius by his two wives; and his anguish daughter would not have married in exile at Damascus (see Ducange, Fam. Byzantia. p. 118, 119.). Had he been less religious, I might only suspect the legitimacy of the damsel.

(59) Al Wakidi (Ockley, p. 101.) says, "with poisoned arrows;" but this savage invention is so repugnant to the practice of the Greeks and Romans, that I must suspect, on this occasion, the malevolent credulity of the Saracens.
the battle. Her first arrow pierced the hand of his standard-bearer; her second wounded Thomas in the eye; and the fainting Christians no longer beheld their ensign or their leader. Yet the generous champion of Damascus refused to withdraw to his palace: his wound was dressed on the rampart; the fight was continued till the evening; and the Syrians rested on their arms. In the silence of the night, the signal was given by a stroke on the great bell; the gates were thrown open, and each gate discharged an impetuous column on the sleeping camp of the Saracens. Caled was the first in arms; at the head of four hundred horse he flew to the post of danger, and the tears trickled down his iron cheeks, as he uttered a fervent ejaculation: "O God, who never sleepest, look upon thy servants, and do not deliver them into the hands of their enemies." The valour and victory of Thomas were arrested by the presence of the sword of God; with the knowledge of the peril, the Moors recovered their ranks, and charged the assailants in the flank and rear. After the loss of thousands, the Christian general retreated with a sigh of despair, and the pursuit of the Saracens was checked by the military engines of the rampart.

After a siege of seventy days (60), the patience, and perhaps the provisions, of the Damascenes were exhausted; and the bravest of their chiefs submitted to the hard dictates of necessity.

(60) Abulfeda allows only seventy days for the siege of Damascus (Annal. Moslem. p. 67. verl. Reiske); but Elmacin, who mentions this opinion, prolongs the term to six months, and notices the use of belettes by the Saracens (Hist. Saracen. p. 25. 32.) Even this longer period is insufficient to fill the interval between the battle of Assadin (July, A.D. 633) and the accession of Omar (24 July, A.D. 634), to whose reign the conquest of Damascus is unanimously ascribed (Al Wakidi, apud Ockley, vol. i. p. 115. Abulpharagius, Dynast. p. 112. verf. Pocock). Perhaps, as in the Trojan war, the operations were interrupted by excursions and detachments, till the last seventy days of the siege.
closeness. In the occurrences of peace and war, they had been taught to dread the fierceness of Caled, and to revere the mild virtues of Abu Obeidah. At the hour of midnight, one hundred chosen deputies of the clergy and people were introduced to the tent of that venerable commander. He received and dismissed them with courtesy. They returned with a written agreement, on the faith of a companion of Ma-homet, that all hostilities should cease; that the voluntary emigrants might depart in safety, with as much as they could carry away of their effects; and that the tributary subjects of the caliph should enjoy their lands and houses, with the use and possession of seven churches. On these terms, the most respectable hostages, and the gate nearest to his camp, were delivered into his hands: his soldiers imitated the moderation of their chief; and he enjoyed the submissive gratitude of a people whom he had rescued from destruction. But the success of the treaty had relaxed their vigilance, and in the same moment the opposite quarter of the city was betrayed and taken by assault. A party of an hundred Arabs had opened the eastern gate to a more inexorable foe. "No quarter," cried the rapacious and sanguinary Caled, "no quarter to the enemies of the Lord:" his trumpets sounded, and a torrent of Christian blood was poured down the streets of Damascus. When he reached the church of St. Mary, he was astonished and provoked by the peaceful aspect of his companions: their swords were in the scabbard, and they were surrounded by a multitude of priests and monks. Abu Obeidah saluted the general: "God," said he, "has delivered the city into my hands by way of surrender, and has saved the believers the trouble of fighting." "And am I not," replied
THE DECLINE AND FALL

replied the indignant Caled, "am I not the "lieutenant of the commander of the faithful? "Have I not taken the city by storm? The un-"believers shall perish by the sword. Fall on."
The hungry and cruel Arabs would have
obeyed the welcome command; and Damascus
was lost, if the benevolence of Abu Obeid-
dah had not been supported by a decent and
dignified firmness. Throwing himself between
the trembling citizens and the most eager of the Barbarians, he adjured them by
the holy name of God, to respect his promise,
to suspend their fury, and to wait the determi-
nation of their chiefs. The chiefs retired into
the church of St. Mary; and after a vehement
debate, Caled submitted in some measure to the
reason and authority of his colleague; who
urged the sanctity of a covenant; the advantage
as well as the honour which the Moslems would
derive from the punctual performance of their
word, and the obstinate resistance which they
must encounter from the distrust and despair of
the rest of the Syrian cities. It was agreed that
the sword should be sheathed, that the part of
Damascus which had surrendered to Abu Obeid-
dah, should be immediately entitled to the bene-
fit of his capitulation, and that the final decision
should be referred to the justice and wisdom of
the caliph (61). A large majority of the peo-
ple accepted the terms of toleration and tribute;
and Damascus is still peopled by twenty thousand
Christians. But the valiant Thomas, and the
free-born patriots who had fought under his
banner, embraced the alternative of poverty and
exile. In the adjacent meadow, a numerous

(61) It appears from Abulfeda (p. 123.) and Elmacin (p. 21.), that
this distinction of the two parts of Damascus was long remembered,
though not always respected, by the Mahometan sovereigns. See like-
wise Eutychius (Annal. tom. ii p. 379, 380, 383.).

encampment
encampment was formed of priests and laymen, of soldiers and citizens, of women and children: they collected, with haste and terror, their most precious moveables; and abandoned, with loud lamentations or silent anguish, their native homes, and the pleasant banks of the Pharpar. The inflexible soul of Caled was not touched by the spectacle of their distress: he disputed with the Damaascenes the property of a magazine of corn; endeavoured to exclude the garrison from the benefit of the treaty; contended, with reluctance, that each of the fugitives should arm himself with a sword, or a lance, or a bow; and sternly declared, that, after a respite of three days, they might be pursued and treated as the enemies of the Moamems.

The passion of a Syrian youth completed the ruin of the exiles of Damascus. A nobleman of the city, of the name of Jonas (62), was betrothed to a wealthy maiden; but her parents delayed the consummation of his nuptials, and their daughter was persuaded to escape with the man whom she had chosen. They corrupted the nightly watchmen of the gate Keifan: the lover, who led the way, was encompassed by a squadron of Arabs; but his exclamation in the Greek tongue, "the bird is taken," admonished his mistress to hasten her return. In the presence of Caled, and of death, the unfortunate

(62) On the fate of these lovers, whom he names Phocyas and Eudocia, Mr. Hughes has built the Siege of Damascus, one of our most popular tragedies, and which possesses the rare merit of blending nature and history, the manners of the times and the feelings of the heart. The foolish delicacy of the players compelled him to soften the guilt of the hero and the despair of the heroine. Instead of a base renegade, Phocyas serves the Arabs as an honourable ally; instead of prompting their pursuit, he flies to the succour of his countrymen, and after killing Caled and Dero, is himself mortally wounded, and expires in the presence of Eudocia, who professes her resolution to take the veil at Constantinople. A frigid catastrophe!
THE DECLINE AND FALL

Jonas professed his belief in one God, and his apostle Mahomet; and continued, till the season of his martyrdom, to discharge the duties of a brave and sincere Musulman. When the city was taken, he flew to the monastery, where Eudocia had taken refuge; but the lover was forgotten; the apostate was stained; she preferred her religion to her country; and the justice of Caled, though deaf to mercy, refused to detain by force a male or female inhabitant of Damascus. Four days was the general continued to the city by the obligation of the treaty, and the urgent cares of his new conquest. His appetite for blood and rapine would have been extinguished by the hopeless computation of time and distance; but he listened to the importunities of Jonas, who assured him that the weary fugitives might yet be overtaken. At the head of four thousand horse, in the disguise of Christian Arabs, Caled undertook the pursuit. They halted only for the moments of prayer; and their guide had a perfect knowledge of the country. For a long way the footsteps of the Damascenes were plain and conspicuous: they vanished on a sudden; but the Saracens were comforted by the assurance that the caravan had turned aside into the mountains, and must speedily fall into their hands. In traversing the ridges of the Libanus, they endured intolerable hardships, and the sinking spirits of the veteran fanatics were supported and cheered by the unconquerable ardour of a lover. From a peasant of the country, they were informed that the emperor had sent orders to the colony of exiles, to pursue without delay the road of the sea-coast, and of Constantinople; apprehensive, perhaps, that the soldiers and people of Antioch might be discouraged by the flight and the story of their sufferings. The Saracens were conducted through the

the territories of Gabala (63) and Laodicea, at a cautious distance from the walls of the cities; the rain was incessant, the night was dark, a single mountain separated them from the Roman army; and Caled, ever anxious for the safety of his brethren, whispered an ominous dream in the ear of his companion. With the dawn of day, the prospect again cleared, and they saw before them, in a pleasant valley, the tents of Damascus. After a short interval of repose and prayer, Caled divided his cavalry into four squadrons, committing the first to his faithful Devar, and referring the last for himself. They successively rushed on the promiscuous multitude, insufficiently provided with arms, and already vanquished by sorrow and fatigue. Except a captive who was pardoned and dismissed, the Arabs enjoyed the satisfaction of believing that not a Christian of either sex escaped the edge of their scimitars. The gold and silver of Damascus was scattered over the camp, and a royal wardrobe of three hundred loads of silk might clothe an army of naked Barbarians. In the tumult of the battle, Jonas fought and found the object of his pursuit; but her resentment was inflamed by the last act of his perfidy; and as Eudocia struggled in her hateful embraces, she struck a dagger to her heart. Another female, the widow of Thomas, and the real or supposed daughter of Heraclius, was spared and released without a ransom; but the generosity of Caled was the effect of his contempt; and the haughty Saracen insulted, by a message of

(63) The towns of Gabala and Laodicea, which the Arabs visited, still exist in a state of decay (Maunder, p. 11, 12. Pocock, vol. ii. p. 13.). Had not the Christians been overtaken, they must have crossed the Orient on some bridge in the fifteen miles between Antiok and Antioch, and might have rejoined the high road of Constantinople at Alexandria. The itineraries will represent the directions and distances (p. 145, 146, 581, 582. ed. Wesseling).

defiance, the throne of the Caesars. Caled had penetrated above an hundred and fifty miles into the heart of the Roman province: he returned to Damascus with the same secrecy and speed. On the accession of Omar, the sword of God was removed from the command; but the caliph, who blamed the rashness, was compelled to applaud the vigour and conduct, of the enterprise.

Another expedition of the conquerors of Damascus will equally display their avidity and their contempt for the riches of the present world. They were informed that the produce and manufactures of the country were annually collected in the fair of Abyla (64), about thirty miles from the city; that the cell of a devout hermit was visited at the same time by a multitude of pilgrims; and that the festival of trade and superstition would be ennobled by the nuptials of the daughter of the governor of Tripoli. Abdallah, the son of Jaafar, a glorious and holy martyr, undertook, with a banner of five hundred horse, the pious and profitable commission of despoiling the infidels. As he approached the fair of Abyla, he was astonished by the report of the mighty concourse of Jews and Christians, Greeks and Armenians, of natives of Syria, and of strangers of Egypt, to the number of ten thousand, besides a guard of five thousand horses that attended the person of the bride. The Saracens paused: "For my own part," said Abdallah, "I dare not go back; our foes are many, our danger is great, but our reward is splendid and secure, either in this life or in the life to come. Let every manaccording to his inclination, ad-

"Vance or retire." Not a Musulman deflected his standard. "Lead the way," said Abdallah to his Christian guide, "and you shall see what the companions of the prophet can perform." They charged in five squadrons; but after the first advantage of the surprise they were encompassed and almost overwhelmed by the multitude of their enemies; and their valiant band is fancifully compared to a white spot in the skin of a black camel (65). About the hour of sunset, when their weapons dropped from their hands; when they panted on the verge of eternity, they discovered an approaching cloud of dust, they heard the welcome sound of the tecbir (66), and they soon perceived the standard of Caled, who flew to their relief with the utmost speed of his cavalry. The Christians were broken by his attack, and slaughtered in their flight as far as the river of Tripoli. They left behind them the various riches of the fair; the merchandizes that were exposed for sale, the money that was brought for purchase, the gay decorations of the nuptials, and the governor's daughter, with forty of her female attendants. The fruits, provisions, and furniture, the money, plate, and jewels, were diligently laden on the backs of horses, asses, and mules; and the holy robbers returned in triumph to Damascus. The hermit, after a short and angry controversy with Caled, declined the crown of martyrdom, and was left alive in the solitary scene of blood and devastation.

(65) I am bolder than Mr. Ockley (vol. i. p. 164) who dares not insert this figurative expression in the text, though he observes in a marginal note, that the Arabians often borrow their families from that useful and familiar animal. The rein-deer may be equally famous in the songs of the Laplanders.

(66) We heard the tecbir; so the Arabs call Their shout of onset, when with loud appeal They challenge heaven, as if demanding conquest.

This word, so formidable in their holy wars, is a verb active (fays Ockley in his index) of the second conjugation, from kabbara, which signifies saying alla adhar, God is most mighty!

Syria
Syria (67), one of the countries that have been improved by the most early cultivation, is not unworthy of the preference (68). The heat of the climate is tempered by the vicinity of the sea and mountains, by the plenty of wood and water; and the produce of a fertile soil affords the subsistence, and encourages the propagation, of men and animals. From the age of David to that of Heraclius, the country was overspread with ancient and flourishing cities: the inhabitants were numerous and wealthy; and, after the slow ravage of despotism and superstition, after the recent calamities of the Persian war, Syria could still attract and reward the rapacious tribes of the desert. A plain, of ten days journey, from Damascus to Aleppo and Antioch, is watered, on the western side, by the winding course of the Orontes. The hills of Libanus and Anti-Libanus are planted from north to south, between the Orontes and the Mediterraneum; and the epithet of hallow (Coele-Syria) was applied to a long and fruitful valley, which is confined in the same direction by the two ridges of snowy mountains (69). Among the cities,

which are enumerated by Greek and Oriental names in the geography and conquest of Syria, we may distinguish Emesa or Hems, Heliopolis or Baalbec, the former as the metropolis of the plain, the latter as the capital of the valley. Under the last of the Caesars, they were strong and populous: the turrets glittered from afar: an ample space was covered with public and private buildings; and the citizens were illustrious by their spirit, or at least by their pride: by their riches, or at least by their luxury. In the days of paganism, both Emesa and Heliopolis were addicted to the worship of Baal, or the sun; but the decline of their superstition and splendour has been marked by a singular variety of fortune. Not a vestige remains of the temple of Emesa, which was equalled in poetic stile to the summits of mount Libanus (70), while the ruins of Baalbec, invisible to the writers of antiquity, excite the curiosity and wonder of the European traveller (71). The measure of the temple is two hundred feet in length, and one hundred in breadth: the front is adorned with a double portico of eight columns; fourteen may be counted on either side; and each column,

Thefe verses of the Latin version of Rufus Avienus are wanting in the Greek original of Dionysius; and since they are likewise unnoticed by Eutychius, I must, with Fabricius (Bibliot. forty-five feet in height, is composed of three massy blocks of stone or marble. The proportions and ornaments of the Corinthian order express the architecture of the Greeks; but as Baalbec has never been the seat of a monarch, we are at a loss to conceive how the expense of these magnificent structures could be supplied by private or municipal liberality (72). From the conquest of Damascus the Saracens proceeded to Heliopolis and Emesa; but I shall decline the repetition of the fallies and combats which have been already shewn on a larger scale. In the prosecution of the war, their policy was not less effectual than their sword. By short and separate truces they dissolved the union of the enemy; accustomed the Syrians to compare their friendship with their enmity; familiarised the idea of their language, religion, and manners; and exhausted, by clandestine purchase, the magazines and arsenals of the cities which they returned to besiege. They aggravated the ransom of the more wealthy, or the more obstinate; and Chalcis alone was taxed at five thousand ounces of gold, five thousand ounces of silver, two thousand robes of silk, and as many figs and olives as would load five thousand asses. But the terms of truce or capitulation were faithfully observed; and the lieutenant of the caliph, who had promised not to enter the walls of the captive Baalbec, remained tranquil and immovable in his tent till the jarring factions solicited the interposition of a foreign master. The conquest of the plain and valley of Syria was achieved in less than two years. Yet the commander of the faithful

(72) The Orientals explain the prodigy by a never-failing expedient. The edifices of Baalbec were constructed by the fairies or the genii (Hill. de Timour Béc, tom. iii. l. v. c. 23. p. 311, 312. Voyage d’Oster, tom. i. p. 83). With less absurdity, but with equal ignorance, Abulfeda and Ibn Chaukel ascribe them to the Sabrains or Asadites. Non sunt in omni Syria adificia magnificentiora his (Tabula Syria, p. 103.). reproved
reproved the slowness of their progress, and the Saracens, bewailing their fault with tears of rage and repentance, called aloud on their chiefs to lead them forth to fight the battles of the Lord. In a recent action, under the walls of Emesa, an Arabian youth, the cousin of Caled, was heard aloud to exclaim, "Methinks I see the black-eyed girls looking upon me; one of whom should she appear in this world, all mankind would die for love of her. And I see in the hand of one of them, an handkerchief, chief of green silk, and a cap of precious stones, and she beckons me, and calls out, 'come hither quickly, for I love thee.'" With these words, charging the Christians, he made havoc wherever he went, till, observed at length by the governor of Hems, he was struck through with a javelin.

It was incumbent on the Saracens to exert the full powers of their valour and enthusiasm against the forces of the emperor, who was taught by repeated losses, that the rovers of the desert had undertaken, and would speedily achieve, a regular and permanent conquest. From the provinces of Europe and Asia, four-score thousand soldiers were transported by sea and land to Antioch and Caesarea; the light troops of the army consisted of sixty thousand Christian Arabs, of the tribe of Gassan. Under the banner of Jabalah, the last of their princes, they marched in the van; and it was a maxim of the Greeks, that, for the purpose of cutting diamond, a diamond was the most effectual. Heraclius withheld his person from the dangers of the field; but his presumption, or perhaps his despondency, suggested a peremptory order, that the fate of the province and the war should be decided by a single battle. The Syrians were attached to the standard of Rome and of the cross;
crofs; but the noble, the citizen, the peafant, were exasperated by the injustice and cruelty of a licentious hoft, who oppressed them as subjects, and defpifed them as strangers and aliens (73). A report of these mighty preparations was conveyed to the Saracens in their camp of Efemfa; and the chiefs, though resolved to fight, assembled a council: the faith of Abu Obeidah would have expected on the fame fpot the glory of martyrdom; the wisdom of Caled advised an honourable retreat to the skirts of Palestifne and Arabia, where they might await the succour of their friends and the attack of the unbelievers. A speedy messenger soon returned from the throne of Medina, with the blessings of Omar and Ali, the prayers of the widows of the prophet, and a reinforcement of eight thousand Moslems. In their way they overturned a detachment of Greeks, and when they joined at Yermuk the camp of their brethren, they found the pleasing intelligence, that Caled had already defeated and scattered the Christian Arabs of the tribe of Gaffan. In the neighbourhood of Boifra, the springs of mount Hermon defcend in a torrent to the plain of Decapolis, or ten cities; and the Hieromax, a name which has been corrupted to Yermuk, is lost after a short course in the lake of Tiberias (74). The banks of this obscure stream were illustrated by a long and bloody encounter. On this momentous occa-

This learned professor was equal to the task of describing the Holy Land, since he was alike conversant with Greek and Latin, with Hebrew and Arabian literature. The Yermuk, or Hieromax, is noticed by Cclarius (Geograph. Antiq. tom. i. p. 392.) and d’Anville (Geographie Ancienne, tom. ii. p. 185.) The Arabs, and even Abukeda himself, do not know to recognize the scene of their victory.
OF THE ROMAN EMPIRE.

On, the public voice, and the modesty of Abu Obeidah, restored the command to the most deserving of the Molems. Caled assumed his station in the front, his colleague was posted in the rear, that the disorder of the fugitives might be checked by his venerable aspect and the sight of the yellow banner which Mahomet had displayed before the walls of Chaibar. The last line was occupied by the sister of Derar, with the Arabian women who had enlisted in this holy war, who were accustomed to wield the bow and the lance, and who in a moment of captivity had defended, against the uncircumcised ravishers, their chastity and religion (75). The exhortation of the generals was brief and forcible: "Paradise is before you, the devil and hell-fire in your rear." Yet such was the weight of the Roman cavalry, that the right wing of the Arabs was broken and separated from the main body. Thrice did they retreat in disorder, and thrice were they driven back to the charge by the reproaches and blows of the women. In the intervals of action, Abu Obeidah visited the tents of his brethren, prolonged their repose, by repeating at once the prayers of two different hours; bound up their wounds with his own hands, and administered the comfortable reflection, that the infidels partook of their sufferings without partaking of their reward. Four thousand and thirty of the Molems were buried in the field of battle; and the skill of the Armenian archers enabled seven hundred to boast that they had lost an eye in that meritorious service. The veterans of the Syrian war acknowledged that it was the hardest and most doubtful of the

days which they had seen. But it was likewise the most decisive: many thousands of the Greeks and Syrians fell by the swords of the Arabs; many were slaughtered, after the defeat, in the woods and mountains; many, by mistaking the ford, were drowned in the waters of the Yermuk; and however the loss may be magnified (76), the Christian writers confess and bewail the bloody punishment of their sins (77). Manuel, the Roman general, was either killed at Damascus, or took refuge in the monastery of mount Sinaï. An exile in the Byzantine court, Jabalah lamented the manners of Arabia, and his unlucky preference of the Christian cause (78). He had once inclined to the profession of Islam; but in the pilgrimage of Mecca, Jabalah was provoked to strike one of his brethren, and fled with amazement from the stern and equal justice of the caliph. The victorious Saracens enjoyed at Damascus a month of pleasure and repose: the spoil was divided by the discretion of Abu Obeidah: an equal share was allotted to a soldier and to his horse, and a double portion was reserved for the noble courtiers of the Arabian breed.

(76) We killed of them, says Abu Obeidah to the caliph, one hundred and fifty thousand, and made prisoners forty thousand (Ockley, vol. i. p. 241.). As I cannot doubt his veracity, nor believe his computation, I must suspect that the Arabic historians indulged themselves in the practice of composing speeches and letters for their heroes.

(77) After deploiring the sins of the Christians, Theophanes adds (Chronograph. p. 276.), ἦν δε ορμηνικ ειμαιλα νομην Ἰρακ στο τον λόγο το χριστιανειον, και προτον προτον φορη απο τον Ρωμαιων γρατι δε κατα το Γαβδες λεγειν (does he mean Λίβαστρι?) και εραμενα, και την αδαρμον αμαρτωλον. His account is brief and obscure, but he accords the numbers of the enemy, the adverse wind, and the cloud of dust: με δισακλον (the Romans) αντιπροσωποι εκφερον δια την κοπηνην μεταλειπεν, και ιδοντες δεικνυσε ει της ευθυς την Ρωμαιων στρατες και ισπαναλλον αρχαν (Chronograph. p. 280.).

(78) See Abulfeda (Annal. Moslem. p. 70, 71.), who transcribes the poetical complaint of Jabalah himself; and some paeonnrical strains of an Arabian poet, to whom the chief of Gaffin sent from Constantinople a gift of five hundred pieces of gold by the hands of the ambassador of Omar.
OF THE ROMAN EMPIRE.

After the battle of Yermuk, the Roman army no longer appeared in the field; and the Saracens might securely choose among the fortified towns of Syria, the first object of their attack. They consulted the caliph whether they should march to Caesarea or Jerusalem; and the advice of Ali determined the immediate siege of the latter. To a profane eye, Jerusalem was the first or second capital of Palestine; but after Mecca and Medina, it was revered and visited by the devout Moslems, as the temple of the Holy Land which had been sanctified by the revelation of Moses, of Jesus, and of Mahomet himself. The son of Abu Sophian was sent with five thousand Arabs to try the first experiment of surprise or treaty: but on the eleventh day, the town was invested by the whole force of Abu Obeidah. He addressed the customary summons to the chief commanders and people of Alia (79). "Health and happiness to every one that follows the right way! We require of you to testify that there is but one God, and that Mahomet is his apostle. If you refuse this, consent to pay tribute, and be under us forthwith. Other wise I shall bring men against you who love death better than you do the drinking of wine or eating hogs flesh. Nor will I ever stir from you, if it please God, till I have destroyed those that fight for you, and made slaves of your children." But the city was defended on every side by deep vallies and steep ascents: since the invasion of Syria, the walls and towers had been anxiously restored; the bravest of the

(79) In the name of the city, the profane prevailed over the sacred; Jerusalem was known to the devout Christians (Euseb. de Martyr. Palest. c. xi.) but the legal and popular appellation of Cæsarea (the colony of Hadrianus) has passed from the Romans to the Arabs (Reland, Palest. tom. i. p. 207. tom. ii. p. 835. d'Herbelot. Bibliothèque Orientale, Cæs., p. 169. Thau, p. 410.). The epithet of Al Cæs., the Holy, is used as the proper name of Jerusalem.

THE DECLINE AND FALL

Fugitives of Yermuk had stopped in the nearest place of refuge; and in the defence of the sepulchre of Christ, the natives and strangers might feel some sparks of the enthusiasm which so fiercely glowed in the bosoms of the Saracens. The siege of Jerusalem lasted four months; not a day was lost without some action of folly or assault; the military engines incessantly played from the ramparts; and the inclemency of the winter was still more painful and destructive to the Arabs. The Christians yielded at length to the perseverance of the besiegers. The patriarch Sophronius appeared on the walls, and by the voice of an interpreter demanded a conference. After a vain attempt to dissuade the lieutenant of the caliph from his impious enterprise, he proposed, in the name of the people, a fair capitulation, with this extraordinary clause, that the articles of security should be ratified by the authority and presence of Omar himself. The question was debated in the council of Medina; the sanctity of the place, and the advice of Ali, persuaded the caliph to gratify the wishes of his soldiers and enemies, and the simplicity of his journey is more illustrious than the royal pageants of vanity and oppression. The conqueror of Persia and Syria was mounted on a red camel, which carried, besides his person, a bag of corn, a bag of dates, a wooden dish, and a leathern bottle of water. Wherever he halted, the company, without distinction, was invited to partake of his homely fare, and the repast was consecrated by the prayer and exhortation of the commander of the faithful (80). But in this expedition or pilgrimage, his power was exercised in the administration of justice; he

reformed the licentious polygamy of the Arabs; relieved the tributaries from extortion and cruelty, and chastised the luxury of the Saracens, by despoiling them of their rich silks, and dragging them on their faces in the dirt. When he came within sight of Jerusalem, the caliph cried with a loud voice, "God is victorious. O Lord "give us an easy conquest;" and, pitching his tent of coarse hair, calmly seated himself on the ground. After signing the capitulation, he entered the city without fear or precaution; and courteously discoursed with the patriarch concerning its religious antiquities (81). Sophronius bowed before his new master, and secretly muttered, in the words of Daniel, "The abomina-
tion of desolation is in the holy place (82)." At the hour of prayer, they stood together in the church of the Resurrection; but the caliph refused to perform his devotions, and contented himself with praying on the steps of the church of Constantine. To the patriarch he disclosed his prudent and honourable motive. "Had I "yielded," said Omar, "to your request, the " Moslems of a future age would have infringed "the treaty under colour of imitating my ex-
ample." By his command, the ground of the temple of Solomon was prepared for the foundation of a mosque (83); and, during a resi-

In Copenhagen, he regulated the present and future state of his Syrian conquests. Medina might be jealous, lest the caliph should be detained by the sanctity of Jerusalem or the beauty of Damascus; her apprehensions were dispelled by his prompt and voluntary return to the tomb of the apostle (84).

To achieve what yet remained of the Syrian war, the caliph had formed two separate armies; a chosen detachment, under Amrou and Yezid, was left in the camp of Palestine; while the larger division, under the standard of Abu Obeidah and Calid, marched away to the north against Antioch and Aleppo. The latter of these, the Berea of the Greeks, was not yet illustrious as the capital of a province or a kingdom; and the inhabitants, by anticipating their submission and pleading their poverty, obtained a moderate composition for their lives and religion. But the castle of Aleppo (85), distinct from the city, stood erect on a lofty artificial mound; the sides were sharpened to a precipice, and faced with freestone; and the breadth of the ditch might be filled with water from the neighbouring springs. After the loss of three thousand men, the garrison was still equal to the defence; and

temple (παλαιον σε μεγαλην σε βουλευσθανε, says Phocas), a length of 515, a breadth of 489, 76/feet. The Western geographer declares, that this magnificent structure was second only in size and beauty to the great mount of Cordova (p. 113), whose present state Mr. Swinburne has so elegantly represented (Travels into Spain, p. 196—301).

(84) Of the many Arabic verities or chronicles of Jerusalem, (d'Herbelot, p. 867.), Ockley found one among the Pocock MSS. of Oxford (vol. i. p. 127.), which he has used to supply the defective narrative of Al Wakihi.

(85) The Persian historian of Timur (tom. iii. l. v. c. 81 p. 300.) describes the castle of Aleppo as founded in which one hundred cubits in height, a proof, says the French translator, that he had never visited the place. It is now in the midst of the city, of no strength, with a single terrace, the circuit is about 3 or 500 paces, and the ditch half full of stagnant water (Voyages de Tavernier, tom. i. p. 129. Pocock, vol. ii. part. i. p. 120.). The fortresses of the East are contemptible to an European eye.

Yovkinna,
OF THE ROMAN EMPIRE.

Youkinna, their valiant and hereditary chief, had murdered his brother, an holy monk, for daring to pronounce the name of peace. In a siege of four or five months, the hardest of the Syrian war, great numbers of the Saracens were killed and wounded: their removal to the distance of a mile could not seduce the vigilance of Youkinna; nor could the Christians be terrified by the execution of three hundred captives, whom they beheaded before the castle wall. The silence, and at length the complaints, of Abu Obeidah informed the caliph that their hope and patience were consumed at the foot of this impregnable fortress. "I am variously affected," replied Omar, "by the difference of your successes; but I charge you by no means to raise the siege of the castle. Your retreat would diminish the reputation of our arms, and encourage the infidels to fall upon you on all sides. Remain before Aleppo till God shall determine the event, and forsake with your horse round the adjacent country." The exhortation of the commander of the faithful was fortified by a supply of volunteers from all the tribes of Arabia, who arrived in the camp on horses or camels. Among these was Dames, of a servile birth, but of gigantic size and intrepid resolution. The fortieth day of his service he proposed, with only thirty men, to make an attempt on the castle. The experience and testimony of Caled recommended his offer; and Abu Obeidah admonished his brethren not to despise the baser origin of Dames, since he himself, could he relinquish the public care, would cheerfully serve under the banner of the slave. His design was covered by the appearance of a retreat; and the camp of the Saracens was pitched about a league from Aleppo. The thirty adventurers lay in ambush,
bush at the foot of the hill; and Dames at length succeeded in his enquiries, though he was provoked by the ignorance of his Greek captives. "God curse these dogs," said the illiterate "Arab, what a strange barbarous language they speak!" At the darkest hour of the night, he scaled the most accessible height which he had diligently surveyed, a place where the stones were less entire, or the slope less perpendicular, or the guard less vigilant. Seven of the stoutest Saracens mounted on each others shoulders, and the weight of the column was sustained on the broad and sinewy back of the gigantic slave. The foremost in this painful ascent could grasp and climb the lowest part of the battlements; they silently stabbed and cast down the sentinels; and the thirty brethren, repeating a pious ejaculation, "O apostle of God, help and deliver us!" were successively drawn up by the long folds of their turbans. With bold and cautious footsteps, Dames explored the palace of the governor, who celebrated, in riotous merriment, the festival of his deliverance. From thence, returning to his companions, he assaulted on the inside the entrance of the castle. They overpowered the guard, unbolstered the gate, let down the drawbridge, and defended the narrow pass, till the arrival of Caled, with the dawn of day, relieved their danger and assured their conquest. Youkanna, a formidable foe, became an active and useful proselyte; and the general of the Saracens expressed his regard for the most humble merit, by detaining the army at Aleppo till Dames was cured of his honourable wounds. The capital of Syria was still covered by the castle of Aazaz and the iron bridge of Orontes. After the loss of those important posts, and the defeat of the last of the Roman

Roman armies, the luxury of Antioch (86) trembled and obeyed. Her safety was ransomed with three hundred thousand pieces of gold; but the throne of the successors of Alexander, the seat of the Roman government in the East, which had been decorated by Cæsar with the titles of free, and holy, and inviolate, was degraded under the yoke of the caliphs to the secondary rank of a provincial town (87).

In the life of Heraclius, the glories of the Persian war are clouded on either hand by the disgrace and weakness of his more early and his later days. When the successors of Mahomet unsheathed the sword of war and religion, he was afoinished at the boundless prospect of toil and danger; his nature was indolent, nor could the infirm and frigid age of the emperor be kindled to a second effort. The sense of shame, and the importunities of the Syrians, prevented his hasty departure from the scene of action; but the hero was no more; and the loss of Damascus and Jerusalem, the bloody fields of Aiznadin and Yermuk, may be imputed in some degree to the absence or misconduct of the sovereign. Instead of defending the sepulchre of Christ, he involved the church and state in a metaphysical controversy for the unity of his will; and while Heraclius crowned the offspring

(86) The date of the conquest of Antioch by the Arabs is of some importance. By comparing the years of the world in the chronography of Theophanes with the years of the Hegira in the history of Elmacin, we shall determine, that it was taken between January 23d and September 31st of the year of Christ 638 (Pagi Critica, in Baron. Annu. tom. ii p. 812, 813.). Al Waski (Ockley, vol. i. p. 314.) assigns that event to Tuesday, August 21st, an inconsistent date; since Easter fell that year on April 5th, the 21st of August must have been a Friday (see the Tables of the Art de Vérifier les Dates).

of his second nuptials, he was tamely stripped of the most valuable part of their inheritance. In the cathedral of Antioch, in the presence of the bishops, at the foot of the crucifix, he bewailed the sins of the prince and the people; but his confession instructed the world, that it was vain, and perhaps impious, to resist the judgment of God. The Saracens were invincible in fact, since they were invincible in opinion; and the desertion of Youkinna, his false repentance and repeated perfidy, might justify the suspicion of the emperor, that he was encompassed by traitors and apostates, who conspired to betray his person and their country to the enemies of Christ. In the hour of adversity, his superstition was agitated by the omens and dreams of a falling crown; and after bidding an eternal farewell to Syria, he secretly embarked with a few attendants, and absolved the faith of his subjects (88). Constantine, his eldest son, had been stationed with forty thousand men at Caesarea, the civil metropolis of the three provinces of Palestine. But his private interest recalled him to the Byzantine court; and, after the flight of his father, he felt himself an unequal champion to the united force of the caliph. His vanguard was boldly attacked by three hundred Arabs and a thousand black slaves, who, in the depth of winter, had climbed the snowy mountains of Libanus, and who were speedily followed by the victorious squadrons of Caled himself. From the north and south the troops of Antioch and Jerusalem advanced along the sea shore, till their banners were joined under

(88) See Ockley (vol. i. p. 308. 312.), who laughs at the credulity of his author. When Hericius bade farewell to Syria, Tale-Synias et alium, he prophesied that the Romans should never re-enter the province till the birth of an insidious child, the future scourge of the empire. the walls of the Phoenician cities: Tripoli and Tyre were betrayed; and a fleet of fifty transports, which entered without distrust the captive harbours, brought a reasonable supply of arms and provisions to the camp of the Saracens. Their labours were terminated by the unexpected surrender of Caesarea: the Roman prince had embarked in the night (89): and the defenceless citizens solicited their pardon with an offering of two hundred thousand pieces of gold. The remainder of the province Ramla, Ptolemais or Acre, Sichem or Neapolis, Gaza, Alcalon, Berytus, Sidon, Gabala, Laodicea, Apamea, Hierapolis, no longer presumed to dispute the will of the conqueror; and Syria bowed under the sceptre of the caliphs seven hundred years after Pompey had deploiled the last of the Macedonian kings (90).

The sieges and battles of six campaigns had consumed many thousands of the Moslems. They died with the reputation and the cheerfulness of martyrs; and the simplicity of their faith may be expressed in the words of an Arabian youth, when he embraced for the last time, his father and mother: "It is not," said he, "the delicacies of Syria, or the fading delights of this world, that have prompted me to devote my life in the cause of religion. But I seek the favour of God and his apostle; and I have heard, from one of the companions of the

(89) In the loose and obscure chronology of the times, I am guided by an authentic record (in the book of ceremonies of Constantine Porphyrigenitus), which verifies that, June 4, A. D. 639, the emperor crowned his younger son Heraclius in the presence of his eldest Constantine, and the prince of Constantinople; that January 1, A. D. 639, the royal procession visited the great church, and on the 4th of the same month, the hippodrome.

"prophet, that the spirits of the martyrs will
be lodged in the crops of green birds, who
shall taste the fruits and drink of the rivers of
paradise, farewell, we shall meet again among
the groves and fountains which God has pro-
vided for his elect." The faithful captives
might exercise a passive and more arduous refo-
lution; and a cousin of Mahomet is celebrated
for refusing, after an abstinence of three days,
the wine and pork, the only nourishment that
was allowed by the malice of the infidels. The
frailty of some weaker brethren exasperated the
implacable spirit of fanatacism; and the father
of Amar deplored, in pathetic strains, the apo-
tacy and damnation of a son, who had renounc-
ed the promises of God, and the intercession of
the prophet, to occupy, with the priests and
deacons, the lowest mansions of hell. The
more fortunate Arabs, who survived the war
and persevered in the faith, were restrained
by their abstemious leader from the abuse
of prosperity. After a refreshment of three
days, Abu Obeidah withdrew his troops from
the pernicious contagion of the luxury of An-
tioch, and assured the caliph that their reli-
gion and virtue could only be preserved by
the hard discipline of poverty and labour. But
the virtue of Omar, however rigorous to himself,
was kind and liberal to his brethren. After a
just tribute of praise and thanksgiving, he dropt
a tear of compassion; and sitting down on the
ground, wrote an answer, in which he mildly
censured the severity of his lieutenant: "God,"
said the successor of the prophet, "has not
forbidden the use of the good things of this
world to faithful men, and such as have per-
formed good works. Therefore you ought
to have given them leave to rest themselves,
and partake freely of those good things which

"the country affordeth. If any of the Saracens has no family in Arabia, they may marry in Syria; and whosoever of them wants any female slaves, he may purchase as many as he hath occasion for." The conquerors prepared to use, or to abuse, this gracious permission; but the year of their triumph was marked by a mortality of men and cattle; and twenty-five thousand Saracens were snatched away from the possession of Syria. The death of Abu Obeidah might be lamented by the Christians; but his brethren recollected that he was one of the ten elect whom the prophet had named as the heirs of paradise (91). Caled survived his brethren about three years; and the tomb of the sword of God is shewn in the neighbourhood of Emesa. His valour, which founded in Arabia and Syria the empire of the caliphs, was fortified by the opinion of a special providence; and as long as he wore a cap, which had been blessed by Mahomet, he deemed himself invulnerable amidst the darts of the infidels.

The place of the first conquerors was supplied by a new generation of their children and countrymen; Syria became the seat and support of the house of Ommiyah; and the revenue, the soldiers, the ships of that powerful kingdom, were consecrated to enlarge on every side the empire of the caliphs. But the Saracens despite a superfluity of fame; and their historians scarcely condescend to mention the subordinate conquests which are lost in the splendour and rapidity of their victorious career. To the north of Syria, they passed mount Taurus, and re-

(91) Abulfeda, Annal. Moslem. p. 73. Mahomet could artfully vary the praise of his disciples. Of Omar he was accustomed to say, that if a prophet could smile after himself, it would be Omar; and that in a general calamity, Omar would be excepted by the divine justice (Ockley, vol. 1. p. 221).

duced to their obedience the province of Cilicia, with its capital Tarfus, the ancient monument of the Assyrian kings. Beyond a second ridge of the same mountains, they spread the flame of war, rather than the light of religion, as far as the shores of the Euxine and the neighbourhood of Constantinople. To the east they advanced to the banks and sources of the Euphrates and Tigris (92): the long-disputed barrier of Rome and Persia was for ever confounded; the walls of Edessa and Amida, of Dara and Nisibis, which had refitted the arms and engines of Sapor or Nushirvan, were levelled in the dust; and the holy city of Abgarus might vainly produce the epistle or the image of Christ to an unbelieving conqueror. To the west, the Syrian kingdom is bounded by the sea: and the ruin of Aradus, a small island or peninsula on the coast, was postponed during ten years. But the hills of Libanus abounded in timber, the trade of Phoenicia was populous in mariners; and a fleet of seventeen hundred barns was equipped and manned by the natives of the desert. The Imperial navy of the Romans fled before them from the Pamphylian rocks to the Hellespont; but the spirit of the emperor, a grandson of Heraclius, had been subdued before the combat by a dream and a pun (93). The Saracens rode masters of the sea; and the islands of Cyprus, Rhodes, and the Cyclades,

(92) Al-Wakidi had likewise written an history of the conquest of Diarbekir, or Mesopotamia (Ockley, at the end of the ii vol.), which our interpreters do not appear to have seen. The Chronicle of Dionysius of Tellmar, the Jacobite patriarch, records the taking of Edessa A.D. 637, and of Dara A.D. 641 (Affeman, Bibliot. Orient. tom. ii. p. 163.); and the extensive may glean some doubtful information from the Chronography of Theophanes (p. 285–287.). Most of the towns of Mesopotamia yielded by surrender (Abulpharag. p. 112.).

(93) He dreamed that he was at Thessalonica, an harbourless and unsavouring vision; but his footstayer, or his cowardice, understood the sense of a defeat concealed in that insipiduous word for now, now. Give to another the victory (Theophan. p. 286. Zonaras, tom. 41. xiv. p. 88.).

were successively exposed to their rapacious visits. Three hundred years before the Christian era, the memorable though fruitless siege of Rhodes (94) by Demetrius, had furnished that maritime republic with the materials and the subject of a trophy. A gigantic statue of Apollo or the sun, seventy cubits in height, was erected at the entrance of the harbour, a monument of the freedom and the arts of Greece. After standing fifty-six years, the colossus of Rhodes was overthrown by an earthquake: but the maffy trunk, and huge fragments, lay scattered eight centuries on the ground, and are often described as one of the wonders of the ancient world. They were collected by the diligence of the Saracens, and sold to a Jewish merchant of Edessa, who is said to have laden nine hundred camels with the weight of the brass metal: an enormous weight, though we should include the hundred colossal figures (95), and the three thousand statues, which adorned the prosperity of the city of the sun.

III. The conquest of Egypt may be explained by the character of the victorious Saracen, one of the first of his nation, in an age when the meanest of the brethren was exalted above his nature by the spirit of enthusiasm. The birth of Amrou was at once base and illustrious: his mother, a notorious prostitute, was unable to decide among five of the Koreish; but the proof of resemblance adjudged the child to Aafi the

(94) Every passage and every fact that relates to the isle, the city, and the colossus of Rhodes, are compiled in the laborious treatise of Meursius, who has bestowed the same diligence on the two larger islands of Crete and Cyprus. See in the 1st vol. of his works, the Rhodos of Meursius (l. i. c. 15. p. 718—719). The Byzantine writers, Theophanes and Constantine, have ignorantly prolonged the term to 1360 years, and ridiculously divide the weight among 30,000 camels.

oldest of her lovers (96). The youth of Amrou was impelled by the passions and prejudices of his kindred: his poetic genius was exercised in satirical verses against the person and doctrine of Mahomet; his dexterity was employed by the reigning faction to pursue the religious exiles who had taken refuge in the court of the Æthiopian king (97). Yet he returned from this embassy, a secret proselyte; his reason or his interest determined him to renounce the worship of idols; he escaped from Mecca with his friend Caled, and the prophet of Medina enjoyed at the same moment the satisfaction of embracing the two firmest champions of his cause. The impatience of Amrou to lead the armies of the faithful, was checked by the reproof of Omar, who advised him not to seek power and dominion, since he who is subject to-day, may be a prince tomorrow. Yet his merit was not overlooked by the two first successors of Mahomet; they were indebted to his arms for the conquest of Palestine; and in all the battles and sieges of Syria, he united with the temper of a chief, the valour of an adventurous soldier. In a visit to Medina, the caliph expressed a wish to survey the sword which had cut down so many Christian warriors: the son of Aasi unsheathed a short and ordinary scymetar; and as he perceived the surprise of Omar, “Alas,” said the modest Saracen, “the sword itself, without the arms of its master, is neither sharper nor more weighty than the sword of Pharezdak the poet (98).” After

(96) We learn this anecdote from a spirited old woman, who reviled to their faces the caliph and his friend. She was encouraged by the silence of Amrou and the liberality of Mowliyah (Abulfeda, Annal, Moslem, p. 111.).

the conquest of Egypt, he was recalled by the jealousy of the caliph Othman; but in the frequent troubles, the ambition of a soldier, a statesman, and an orator, emerged from a private station. His powerful support, both in council and in the field, established the throne of the Ommiades; the administration and revenue of Egypt were restored by the gratitude of Moawiyah to a faithful friend who had raised himself above the rank of a subject; and Amrou ended his days in the palace and city which he had founded on the banks of the Nile. His dying speech to his children is celebrated by the Arabians as a model of eloquence and wisdom: he deplored the errors of his youth; but if the penitent was still infected by the vanity of a poet, he might exaggerate the venom and mischief of his impious compositions (99).

From his camp, in Palestin, Amrou had surprised or anticipated the caliph’s leave for the invasion of Egypt (100). The magnanimous Omar trusted in his God and his sword, which had shaken the thrones of Chosroes and Caesar; but when he compared the slender force of the Moslems with the greatness of the enterprise, he condemned his own rashness, and listened to his timid companions. The pride and the greatness of Pharaoh were familiar to the readers of the Koran; and a tenfold repetition of prodigies had

The readers of Tacitus may apply compare Vespasian and Mucianus, with Moawiyah and Amrou. Yet the resemblance is still more in the situation, than in the characters, of the men.

(100) Al-Wakidi had likewise composed a separate history of the conquest of Egypt, which Mr. Ockley could never procure; and his own enquiries (vol. i. p. 344—362.) have added very little to the original text of Eutychius (Annal. tom. ii. p. 296—323. ver. Posock), the Melchite patriarch of Alexandria, who lived three hundred years after the revolution.
THE DECLINE AND FALL

been scarcely sufficient to effect, not the victory, but the flight, of six hundred thousand of the children of Israel: the cities of Egypt were many and populous; their architecture was strong and solid; the Nile, with its numerous branches, was alone an insuperable barrier; and the granary of the Imperial city would be obstinately defended by the Roman powers. In this perplexity, the commander of the faithful resigned himself to the decision of chance, or, in his opinion, of providence. At the head of only four thousand Arabs, the intrepid Amrūd had marched away from his station of Gaza when he was overtaken by the messenger of Omar. "If you are still in Syria," said the ambiguous mandate, "retreat without delay; but if, at the receipt of this epistle, you have already reached the frontiers of Egypt, advance with confidence, and depend on the succour of God and of your brethren." The experience, perhaps the secret intelligence, of Amrūd had taught him to suspect the immutability of courts; and he continued his march till his tents were unquestionably pitched on Egyptian ground. He there assembled his officers, broke the seal, perused the epistle, gravely enquired the name and situation of the place, and declared his ready obedience to the commands of the caliph. After a siege of thirty days, he took possession of Parmah or Pelusium; and that key of Egypt, as it has been justly named, unlocked the entrance of the country, as far as the ruins of Heliopolis and the neighbourhood of the modern Cairo.

The cities of Memphis, Babylon, and Cairo.

On the western side of the Nile, at a small distance to the east of the pyramids, at a small distance to the south of the Delta, Memphis, one hundred and fifty furlongs in circumference, displayed the magnificence of ancient kings. Under the reign of the Ptolemies and Caesars,

the seat of government was removed to the sea-
coast; the ancient capital was eclipsed by the
arts and opulence of Alexandria; the palaces,
and at length the temples, were reduced to a
defolate and ruinous condition: yet, in the
age of Augustus, and even in that of Constantine,
Memphis was still numbered among the greatest
and most populous of the provincial cities (101).
The banks of the Nile, in this place of the
breadth of three thousand feet, were united by
two bridges of sixty and of thirty boats, con-
nect ed in the middle stream by the small island of
Rouda, which was covered with gardens and ha-
bitations (102). The eastern extremity of the
bridge was terminated by the town of Babylon
and the camp of a Roman legion, which pro-
tected the passage of the river and the second ca-

capital of Egypt. This important fortress, which
might fairly be described as a part of Memphis
or Misr ah, was invested by the arms of the lieu-
tenant of Omar: a reinforcement of four thou-
sand Saracens soon arrived in his camp; and the
military engines which battered the walls, may
be imputed to the art and labour of his Syrian
allies. Yet the siege was protracted to seven
months; and the rash invaders were encompas-
sed and threatened by the inundation of the
Nile (103). Their last assault was bold and
successful:

of Memphis, he declares, πολεις Ἡλείων ἡ πολεις (p. 1161.) he notices, however, the mixture of inhabitants,
and the ruin of the palaces. In the proper Egypt, Ammianus enumer-
ates Memphis among the four cities, maximis urbibus quibus provincia
nitet (xvm. 16.) and the name of Memphis appears with distincti
in the Roman Itinerary and episcopal lists.

(102) These rare and curious facts, the breadth (2945 feet) and the
bridge of the Nile, are only to be found in the Nubian geographer (p 98.).

successful: they passed the ditch, which had been fortified with iron spikes, applied their scaling-ladders, entered their fortress with the shout of “God is victorious!” and drove the remnant of the Greeks to their boats and the isle of Rouda. The spot was afterwards recommended to the conqueror by the easy communication with the gulf and the peninsula of Arabia: the remains of Memphis were deserted: the tents of the Arabs were converted into permanent habitations; and the first mosque was blessed by the presence of fourscore companions of Mahomet (104). A new city arose in their camp on the eastward bank of the Nile; and the contiguous quarters of Babylon and Fostat are confounded in their present decay by the appellation of old Misrah or Cairo, of which they form an extensive suburb. But the name of Cairo, the town of victory, more strictly belongs to the modern capital, which was founded in the tenth century by the Fatimite caliphs (105). It has gradually receded from the river, but the continuity of buildings may be traced by an attentive eye from the monuments of Senofstris to those of Saladin (106).

(106) The position of New and of Old Cairo is well known, and has been often described. Two writers, who were intimately acquainted with ancient and modern Egypt, have fixed, after a learned enquiry, the city of Memphis at Cîsât, directly opposite the Old Cairo (Sieard, Nouveaux Mémoires des Missions du Levant, tom. vi. p. 55. Shaw’s Observations and Travels, p. 296—309.) Yet we may not disregard the authority or the arguments of Porock (vol. i. p. 25—64.), Niebuhr (Voyage, tom. i. 77—106.), and, above all, of d’Anville (Description de l’Egypte, p. 111, 112, 125—149.), who have removed Memphis towards the village of Mohamah, some miles farther to the south. In their heat, the disputants have forgot that the ample space of a metropolis covers and annihilates the far greater part of the controversy.

Yet
OF THE ROMAN EMPIRE.

Yet the Arabs, after a glorious and profitable enterprife, must have retreated to the desert, had they not found a powerful alliance in the heart of the country. The rapid conquest of Alexander was assisted by the superition and revolt of the natives: they abhorred their Persian oppressors, the disciples of the Magi, who had burnt the temples of Egypt, and feasted with sacrilegious appetite on the flesh of the god Apis (107). After a period of ten centuries the same revolution was renewed by a fimilar caufe; and in the support of an incomprehensible creed, the zeal of the Coptic Christians was equally ardent. I have already explained the origin and progress of the Monophysite controversy, and the persecution of the emperors, which converted a fect into a nation, and alienated Egypt from their religion and government. The Saracens were received as the deliverers of the Jacobite church; and a secret and effectual treaty was opened during the fiege of Memphis between a victorious army and a people of slaves. A rich and noble Egyptian, of the name of Mokawks, had dissembled his faith to obtain the administration of his province: in the disorders of the Persian war he aspired to independence: the embassy of Mahomet ranked him among princes; but he declined, with rich gifts and ambiguous compliments, the proposal of a new religion (108). The abuse of his trust exposed him to the resentment of Heraclius; his submission was delayed.

(108) Mokawks sent the prophet two Coptic damfels, with two maids, and one eunuch, an alabaster vase, an ingot of pure gold, oil, honey, and the finest white linen of Egypt, with an horse, a mule, and an ass, distinguished by their respective qualifications. The embassy of Mahomet was dispatched from Medina in the seventh year of the Hegira A.D. 628). See Gagnier (Vie de Mahomet, tom. ii. p. 255, 256, 303.), from Al Jamahi.
THE DECLINE AND FALL

delayed by arrogance and fear; and his con-
science was prompted by interest to throw him-
s elf on the favour of the nation and the support
of the Saracens. In his first conference with
Amrou, he heard without indignation the usual
option of the Koran, the tribute or the sword.
"The Greeks," replied Mokawkas, "are de-
termined to abide the determination of the
sword; but with the Greeks I desire no com-
munion, either in this world or in the next,
and I abjure forever the Byzantine tyrant,
his synod of Chalcedon, and his Melchite
slaves. For myself and my brethren, we are
resolved to live and die in the profession of the
gospel and unity of Christ. It is impossible
for us to embrace the revelations of your
prophet; but we are desirous of peace, and
cheerfully submit to pay tribute and obedience
to his temporal successors." The tribute was
ascertained at two pieces of gold for the head of
every Christian; but old men, monks, women,
and children of both sexes, under sixteen years
of age, were exempted from this personal af-
fection: the Copts above and below Memphis
 swore allegiance to the caliph, and promised an
hospitable entertainment of three days to every
Muslim who should travel through their
country. By this charter of security, the ec-
clesiastical and civil tyranny of the Melchites
was destroyed (109); the anathemas of St. Cyril
were thundered from every pulpit; and the sa-
cred edifices, with the patrimony of the church,

(109) The prefecture of Egypt, and the conduct of the war, had
been trusted to the patriarch Cyrus (Theophan. p. 280,
281.). "In Spain," said James II, "do you not consult your priests?"
"We do," replied the Catholic ambassador, "and our affairs succeed
accordingly." I know not how to relate the plans of Cyrus, of pay-
ing tribute without impairing the revenue, and of converting Omar by
his marriage with the emperor's daughter (Nicephor. Breviar. p. 17,
18).
were restored to the national communion of the Jacobites, who enjoyed without moderation the moment of triumph and revenge. At the pressing summons of Amrou, their patriarch Benjamin emerged from his desert; and, after the first interview, the courteous Arab affected to declare, that he had never conversed with a Christian priest of more innocent manners and a more venerable aspect (110). In the march from Memphis to Alexandria the lieutenant of Omar entrusted his safety to the zeal and gratitude of the Egyptians; the roads and bridges were diligently repaired; and in every step of his progress, he could depend on a constant supply of provisions and intelligence. The Greeks of Egypt, whose numbers could scarcely equal a tenth of the natives, were overwhelmed by the universal defection; they had ever been hated, they were no longer feared: the magistrate fled from his tribunal, the bishop from his altar; and the distant garrisons were surprised or starved by the surrounding multitudes. Had not the Nile afforded a safe and ready conveyance to the sea, not an individual could have escaped, who by birth, or language, or office, or religion, was connected with their odious name.

By the retreat of the Greeks from the provinces of Upper Egypt, a considerable force was collected in the island of Delta; the natural and artificial channels of the Nile afforded a succession of strong and defensible posts; and the road to Alexandria was laboriously cleared by the victory of the Saracens in two and twenty days of general or partial combat. In their annals of conquest, the siege of Alexandria (111) is perhaps

1 (110) See the Life of Benjamin, in Renaudot (Hist. Patriarch. Alexandrin. p. 156-172.), who has enriched the conquest of Egypt with some facts from the Arabic text of Severus the Jacobite historian.

2 (111) The local description of Alexandria is perfectly ascertained by the
haps the most arduous and important enterprise. The first trading city in the world was abundantly replenished with the means of subsistence and defence. Her numerous inhabitants fought for the dearest of human rights, religion and property; and the enmity of the natives seemed to exclude them from the common benefit of peace and toleration. The sea was continually open; and if Heraclius had been awake to the public distress, fresh armies of Romans and Barbarians might have been poured into the harbour to save the second capital of the empire. A circumference of ten miles would have scattered the forces of the Greeks, and favoured the stratagems of an active enemy; but the two sides of an oblong square were covered by the sea and the lake Marœotis, and each of the narrow ends exposed a front of no more than ten furlongs. The efforts of the Arabs were not inadequate to the difficulty of the attempt and the value of the prize. From the throne of Medina, the eyes of Omar were fixed on the camp and city: his voice excited to arms the Arabian tribes and the veterans of Syria; and the merit of an holy war was recommended by the peculiar fame and fertility of Egypt. Anxious for the ruin or expulsion of their tyrants, the faithful natives devoted their labours to the service of Amrou; some sparks of martial spirit were perhaps rekindled by the example of their allies; and the fagonious hopes of Mokawkas had fixed his sepulchre in the church of St. John of Alexandria. Eutychius the patriarch observes, that the Saracens fought with

the master hand of the first of geographers (d’Anville, Mémoire sur l’Égypte, p. 52—63.); but we may borrow the eyes of the modern travellers, more especially of Thévenot (Voyage au Levant, part i. p. 381—395.), Pocock (vol. i. p. 4—13.); and Niebuhr (Voyage en Arabie, tom. i. p. 34.—43.). Of the two modern rivals, Savary and Volney, the one may amuse, the other will instruct.
the courage of lions; they repulsed the frequent and almost daily sallies of the besieged, and soon assaulted in their turn the walls and towers of the city. In every attack, the sword, the banner of Amrou, glittered in the van of the Moslems. On a memorable day, he was betrayed by his imprudent valour: his followers who had entered the citadel were driven back; and the general, with a friend and a slave, remained a prisoner in the hands of the Christians. When Amrou was conducted before the praefect, he remembered his dignity and forgot his situation; a lofty demeanour, and resolute language, revealed the lieutenant of the caliph, and the battle-axe of a soldier was already raised to strike off the head of the audacious captive. His life was saved by the readiness of his slave, who instantly gave his master a blow on the face, and commanded him, with an angry tone, to be silent in the presence of his superiors. The credulous Greek was deceived; he listened to the offer of a treaty, and his prisoners were dismissed in the hope of a more respectable embassage, till the joyful acclamations of the camp announced the return of their general, and insulted the folly of the infidels. At length, after a siege of fourteen months (112), and the loss of three and twenty thousand men, the Saracens prevailed: the Greeks embarked their dispirited and diminished numbers, and the standard of Mahomet was planted on the walls of the capital of Egypt.

(112) Both Eutychius (Annal. tom. ii. p. 319.) and Elmaci (Hist. Saracen. p. 28.) agree in fixing the taking of Alexandria to Friday of the new moon of Moharram of the twentieth year of the Hegira (December 24, A. D. 640). In reckoning backwards fourteen months spent before Alexandria, seven months before Babylon, &c. Amrou might have invaded Egypt about the end of the year 638: but we are assured, that he entered the country the 12th of Bayaz, 6th of June (Muradhi, Merveilles de l'Egypte, p. 164. Severus, apud Renaudet, p. 165.). The Saracen, and afterwards Lewis IX. of France, halted at Paladium, or Damieus, during the season of the inundation of the Nile.

THE DECLINE AND FALL

"I have taken," said Amrou to the caliph, "the great city of the West. It is impossible for me to enumerate the variety of its riches and beauty; and I shall content myself with observing, that it contains four thousand palaces, four thousand baths, four hundred theaters or places of amusement, twelve thousand shops for the sale of vegetable food, and forty thousand tributary Jews. The town has been subdued by force of arms, without treaty or capitulation, and the Molems are impatient to seize the fruits of their victory (113)." The commander of the faithful rejected with firmness the idea of pillage, and directed his lieutenant to reserve the wealth and revenue of Alexandria for the public service and the propagation of the faith: the inhabitants were numbered; a tribute was imposed; the zeal and resentment of the Jacobites were curbed, and the Melchites who submitted to the Arabian yoke were indulged in the obscure but tranquil exercise of their worship. The intelligence of this disgraceful and calamitous event afflicted the declining health of the emperor; and Heraclius died of adropsy about seven weeks after the loss of Alexandria (114). Under the minority of his grandson, the clamours of a people, deprived of their daily sustenance, compelled the Byzantine court to undertake the recovery of the capital of Egypt. In the space of four years, the harbour and fortifications of Alexandria were twice occupied by a fleet and army of Romans. They were twice expelled by the valour of Amrou, who was recalled by the domestic peril

(114) Notwithstanding some inconsistencies of Theophanes and Cedrèbus, the accuracy of Pagi (Critica, tom ii. p. 824.) has extracted from Nicephorus and the Chronicon Orientale the true date of the death of Heraclius, February 11th, A.D. 641, fifty days after the loss of Alexandria. A fourth of that time was sufficient to convey the intelligence.

peril from the distant wars of Tripoli and Nubia. But the facility of the attempt, the repetition of the insult, and the obstinacy of the resistance provoked him to swear, that if a third time he drove the infidels into the sea, he would render Alexandria as accessible on all sides as the house of a prostitute. Faithful to his promise, he dismantled several parts of the walls and towers, but the people was spared in the chastisement of the city, and the moat of Mercy was erected on the spot where the victorious general had stopped the fury of his troops.

I should deceive the expectation of the reader, if I passed in silence the fate of the Alexandrian library, as it is described by the learned Abulfaragius. The spirit of Amrou was more curious and liberal than that of his brethren, and in his leisure hours, the Arabian chief was pleased with the conversation of John, the last disciple of Ammonius, and who derived the surname of Philoponus, from his laborious studies of grammar and philosophy (115). Emboldened by this familiar intercourse, Philoponus prevailed to solicit a gift, inestimable in his opinion, contemptible in that of the Barbarians; the royal library, which alone, among the spoils of Alexandria, had not been appropriated by the visit and the seal of the conqueror. Amrou was inclined to gratify the wish of the grammarian, but his rigid integrity refused to alienate the minutest object without the consent of the caliph; and the well-known answer of Omar

(115) Many treatises of this lover of labour (παραμενεῖ) are still extant, but for readers of the present age, the printed and unpublished are nearly in the same predicament. Moles and Aristotle are the chief objects of his verbose commentaries, one of which is dated as early as May 10th, A.D. 617 (Fabric. Biblioth. Graec. tom. ix. p. 458—468.). A modern (John Le Clerc), who sometimes assumed the same name, was equal to old Philoponus in diligence, and far superior in good sense and real knowledge.

was inspired by the ignorance of a fanatic. "If these writings of the Greeks agree with the book of God, they are useless and need not be preferred: if they disagree, they are pernicious and ought to be destroyed." The sentence was executed with blind obedience: the volumes of paper or parchment were distributed to the four thousand baths of the city; and such was their incredible multitude, that six months were barely sufficient for the consumption of this precious fuel. Since the Dynasties of Abulpharagius (116) have been given to the world in a Latin version, the tale has been repeatedly transcribed; and every scholar, with pious indignation, has deplored the irreparable shipwreck of the learning, the arts, and the genius, of antiquity. For my own part, I am strongly tempted to deny both the fact and the consequences. The fact is indeed marvelous; "Read and wonder!" says the historian himself: and the solitary report of a stranger who wrote at the end of six hundred years on the confines of Media, is overbalanced by the silence of two annalists of a more early date, both Christians, both natives of Egypt, and the most ancient of whom, the patriarch Eutychius, has amply described the conquest of Alexandria (117). The rigid sentence of Omar is repugnant to the sound and orthodox precept of the Mahometan casuists: they expressly declare, that the religious books of the Jews and Christians, which are acquired by the right of war,

It would be endless to enumerate the moderns who have wondered and believed, but I may distinguish with honour the rational scepticism of Renanot (Hist. Alex. (117) This curious anecdote will be vainly sought in the annals of Eutychius, and the Saracen history of Elmasin. The silence of Alifays, Muradi, and a crowd of Moslems, is left conclusive from their ignorance of Christian literature.

Should never be committed to the flames; and that the works of profane science, historians or poets, physicians or philosophers, may be lawfully applied to the use of the faithful (118). A more destructive zeal may perhaps be attributed to the first successors of Mahomet; yet in this instance, the conflagration would have speedily expired in the deficiency of materials. I shall not recapitulate the disasters of the Alexandrian library, the involuntary flame that was kindled by Cæsar in his own defence (119), or the mischievous bigotry of the Christians who studied to destroy the monuments of idolatry (120). But if we gradually descend from the age of the Antonines to that of Theodosius, we shall learn from a chain of contemporary witnesses, that the royal palace and the temple of Serapis, no longer contained the four, or the seven, hundred thousand volumes, which had been assembled by the curiosity and magnificence of the Ptolemies (121). Perhaps the church and seat of the patriarchs might be enriched with a repository of books; but if the ponderous masts of Arian and Monophysite controversy were indeed consumed in the public baths (122), a philosopher may allow, with a

Livy himself had styled the Alexandrian library, elegantius regum curaeque egregios opus; a liberal encomium, for which he is justly criticized by the narrow sciolism of Seneca (De Tranquillitate Animi, c. 9.), whose wisdom, on this occasion, de-vests into nonense.

smile, that it was ultimately devoted to the benefit of mankind. I sincerely regret the more valuable libraries which have been involved in the ruin of the Roman empire; but when I seriously compute the lapse of ages, the waste of ignorance, and the calamities of war, our treasures, rather than our losses, are the object of my surprise. Many curious and interesting facts are buried in oblivion; the three great historians of Rome have been transmitted to our hands in a mutilated state; and we are deprived of many pleasing compositions of the lyric, iambic, and dramatic poetry of the Greeks. Yet we should gratefully remember, that the mischances of time and accident have spared the classic works to which the suffrage of antiquity (123) had adjudged the first place of genius and glory: the teachers of ancient knowledge, who are still extant, had perused and compared the writings of their predecessors (124); nor can it fairly be presumed that any important truth, any useful discovery in art or nature, has been snatched away from the curiosity of modern ages.

In the administration of Egypt (125), Amrou balanced the demands of justice and policy; the interest of the people of the law, who were defended by God; and of the people of the alliance, who were protected by man. In the recent tumult of conquest and deliverance, the

(124) Such as Galen, Pliny, Aristotle, &c. On this subject Wotton (Reflections on ancient and modern Learning, p 85—95.) argues, with solid sense, against the lively exotic fancies of Sir William Temple. The contempt of the Greeks for Barbarian science, would scarcely admit the Indian or Æthiopic books into the library of Alexandria; nor is it proved that philosophy has sustained any real loss from their exclusion.

tongue of the Copts and the sword of the Arabs were most adverse to the tranquillity of the province. To the former, Amrou declared, that faction and falsehood would be doubly chastised; by the punishment of the accusers, whom he should detest as his personal enemies, and by the promotion of their innocent brethren, whom their envy had laboured to injure and supplant. He excised the latter by the motives of religion and honour to sustain the dignity of their character, to endear themselves by a modest and temperate conduct to God and the caliph, to spare and protect a people who had trusted to their faith, and to content themselves with the legitimate and splendid rewards of their victory. In the management of the revenue he disapproved the simple but oppressive mode of a capitation, and preferred with reason a proportion of taxes, deducted on every branch from the clear profits of agriculture and commerce. A third part of the tribute was appropriated to the annual repairs of the dykes and canals, so essential to the public welfare. Under his administration the fertility of Egypt supplied the dearth of Arabia; and a string of camels, laden with corn and provisions, covered almost without an interval the long road from Memphis to Medina (126). But the genius of Amrou soon renewed the maritime communication which had been attempted or achieved by the Pharaohs, the Ptolemies, or the Caesars; and a canal, at least eighty miles in length, was opened from the Nile to the Red Sea. This inland navigation, which would have joined the Mediterranean and the Indian ocean, was soon discontinued as useless and dangerous; the throne was removed from Medina to Damas-

... and the Grecian fleets might have explored a passage to the holy cities of Arabia (127).

Of this new conquest, the caliph Omar had an imperfect knowledge from the voice of fame and the legends of the Koran. He requested that his lieutenant would place before his eyes the realm of Pharaoh and the Amalekites; and the answer of Amrou exhibits a lively and not unfaithful picture of that singular country (128).

"O commander of the faithful, Egypt is a compound of black earth and green plants, between a pulverised mountain and a red sand. The distance from Syene to the sea is a month's journey for a horseman. Along the valley descends a river, on which the blessing of the Most High repose both in the evening and morning, and which rises and falls with the revolutions of the sun and moon. When the annual dispensation of providence unlocks the springs and fountains that nourish the earth, the Nile rolls his swelling and foundering waters through the realm of Egypt: the fields are overspread by the salutary flood; and the villages communicate with each other in their painted barks. The retreat of the inundation deposits a fertilizing mud for the reception of the various seeds; the crowds of husbandmen who blacken the land may be compared to a swarm of industrious ants; and...

(127) On these obscure canals, the reader may try to satisfy himself from d'Avenne (Mem. sur l'Egypte, p. 108—110, 124, 132.), and a learned thesis maintained and printed at Strasburg in the year 1770 (Jungedoram marium flaviorumque melimian, p. 39—47, 68—70.). Even the supeine Turks have agitated the old project of joining the two seas (Memoires du Baron de Tou, tom. iv.).

(128) A small volume, des Merveilles, &c. de l'Egypte, composed in the xiiiith century by Murtadi of Cairo, and translated from an Arabic MS. of cardinal Masarin, was published by Pierre Vatier, Paris, 1666. The antiquities of Egypt are wild and legendary: but the writer defers credit and esteem for his account of the conquest and geography of his native country (See the correspondence of Amrou and Omar, p. 479—489).
OF THE ROMAN EMPIRE.

"their native indolence is quickened by the lash
of the task-master, and the promise of the
flowers and fruits of a plentiful encrease.
Their hope is seldom deceived; but the riches
which they extract from the wheat, the barley,
and rice, the legumes, the fruit-trees, and
the cattle, are unequally shared between those
who labour and those who possess. According
to the vicissitudes of the seasons, the face
of the country is adorned with a silver wave,
a verdant emerald, and the deep yellow of a
golden harvest (129)." Yet this beneficial or-
der is sometimes interrupted; and the long de-
lay and sudden swell of the river in the first year
of the conquest might afford some colour to an
edifying fable. It is said, that the annual sacri-
fice of a virgin (130) had been interdicted by
the piety of Omar; and that the Nile lay fallen
and inactive in his shallow bed, till the mandate
of the caliph was cast into the obedient stream,
which rose in a single night to the height of six-
teen cubits. The admiration of the Arabs for
their new conquest encouraged the licence of their
romantic spirit. We may read, in the gravest authors, that Egypt was crowded with

(129) In a twenty years' residence at Cairo, the consul Maillot had
contemplated that varying scene, the Nile (lettre ii, particularly p. 70,
75.); the fertility of the land (lettre ix.). From a college at Cambridge,
the poetic eye of Gray had seen the same objects with a keener glance:

What wonder in the sultry climes that spread,
Where Nile, redundant o'er his summer bed,
From his broad bosom life and verdure spring,
And broods o'er Egypt with his wat'ry wings;
If with advent'rous oar, and ready sail,
The dusky people drive before the gale;
Or on frail floats to neighbouring cities ride,
That rise and glitter o'er the ambient tide.

twenty thousand cities or villages (131): that, exclusive of the Greeks and Arabs, the Copts alone were found, on the assessment, six millions of tributary subjects (132), or twenty millions of either sex and of every age: that three hundred millions of gold or silver were annually paid to the treasury of the caliph (133). Our reason must be startled by these extravagant assertions; and they will become more palatable, if we assume the compass and measure the extent of habitable ground: a valley from the tropic to Memphis, seldom broader than twelve miles, and the triangle of the Delta, a flat surface of two thousand one hundred square leagues, compose a twelfth part of the magnitude of France (134). A more accurate research will justify a more reasonable estimate. The three hundred millions, created by the error of a scribe, are reduced to the decent revenue of four millions three hundred thousand pieces of gold, of which nine hundred thousand were

(131) Maillet, Description de l'Egypte, p. 22. He mentions this number as the common opinion; and adds, that the generality of these villages contain two or three thousand persons, and that many of them are more populous than our large cities.

(132) Eutych. Annal. tom. ii. p. 308. 311. The twenty millions are computed from the following date: one-twelfth of mankind above sixty, one-third below sixteen, the proportion of men to women as seventeen to sixteen; Recherches sur la Population de la France, p. 71, 72. The president Goguet (Origine des Arts, &c. tom. iii. p. 26, &c.) bespeaks twenty-seven millions on ancient Egypt, because the seventeen hundred companions of Sesostris were born on the same day.

They might allege the not less extravagant liberality of Appian in favour of the Ptolemies (in praefat.) of seventy-four myriads, 7,10,000 talents, an annual income of 185, or near 300, millions of pounds sterling, according as we reckon by the Egyptian or the Alexandrian talent (Bernard de Ponderibus Antiq. p. 186.).

confused by the pay of the soldiers (135). Two authentic lists, of the present and of the twelfth century, are circumscribed within the respectable number of two thousand seven hundred villages and towns (136). After a long residence at Cairo, a French consul has ventured to assign about four millions of Mahometans, Christians, and Jews, for the ample, though not incredible, scope of the population of Egypt (137).

IV. The conquest of Africa, from the Nile to the Atlantic ocean (138), was first attempted by the arms of the caliph Othman. The pious design was approved by the companions of Mahomet and the chiefs of the tribes; and twenty thousand Arabs marched from Medina, with the gifts and the blessing of the commander of the faithful. They

His own emendation, of 4,300,000 pieces, in the 16th century, maintains a probable medium between the 3,000,000 which the Arabs acquired by the conquest of Egypt (Idem, p. 168); and the 2,400,000 which the sultan of Constantinople levied in the last century (Pietro della Valle, tom. i. p. 352; Thevenot, part i. p. 324). Pauw (Recherches, tom. ii. p. 365–373) gradually raises the revenue of the Pharaohs, the Ptolemies, and the Caesars, from six to fifteen millions of German crowns.

(137) See Mailles: (Description de l’Egypte, p. 28.), who seems to argue with candour and judgment. I am much better satisfied with the observations than with the reading of the French consul. He was ignorant of Greek and Latin literature, and his fancy is too much delighted with the fictions of the Arabs. Their best knowledge is collected by Abulfeda (Descrip. Aegypt. Arab. et Lat. à Joh. David Michaelis, Gottingen, in 4to, 1776); and in two recent voyages into Egypt, we are amused by Savary, and instructed by Volney. I wish with the latter could travel over the globe.

(138) My conquest of Africa is drawn from two French interpreters of Arabic literature, Caronel (Hist. de l’Afrique et de l’Espagne sous la Domination des Arabes, tom. i. p. 8–35.) and Otter (Hist. de l’Académie des Inscriptions, tom. xii. p. 111–125 and 136.). They derive their principal information from Novairi, who composed, A. D. 1331, an Encyclopaedia in more than twenty volumes. The five general parts successively treat of 1. Physics, 2. Man, 3. Animals, 4. Plants, and 5. History; and the African affairs are discussed in the 6th chapter of the 8th section of this last part (Reiske, Prodig.-mata ad Hagii Chalifs Tabulae, p. 322–324.) Among the older historians who are quoted by Novairi we may distinguish the original narrative of a soldier who led the van of the Moslem.

were joined in the camp of Memphis by twenty thousand of their countrymen; and the conduct of the war was entrusted to Abdallah (139), the son of Said and the foster-brother of the caliph, who had lately supplanted the conqueror and lieutenant of Egypt. Yet the favour of the prince, and the merit of his favourite, could not obliterate the guilt of his apostacy. The early conversion of Abdallah, and his skilful pen, had recommended him to the important office of transcribing the sheets of the Koran: he betrayed his trust, corrupted the text, derided the errors which he had made, and fled to Mecca to escape the justice, and expose the ignorance, of the apostle. After the conquest of Mecca, he fell prostrate at the feet of Mahomet: his tears, and the entreaties of Othman, extorted a reluctant pardon; but the prophet declared that he had so long hesitated, to allow time for some zealous disciple to avenge his injury in the blood of the apostate. With apparent fidelity and effective merit, he served the religion which it was no longer his interest to desert: his birth and talents gave him an honourable rank among the Koreish; and, in a nation of cavalry, Abdallah was renowned as the boldest and most dextrous horseman of Arabia. At the head of forty thousand Moslems, he advanced from Egypt into the unknown countries of the West. The sands of Barca might be impervious to a Roman legion; but the Arabs were attended by their faithful camels; and the natives of the desert beheld without terror the familiar aspect of the soil and climate. After a painful march, they pitched their tents before the walls of Tripoli (140), a maritime

maritime city, in which the name, the wealth, and the inhabitants, of the province had gradually centered, and which now maintains the third rank among the states of Barbary. A reinforcement of Greeks was surprized and cut in pieces on the sea-shore; but the fortifications of Tripoli resisted the first assaults; and the Saracens were tempted by the approach of the praefect Gregory (141) to relinquish the labours of the siege for the perils and the hopes of a decisive action. If his standard was followed by one hundred and twenty thousand men, the regular bands of the empire must have been lost in the naked and disorderly crowd of Africans and Moors, who formed the strength, or rather the numbers, of his host. He rejected with indignation the option of the Koran or the tribute; and during several days, the two armies were fiercely engaged from the dawn of light to the hour of noon, when their fatigue and the excessive heat compelled them to seek shelter and refreshment in their respective camps. The daughter of Gregory, a maid of incomparable beauty and spirit, is said to have fought by his side: from her earliest youth she was trained to mount on horseback, to draw the bow, and to wield the scymetar; and the richness of her arms and apparel were conspicuous in the foremost ranks of the battle. Her hand, with an hundred thousand pieces of gold, was offered

The first of these writers was a Moor, a scholar, and a traveller, who composed or translated his African geography in a state of captivity at Rome, where he had assumed the name and religion of pope Leo X. In a similar captivity among the Moors, the Spaniard Marmol, a soldier of Charles V. compiled his Description of Africa, translated by d'Albancourt into French (Paris, 1667, 3 vols. in 4to). Marmol had read and seen, but he is deficient of the curious and extensive observation which abounds in the original work of Leo the African.

for the head of the Arabian general, and the youths of Africa were excited by the prospect of the glorious prize. At the pressing solicitation of his brethren, Abdallah withdrew his person from the field; but the Saracens were discouraged by the retreat of their leader, and the repetition of these equal or unsuccessful conflicts.

A noble Arabian, who afterwards became the adversary of Ali and the father of a caliph, had signalized his valour in Egypt, and Zobeir (142) was the first who planted a scaling-ladder against the walls of Babylon. In the African war he was detached from the standard of Abdallah. On the news of the battle, Zobeir, with twelve companions, cut his way through the camp of the Greeks, and pressed forwards, without tasting either food or repose, to partake of the dangers of his brethren. He cast his eyes round the field: "Where," said he, "is our general?" "In his tent." "Is the tent a station for the general of the Moslems?" Abdallah represented with a blush the importance of his own life, and the temptation that was held forth by the Roman praefect. "Retort," said Zobeir, "on the infidels their ungenerous attempt. Proclaim through the ranks, that the head of Gregory shall be repaid with his captive daughter, and the equal sum of one hundred thousand pieces of gold." To the courage and discretion of Zobeir the lieutenant of the caliph entrusted the execution of his own stratagem, which inclined the long disputed balance in favour of the Saracens. Supplying by activity and artifice the deficiency of numbers, a

part of their forces lay concealed in their tents, while the remainder prolonged an irregular skirmish with the enemy, till the sun was high in the heavens. On both sides they retired with fainting steps: their horses were unbridled, their armour was laid aside, and the hostile nations prepared, or seemed to prepare, for the refreshment of the evening, and the encounter of the ensuing day. On a sudden, the charge was founded; the Arabian camp poured forth a swarm of fresh and intrepid warriors; and the long line of the Greeks and Africans was surprised, assaulted, overturned, by new squadrons of the faithful, who, to the eye of fanaticism, might appear as a band of angels descending from the sky. The praefect himself was slain by the hand of Zobeir: his daughter, who fought revenge and death, was surrounded and made prisoner; and the fugitives involved in their disaster the town of Sufetula, to which they escaped from the fabres and lances of the Arabs. Sufetula was built one hundred and fifty miles to the south of Carthage: a gentle declivity is watered by a running stream, and shaded by a grove of juniper-trees; and, in the ruins of a triumphal arch, a portico, and three temples of the Corinthian order, curiosity may yet admire the magnificence of the Romans (143). After the fall of this opulent city, the provincials and Barbarians implored on all sides the mercy of the conqueror. His vanity or his zeal might be flattered by offers of tribute or professions of faith: but his losses, his fatigues, and the progress of an epidemical disease, prevented a solid establishment; and the Saracens, after a campaign of fifteen months, retreated to the confines of Egypt, with the captives and the wealth of their African expedition.

expedition. The caliph's fifth was granted to a favourite, on the nominal payment of five hundred thousand pieces of gold (144); but the state was doubly injured by this fallacious transaction, if each foot-soldier had shared one thousand, and each horseman three thousand, pieces, in the real division of the plunder. The author of the death of Gregory was expected to have claimed the most precious reward of the victory: from his silence it might be presumed that he had fallen in the battle, till the tears and exclamations of the præfect's daughter, at the sight of Zobeir revealed the valour and modesty of that gallant soldier. The unfortunate virgin was offered, and almost rejected as a slave, by her father's murderer, who coolly declared that his sword was consecrated to the service of religion; and that he laboured for a recompense far above the charms of mortal beauty, or the riches of this transitory life. A reward congenial to his temper, was the honourable commission of announcing to the caliph Othman the success of his arms. The companions, the chiefs, and the people, were assembled in the mosch of Medina, to hear the interesting narrative of Zobeir; and, as the orator forgot nothing except the merit of his own counsels and actions, the name of Abdallah was joined by the Arabians with the heroic names of Caled and Amrou (145).

The western conquests of the Saracens were suspended near twenty years, till their dispositions were composed by the establishment of the house

house of Ommiyah: and the caliph Moawiyah was invited by the cries of the Africans themselves. The successors of Heraclius had been informed of the tribute which they had been compelled to stipulate with the Arabs; but instead of being moved to pity and relieve their distress, they imposed, as an equivalent or a fine, a second tribute of a similar amount. The ears of the Byzantine ministers were shut against the complaints of their poverty and ruin: their despair was reduced to prefer the dominion of a single master; and the extortions of the patriarch of Carthage, who was invested with civil and military power, provoked the sectaries, and even the Catholics, of the Roman province to abjure the religion as well as the authority of their tyrants. The first lieutenant of Moawiyah acquired a just renown, subdued an important city, defeated an army of thirty thousand Greeks, swept away four-score thousand captives, and enriched with their spoils the bold adventurers of Syria and Egypt (146). But the title of conqueror of Africa is more justly due to his successor Akbah. He marched from Damascus at the head of ten thousand of the bravest Arabs; and the genuine force of the Moslems was enlarged by the doubtful aid and conversion of many thousand Barbarians. It would be difficult, nor is it necessary, to trace the accurate line of the progress of Akbah. The interior regions have been peopled by the Orientals with fictitious armies and imaginary citadels. In the warlike province of Zab or Numidia, four-score thousand of the natives might assemble in

(146) Theophanes (in Chronograph. p 293.) infers the vague rumors that might reach Constantinople, of the western conquests of the Arabs; and I learn from Paul Warnefrid, deacon of Aquileia (de Gellis Langobard. l. v. c. 13.), that at this time they sent a fleet from Alexandria into the Sicilian and African seas.
THE DECLINE AND FALL

arms; but the number of three hundred and sixty towns is incompatible with the ignorance or decay of husbandry (147); and a circumference of three leagues will not be justified by the ruins of Erbe or Lambesa, the ancient metropolis of that inland country. As we approach the sea-coast, the well-known cities of Bugia (148) and Tangier (149) define the more certain limits of the Saracen victories. A remnant of trade still adheres to the commodious harbour of Bugia, which in a more prosperous age, is said to have contained about twenty thousand houses; and the plenty of iron which is dug from the adjacent mountains might have supplied a braver people with the instruments of defence. The remote position and venerable antiquity of Tingi, or Tangier, have been decorated by the Greek and Arabian fables; but the figurative expressions of the latter, that the walls were constructed of brass, and that the roofs were covered with gold and silver, may be interpreted as the emblems of strength and opulence. The province of Mauritania Tingitana (150), which assumed the name of the capital, had been imperfectly discovered and settled by the Romans; the five colonies were confined to a narrow pale, and the more southern parts were seldom explored.

(147) See Novairi (apud Otter, p. 118.), Leo Africanus (fol. 81. verso), who reckons only cinque citta e infinite casale, Marmol (Description de l'Afrique, tom. iii. p. 33.), and Shaw (Travels, p. 57. 65–68.).

vius). He lived at the time of the final reduction of that country by the emperor Claudius; yet almost thirty years afterwards, Pliny (Hist. Nat. v. 1.) complains of his authors, too lazy to enquire, too proud to confess their ignorance of that wild and remote province.

except by the agents of luxury, who searched the forests for ivory and the citron wood (151), and the shores of the ocean for the purple shellfish. The fearless Akbah plunged into the heart of the country, traversed the wilderness in which his successors erected the splendid capitals of Fez and Morocco (152), and at length penetrated to the verge of the Atlantic and the great desert. The river Sus descends from the western sides of mount Atlas, fertilises, like the Nile, the adjacent soil, and falls into the sea at a moderate distance from the Canary, or Fortunate, islands. Its banks were inhabited by the haunter of the Moors, a race of savages, without laws, or discipline, or religion: they were astonished by the strange and irresistible terrors of the Oriental arms; and as they possessed neither gold nor silver, the richest spoil was the beauty of the female captives, some of whom were afterwards sold for a thousand pieces of gold. The career, though not the zeal, of Akbah was checked by the prospect of a boundless ocean. He spurred his horse into the waves, and raising his eyes to heaven, exclaimed with the tone of a fanatic: "Great God! if my course were not stopped by this sea, I would still go on, to the unknown kingdoms of the West, preaching the unity of

(151) The foolish fashion of this citron wood prevailed at Rome among the men, as much as the taste for pearls among the women. A round board or table, four or five feet in diameter, sold for the price of an estate (late-fundii taxatione), eight, ten, or twelve thousand pounds sterling (Plin. Hift. Natur. xiii. 29.). I conceive that I must not confound the tree citrus, with that of the fruit citrus. But I am not botanist enough to define the former (it is like the wild cypress) by the vulgar or Linnean name: nor will I decide whether the citrus be the orange or the lemon. Salmasius appears to exhaust the subject, but he too often involves himself in the web of his disorderly erudition (Plinian, Exercit. tom. ii. p. 666, &c.).

(152) Leo African. f. 16 verso. Marmol, tom. ii. p. 28. This province, the first scene of the exploits and great-ees of the cberifs, is often mentioned in the curious history of that dynasty at the end of the iii vol- lume of Marmol, Description de l'Afrique. The iii vol. of the Recherches Histo- riques sur les Maures (lately published at Paris) illustrates the history and geography of the kingdoms of Fez and Morocco.

"thy
"thy holy name, and putting to the sword the re-
bellious nations who worship any other gods
than thee." Yet this Mahometan Alexander, who
sighed for new worlds, was unable to pre-
serve his recent conquests. By the universal de-
fection of the Greeks and Africans, he was re-
called from the shores of the Atlantic, and the
surrounding multitudes left him only the resource
of an honourable death. The last scene was di-
gnified by an example of national virtue. An
ambitious chief, who had disputed the command
and failed in the attempt, was led about as a pri-
soner in the camp of the Arabian general. The
insurgents had trusted to his discontent and re-
venge; he disdained their offers and revealed
their designs. In the hour of danger, the grate-
ful Akbah unlocked his fetters, and advised him
to retire; he chose to die under the banner of
his rival. Embracing as friends and martyrs,
they unsheathed their scymetars, broke their
scabbards, and maintained an obstinate combat,
till they fell by each others side on the laft of
their slaughtered countrymen. The third gene-
ral or governor of Africa, Zuheir, avenged and
encountered the fate of his predecessor. He
vanquished the natives in many battles; he was
overthrown by a powerful army, which Con-
stantinople had sent to the relief of Carthage.
It had been the frequent practice of the
Moorish tribes to join the invaders, to share the
plunder, to profess the faith, and to revolt to
their savage state of independence and idolatry,
on the first retreat or misfortune of the Moflems.
The prudence of Akbah had proposed to found
an Arabian colony in the heart of Africa; a ci-

(153) Oster (p. 110.) has given the strong tone of fanaticism to this
exclamation, which Cardonne (p. 37.) has softened to a pious wish of

tadel that might curb the levity of the Barbarians, a place of refuge to secure, against the accidents of war, the wealth and the families of the Saracens. With this view, and under the modest title of the station of a caravan, he planted this colony in the fiftieth year of the Hegira. In its present decay, Cairoan (154) still holds the second rank in the kingdom of Tunis, from which it is distant about fifty miles to the south (155); its inland situation, twelve miles westward of the sea, has protected the city from the Greek and Sicilian fleets. When the wild beasts and serpents were extirpated, when the forest, or rather wilderness, was cleared, the vestiges of a Roman town were discovered in a sandy plain: the vegetable food of Cairoan is brought from afar: and the scarcity of springs constrains the inhabitants to collect in cisterns and reservoirs a precarious supply of rain-water. These obstacles were subdued by the industry of Akbah; he traced a circumference of three thousand and six hundred paces, which he encompassed with a brick wall; in the space of five years, the governor's palace was surrounded with a sufficient number of private habitations; a spacious mosh was supported by five hundred columns of granite, porphyry, and Numidian marble; and Cairoan became the seat of learning as well as of empire. But these were the glories of a later age; the new colony was shaken by the successive defeats of Akbah and Zuheir, and the western expeditions were

(154) The foundation of Cairoan is mentioned by Ockley (Hist. of the Saracens, vol. ii. p. 129, 130.; and the situation, mosh, &c. of the city, are described by Leo Africanus (fol. 75.), Marmol (tom. ii. p. 532.), and Shaw (p. 115.).

(155) A portentous, though frequent mistake, has been the confounding, from a slight similitude of name, the Cyrene of the Greeks, and the Cairoan of the Arabs, two cities which are separated by an interval of a thousand miles along the sea-coast. The great Thuanus has not escaped this fault, the less excusable as it is connected with a formal and elaborate description of Africa (Hist. Etruria, l. vii. c. 2. in tom. i. p. 240, edit. Buckley).
again interrupted by the civil discord of the Arabian monarchy. The son of the valiant Zobeir maintained a war of twelve years, a siege of seven months against the house of Ommiyah. Abdallah was said to unite the fierceness of the lion with the subtlety of the fox; but if he inherited the courage, he was devoid of the generosity, of his father (156).

The return of domestic peace allowed the caliph Abdalmalek to resume the conquest of Africa; the standard was delivered to Hassan governor of Egypt, and the revenue of that kingdom, with an army of forty thousand men, was consecrated to the important service. In the vicissitudes of war, the interior provinces had been alternately won and lost by the Saracens. But the sea-coast still remained in the hands of the Greeks; the predecessors of Hassan had respected the name and fortifications of Carthage; and the number of its defenders was recruited by the fugitives of Cebes and Tripoli. The arms of Hassan were bolder and more fortunate; he reduced and pillaged the metropolis of Africa; and the mention of scaling-ladders may justify the suspicion that he anticipated, by a sudden assault, the more tedious operations of a regular siege. But the joy of the conquerors was soon disturbed by the appearance of the Christian succours. The praefect and patrician John, a general of experience and renown, embarked at Constantinople the forces of the Eastern empire (157); they were

(156) Besides the Arabic chronicles of Abulfeda, Elmacin, and Abulpharagius, under the lxxxiiiid year of the Hegira, we may consult d’Herbelot (Bibl. Orient. p. 7.) and Ockley (Hist. of the Saracens, vol. ii. p. 336—349.). The latter has given the last and pathetic dialogue between Abdallah and his mother; but he has forgot a physical effect of her grief for his death, the return, at the age of ninety, and fatal consequences, of her menses.

were joined by the ships and soldiers of Sicily, and a powerful reinforcement of Goths (158) was obtained from the fears and religion of the Spanish monarch. The weight of the confederate navy broke the chain that guarded the entrance of the harbour; the Arabs retired to Carthage, or Tripoli; the Christians landed; the citizens hailed the ensign of the cross, and the winter was idly wasted in the dream of victory or deliverance. But Africa was irrecoverably lost: the zeal and resentment of the commander of the faithful (159) prepared in the ensuing spring a more numerous armament by sea and land; and the patrician in his turn was compelled to evacuate the post and fortifications of Carthage. A second battle was fought in the neighbourhood of Utica: the Greeks and Goths were again defeated; and their timely embarkation saved them from the sword of Hasdrubal, who had invested the garrison and insufficient rampart of their camp. Whatever yet remained of Carthage, was delivered to the flames, and the colony of Dido (160) and Caesar lay desolate.

(158) Nisicophor Constantipolitani Brevar. p. 28. The patriarch of Constantinople, with Theophanes (Chronograph. p. 908.), have slightly mentioned this last attempt for the relief of Africa. Pagi (Critica, tom. iii. p. 129.141.) has nicely ascertained the chronology by a strict comparison of the Arabic and Byzantine historians, who often disagree both in time and fact. See like-wise a note of Otter (p. 121.).

(159) Dovre b'arana ridotti i nobili Romani e i Goti; and afterwards, i Romani fuggirono, e i Goti lasciarono Cartagine (Leo African. fol. 72. recto). I know not from what Arabic writer the African derived his Goths, but the fact, though new, is so interesting and so probable, that I will accept it on the highest authority.

(159) This commander is styled by Nisicophorus Basilius Zaraetum, a vague though not improper definition of the caliph. Theophanes introduces the strange appellation of Protosynbolos, which his interpreter Goar explains by Visir Aseea. They may approach the truth, in assigning the active part to the minister, rather than the prince: but they forget that the Ommiades had only a kadi, or secretary, and that the office of vizir was not revived or instituted till the 132d year of the Hegira (d'Herbelot, p. 912.).

(160) According to Solinus (l. 27. p. 36. edit. Salmasi.), the Carthage of Dido stood either 677 or 737 years; a various reading, which proceeds from

foliate above two hundred years, till a part, perhaps a twentieth, of the old circumference was repeopled by the first of the Fatimite caliphs. In the beginning of the sixteenth century, the second capital of the Welt was represen ted by a mosch, a college without students, twenty-five or thirty shops, and the huts of five hundred peasants, who, in their abject poverty, displayed the arrogance of the Punic senators. Even that paltry village was swept away by the Spaniards whom Charles the Fifth had stationed in the fortresses of the Goletta. The ruins of Carthage have perished; and the place might be unknown if some broken arches of an aqueduct did not guide the footsteps of the inquisitive traveller (161).

The Greeks were expelled, but the Arabians were not yet masters of the country. In the interior provinces the Moors or Berbers (162), so feeble under the first Caesars, so formidable to the Byzantine princes, maintained a disorderly

from the difference of MSS or editions (Salmas. Plinian, Exercit. tom. i. p. 228.), The former of these accounts, which gives 823 years before Christ, is more consistent with the well-weighed testimony of Velleius Paterculus: but the latter is preferred by our chronologists (Marshall, Canon. Chron. p. 398.), as more agreeable to the Hebrew and Tyrian annals.

(162) The history of the word: Barbar may be classed under four periods: 1. In the time of Homer, when the Greeks and Asiatics might probably use a common idiom, the imitative sound of Bar-bar was applied to the ruder tribes, whose pronunciation was most harsh, whose grammar was most defective. Καπες Ῥαγισαφεςον (Iliad ii. 867. with the Oxford scholia, Clarke’s Annotation, and Henry Stephen’s Greek Thesaurus, tom. i. p. 730.). 2. From the time, at least, of Herodotus, it was extended to all the nations, who were strangers to the language and manners of the Greeks. 3. In the age of Plautus, the Romans submitted to the insult (Pompeius Festus, i. ii. p. 48. edit. Dacier), and freely gave themselves the name of Barbarians. They infeintly claimed an exemption for Italy, and her subject provinces; and at length removed the disgraceful appellation to the savage or hostile nations beyond the pale of the empire. 4. In every sense it was due to the Moors; the familiar word was borrowed from the Latin provincials by the Arabian conquerors, and has justly settled as a local denomination (Barbary) along the northern coast of Africa.

refist-
resistance to the religion and power of the successors of Mahomet. Under the standard of their queen Cahina the independent tribes acquired some degree of union and discipline; and as the Moors respected in their females the character of a prophetess, they attacked the invaders with an enthusiasm similar to their own. The veteran bands of Hassan were inadequate to the defence of Africa: the conquests of an age were lost in a single day; and the Arabian chief, overwhelmed by the torrent, retired to the confines of Egypt, and expected, five years, the promised succours of the caliph. After the retreat of the Saracens, the victorious prophetesses assembled the Moorish chiefs, and recommended a measure of strange and savage policy. "Our cities," said she, "and the gold and silver which they contain, perpetually attract the arms of the Arabs. These vile metals are not the objects of our ambition; we content ourselves with the simple productions of the earth. Let us destroy these cities; let us bury in their ruins those pernicious treasures; and when the avarice of our foes shall be destitute of temptation, perhaps they will cease to disturb the tranquillity of a warlike people." The proposal was accepted with unanimous applause. From Tangier to Tripoli the buildings, or at least the fortifications, were demolished, the fruit-trees were cut down, the means of subsistence were extirpated, a fertile and populous garden was changed into a desert, and the historians of a more recent period could discern the frequent traces of the prosperity and devastation of their ancestors. Such is the tale of the modern Arabians. Yet I strongly suspect that their ignorance of antiquity, the love of the marvellous, and the fashion of extolling the philosophy of Barbarians, has induced them to describe,
describe, as one voluntary act, the calamities of three hundred years since the first fury of the Donatists and Vandals. In the progress of the revolt Cahina had most probably contributed her share of destruction; and the alarm of universal ruin might terrify and alienate the cities that had reluctantly yielded to her unworthy yoke. They no longer hoped, perhaps they no longer wished, the return of their Byzantine sovereigns: their present servitude was not alleviated by the benefits of order and justice; and the most zealous Catholic must prefer the imperfect truths of the Koran to the blind and rude idolatry of the Moors. The general of the Saracens was again received as the favour of the province: the friends of civil society conspired against the savages of the land; and the royal prophetess was slain in the first battle which overturned the baseless fabric of her superstition and empire. The same spirit revived under the successor of Haslan: it was finally quelled by the activity of Mufa and his two sons; but the number of the rebels may be presumed from that of three hundred thousand captives; sixty thousand of whom, the caliph's fifth, were sold for the profit of the public treasury. Thirty thousand of the Barbarian youth were enlisted in the troops; and the pious labours of Mufa, to inculcate the knowledge and practice of the Koran, accustomed the Africans to obey the apostle of God and the commander of the faithful. In their climate and government, their diet and habitation, the wandering Moors resembled the Bedowens of the desert. With the religion, they were proud to adopt the language, name, and origin, of Arabs: the blood of the strangers and natives was insensibly mingled; and from the Euphrates to the Atlantic the same nation might seem to be diffused over the sandy plains.

plains of Asia and Africa. Yet I will not deny that fifty thousand tents of pure Arabians might be transported over the Nile, and scattered through the Libyan desert; and I am not ignorant that five of the Moorish tribes still retain their barbarous idiom, with the appellation and character of white Africans (163).

V. In the progress of conquest from the north and south, the Goths and the Saracens encountered each other on the confines of Europe and Africa. In the opinion of the latter, the difference of religion is a reasonable ground of enmity and warfare (164). As early as the time of Othman (165) their piratical squadrons had ravaged the coast of Andalusia (166); nor had they forgotten the relief of Carthage by the Gothic succours. In that age, as well as in the present, the kings of Spain were possessed of the fortress of Ceuta; one of the columns of Hercules, which is divided by a narrow strait from the opposite pillar or point of Europe. A small portion of Mauritania was still wanting to the African conquest; but Musa, in the pride of victory, was repulsed from the walls of Ceuta, by the vigilance and courage of count Julian,

(163) The first book of Leo Africanus, and the observations of Dr. Shaw (p. 220, 223, 227, 247, &c.), will throw some light on the roving tribes of Barbary, of Arabian or Moorish descent. But Shaw had seen these savages with distant terror; and Leo, a captive in the Vatican, appears to have lost more of his Arabic, than he could acquire of Greek or Roman, learning. Many of his gross mistakes might be detected in the first period of the Mahometan history.

(164) In a conference with a prince of the Greeks, Amrou observed that their religion was different; upon whichscore it was lawful for brothers to quarrel. Ockley's History of the Saracens, vol. i. p. 328.

(166) The name of Andalusia is applied by the Arabs not only to the modern province, but to the whole peninsula of Spain (Geograph. Nub. p. 151. d'Herbelot, Biblot. Orient. p. 114, 115.). The etymology has been most improbably deduced from Vandalusia, country of the Vandals (d'Anville Etats de l'Europe, p. 146, 147, &c.). But the Vandalusia of Cafriri, which signifies in Arabic the region of the evening, of the West, in a word, the Hesperia of the Greeks, is perfectly opposite (Biblot. Arabico-Hispana, tom. ii. p. 327, &c.).

the general of the Goths. From his disappointment and perplexity, Musa was relieved by an unexpected message of the Christian chief, who offered his place, his person, and his sword, to the successors of Mahomet, and solicited the disgraceful honour of introducing their arms into the heart of Spain (167). If we enquire into the cause of his treachery, the Spaniards will repeat the popular story of his daughter Cava (168); of a virgin who was seduced, or ravished, by her sovereign; of a father who sacrificed his religion and country to the thirst of revenge. The passions of princes have often been licentious and destructive; but this well-known tale, romantic in itself, is indifferently supported by external evidence; and the history of Spain will suggest some motives of interest and policy more congenial to the breast of a veteran statesman (169). After the decease or deposition of Witiza, his two sons were supplanting by the ambition of Roderic, a noble Goth, whose father, the duke or governor of a province, had fallen a victim to the preceding tyranny. The mo-

(167) The fall and resurrection of the Gothic monarchy are related by Marianus (tom. i. p. 238—260. l. vi. c. 19—26. l. vii. c. 1, 2.). That historian has infused into his noble work (Historia de Rebus Hispaniae, libri xxx. Hages Comitum 1733, in four volumes in folio, with the Continuation of Minians), the style and spirit of a Roman classic; and after the ninth century, his knowledge and judgment may be safely trusted. But the subject is not exempt from the prejudices of his order; he adopts and adorns, like his rival Buchanan, the most absurd of the national legends; he is too careless of criticism and chronology, and supplies, from a lively fancy, the chasms of historical evidence. These chasms are large and frequent; Roderic archbishop of Toledo, the father of the Spanish history, lived five hundred years after the conquest of the Arabs; and the more early accounts are comprised in some meagre lines of the blind chronicles of Isidore of Badajos (Pacentii), and of Alphonso III, king of Leon, which I have seen only in the Annales of Pagi.

(168) Le viol (saye Voltaire) est assez difficile à faire qu’à prouver. Des Evêques se feroient-ils ligues pour une fille? (Histoire Générale, c. xxvi.). His argument is not logically conclusive.

(169) In the story of Cava, Marianus (l. vi. c. 21. p. 241, 242.) seems to vie with the Lucretia of Livy. Like the ancients, he field m quotes; and the oldest testimony of Baronius (Annales Ecclesi. A. D. 713, No. 19.), that of Lucas Tudencia, a Galician deacon, of the xiiith century, only says, Cava quam pro concubinis utebatur.
narchy was still elective; but the sons of Witiza, educated on the steps of the throne, were impatient of a private station. Their resentment was the more dangerous, as it was varnished with the dissimulation of courts: their followers were excited by the remembrance of favours and the promise of a revolution; and their uncle Oppas, archbishop of Toledo and Seville, was the first person in the church, and the second in the state. It is probable that Julian was involved in the disgrace of the unsuccessful faction, that he had little to hope and much to fear from the new reign; and that the imprudent king could not forget or forgive the injuries which Roderic and his family had sustained. The merit and influence of the count rendered him an useful or formidable subject: his estates were ample, his followers bold and numerous, and it was too fatally shewn that, by his Andalusian and Mauritanian commands he held in his hand the keys of the Spanish monarchy. Too feeble, however, to meet his sovereign in arms, he sought the aid of a foreign power; and his rash invasion of the Moors and Arabs produced the calamities of eight hundred years. In his epistles, or in a personal interview, he revealed the wealth and nakedness of his country; the weakness of an unpopular prince; the degeneracy of an effeminate people. The Goths were no longer the victorious Barbarians, who had humbled the pride of Rome, despoiled the queen of nations, and penetrated from the Danube to the Atlantic ocean. Secluded from the world by the Pyrenean mountains, the successors of Alaric had flumdered in a long peace; the walls of the cities were moulderd into dust: the youth had abandoned the exercise of arms; and the presumption of their ancient renown would expose them in a field of battle to the first assault of the invaders,
THE DECLINE AND FALL

invaders. The ambitious Saracen was fired by the ease and importance of the attempt; but the execution was delayed till he had consulted the commander of the faithful; and his messenger returned with the permission of Walid to annex the unknown kingdoms of the West to the religion and throne of the caliphs. In his residence of Tangier, Musa, with secrecy and caution, continued his correspondence and hastened his preparations. But the remorse of the conspirators was soothed by the fallacious assurance that he should content himself with the glory and spoil, without aspiring to establish the Moslems beyond the sea that separates Africa from Europe (170).

Before Musa would trust an army of the faithful to the traitors and infidels of a foreign land, he made a less dangerous trial of their strength and veracity. One hundred Arabs, and four hundred Africans, passed over, in four vessels, from Tangier or Ceuta; the place of their descent on the opposite shore of the strait, is marked by the name of Tarif their chief; and the date of this memorable event (171) is fixed

(170) The Orientals, Elmacin, Abulpharagius, Abulfeda, pass over the conquest of Spain in silence, or with a single word. The text of Novairi, and the other Arabian writers, is represented, though with some foreign alloy, by M. de Cardonne (Hist. de l'Afrique, et de l'Espagne sous la Domination des Arabes, Paris 1765, 3 vol. in 12mo. tom. i. p. 55—114), and more concisely by M. de Gaigue (Hist. des Huns, tom. i. p. 347—350). The librarian of the Ecufial has not satisfied my hopes: yet he appears to have searched with diligence his broken materials; and the history of the conquest is illustrated by some valuable fragments of the genuine Rasis (who wrote at Corduba, A. H. 300), of Ben Hazil, &c. See Biblioth. Arabicae-Ebropana, tom. ii. p. 31. 185, 193, 185. 182. 352. 319—332. On this occasion, the industry of Pagis has been aided by the Arabic learning of his friend the Abbé de Longeurue, and to their joint labours I am deeply indebted.

(171) A mistake of Roderic of Toledo, in comparing the lunar years of the Hegire with the Julian years of the Æra, has determined Baronia, Mariana, and the crowd of Spanish historians, to place the first invasion in the year 713, and the battle of Xeres in November 714. This misconception of three years, has been detected by the more correct industry of modern chronologists, above all, of Pagis (Crisius, tom. iii. p. 169. 171—172), who have restored the genuine date of the revolution. At the present time, as Arabian scholars like Cardonnes, who adopt the ancient eras (tom. i. p. 75.), is inexcusably ignorant or careless.

to
to the month of Ramadan, of the ninety-first year of the Hegira, to the month of July, seven hundred and forty-eight years from the Spanish æra of Cæsar (172), seven hundred and ten after the birth of Chrift. From their first station, they marched eighteen miles through an hilly country to the castle and town of Julian (173); on which (it is still called Algezire) they bestowed the name of the Green Island, from a verdant cape that advances into the sea. Their hospitable entertainment, the Christians who joined their standard, their inroad into a fertile and unguarded province, the richness of their spoil, and the safety of their return, announced to their brethren the most favourable omens of victory. In the ensuing spring, five thousand veterans and volunteers were embarked under the command of Tarik, a dauntless and skilful soldier, who surpassed the expectation of his chief; and the necessary transports were provided by the industry of their too faithful ally. The Saracens landed (174) at the pillar or point of Europe; the corrupt and familiar appellation of Gibraltar (Gebed al Tarik) describes the mountain of Tarik; and the intrenchments of his camp were the first outline of those fortifications, which, in the hands of our countrymen, have refixed the art and power of the house of Bourbon. The adjacent go-

(172) The æra of Cæsar, which in Spain was in legal and popular use till the sixteenth century, begins thirty-eight years before the birth of Christ. I would refer the origin to the general peace by sea and land, which confirmed the power and partition of the Triumvirs (Dion Cassius, l. xlviii. p. 547. 553. Appian de Bell. Civ. l. v. p. 1034. edit. fol.), Spain was a province of Cæsar Octavian; and Tarragona, which raised the first temple to Augustus (Tacit. Annal. i. 78.), might borrow from the Orientals this mode of flattery.

(173) The road, the country, the old castle of count Julian, and the superlative beauty of the Spaniards of hidden treasures, &c. are described by Père Labat (Voyages en Espagne et en Italie, tom. i. p. 207—217) with his usual pietas.

(174) The Nubian geographer (p. 154.) explains the topography of the war; but it is highly incredible that the lieutenant of Muris should execute the desperate and useless measure of burning his ships.
THE DECLINE AND FALL

Vernors informed the court of Toledo of the descent and progress of the Arabs; and the defeat of his lieutenant Edoco, who had been commanded to seize and bind the presumptuous strangers, admonished Roderic of the magnitude of the danger. At the royal summons, the dukes and counts, the bishops and nobles of the Gothic monarchy, assembled at the head of their followers; and the title of king of the Romans, which is employed by an Arabic historian, may be excused by the close affinity of language, religion, and manners, between the nations of Spain. His army consisted of ninety or an hundred thousand men; a formidable power, if their fidelity and discipline had been adequate to their numbers. The troops of Tarik had been augmented to twelve thousand Saracens; but the Christian malecontents were attracted by the influence of Julian, and a crowd of Africans most greedily tasted the temporal blessings of the Koran. In the neighbourhood of Cadiz, the town of Xeres (175) has been illustrated by the encounter which determined the fate of the kingdom; the stream of the Guadalete, which falls into the bay, divided the two camps, and marked the advancing and retreating skirmishes of three successive and bloody days. On the fourth day, the two armies joined a more serious and decisive issue; but Alaric would have blushed at the sight of his unworthy successor, sustainting on his head a diadem of pearls, incumbered with a flowing robe of gold and silken embroidery, and reclining on a litter or car of ivory drawn by two white mules. Notwithstanding the valour of the Saracens, they fainted under the weight of mul-

(175) Xeres (the Roman colony of Afa Regia) is only two leagues from Cadiz. In the xvith century it was a granary of corn; and the wine of Xeres is familiar to the nations of Europe (Lud. titudes, and the plain of Xeres was overspread with sixteen thousand of their dead bodies. "My brethren," said Tarik to his surviving companions, "the enemy is before you, the sea is behind; whither would ye fly? Follow your general: I am resolved either to lose my life, or to trample on the prostrate king of the Romans." Besides the resource of despair, he confided in the secret correspondence and nocturnal interviews of count Julian, with the sons and the brother of Witiza. The two princes and the archbishop of Toledo, occupied the most important post: their well-timed defection broke the ranks of the Christians; each warrior was prompted by fear or suspicion to consult his personal safety; and the remains of the Gothic army were scattered or destroyed in the flight and pursuit of the three following days. Amidst the general disorder, Roderic started from his car, and mounted Orelia, the fleetest of his horses; but he escaped from a soldier's death to perish more ignobly in the waters of the Bœtis or Guadalquivir. His diadem, his robes, and his courser, were found on the bank; but as the body of the Gothic prince was lost in the waves, the pride and ignorance of the caliph must have been gratified with some meaner head, which was exposed in triumph before the palace of Damascus. "And such," continues a valiant historian of the Arabs, "is the fate of those kings who withdraw themselves from a field of battle (176)."

Some credulous Spaniards believe that king Roderic, or Rodrigo, escaped to an hermit's cell; and others, that he was cast alive into a tub full of terpents, from whence he exclaimed, with a lamentable voice, "they devour the part with which I have so grievously sinned" (Don Quixote, part. ii. l. iii. c. i.).

Count
THE DECLINE AND FALL

Count Julian had plunged so deep into guilt and infamy, that his only hope was in the ruin of his country. After the battle of Xeres he recommended the most effectual measures to the victorious Saracen. "The king of the Goths is slain; their princes have fled before you, the army is routed, the nation is astonished. Secure with sufficient detachments the cities of Baeotica; but in person, and without delay, march to the royal city of Toledo, and allow not the distracted Christians either time or tranquillity for the election of a new monarch." Tarik listened to his advice. A Roman captive and profelyte, who had been enfranchised by the caliph himself, assaulted Cordova with seven hundred horse; he swam the river, surpised the town, and drove the Christians into the great church, where they defended themselves above three months. Another detachment reduced the sea-coast of Baeotica, which in the last period of the Moorish power has comprised in a narrow space the populous kingdom of Grenada. The march of Tarik from the Baeotis to the Tagus (177), was directed through the Sierra Morena, that separates Andalusia and Catalonia, till he appeared in arms under the walls of Toledo (178). The most zealous of the Catholics had escaped with the relics of their saints; and if the gates were shut, it was only till the victor had subscribed a fair and reasonable capitulation. The voluntary exiles were

(177) The direct road from Corduba to Toledo was measured by Mr. Swinburne's mules in 7½ half hours; but a larger computation must be adopted for the slow and tedious marches of an army. The Arabs traversed the province of La Mancha, which the pen of Cervantes has transformed into classic ground to the readers of every nation.

(178) The antiquities of Toledo, Urbe Parva in the Panegyric wars, Urbe Regia in the vieth century, are briefly described by Nolius (Hispania, c. 59, p. 181—186). He borrows from Roderic the factum palatium of Moorish portraits; but modestly infestates, it was no more than a Roman amphitheatre.
allowed to depart with their effects; seven churches were appropriated to the Christian worship; the archbishop and his clergy were at liberty to exercise their functions, the monks to practice or neglect their penance; and the Goths and Romans were left in all civil and criminal cases to the subordinate jurisdiction of their own laws and magistrates. But if the justice of Tarik protected the Christians, his gratitude and policy rewarded the Jews, to whose secret or open aid he was indebted for his most important acquisitions. Persecuted by the kings and synods of Spain, who had often pressed the alternative of banishment or baptism, that outcast nation embraced the moment of revenge: the comparison of their past and present state was the pledge of their fidelity; and the alliance between the disciples of Moses and of Mahomet, was maintained till the final era of their common expulsion. From the royal seat of Toledo, the Arabian leader spread his conquests to the north, over the modern realms of Castille and Leon; but it is needless to enumerate the cities that yielded on his approach, or again to describe the table of emerald (179), transported from the East by the Romans, acquired by the Goths among the spoils of Rome, and presented by the Arabs to the throne of Damascus. Beyond the Asturian mountains,

(179) In the Historia Arabum (c. 9. p. 17. ad calceum Elmacin), Roderic of Toledo describes the emerald table, and infers the name of Medinat Almeyda in Arabic words and letters. He appears to be conversant with the Mahometan writers; but I cannot agree with M. de Guignes Histoire des Huns, tom. 1. p. 350., that he had read and transcribed Nouairi, because he was dead an hundred years before Nouairi composed his history. This mistake is founded on a still greater error. M. de Guignes confounds the historian Roderic Ximenes archbishop of Toledo in the xiiith century, with cardinal Ximenes who governed Spain in the beginning of the xvith, and was the subject, not the author, of historical compositions.
the maritime town of Gijon was the term (180) of the lieutenant of Mufa, who had performed, with the speed of a traveller, his victorious march, of seven hundred miles, from the rock of Gibraltar to the bay of Biscay. The failure of land compelled him to retreat; and he was recalled to Toledo, to excuse his presumption of subduing a kingdom in the absence of his general. Spain, which, in a more savage and disorderly state, had resisted, two hundred years, the arms of the Romans, was overrun in a few months by those of the Saracens; and such was the eagerness of submission and treaty, that the governor of Cordova is recorded as the only chief who fell, without conditions, a prisoner into their hands. The cause of the Goths had been irrevocably judged in the field of Xeres; and, in the national dismay, each part of the monarchy declined a contest with the antagonist who had vanquished the united strength of the whole (181). That strength had been wasted by two successive seasons of famine and pestilence; and the governors, who were impatient to surrender, might exaggerate the difficulty of collecting the provisions of a siege. To disarm the Christians, superstition likewise contributed her terrors: and the subtle Arab encouraged the report of dreams, omens, and prophecies, and of the portraits of the destined conquerors of Spain, that were discovered on breaking open an apartment of the royal palace. Yet a spark of the vital flame was still alive: some invinc-

(180) Tarik might have inscribed on the last rock, the boast of Regnard and his companions in their Lapland journey, “Hic tandem Repti-“ mus, nobis ubi defuit orbis.”

(181) Such was the argument of the traitor Oppes, and every chief to whom it was addressed did not answer with the spirit of Pelagius: Omnis Hispania dumum sub uno regimine Gothorum, omnis exercitus Hispavie in uno congregatus Ismaelitarum non valuit futurere impetum. Chron. Alphonfi Regis, apud Pagi, tom. iii. p. 177.
ble fugitives preferred a life of poverty and freedom in the Asturian vallies; the hardy mountaineers repulsed the slaves of the caliph; and the sword of Pelagius has been transformed into the sceptre of the Catholic kings (182).

On the intelligence of this rapid success, the applause of Muṣa degenerated into envy; and he began, not to complain, but to fear, that Tarik would leave him nothing to subdue. At the head of ten thousand Arabs and eight thousand Africans, he passed over in person from Mauritania to Spain: the first of his companions were the noblest of the Koreish; his eldest son was left in the command of Africa; the three younger brethren were of an age and spirit to second the boldest enterprizes of their father. At his landing in Algezire, he was respectfully entertained by count Julian, who stifled his inward remorse, and testified, both in words and actions, that the victory of the Arabs had not impaired his attachment to their cause. Some enemies yet remained for the sword of Muṣa. The tardy repentance of the Goths had compared their own numbers and those of the invaders; the cities from which the march of Tarik had declined, considered themselves as impregnable; and the bravest patriots defended the fortifications of Seville and Merida. They were successively besieged and reduced by the labour of Muṣa, who transported his camp from the Bœtis to the Anas, from the Guadalquivir to the Guadiana. When he beheld the works of Roman magnificence, the bridge, the aqueducts, the triumphal arches, and the theatre, of the ancient metropolis of Lusitania, "I should imagine," said he to his four companions,

that the human race must have united their
art and power in the foundation of this city:
"Happy is the man who shall become its
master!" He aspired to that happiness, but
the Emeritans sustained on this occasion the ho-
bour of their descent from the veteran legionaries
of Augustus (183). Dismaying the confinement
of their walls, they gave battle to the Arabs on
the plain; but an ambuscade rising from the
shelter of a quarry, or a ruin, chastised their
indiscretion and intercepted their return. The
wooden turrets of assault were rolled forwards
to the foot of the rampart; but the defence of
Merida was obstinate and long; and the castle of
the martyrs was a perpetual testimony of the losses
of the Moors. The constancy of the besieged
was at length subdued by famine and despair;
and the prudent victor disguised his impatience
under the names of clemency and esteem. The
alternative of exile or tribute was allowed; the
churches were divided between the two religi-
ous; and the wealth of those who had fallen in
the siege, or retired to Galicia, was confiscated
as the reward of the faithful. In the midway
between Merida and Toledo, the lieutenant of
Musa saluted the vicegerent of the caliph, and
conducted him to the palace of the Gothic kings.
Their first interview was cold and formal: a
rigid account was exacted of the treasures of
Spain; the character of Tarik was exposed to
suspicion and obloquy; and the hero was impris-
oned, reviled, and ignominiously scourged by
the hand, or the command, of Musa. Yet so
strict was the discipline, so pure the zeal, or

so tame the spirit, of the primitive Mocheans, that, after this public indignity, Tarik could serve and be trusted in the reduction of the Tarraconese province. A moch was erected at Saragossa, by the liberality of the Koreish; the port of Barcelona was opened to the vessels of Syria; and the Goths were pursued beyond the Pyrenean mountains into their Gallic province of Septimania or Languedoc (184). In the church of St. Mary at Carcassone, Musa found, but it is improbable that he left, seven equestrian statues of maffy silver; and from his term or column of Narbonne, he returned on his footsteps to the Gallican and Lusitanian shores of the ocean. During the absence of the father, his son Abdelaziz chastised the insurgers of Seville, and reduced, from Malaga to Valenția, the sea-coast of the Mediterranean: his original treaty with the discreet and valiant Theodemir (285) will represent the manners and policy of the times. "The conditions of peace agreed "and sworn between Abdelaziz, the son of Musa, "the son of Nafr, and Theodemir, prince of the "Goths. In the name of the most merciful "God, Abdelaziz makes peace on these conditions: "that Theodemir shall not be disturbed "in his principality; nor any injury be offered "to the life or property, the wives and children,

But I find no mention of this enterprise either in Roderic of Toledo, or the MSS. of the Escorial, and the invasion of the Saracens is postponed by a French chronicle till the 12th year after the conquest of Spain, A. D. 721 (Pagi Criticas, tom. iii. p. 177. 195. Historians of France, tom. iii.). I much question whether Musa ever passed the Pyrenees.

(185) Four hundred years after Theodemir, his territories of Murcia and Carthagena remain in the Nubian geographer Edrisi (p. 154. 161.) the name of Tadmir (d'Anville, Etats de l'Europe, p. 156. Pagni, tom. iii. p. 174.). In the present decay of Spanish agriculture, Mr. Swinhorne (Travels into Spain, p. 119.) surveyed with pleasure the delicious valleys from Murcia to Orihuela, four leagues and a half of the sweet corn, pulse, lucerna, oranges, &c.

fals shall be taxed at one moiety of the said
imposition. Given the fourth of Regeb, in
the year of the Hegira ninety-four, and sub-
scribed with the names of four Musulman
witmesses (186)." Theodemir and his subjects
were treated with uncommon lenity; but the
rate of tribute appears to have fluctuated from a
ten to a fifth, according to the submission or
obtainty of the Christians (187). In this revo-
lution, many partial calamities were inflicted
by the carnal or religious passions of the enthusi-
asts: some churches were profaned by the new
worship: some relics or images were confounded
with idols: the rebels were put to the sword;
and one town (an obscure place between Cor-
dova and Seville) was razed to its foundations.

(186) See the treaty in Arabic and Latin, in the Bibliotheca Arabico-
Hispana, tom. ii. p. 105, 106. It is signed the 4th of the month of Regeb,
A. H. 94 the 5th of April, A. D. 713, a date which seems to prolong
the resitance of Theodemir and the government of Mufa.

(187) From the history of Sandoval, p. 87. Fleury (Hist. Eccles.
tom. ix. p. 251.) has given the substance of another treaty concluded
A. E. C. 782. A. D. 734, between an Arabian chief, and the Goths
and Romans, of the territory of Conimbriga in Portugal. The tax of
the churches is fixed at twenty-five pounds of gold; of the monasteries, fifty;
of the cathedrals, one hundred: the Christians are judged by their count,
but in capital cases he must consult the alcaide. The church doors must
be shut, and they must respect the name of Mahomet. I have not the
original before me; it would confirm or destroy a dark suspicion, that
the piece has been forged to introduce the immunity of a neighbouring
convent.

Yet
Yet if we compare the invasion of Spain by the Goths, or its recovery by the kings of Castille and Aragon, we must applaud the moderation and discipline of the Arabian conquerors.

The exploits of Musa were performed in the evening of life; though he affected to disguise his age by colouring with a red powder the whiteness of his beard. But in the love of action and glory, his breast was still fired with the ardour of youth; and the possession of Spain was considered only as the first step to the monarchy of Europe. With a powerful armament by sea and land, he was preparing to repass the Pyrenees, to extinguish in Gaul and Italy the declining kingdoms of the Franks and Lombards, and to preach the unity of God on the altar of the Vatican. From thence, subduing the Barbarians of Germany, he proposed to follow the course of the Danube from its source to the Euxine sea, to overthrow the Greek or Roman empire of Constantinople, and returning from Europe to Asia, to unite his new acquisitions with Antioch and the provinces of Syria (188). But his vast enterprise, perhaps of easy execution, must have seemed extravagant to vulgar minds; and the visionary conqueror was soon reminded of his dependence and servitude. The friends of Tarik had effectually stated his services and wrongs at the court of Damascus, the proceedings of Musa were blamed, his intentions were suspected, and his delay in complying with the first invitation was chastised by an harsher and more peremptory summons. An intrepid messenger of the caliph entered his camp at Lugo

(188) This design, which is attested by several Arabian historians (Cardoneg., tom. i. p. 95, 96.), may be compared with that of Mithridates, to march from the Crimea to Rome; or with that of Caesar, to conquer the J Atlas and return home by the North: and all three are perhaps surpassed by the real and successful enterprise of Hannibal.
THE DECLINE AND FALL:
in GaUcicit, and in the presence of the Saracens and
Christians arrested the bridle of his horse. His
own loyalty, or that of his troops, inculcated
the duty of obedience: and his disgrace was al-
leviated by the recall of his rival, and the per-
mission of investing with his two governments
his two sons, Abdallah and Abdelaziz. His
long triumph from Cotta to Damascus displayed
the spoils of Africa and the treasures of Spain:
four hundred Gothic nobles, with gold coronets
and girdles, were distinguished in his train; and
the number of male and female captives, selected
for their birth or beauty, was computed at eight-
eight, or even at thirty, thousand persons. As
soon as he reached Tibenias in Palestine, he was
apprised of the sickness and danger of the caliph,
by a private message from Solomon, his brother
and presumptive heir; who wished to reserve
for his own reign, the spectacle of victory. Had
Walid recovered, the delay of Musa would have
been criminated: he pursued his march, and found
an enemy on the throne. In his trial before a
partial judge, against a popular antagonist, he
was convicted of vanity and falsehood; and a
fine of two hundred thousand pieces of gold,
either exhausted his poverty or proved his rapa
cenfives. The unworthy treatment of Tarik
was revenged by similar indignity; and the
veteran commander, after a public whipping,
loved a whole day in: the sun before the palace
gate, till he obtained a decent exile under the
plains name of a pilgrim age to Mecca. The re-
sentment of the caliph might have been satiated
with the ruin of Musa: but, his fear demanded
the extirpation of a potent and injured family.
A sentence of death was intimated with ferocity
and speed to the trusted servants of the throne
both in Africa and Spain: and the forms, if not
the substance, of justice were superfluously in this

bloody execution. In the march or palace of
Cardova, Abd-el-ziz was slain by the swords of
the conspirators; they accused their governor
of claiming the honours of royalty, and his
scandalous marriage with Egriana, the widow
of Boedecic, offended the prejudices both of the
Christians and Mooslims. By a refinement of
cruelty, the head of the son was presented to
the father with an insulting question, whether he
acknowledged the features of the rebel? "I
know his features," he exclaimed, with in-
vignation: "I assert his innocence; and I im-
prest the shame, a juster, fate, against the
authors of his death." The age and despair
of Mua raised him above the power of kings;
and he expired at Mecca of the anguish of a
broken heart. His rival was more favourably
rewarded; his services were forgiven; and Tarik
was permitted to mingle with the crowd of
knaves (189). I am ignorant whether court Jau-
lian was rewarded with the death which he de-
served indeed, though not from the hands of
the Saracens; but the tale of their ingratitude
to the sons of Witiza is disproved by the most
unquestionable evidence. The two royal youths
were reinstated in the private patrimony of their
father; but on the decease of Ebn the elder, his
daughter was unjustly despoiled of her portion
by the violence of her uncle Sigebut. The
Gothic maid pleaded her cause before the caliph
Hathem; and obtained the restitution of her in-
héritance, but she was given in marriage to a
noble Arabian, and their two sons, Isaac and

(189) I must regret our loss, so my ignorance, of two Afrikan works
of the viith century, a Life of Mua, and a Poem on the exploits
of Tarik. Of these authentic pieces, the former was composed by
a grandchild of Mua, who had escaped from the massacre of his kin-
dred; the latter, by the Visar of the first Abdalhaman caliph of Spain,

E e 2 Ibrahim,
Ibrahim, were received in Spain with the consideration that was due to their origin and riches.

A province is assimilated to the victorious state by the introduction of strangers and the imitative spirit of the natives; and Spain, which had been successively tainted with Punic, and Roman, and Gothic blood, imbibed, in a few generations, the name and manners of the Arabs. The first conquerors, and the twenty successive lieutenants of the caliphs, were attended by a numerous train of civil and military followers, who preferred a distant fortune to a narrow home: the private and public interest was promoted by the establishment of faithful colonies; and the cities of Spain were proud to commemorate the tribe or country of their Eastern progenitors. The victorious though motley bands of Tarik and Musa asserted, by the name of Spaniards, their original claim of conquest; yet they allowed their brethren of Egypt to share their establishments of Murcia and Líbion. The royal legion of Damascus was planted at Cordova; that of Emesa at Seville; that of Kinnisrin or Chalcis at Jaen; that of Palestine at Algezire and Medina Sidonia. The natives of Yemen and Peria were scattered round Toledo and the inland country; and the fertile seats of Grenada were bestowed on ten thousand horsemen of Syria and Irak, the children of the purest and most noble of the Arabian tribes (190). A spirit of emulation, sometimes beneficial,
beneficial, more frequently dangerous, was nourished by these hereditary factions. Ten years after the conquest, a map of the province was presented to the caliph: the seas, the rivers, and the harbours, the inhabitants and cities, the climate, the soil, and the mineral productions of the earth (191). In the space of two centuries, the gifts of nature were improved by the agriculture (192), the manufactures, and the commerce of an industrious people; and the effects of their diligence have been magnified by the idleness of their fancy. The first of the Ommiades who reigned in Spain solicited the support of the Christians; and, in his edict of peace and protection, he contents himself with a modest imposition of ten thousand ounces of gold, ten thousand pounds of silver, ten thousand horses, as many mules, one thousand cuirasses, with an equal number of helmets and lances (193). The most powerful of his successors derived from the same kingdom the annual tribute of twelve millions and forty-five thousand dinars or pieces of gold, about six

(192) A copious treatise of husbandry, by an Arabian of Seville, in the xiiith century, is in the Eccurial library, and Cæsari had some thoughts of translating it. He gives a list of the authors quoted, Arabs, as well as Greeks, Latins, &c.; but it is much if the Andalusian saw these strangers through the medium of his countryman Columella (Cæsari, Biblioth. Arabico-Hispana, tom. i. p. 323—338.).

(193) Biblioth. Arabico-Hispana, tom. ii. p. 104. Cæsari translates the original testimony of the historian Rafis, as it is alleged in the Arabic Biographia Hispanica, pars ix. But I am most exceedingly surprised at the address, Principibus cæterisque Christianis Hispanis suis Cæcellæ. The name of Cæcellæ was unknown in the viith century; the kingdom was not erected till the year 1022, an hundred years after the time of Rafis (Biblioth. tom. ii. p. 330.), and the appellation was always expressive, not of a tributary province, but of a line of cæsæ independent of the Moorish yoke (d'Anville, Etats de l'Europe, p. 166—170.). Had Cæsari been a critic, he would have cleared a difficulty, perhaps of his own making.

millions of sterling money (194); a sum which, in the tenth century, must probably surpassed the united revenues of the Christian monarchs. His royal seat of Cordova contained six hundred mosques, nine hundred baths, and two hundred thousand houses; he gave laws to eighty cities of the first, to three hundred of the second and third order; and the fertile banks of the Guadalquivir were adorned with twelve thousand villages and hamlets. The Arabs might exaggerate the truth, but they created and they describe the most prosperous era of the riches, the cultivation, and the populousness of Spain (195).

The wars of the Moors were sanctified by the prophet; but, among the various precepts and examples of his life, the caliphs selected the lessons of toleration that might tend to diminish the resistance of the unbelievers. Arabia was the temple and patrimony of the God of Mahomet; but he beheld with less jealousy and affecion the nations of the earth. The polytheists and idolaters who were ignorant of his name, might be lawfully extirpated by his votaries (196); but a wise policy supplied the obligation of justice; and after some acts of into-

(195) I am happy enough to possess a splendid and interesting work, which has only been distributed in presents by the court of Madrid: Bibliothea Arabica-Hispana Eorumque operis et litterarum. Bibliotheca Arabica, Mexicana, etc. Madrid, in folio, tomus prior, 1760. tomus posterior, 1770. The execution of this work does honour to the Spanish press; the MSS. to the number of six hundred, are judiciously collated by the editor, and his copious extracts throw some light on the Mahometan literature and history of Spain. These reliefs are now scarce, but the text has been fortunately delayed, till in the year 1572 a fire consumed the greatest part of the Ecurial Library, rich in the spots of Granada and Morocco.

larant seal; the Mahometan conquerors of Hindoostan have spared the pagods of that devout and populous country. The disciples of Abraham, of Moses, and of Jesus, were solemnly invited to accept the more perfect revelation of Mahomet; but if they preferred the payment of a moderate tribute, they were entitled to the freedom of conscience and religious worship (197). In a field of battle, the forfeit lives of the prisoners were redeemed by the profession of Islam; the females were bound to embrace the religion of their masters, and a race of sincere proselytes was gradually multiplied by the education of the infant captives. But the millions of African and Asiatic converts, who swelled the native band of the faithful Arabs, must have been allured, rather than constrained, to declare their belief in one God and the apostle of God. By the repetition of a sentence and the loss of a foreskin, the subject or the slave, the captive or the criminal, arose in a moment the free and equal companion of the victorious Moslems. Every sin was expiated, every engagement was dissolved; the vow of celibacy was superseded by the indulgence of nature; the active spirits who slept in the cloister were awakened by the trumpet of the Saracens; and in the convulsion of the world, every member of a new society ascended to the natural level of his capacity and courage. The minds of the multitude were tempted by the invisible as well as temporal blessings of the Arabian prophet; and charity will hope that many of his proselytes entertained a serious conviction of the

truth and sanctity of his revelation. In the eyes of an inquisitive polytheist, it must appear worthy of the human and the divine nature. More pure than the system of Zoroaster, more liberal than the law of Moses, the religion of Mahomet might seem less inconsistent with reason, than the creed of mystery and superstition, which, in the seventh century, disgraced the simplicity of the gospel.

In the extensive provinces of Persia and Africa, the national religion has been eradicated by the Mahometan faith. The ambiguous theology of the Magi stood alone among the sects of the East: but the profane writings of Zoroaster (198) might, under the reverend name of Abraham, be dexterously connected with the chain of divine revelation. Their evil principle, the daemon Ahriman, might be represented as the rival or as the creature of the God of light. The temples of Persia were devoid of images; but the worship of the sun and of fire might be stigmatized as a gross and criminal idolatry (199). The milder sentiment was consecrated by the practice of (200) Mahomet and the prudence of the caliphs; the Magians or Ghebers were ranked

(198) The Zend or Pashend, the bible of the Ghebers, is reckoned by themselves, or at least by the Mahometans, among the ten books which Abraham received from heaven; and their religion is honourably styled the religion of Abraham (d'Herbelot, Biblot. Orient. p. 701, &c.); Hyde, de Religione veterum Persarum, c. iii. p. 27, 28, &c.). I much fear that we do not possess any pure and free description of the system of Zoroaster. Dr. Prideaux (Connection, vol. i. p. 300, &c.) adopts the opinion, that he had been the slave and sinner of some Jewish prophet in the captivity of Babylon. Perhaps the Persians, who have been the masters of the Jews, would affect the honour, a poor honour, of being their masters.

(199) The Arabian Nights, a faithful and moving picture of the Oriental world, represent in the most odious colours the Magians, or worshippers of fire, to whom they attribute the annual sacrifice of a Muslim. The religion of Zoroaster has not the least affinity with that of the Hindoos, yet they are often confounded by the Mahometans; and the sword of Timour was sharpened by this mislake (Hist. de Timour Bce, par Cherefeddin Ali Yezdi, l. v.).

with the Jews and Christians among the people of the written law (201); and as late as the third century of the Hegira, the city of Herat will afford a lively contrast of private zeal and public toleration (202). Under the payment of an annual tribute, the Mahometan law secured to the Ghebers of Herat, their civil and religious liberties; but the recent and humble mosque was overshadowed by the antique splendour of the adjoining temple of fire. A fanatic Imam deplored, in his sermons, the scandalous neighbourhood; and accused the weakness or indifference of the faithful. Excited by his voice, the people assembled in tumult; the two houses of prayer were consumed by the flames, but the vacant ground was immediately occupied by the foundations of a new mosque. The injured Magi appealed to the sovereign of Chorasan; he promised justice and relief; when, behold! four thousand citizens of Herat, of a grave character and mature age, unanimously swore that the idolatrous fane had never existed; the inquisition was silenced, and their conscience was satisfied (says the historian Mirchond) (203), with this holy and meritorious

(201) Ha tres saeae, Judaei, Christiani, et qui inter Persas Magorum instituti additi sunt, xar 162, populii libri dicuntur (Reland, Differtat. tom. iii. p. 15.). The caliph Al Mamun confirms this honourable distinction in favour of the three seasts, with the vague and equivocal-religion of the Sabaeans, under which the ancient polytheists of Chars were allowed to shelter their idolatrous worship (Hottinger, Hist. Orient. p. 167, 168).

(202) This singular story is related by d'Herbelot (Biblioth. Orient. p. 448, 449.) on the faith of Khondemir, and by Mirchond himself (Hist. priorum Regum Persarum, &c. p. 9, to. not. p. 88, 89.).

(203) Mirchond (Mohammed Emir Khoondah Shah), a native of Herat, composed in the Persian language a general history of the East, from the creation to the year of the Hegira 875 (A. D. 1471). In the year 904 (A. D. 1498) the historian obtained the command of a princely library, and his applauded work, in seven or twelve parts, was abbreviated in three volumes by his son Khondemir, A. H. 927. A. D. 1520. The two writers most accurately distinguished by Petit de la Croix (Hist. de Genghizcan, p. 537, 538, 544, 545.), are loosely confounded by d'Herbelot (p. 358, 410, 994, 995.); but his numerous extracts, under the improper name of Khondemir, belong to the father rather than the son.
rious perjury (204). But the greatest part of the temples of Persia were ruined by the insensible and general detestation of their votaries. It was insensible, since it is not accompanied with any memorial of time or place, of persecution or resistance. It was general, since the whole realm, from Shiraz to Samarcand, imbibed the faith of the Koran; and the preservation of the native tongue reveals the descent of the Mahometans of Persia (205). In the mountains and deserts, an obstinate race of unbelievers adhered to the superstition of their fathers; and a faint tradition of the Magian theology is kept alive in the province of Kirman; along the banks of the Indus, among the exiles of Surat, and in the colony which, in the last century, was planted by Sháh Abbas at the gates of Isfahan. The chief pontiff has retired to mount Elbourz, eighteen leagues from the city of Yezd: the perpetual fire (if it continue to burn) is inaccessible to the profane; but his residence is the school, the oracle, and the pilgrimage, of the Ghebers, whose hard and uniform features attest the unmingled purity of their blood. Under the jurisdiction of their elders, eighty thousand families maintain an innocent and industrious life; their subsistence is derived from some curious manu-

The historian of Genghizcan refers to a MS. of Mitchond, which he received from the hands of his friend d'Herbelot himself. A curious fragment (the Taherian and S Moffarian Dynasties) has been lately published in Persian and Latin (Vienna, 1782, in 4to, cum notis Bernard. de Jonisch) and the editor allows us to hope for the continuation of Mitchond.

(204) Quo testimonio boni fe qui quisam praefilet eoptemontur. Yet Mitchond must have condemned their zeal, since he approved the legal toleration of the Magi, cui (the fire temple) peracto singulis annis onerat, uti sacra Mohammedis lege caputum, ab omnibus melterifas et oneribus in se vero efficit.

(205) The last Magian of name and power appears to be Mardavij the Dilemites, who, in the beginning of the 7th century, reigned in the northern provinces of Persia, near the Caspian Sea (d'Herbelot, Biblioth. Orient. p. 355.). But his soldiers and succours, the Dilmunites, either proscribed or embraced the Mahometan faith; and under their dynasty (A. factions and mechanic trades; and they cultivate the earth with the fervour of a religious duty. Their ignorance withstood the despotism of Shaw Abbas, who demanded with threats and tortures the prophetic books of Zoroaster; and this obscure remnant of the Magians is spared by the moderation or contempt of their present sovereigns (206).

The northern coast of Africa is the only land in which the light of the Gospel, after a long and perfect establishment, has been totally extinguished. The arts, which had been taught by Carthage and Rome, were involved in a cloud of ignorance; the doctrine of Cyprian and Augustin was no longer studied. Five hundred episcopal churches were overturned by the hostile fury of the Donatists, the Vandals, and the Moors. The zeal and numbers of the clergy declined; and the people, without discipline, or knowledge, or hope, submissively sunk under the yoke of the Arabian prophet. Within fifty years after the expulsion of the Greeks, a lieutenant of Africa informed the caliph that the tribute of the infidels was abolished by their conversion (207); and, though he sought to disguise his fraud and rebellion, his specious pretense was drawn from the rapid and extensive progress of the Mahometan faith. In the next age, an extraordinary mission of five bishops was detached from Alexandria to Cairo. They were ordained by the Jacobite patriarch to cherish and revive the dying embers of Christ.

(206) The present state of the Ghazis in Persia, is taken from Sir John Chardin, who indeed the most learned, but the most judicious and inquisitive, of our modern travellers (Voyages en Perse, tom. ii. p. 104. 179—187. in 4°). His brethren, Pietro della Valle, Olearius, Thevenot, Tavernier, &c. whom I have fruitlessly searched, had neither eyes nor attention for this interesting people.

(207) The letter of Abümarshman, governor or tyrant of Africa, to the caliph Abou Abbas, the first of the Abbassides, is dated A. H. 132 (Cardonne, Hist. de l'Afrique et de l'Espagne, tom. i. p. 168.).

Christianity
Tianity (208): but the interposition of a foreign prelate, a stranger to the Latins, an enemy to the Catholics, supposes the decay and dissolution of the African hierarchy. It was no longer the time when the successor of St. Cyprian, at the head of a numerous synod, could maintain an equal contest with the ambition of the Roman pontiff. In the eleventh century, the unfortunate priest who was seated on the ruins of Carthage, implored the alms and the protection of the Vatican; and he bitterly complains that his naked body had been scourged by the Saracens, and that his authority was disputed by the four suffragans, the tottering pillars of his throne. Two epistles of Gregory the seventh (209) are destined to soothe the distress of the Catholics and the pride of a Moorish prince. The pope assures the sultan that they both worship the same God, and may hope to meet in the bosom of Abraham; but the complaint, that three bishops could no longer be found to consecrate a brother, announces the speedy and inevitable ruin of the episcopal order. The Christians of Africa and Spain had long since submitted to the practice of circumcision and the legal abstinence from wine and pork; and the name of Mozara-

bes (210) (adoptive Arabs) was applied to their

The Mozarabic liturgy, the ancient ritual of the church of Toledo, has been attacked by the popes, and exposed to the doubtful trials of the sword and of fire (Marin. Hist. Hispans tom. i. l. ix. c. 18. p. 378). It was, or rather it is, in the Latin tongue; yet in the 14th century it was found necessary (A. Æ. C. 1687, A. D. 1039.) to transcribe an Arabic version of the canons of the councils of Spain (Bibliot. Arab. Hisp. tom. i. p. 547.), for the use of the bishops and clergy in the Moorish kingdoms.

civil or religious conformity (211). About the middle of the twelfth century the worship of Christ and the succession of pastors were abolished along the coast of Barbary, and in the kingdoms of Cordova and Seville, of Valencia and Grenada (212). The throne of the Almohades, or Unitarians, was founded on the blindest fanaticism, and their extraordinary rigour might be provoked or justified by the recent victories and intolerant zeal of the princes of Sicily and Catilile, of Arragon and Portugal. The faith of the Mozarabes was occasionally revived by the papal missionaries; and, on the landing of Charles the fifth, some families of Latin Christians were encouraged to rear their heads at Tunis and Algiers. But the seed of the gospel was quickly eradicated, and the long province from Tripoli to the Atlantic has lost all memory of the language and religion of Rome (213).

After the revolution of eleven centuries, the Jews and Christians of the Turkish empire enjoy the liberty of conscience which was granted by the Arabian caliphs. During the first age of the conquest, they suspected the loyalty of the Catholics, whose name of Melchites betrayed their secret attachment to the Greek emperor,

(211) About the middle of the 12th century, the clergy of Cordova was reproached with this criminal compliance, by the intrepid envoy of the emperor Otho I. (Vit. Johann. Gorz, in Secul. Bened. a. V. No 115, apud Fleury, Hist. Eccl. tom. xii. p. 91.)

(212) Pagi, Crit. tom. iv. A. D. 1149, No 8, 9. He justly observes, that when Seville, &c. were retaken by Ferdinand of Castile, 130 Christians, except captives, were found in the place; and that the Mozarab churches of Africa and Spain, described by James A. Vitriaco, A. D. 1318 (Hist. Hierol. c. 80, p. 1935 in Gell. Dei per Francios), are copied from some older book. I shall add, that the date of the Hegira 677 (A. D. 1278) must apply to the copy, not the composition, of a treatise of jurisprudence, which states the civil rights of the Christians of Cordova (Biblioth. Arab. Hisp. tom. i. p. 421); and that the Jews were the only dissenters whom Abul-Waled, king of Grenada (A. D. 1313), would either discomfit or tolerate. (tom. ii. p. 288.)

while the Nestorians and Jacobites, his inve- 
terate enemies, approved themselves the sincer- 
e and voluntary friends of the Mahometan govern- 
ment (214). Yet this partial jealousy was healed 
by time and submission: the churches of Egypt 
were shared with the Catholics (215); and all 
the Oriental sects were included in the common 
benefits of toleration. The rank, the immuni-
ties, the domestic jurisdiction, of the patriarchs, 
the bishops, and the clergy, were protected by 
the civil magistrate: the learning of individuals 
recommended them to the employments of se-
cretaries and physicians: they were enriched by 
the lucrative collection of the revenue; and 
their merit was sometimes raised to the com-
mand of cities and provinces. A caliph of the 
house of Abbas was heard to declare that the 
Christians were most worthy of trust in the ad-
mistration of Persia: "The Moslems," said 
he, "will abuse their present fortune; the Ma-
gians regret their fallen greatness; and the 
Jews are impatient for their approaching deli-
verance (216)." But the flames of despotism 
are exposed to the alternatives of favour and 
disgrace. The captive churches of the Balk 
have been afflicted in every age by the avarice 
or bigotry of their rulers; and the ordinary 
and legal restraints must be offensive to the pride

or the zeal of the Christians (217). About two hundred years after Mahomet, they were separated from their fellow-subjects by a turban or girdle of a less honourable colour; instead of horses or mules, they were condemned to ride on asses, in the attitude of women. Their public and private buildings were measured by a diminutive standard; in the streets or the baths, it is their duty to give way or bow down before the meanest of the people; and their testimony is rejected, if it may tend to the prejudice of a true believer. The pomp of processions, the sound of bells or of psalmody, is interdicted in their worship; a decent reverence for the national faith is imposed on their sermons and conversations; and the sacrilegious attempt to enter a mosque, or to seduce a Muslim, will not be suffered to escape with impunity. In a time however of tranquillity and justice the Christians have never been compelled to renounce the Gospel or to embrace the Koran; but the punishment of death is inflicted on the apostates who have professed and defected the law of Mahomet. The martyrs of Cordova provoked the sentence of the caliph, by the public confession of their insubstantial, or their pernicious invocations against the person and religion of the prophet (218).
THE DECLINE AND FALL

At the end of the first century of the Hegira, the caliphs were the most potent and absolute monarchs of the globe. Their prerogative was not circumscribed, either in right or in fact, by the power of the nobles, the freedom of the commons, the privileges of the church, the votes of a senate, or the memory of a free constitution. The authority of the companions of Mahomet expired with their lives; and the chiefs or emirs of the Arabian tribes left behind, in the desert, the spirit of equality and independence. The regal and sacerdotal characters were united in the successors of Mahomet; and if the Koran was the rule of their actions, they were the supreme judges and interpreters of that divine book. They reigned by the right of conquest over the nations of the East, to whom the name of liberty was unknown, and who were accustomed to applaud in their tyrants the acts of violence and severity that were exercised at their own expense. Under the last of the Omrids, the Arabian empire extended two hundred days' journey from east to west, from the confines of Tartary and India, to the shores of the Atlantic ocean. And if we retrench the sleeve of the robe, as it is styled by their writers, the long and narrow province of Africa, the solid and compact dominion from Fargana to Aden, from Tarfus to Surat, will spread on every side to the measure of four or five months of the march of a caravan (219). We should vainly seek the indissoluble union and easy obedience that pervaded the government of Augustus and the Antonines; but the progress of the Mahometan

(219) See the articles Elamitab (as we say Chirilendom), in the Bibliothèque Orientale (p. 415.). This chart of the Mahometan world is faulted by the author, Ebn. Alwardi, to the year of the Hegira 385 (A. D. 995). Since that time, the Moslems in Spain have been overbalanced by the conquests in India, Tartary, and the European Turkey.
religion diffused over this ample space a general resemblance of manners and opinions. The language and laws of the Koran were studied with equal devotion at Samarcand and Seville: the Moor and the Indian embraced as countrymen and brothers in the pilgrimage of Mecca; and the Arabian language was adopted as the popular idiom in all the provinces to the westward of the Tigris (220).

(220) The Arabic of the Koran is taught as a dead language in the college of Mecca. By the Danish traveller, this ancient idiom is compared to the Latin; the vulgar tongue of Hejaz and Yemen to the Italian; and the Arabian dialects of Syria, Egypt, Africa, &c. to the Provençal, Spanish, and Portuguese (Niebuhr, Description de l'Arabie, p. 74, &c.).
